## Hangar Networked Re-Radiating Kit Technical Product Data

### Features

- High Gain Amplified Roof Antenna
  - Provides 40 dB gain via internal LNA.
- Re-Radiating Amplifier with External Power Supply
  - 30 dB gain typical.
- Optional Kit Mounting Hardware
  - Roof Antenna Mount & Re-Radiating Amplifier Mount available.
- Optional Re-Radiating Variable Gain Amplifier
  - Adjustable gain from 1 dB to 30 dB.

Please note that the pictured L1RAMB (active antenna mount), cable and WRUMT (passive antenna mount) are not included with the L1/L2GHNRRKIT and are sold separately.

### Description

The GPS Hangar Networked Re-Radiating Kit (L1/L2GHNRRKIT) comes with the components to build a re-radiating system that can re-radiate all the major GNSS frequencies indoors. The GNSS signals received by the roof antenna are amplified and re-radiated to GPS receivers indoors, eliminating the need to attach receivers directly to the roof antenna. The L1/L2GHNRRKIT consists of an active roof antenna, a passive re-radiating antenna, and a re-radiating amplifier (L1/L2GHNRRKAMP) with an external power supply that powers the entire system. A cable from the roof antenna to the re-radiating kit is required and can be purchased separately. With up to 150ft of LMR400 low loss coax cable connecting the roof antenna to the re-radiating amplifier, the L1/L2GHNRRKIT will transmit GNSS signals indoors to receivers up to 100 feet away.

In the standard Networked (Externally Powered) configuration, the re-radiating amplifier output (J1) is DC Blocked. Custom gain, DC power, and connector configurations are available upon request.

### Use Cases

- To re-radiate signal indoors for GPS product testing.
- To maintain GPS signal for emergency vehicles parked indoors.
- To facilitate faster GPS signal acquisition for aircraft inside a hangar.
- In combination with one of our splitter devices to create a GPS distribution network.

## Part Number Configuration

(Military DC Mating Connector is included standard with the MC power option).

When no external power supply option (AC or DC) is selected, Output 1/J1 is Pass DC Standard.

When external power supply option is selected, all outputs are DC blocked standard.

Contact GPS Networking Technical Support at 1-800-463-3063 or [salestech@gpsnetworking.com](mailto:salestech@gpsnetworking.com) for any questions regarding non-standard configurations and corresponding part numbers.

## Performance

### L1/L2GHNRRKAMP (Standard Gain)

Each L1/L2GHNRRKAMP ships with a test sheet that verifies critical performance characteristics, such as gain, input VSWR, and amplitude balance; a typical VNA test sheet is shown below

# Mechanical

Mechanical Dimensions:  
 Depth: 1.3"  
 Width: Body: 2.5"  
           Baseplate: 3.25"  
 Height: 2.5"  
 Dimensions listed above do not include connectors  
 Weight: 9.6oz (272g) MAX  
 Maximum weight is with female N-connector option  
 Weight will vary by connector type  
 Operating Temperature Range: -57°C to +87°C  
 Housing and Baseplate Finish: Electroless Nickel Plated (MIL-C-26074C, Class 1) 0.0001-0.0003 MAX  
 Lid Finish: Anodize, Type II, Class 2, Black, per MIL-A-8625

Female N connectors shown, other options available  
 MC - Military DC connector shown, other options available  
 EMI shielding may increase dimension by 0.02 inches per axis
