

APPLICATION FOR EXPERIMENTAL LICENSE MODIFICATION

FalconION, Inc. (“FalconION”) seeks Commission approval to modify its experimental station license WM2XHW. Specifically, FalconION seeks authorization to add a new emission designator (40K0G1D) to its authorized frequencies.

As indicated in its initial license application, FalconION is using WM2XHW to test experimental transmitters and to develop new radio techniques for reliably delivering short digital messages over long distances using frequencies in the High Frequency (“HF”) band. The requested license modification will provide FalconION with additional options for conducting these operations. FalconION requests modified license authority in order to perform additional tests and to refine its operating technique. For these reasons, FaconION respectfully submits that approval of this modification application will serve the public interest, convenience and necessity.

STOP BUZZER INFORMATION

For purposes of the proposed, modified operations, the stop buzzer contact will be:
