

BELLSOUTH TELECOMMUNICATIONS, INC. (BellSouth)
2009 ANNUAL FILING – PART I
DESCRIPTION AND JUSTIFICATION
May 1, 2009

SECTION

1. Introduction
2. Exogenous Cost Development (ΔZ)
 - A. Excess Deferred Tax (EDT)
 - B. Investment Tax Credit (ITC) Amortization
 - C. Combined Effect of EDT and ITC
 - D. Telecommunications Relay Service (TRS) Fund
 - E. Regulatory Fee Payments
 - F. Summary of Exogenous Cost and Distributions
3. Other Price Cap Index Factors/Variables Development
4. Development of 2008 Base Period Demand
5. Common Line Basket Rate Development
6. Traffic Sensitive Basket PCI, API, SBI and Rate Development
7. Interexchange Basket PCI, API and Rate Development
8. Trunking Basket PCI, API, SBI and Rate Development
9. Special Access Basket PCI, API, SBI and Rate Development
10. Part 69 Waivers
11. New Services Included in the Price Cap Indices
12. Services Excluded from Price Caps
13. IND-1 Reference
14. Average Traffic Sensitive (ATS) Rate
15. Rate Comparison
16. Exhibits

1. INTRODUCTION

This filing is being made in compliance with the following:

- ❑ In the Matter of Material to be Filed in Support of 2009 Annual Access Tariff Filings, DA 09-684 (*Tariff Review Plans*), released March 26, 2009;
- ❑ In the Matter of July 2009 Annual Access Charge Tariff Filings, DA 09-683 (*2009 TRP Order*), released March 26, 2009;
- ❑ In the Matter of Assessment and Collection of Regulatory Fees for the Fiscal Year 2008, MD Docket 08-65 (FCC 08-182), released August 8, 2008;
- ❑ Sixth Report and Order in CC Docket Nos. 96-262 and 94-1, Report and Order in CC Docket No. 99-249 and Eleventh Report and Order in CC Docket No. 96-45, (CALLS Order), In the Matter of Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, Low-Volume Long Distance Users and Federal-State Joint Board on Universal Service, released May 31, 2000;
- ❑ In the Matter of Cost Review Proceeding for Residential and Single-Line Business Subscriber Line Charge (SLC) Caps, Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, Order in CC Docket Nos. 96-262 and 94-1, FCC 02-161, released June 5, 2002 (“SLC Cost Study Review Order”).

The *LEC Price Cap Order* requires an annual access tariff filing in which BellSouth Telecommunications, Inc. (BellSouth) is required to adjust the price cap indices (PCIs) for each basket of services, based on the change in the Gross Domestic Product Price Index (GDP-PI), a transitional mechanism (x-factor) and exogenous cost changes. BellSouth has incorporated the demand and revenue/cost of those new services introduced during the 2008 base period, and has calculated the PCI for each affected basket and service category, including the new services, in accordance with the Commission's Rules and the *LEC Price Cap Order*.

2. EXOGENOUS COST DEVELOPMENT (ΔZ)

Part 61.45(a) requires that local exchange carriers (LECs) adjust their PCIs to reflect the dollar effect of the exogenous cost changes (ΔZ). According to Part 61.45(b), this dollar effect must be measured at the base period level of operations.

In the 2009 Annual Filing, BellSouth will make the following exogenous adjustments, which are allowable in accordance with the *Code of Federal Regulations* (CFR) or were designated in Commission Orders:

- Regulatory Fee Payment Exogenous
- Telecommunications Relay Service (TRS)

Part 61.45(d) (3) requires that exogenous cost changes be apportioned between price cap services and excluded services. BellSouth adjusted the exogenous cost changes to remove impacts associated with services that are excluded from price cap regulation, to the extent that revenues for these services existed and were identifiable. The costs associated with non-price cap services, included in Parts 36 and 69 costs, are not identifiable. Consequently, BellSouth assumes that the costs for these services are equivalent to the revenue from these services.

BellSouth excluded a percentage of exogenous costs equivalent to the percentage of total identifiable interstate access, including revenue associated with approved pricing flexibility petitions, and Interexchange services revenue that represents non-price cap service revenue. In accordance with Part 61.45(d) (3), no exogenous adjustment will be allocated to Average Traffic Sensitive (ATS) revenue.

2.B TELECOMMUNICATIONS RELAY SERVICES (TRS) FUND

The Commission has also ruled Telecommunications Relay Service (TRS) fund payments¹ may be treated as exogenous. On May 2, 2008, the Commission released FCC 08-1055 (CC Docket 03-123), revising the TRS factor from .00819 to .01012, which is being employed as the basis of this exogenous change as no revised factor has yet been released. Therefore, Bellsouth is estimating the total TRS contribution amount for the ensuing tariff period based on the revised factor and revenue. The development of the TRS exogenous cost for this filing is provided on *Exhibit 2.6A*, and will be updated in the June 2009 tariff filing if, in the interim, the Commission modifies the factor.

¹ In the Matter of Telecommunications Relay Service, and the Americans with Disabilities Act of 1990, CC Docket No. 90-571, Second Order on Reconsideration and Fourth Report and Order, released September 29, 1993, paragraph 18.

2.C REGULATORY FEE PAYMENTS EXOGENOUS ADJUSTMENTS

The filing for exogenous treatment of Regulatory Fees is consistent with Parts 61.45(a) and 61.45(d)(1)(vi) of the Commission's Rules and Regulations and the Common Carrier Bureau's October 7, 1994 Order.² On August 8, 2008, the Commission released its Order, In the Matter of Assessment and Collection of Regulatory Fees for Fiscal Year 2008, MD Docket 08-65 (FCC 08-182), detailing the proposed factor for the Fiscal Year 2008, which is being employed as the basis of this exogenous change as no revised factor has yet been released. BellSouth is estimating regulatory fee payments and the corresponding exogenous adjustment based on the proposed factor and the preliminary change in revenue. The exogenous adjustment is detail in *Exhibit 2.6B*.

2.D SUMMARY OF EXOGENOUS COSTS & DISTRIBUTION

Part 61.45(d)(4) of the Rules requires that exogenous cost changes be apportioned between price cap services and excluded services. The combined exogenous cost changes have been adjusted to remove impacts associated with services that are excluded from price cap regulation, to the extent that revenues for these services existed and were identifiable.

² Price Cap Treatment of Regulatory Fees Imposed by Section 9 of the Communications Act Order, (DA 94-1119) (Common Carrier Bureau, released October 7, 1994), (Erratum released November 2, 1994) paragraph 6, granting a waiver to permit exogenous cost treatment of regulatory fees.

The costs associated with non-price cap services, included in Parts 36 and 69 costs, are not identifiable. It is assumed that the costs for these services are equivalent to the revenue from these services. A percentage of exogenous costs are equivalent to the percentage of total identifiable interstate access and Interexchange services revenue that represents non-price cap service revenue. Totals of all exogenous costs applied in this filing are summarized on ***Exhibit 2.9.***

3. OTHER PRICE CAP INDEX FACTORS/VARIABLES DEVELOPMENT

The annual filing adjustments to the PCI, detailed in Part 61.45(a), require the identification or development of the factors³ contained in the PCI formulas. The development of these factors, except for ΔZ , is described in this section. The development of the ΔZ factor is described in Section 2. These factors are used to calculate a new PCI for each of the price cap baskets. The new PCIs are the benchmark against which the price cap basket Actual Price Indices (APIs), associated with the proposed prices, are measured.

³ The required factors are PCI_{t-1} , GDP-PI, X, R, g, and ΔZ

The change in the PCI also affects the calculation of the allowable Service Band Index (SBI) Upper Limits, used to demonstrate that the proposed service category rates are in-band for the Traffic Sensitive, Trunking, and Special Access baskets. The change in the PCI also affects the allowable Sub-Index upper limits for 800 Database Vertical Services, Trunking and Special Access DS1, DS3 and Zone Density Pricing (ZDP) categories.

The calculations of the PCIs are detailed on form PCI-1 of the Tariff Review Plan (TRP).

EXISTING PCI

The PCI_{t-1} is described in Part 61.45(b)(1)(i) as "the immediately preceding PCI value." For purposes of the 2009 Annual Filing, the immediately preceding PCIs are identified in the existing PCI column of the TRP. The reference document, which is required to identify the transmittal associated with each of the existing PCIs, is provided as *Exhibit 13*.

GDP-PI

The GDP-PI factor is described in Part 61.45(c) as "the percentage change in the GDP-PI between the quarter ending six months prior to the effective date of the new annual tariff and the corresponding quarter of the previous year."

The change in the GDP-PI for the 2009 Annual Filing is 2.0695 percent.

TRANSITIONAL MECHANISM (X-Factor)

Part 61.45(b)(1) specifies price cap LECs shall apply a transitional mechanism of 6.5 percent to the Common Line, Traffic Sensitive, and Trunking basket revenues to lower switched and switched transport access charges until the specified target is met. The X-factor for the Special Access Basket for the 2009 Annual Filing is 2.0695 percent pursuant to 61.45 (b)(1)(iv).

'R' VARIABLE

The 'R' variable, as described in Part 61.45 (b)(1)(i), is calculated by multiplying base period quantities by the rates that were in effect at the time of the last PCI update.

The base period is defined in Part 61.3 (g) as "the 12-month period ending six months prior to the effective date of annual price cap tariffs." For purposes of this filing, the base period is the calendar year 2008.

The calculation of the 'R' variable for the Common Line, Traffic Sensitive, Trunking and Special Access baskets will be provided as part of the June 2009 tariff filing.

COMMON LINE USAGE GROWTH (g)

BellSouth is no longer required to develop a 'g' factor since it no longer assesses Minutes of Use (MOU) Carrier Common Line (CCL) charges.

4. DEVELOPMENT OF 2008 BASE PERIOD DEMAND

Historical base period demand is required for the Common Line, Traffic Sensitive, Trunking, and Special Access baskets. Demand information for these baskets will also be provided as part of the June 2009 tariff filing.

5. COMMON LINE BASKET RATE DEVELOPMENT

The Common Line Basket rates in the June 2009 tariff filing will be developed in accordance with Part 69.152 of the Rules. Universal Service Fund (USF) Support Per Line received, pursuant to Part 54.807, will be used in the rate development process, and receipt of this information is not expected until June 2009. *Exhibit 5.1* details the estimate for Interstate Access Universal Service Support Per Line, calculated in compliance with Part 61.46(d) and updated only to reflect 2008 base period access lines. Thus, the USF Per Line support amount listed in *Exhibit 5.1* is not final.

6. TRAFFIC SENSITIVE BASKET PCI, API, SBI AND RATE DEVELOPMENT

In accordance with Part 61.45, the existing and proposed PCIs for the Traffic Sensitive Basket are detailed on the PCI-1 form of the TRP. The associated API and the SBI for each of the service categories and sub categories will be provided as part of the June 2009 tariff filing in conjunction with the development of the Traffic Sensitive Basket 'R' value.

7. INTEREXCHANGE BASKET PCI, API AND RATE DEVELOPMENT

In accordance with Parts 61.45, the existing and proposed PCI for the Interexchange Basket is detailed on the PCI-1 form of the TRP. The associated API is included on the IND-1 and RTE-1

forms of the TRP. The “R” value is detailed on the RTE-1, SUM-1, and PCI-1 forms of the TRP and *Exhibit 7*.

8. TRUNKING BASKET PCI, API, SBI AND RATE DEVELOPMENT

In accordance with Parts 61.45(a), 61.46(a), 61.47(a), 61.47(b) and 61.47(e), the determination of the proposed Trunking Basket rates, PCI, API, SBI, and SBI Upper Limits for each of the service categories or sub categories of Tandem Switching, Voice Grade, High Cap & Other, and Signaling Interconnection associated with the 2009 Annual Filing are developed using 2008 Base Period demand. The 2009 Annual Filing PCI calculation is detailed on TRP form PCI-1. The development of the Trunking Basket ‘R’ value, API, SBI, and SBI Upper Limits will be provided as part of the June 2009 tariff filing.

9. SPECIAL ACCESS BASKET PCI, API, SBI AND RATE DEVELOPMENT

In accordance with Parts 61.45(a), 61.46(a), 61.47(a), 61.47(b) and 61.47(e), the determination of the proposed Special Access Basket rates, PCI, API, SBI, and SBI Upper Limits for each of the service categories or sub categories of Voice Grade, Audio & Video, and High Cap & DDS associated with the 2009 Annual Filing are developed using 2008 Base Period. The 2009 Annual Filing PCI calculation is detailed on TRP form PCI-1. The development of the Special Access Basket ‘R’ value, API, SBI, and SBI Upper Limits will be provided as part of the June 2009 tariff filing.

10. PART 69 WAIVERS

The following is a list of Part 69 waivers involving Ameritech Operating Companies (Ameritech), Southwestern Bell Telephone Company (SWBT), Pacific Bell Telephone Company (PBTC), Nevada Bell Telephone Company (NBTC), The Southern New England Telephone Company (SNET), and BellSouth Telecommunications, Inc (BellSouth), collectively the AT&T Companies, including a citation to the Order granting the waiver and the basket and service category, if applicable, and the treatment of rate elements created by the waiver:

There are no Part 69 waivers

11. NEW SERVICES INCLUDED IN THE PRICE CAP INDICES

No new services are being added to BellSouth's price cap indices in the 2009 Annual Filing.

12. SERVICES EXCLUDED FROM PRICE CAPS

The Commission's Order, In the Matter of Material to be Filed in Support of the 2001 Annual Access Tariff Filings (2001 TRP Order), released April 30, 2001, required LECs, for the first time, to provide support documentation detailing services excluded from price cap regulation. In *Exhibit 12*, BellSouth has included a list of all services excluded from price cap regulation, which has been revised to reflect activity subsequent to the 2008 Annual Filing in accordance with the *2009 TRP Order*.

13. IND-1 REFERENCE

The reference document, which is required to identify the transmittals associated with each of the existing PCIs, is provided as *Exhibit 13*.

14. AVERAGE TRAFFIC SENSITIVE (ATS) RATE

Pursuant to 61.45(i)(3), BellSouth has recalculated the Average Traffic Sensitive (ATS) rate to reflect the new base period level. The rate is detailed on TRP form TGT-1. The ATS rate is developed in accordance with Part 61.3(e) by dividing the Switched Traffic Sensitive Revenue by the Local Switching MOUs, and adding to that the result of dividing Switched Transport Revenue by the LEC Transport MOUs.

LEC Transport MOUs consist of the Transport Interconnection Charge (TIC) MOUs, Meetpoint Tandem Switched MOUs in which BellSouth does not bill TIC, and Meetpoint Direct Routed MOUs in which BellSouth does not bill TIC.

The Meetpoint Tandem Switched MOUs are the total interstate MOUs carried between a BellSouth tandem and an independent company-owned end office (EO). In this situation, the initial billing company is the independent company that owns the EO, who in turn bills the TIC. As BellSouth does not bill the TIC, these MOUs are not in the TIC MOU quantities.

The Meetpoint Direct Routed MOUs are the total interstate MOUs carried on direct routed circuits from a BellSouth serving wire center (SWC) to an independent company owned EO. In this situation, the initial billing company is the independent company that owns the EO, who in turn bills the TIC. As BellSouth does not bill the TIC, these MOUs are not in the TIC MOU quantities.

The development of the total LEC Transport MOUs is shown on ***Exhibit 14***. The total LEC Transport MOUs are input on the TRP form TGT-1, line 430.

15. RATE COMPARISON

This information will be provided as part of the June 2009 tariff filing.

16. EXHIBITS

This section provides the Exhibits referenced in prior sections of the D&J.

- Exhibit 2.6A – Telecommunications Relay Service
- Exhibit 2.6B – Regulatory Fee Exogenous
- Exhibit 2.9 – Summary of Exogenous Costs & Distribution
- Exhibit 5.1 – USAC Receipts
- Exhibit 7 – Interexchange Price Cap Model (not included in Short Form filing)
- Exhibit 12 – Excluded Services List
- Exhibit 13 – IND-1 Reference
- Exhibit 14 – Development of LEC Transport MOUs
- Tariff Review Plan (TRP)
