ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Service Provider Number Portability (Cont'd)

- (B) SPNP and SPNP Database Service (SPNPDS) Service Description (N)
- SPNP is an advanced intelligent network capability which utilizes the common channel signaling network to query a database to secure network routing instructions before completion of a call. This database contains the Location Routing Number (LRN) that identifies the switch of the Local Service Provider (LSP) that serves a customer with a ported DN. The LRN is used to direct the call to the correct network switching element for completion to the end user customer. Where more than one network is involved in completing the call, the network prior to the termination (i.e., the N-1 Network) is normally responsible for querying a SPNP database to secure the LRN which is then used in routing the call. (N)
- Where the N-1 carrier does not perform a database query, and forwards a call to a switch in the Telephone Company's network for a NXX designated as a number portable code in the National Exchange Carrier Association Inc. F.C.C. No. 4, the Telephone Company will perform a query for the N-1 carrier and bill that N-1 carrier a SPNP Query charge, as shown in Section 13.3.12(E) following. (N) (x)
- When the Telephone Company is the first point of switching for terminating traffic to another local exchange carrier (e.g., a Telephone Company tandem switch), the Telephone Company will perform the query on behalf of the N-1 carrier and bill the N-1 carrier a SPNP Query charge, as shown in Section 13.3.12(E) following. (N)
- Where the N-1 Network queries the Telephone Company SPNP database, the Telephone Company will bill that N-1 carrier a SPNP database query charge. (N)
- SPNP Database Service procedures will be applied uniformly to all users of the Telephone Company's SPNP Database Network. The Telephone Company SPNP Database will receive and respond to all queries, including the Telephone Company's queries as defined in the Technical Reference filed with this service. (N)

(x) Issued under authority of Special Permission No. 91-765 of the Federal Communications Commission.

Certain regulations previously found on this page can now be found on Original Page 13-28.2.

(This page filed under Transmittal No. 540)

Issued: March 15, 1999

Effective: March 30, 1999

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Service Provider Number Portability (Cont'd) (N)(C) Service Provider Number Portability Database Service (SPNPDS) Service Application (N)
(N)

There are two service arrangements of SPNPDS available through the Telephone Company's network: (N)
(N)

- SPNP Query (N)
 - Tandem (N)
 - End Office (N)
- SPNP Database Query (N)

Following are detailed descriptions of each of the available service applications. (N)
(N)

(1) SPNP Query (N)

When the Telephone Company performs a query on behalf of the N-1 carrier, the Telephone Company's end office or access tandem switch will suspend call processing, formulate and launch a query via the common channel signaling network to a SPNP database to obtain information necessary to route calls to numbers in portable NXX codes. When the necessary routing information has been returned from the SPNP database to the switch originating the query, call processing is resumed and the call is routed to the correct network switching element for completion to the called party. (N)
(N)
(N)
(N)
(N)
(N)
(N)
(N)

When a Telephone Company tandem switch performs the query on behalf of the N-1 carrier, an SPNP Query-Tandem charge is applied whenever the call is to an NXX from which a DN has been ported. (N)
(N)
(N)

When a Telephone Company end office switch performs the query on behalf of the N-1 carrier, an SPNP Query-End Office charge will apply when the called DN has ported out of the Telephone Company switch. (N)
(N)
(N)

Certain regulations previously found on this page can now be found on Original Page 13-28.2.

(This page filed under Transmittal No. 540)

Issued: March 15, 1999

Effective: March 30, 1999

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Service Provider Number Portability (Cont'd) (N)(C) Service Provider Number Portability Database Service (SPNPDS) Service Application (Cont'd) (N)(2) SPNP Database Query (N)

N-1 carriers may query the Telephone Company's SPNP database interconnecting with the Telephone Company's common channel signaling network as provided in Section 6 preceding (Common Channel Signaling Access/Signaling System 7 (CCSA/SS7) Service). This is an optional service. (N)

N-1 carriers may arrange in advance to query, via the common channel signaling network, the Telephone Company's SPNP database which contains information necessary to route calls to number portable NXX codes. When the necessary routing information has been returned from the SPNP database to the switch originating the query, call processing is resumed by the originating N-1 carrier, and the call is routed to the correct network switching element for completion to the called party. The N-1 carrier will be assessed a SPNP Database Query Charge on all queries to the SPNP Database. (N)

(D) SPNPDS Service Provisioning (N)(1) SPNPDS Provisioning (N)

SPNP Database access is available in the New York Metropolitan and Eastern Massachusetts LATAs. The database in the New York Metropolitan LATA provides LRN information on ported telephone numbers in the state of New York and the cities of Greenwich and Byram, Connecticut. The database in the Eastern Massachusetts LATA provides LRN information on ported telephone numbers in the states of Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. Customer requests for SPNP Database Query Service will be treated as projects. (N)

(This page filed under Transmittal No. 540)

Issued: March 15, 1999

Effective: March 30, 1999

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Service Provider Number Portability (Cont'd)(D) SPNPDS Service Provisioning (Cont'd)(2) Limitations

SPNP Database Service is to be used only on a call-by-call basis for routing calls to number portable NXX codes and cannot be used for purposes other than those functions described herein.

Information residing in the Telephone Company's SPNP database is protected from unauthorized access and may not be stored in a customer's database or elsewhere for any reason.

(3) Network Management

The Telephone Company will administer its network to ensure the provision of acceptable service levels to all telecommunications users of the Telephone Company's network services.

The Telephone Company maintains the right to apply automated or manual protective controls which would generally be applied as a result of occurrences such as failure or overload of Telephone Company facilities, customer facilities, or other networks, natural disasters, mass calling, or national security demands.

(E) Rate Regulations

The rates and charges associated with SPNPDS which are "query" based will be billed monthly, based on recorded usage. For billing purposes, each month is considered to have thirty (30) days.

(1) Rate Elements

The following provides a list of the various SPNP rate elements.

- SPNP Query
 - Tandem
 - End Office
- SPNP Database Query
- SPNP Database Service Activation and/or Rearrangement
- SPNP Surcharge

(This page filed under Transmittal No. 540)

Issued: March 15, 1999

Effective: March 30, 1999

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Service Provider Number Portability (Cont'd) (N)(E) Rate Regulations (Cont'd) (N)(1) Rate Elements (Cont'd) (N)(a) SPNP Query (N)

The SPNP Query rate element provides for the identification of the (N)
 LRN information associated with the directory number including (N)
 transport of the query to and from the database. This charge is (N)
 assessed at either a Tandem or End Office rate depending on where the (N)
 query was launched. (N)

(1) SPNP Query – Tandem Query Charges are assessed to each (N)
 non-queried call delivered at the Telephone Company Tandem to (N)
 numbers in NXXs from which a DN has ported. This charge is also (N)
 assessed when the N-1 carrier delivers calls to other LECs through a (N)
 Telephone Company Tandem. (N)

(2) SPNP Query – End Office Query Charges are assessed to each (N)
 non-queried call to a directory number that has been ported out of a (N)
 Telephone Company end office switch, and the end office switch (N)
 performs the query. (N)

(3) The SPNP Database Query rate element provides for the (N)
 identification of the LRN associated with the directory number being (N)
 queried including transport from the Telephone Company STP to the (N)
 SPNP database (this service is provided in connection with CCSA/SS7 (N)
 Service described in Section 6 preceding). This charge will be (N)
 assessed to each query made to the SPNP Database. (N)

(b) Nonrecurring Charges (N)

Nonrecurring charges are one-time charges that apply for a specific (N)
 work activity. These nonrecurring charges are applicable for the (N)
 installation of the service and for rearrangements of the service. (N)
 In addition, an Access Order Charge will apply to the SPNP Database (N)
 Query Service, as shown in Section 5 preceding. (N)

(1) SPNPDS Activation and/or Rearrangement Charge: A nonrecurring (N)
 charge applies for the translation of the signaling point code as (N)
 applicable to the SPNP Database Query. (N)

(This page filed under Transmittal No. 540)

Issued: March 15, 1999

Effective: March 30, 1999

(c) SPNP Surcharge

(M) (S) (x)

The SPNP Surcharge recovers Telephone Company costs directly related to providing long term number portability. It is billed on a monthly basis to all Telephone Company end users, line side access customers, unbundled switch port customers, and resale customers, except for those customers who participate in the Lifeline Assistance Program. This surcharge will be recovered over 60 months commencing March 17, 1999, and ending March 16, 2004.
