ACCESS SERVICE

8. Special Federal Government Access Services (Cont'd)

(N)

8.8 Service Offerings to the Federal Government (Cont'd)8.8.1 Type and Description (Cont'd)(E) Government Emergency Telecommunications Service (GETS)(1) General Description

Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a nationwide security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched telephone network (PSTN), through the activation of a special code(s) in the Telephone Company's end office and tandem office switching systems, as requested by the Federal Government or its authorized agent. This service provides enhanced call routing and processing to authorized end users of the federal government with enhanced call completion during natural and man made disasters, using the survivable PSTN resources, and the reserved 710 Numbering Plan Area (NPA) code. Calls will use High Probability of Completion (HPC). GETS facilities are designed to be used only for authorized government emergency telecommunications and for testing of the federal government emergency telecommunications systems. GETS facilities may not be used for non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowance for interruption for GETS features is the same as for the Access Service with which it is associated as set forth in General Regulations section 2.4.3.

(N)

ACCESS SERVICE

8. Special Federal Government Access Services (Cont'd)

(N)

8.8 Service Offerings to the Federal Government (Cont'd)8.8.1 Type and Description (Cont'd)(E) Government Emergency Telecommunications Service (GETS) (Cont'd)(2) GETS Equipped End Offices and Access Tandems

GETS equipped end offices and access tandems of the Telephone Company are as follows:

AGCS GTD5 – End Office
AGCS GTD5 – Access Tandem
Lucent 5ESS – End Office
Lucent 5ESS - Access Tandem
Nortel DMS100 - End Office
Nortel DMS200 - Access Tandem
Nortel DMS500 - End Office

(3) Ordering of GETS Services

GETS services must be ordered by Common Language Location Identifier (CLLI) code for each end office or access tandem.

(4) Concurring Carriers

A list of companies that concur in this tariff can be found in the section titled "Concurring Carriers" .

(N)

ACCESS SERVICE

8. Special Federal Government Access Services (Cont'd)

(N)

8.8 Service Offerings to the Federal Government (Cont'd)8.8.1 Type and Description (Cont'd)(E) Government Emergency Telecommunications Service (GETS) (Cont'd)(5) Application of Rates and Charges for the Replacement and Addition of Switches

The application of rate and charges for the replacement and addition of switches (end offices or access tandems) will be as follows:

- 1) This tariff does not contemplate the following and will require a new Request For Pricing (RFP) proposal from the Federal Government:
 - a) The addition or replacement of GETS equipped or non-GETS equipped switches with GETS equipped switches shipped after 12/31/2007.
 - b) The addition or replacement of GETS equipped switches with non-GETS equipped switched.
- 2) The addition or replacement of a GETS equipped or non-GETS equipped switch with a GETS equipped switch, which is shipped prior to 12/31/2007, will be subject to non-recurring charges for activation of GETS HPC as set forth in Rates and Charges for GETS HPC Features. Monthly Rates would also be applicable.

(N)

ACCESS SERVICE

8. Special Federal Government Access Services (Cont'd) (N)8.8 Service Offerings to the Federal Government (Cont'd)8.8.1 Type and Description (Cont'd)(E) Government Emergency Telecommunications Service (GETS) (Cont'd)(6) GETS Features

1) High Probability of Completion (HPC)

High Probability of Completion is a set of enhanced features, available for GETS in suitably equipped offices, which improves the probability of the completion of GETS traffic via the PSTN during times of national emergencies or disaster, when the PSTN is congested due to heavy traffic or damage to the network. HPC provides the capability to set a special indicator, based on a specific 3, 6, or 12 digit dialed number string, specified by the federal government, that is carried through the network via SS7 signaling and will indicate that the call is a GETS call. Typically the digit string of 710 will be used to set the HPC indicator.

The HPC feature set also provides the capability to queue calls marked with the HPC indicator on out going trunk groups and to exempt them from certain restrictive Network Management Controls.

HPC will be subject to a nonrecurring Service Preparation Charge for activating the feature, nonrecurring charges for activating each end office or access tandem, and monthly recurring charges for each end office or access tandem equipped with the HPC feature.

Rates for HPC are set forth in section 20. (N)

ACCESS SERVICE
