Re: *ELS File No. 0519-EX-ST-2024 (call sign WW9XPI)*

Dear Ms. Dortch:

SpaceX launched another batch of second-generation satellites with direct-to-cellular payloads on November 23, 2024. As required under Condition 2 of the above-mentioned experimental license, SpaceX reports that all spacecraft are operating nominally and it expects to commence transmissions using its direct-to-cellular payloads over the next 7-10 days. Over the coming months, SpaceX will continue to test these and future direct-to-cellular satellites pursuant to the terms of its launch and experimental authorizations.

Should you have any questions, please direct them to me.

Sincerely,

/s/ Cecilia Tenge-Rietberg

Cecilia Tenge-Rietberg
