ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.26 Facilities Management Service (Cont'd)

(D) Terms and Conditions (Cont'd)

(8) (Cont'd)

- (g) Secondary Premises or End User Channel Terminations
- (h) Shared Network Arrangement (Exception: see (9) following).
- (i) Verizon Dedicated SONET Ring (DSR), IntelliLight Shared Assurance Network (ISAN), and IntelliLight Shared Single Path (ISSP) (T)
- (j) IntelliLight Broadband Transport (IBT), except when non-multiplexed and associated with an IntelliLight Entrance Facility (IEF) (T)

- (9) Since Shared Network Arrangements (SNAs) are not allowed under FMS, a FMS customer whose network contains SNAs must choose one of the 2 options following:

(a) SNA Transition Period

The customer is allowed a transition period of one year, beginning with the effective date of the FMS application for service, in which to convert embedded base Shared Network Arrangements (SNAs). No new SNAs will be established once an FMS application for service becomes effective.

The embedded base of SNA services will not be included in the DSO calculation to determine the customer's FMS Rate Band for billing of Primary Premises channels. However, these SNA services will be billed at the FMS rates as identified for the other standard FMS circuits.

The customer must remove all SNAs from its account prior to the end of the one-year transition period. The Company will notify the customer 60 days prior to the end of the transition period of any SNA services that remain on the customer's account. Failure to eliminate the SNAs will result in termination of service with termination liability charges.
