LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

2. REGULATIONS (Cont'd)

2.8 Rate Determination

The rate for an LDMTS call is determined by factors such as:

- distance between stations
- time of day and day of week
- duration of call
- class of service

The specific factors which apply to a given LDMTS call and their application are listed in the rate section applicable to that type of call. The regulations pertaining to those factors are as follows:

2.8.1 Distance Between Stations

- A. The distance between two stations within the specified market area is measured on the basis of airline mileage between rate centers as described in the Local Exchange Routing Guide AT&T's Tariff FCC No. 10. (C)(x)

2.8.2 Time of Day and Day of Week

The rate charged is determined by the day and time (standard or daylight savings) at the rate center of the calling station.

2.8.3 Class of Service

For the purpose of rate application, one of the following classes of service may apply to a given call:

A. Station-to-Station

There are four types of Station-to-Station calls:

- (1) The Dial Station class of service applies when the person originating the call dials the telephone number desired without the assistance of a Telephone Company operator and the call is billed to the calling station. It does not include calls from public or semi-public coin telephones. Dial Station rates also apply when:
 - (a) An operator records the calling station number where no automatic recording equipment is available.
 - (b) A call is placed from a dormitory station and an operator records a special identification number issued by the Telephone Company for billing purposes to students of colleges or universities. The calling station must be equipped with Dormitory Centrex Service or with a PBX equipped with Direct Inward Dial and Identified Outward Dial service.
 - (c) A call is forwarded by Call-Forwarding equipment.
 - (d) An operator reaches the called station because of trouble on the network

(x) Issued under authority of Special Permission No. 08-xxx of the Federal Communications Commission.

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

3. SERVICE CLASSIFICATIONS AND RATES TWO-POINT (Cont'd)3.1 Interstate Intra-Market Area Service(A) Application

Service between two points within a Market Area is furnished as set forth in 3.1(B) and 3.1(C) following.

Service between three or more points (Conference Service) is furnished as set forth in 4.1 following.

(B) Mileage Measurement(1) Mileage Determination

Each point in a Market Area is associated with a specific rate center. Rates for service between points are based on the airline mileage between the associated rate centers as provided in the Local (C)(x) Exchange Routing Guide 2-1.8 of AT&T's Tariff FCC No. 10.

Below is the list of rate centers to which this tariff applies for the provision of interstate LDMTS.

<u>Market Area</u>	<u>Verizon Rate Centers</u>	<u>Independent Company Rate Centers</u>
Terre Haute, IN (See Schedule 1)	Brazil, IN	Clarksville, IL
