

The Fram2 Dragon spacecraft will radiate from T-7 hours as specified below until splashdown approximately 3-5 days later.

<u>Frequency</u>	<u>Emissions Designator</u>	<u>Expected TX Duration</u>	<u>TX Altitude Range</u>
2216 MHz	2M69G1D	Only active during freeflight when we are over a ground station	0 – 460 km
2216 MHz	4M60G1D	Only active during ascent and descent	0 – 460 km
2287.5 MHz	4M80G1D	Always active depending on TDRS availability	0 – 460 km
