

Signalink, Inc.

1208 Slaughter Road

Madison, AL 35758

Signalink, Inc. of Madison, Alabama is a federal government subcontractor that performs engineering design and assists with integration of systems such as aircraft multiband radios and uncrewed aerial system antennas. Signalink is currently seeking to expand its testing capabilities to include an FCC program experimental license for on-site testing of its program systems, such as aircraft radios and antennas.

The radio frequency experimentation will be conducted in the defined geographic area noted in the licensing application, which is under Signalink's control. The area is staffed and maintained by Signalink's staff.

Signalink is fully capable to monitor and effectively manage the test projects. The Signalink engineering and technical staff manages the testing process directly. Signalink has several persons familiar with the technologies and has expertise in radio spectrum management. These include but are not limited to an actively licensed FCC operator, former military helicopter crew chiefs, technicians, and engineering test personnel. The Signalink team also has successfully completed testing in this technology in the past.

The authorization is not to be used for the sole purpose of developing equipment for exportation to be employed under the jurisdiction of a foreign government.
