ACCESS SERVICE

2 General Regulations (Cont.)2.4 Payment Arrangements and Credit Allowances (Cont.)2.4.1 Payment of Rates, Charges and Deposits (Cont.)(F) Proration of Charges

Adjustments for the quantities of services established or discontinued in any billing period beyond the minimum period set forth for services in other sections of this tariff will be prorated to the number of days based on a 30-day month. The Telephone Company will, upon request, furnish within 30 days of a request and at no charge to the customer such detailed information as may reasonably be required for verification of any bill.

(G) Rounding of Charges

When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).

2.4.2 Minimum Periods

The minimum period for which services are provided and for which rates and charges are applicable is one month except for those usage rate services set forth in Section 6 (Switched Access Service) and 9 (Directory Assistance Service) and those services set forth in 6.1.3 (Switched Access High Capacity DS3 Entrance Facility and High Capacity DS3 Direct Trunked Transport), 7.2.4 (Part-time Video and Program Audio), 7.2.7 (High Capacity DS1 and DS3 Service), and 16 (Ethernet), or as otherwise specified. (T*) (N*)

The minimum period for which service is provided and for which rates and charges are applicable for a Specialized Service or Arrangement provided on an individual case basis as set forth in Section 12. following, is one month unless a different minimum period is established with the individual case filing.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

2 General Regulations (Cont.)2.6 Definitions (Cont.)Estimated Cost Special Construction

The term "Estimated Cost" denotes all estimated costs that will be incurred in providing a specific case of special construction, including any appropriate taxes.

Ethernet

(N*)

The term "Ethernet" denotes a high speed networking technology utilizing a packet-based Ethernet protocol. Ethernet enables broadband multimedia traffic (i.e., voice, data, and video) to be carried over the same network.

(N*)

Exchange

The term "Exchange" denotes a unit established by the Telephone Company for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. The exchange includes any Extended Area Service area that is an enlargement of a Telephone Company's exchange area to include nearby exchanges.

Exit Message

The term "Exit Message" denotes an SS7 message sent to an end office by the Telephone Company's tandem switch to mark the Carrier Connect Time when the Telephone Company's tandem switch sends an Initial Address Message to an interexchange customer.

Expected Measured Loss

The term "Expected Measured Loss" denotes a calculated loss which specifies the end-to-end 1004-Hz loss on a terminated test connection between two readily accessible manual or remote test points. It is the sum of the inserted connection loss and test access loss including any test pads.

Extended Area Service

See Exchange

Material previously found on this page has been relocated to 1st Revised Page 2-57.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

2 General Regulations (Cont.)2.6 Definitions (Cont.)Facilities Special Construction

The term "Facilities" denotes any cable, poles, conduit, microwave, or carrier equipment, wire center distribution frames, central office switching equipment, etc., utilized to provide interstate services.

(M*)
|
(M*)

First Point of Switching

The term "First Point of Switching" denotes the first Telephone Company location at which switching occurs on the terminating path of a call proceeding from the customer designated premises to the terminating end office and, at the same time, the last Telephone Company location at which switching occurs on the originating path of a call proceeding from the originating end office to the customer designated premises.

Frequency Shift

The term "Frequency Shift" denotes the change in the frequency of a tone as it is transmitted over a channel.

Global Title

An address such as customer-dialed digits that does not explicitly contain information that would allow routing in the SS7 signaling network, that is, the Global Title Translation function is required.

Global Title Translation

The process of translating a Global Title from dialed digits to a point code (network node) address and application address (subsystem number). This process is accomplished by the STP (Signal Transfer Point) in the SS7 network.

Grandfathered

The term "Grandfathered" denotes Terminal Equipment, Multiline Terminating Systems and Protective Circuitry directly connected to the facilities utilized to provide services under the provisions of this tariff, and which are considered grandfathered under Part 68 of the F.C.C.'s Rules and Regulations.

(M) Material relocated from Original Page 2-56.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

5 Access Ordering (Cont.)5.2 Ordering Requirements (Cont.)5.2.6 Ethernet Transport Service (ETS)

When placing an order for ETS, the customer must specify:

- the customer-designated premises
- the type(s) of ETS Port interface(s)
- the speed for each ETS Port;
- the number and bandwidth capacity for each ETS Channel Termination (ETS CT) associated with an ETS Port;
- options desired, if applicable;
- that the traffic consists of more than 10% interstate traffic.

When connecting to the ETS Port of another customer, the ordering customer must obtain authorization from the other customer.

(N*)

(N*)

5.3 Access Orders For Services Provided By More Than One Telephone Company

Access Services provided by more than one Telephone Company are services where one end of the Channel Mileage element is in the operating territory of one Telephone Company and the other end of the element is in the operating territory of a different Telephone Company.

The ordering procedure for this service is dependent upon the billing arrangement, as set forth in 2.4.7 preceding, to be used by the Telephone Companies involved in providing the Access Service.

5.3.1 Meet Point Billing Ordering

Each Telephone Company will provide its portion of the Access Service within its operating territory to an interconnection point(s) with the other Telephone Company(s). Billing Percentages will be determined by the Telephone Companies involved in providing the Access Service and listed in NATIONAL EXCHANGE CARRIER ASSOCIATION INC. Tariff F.C.C. No. 4. Each Telephone Company will bill the customer for its portion of the service as set forth in 2.4.7. All other appropriate charges in each Telephone Company tariff are applicable.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

5 Access Ordering (Cont.)5.4 Charges Associated with Access Ordering (Cont.)5.4.3 Access Order Change Charges

Access Order changes involve service date changes and design changes. The customer may request a change of its Access Order prior to the service date. The Telephone Company will make every effort to accommodate a requested change when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the change cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order change, the Telephone Company will schedule a new service date as set forth in 5.1.2 preceding. All charges for Access Order change as set forth in 17.4.1(B) and (C) will apply on a per occurrence basis.

Any increase in the number of Special Access Service channels or Switched Access Service lines, trunks, CCS/SS7 Port Terminations, ETS Ports, or ETS Channel Terminations will be treated as a new Access Order (for the increased amount only).

(N*)

If order changes are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer, these changes will be made without order change charges being incurred by the customer.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

5 Access Ordering (Cont.)5.5 Minimum Periods and Cancellations5.5.1 Minimum Periods

The minimum period for part-time Video and Program Audio Special Access Services is one day even though the service will be provided only for the duration of the event specified on the order (e.g., one-half hour, two hours, five hours, etc.). The minimum period for Switched Access High Capacity DS3 Entrance Facilities and Direct Trunked Transport is as set forth in 6.1.3 following. The minimum period for High Capacity DS1 and DS3 Special Access Services is as set forth in 7.2.4 following. The minimum period for Ethernet Transport Service is as set forth in Section 16.3.4, following.

(N*)
(N*)

The minimum period for which Directory Assistance Service and the Directory Access Service is provided and for which charges apply is six months. A minimum period of six months applies for each additional period of service ordered or extended.

Switched Access usage rated services (i.e., End Office, Common Line, Tandem Switched Transport, and Residual Interconnection Charge) have no minimum period. The minimum period for which all other Access Service is provided and for which charges are applicable, is one month.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

5 Access Ordering (Cont.)5.5 Minimum Periods and Cancellations (Cont.)5.5.3 Cancellation of an Access Order (Cont.)

- (C) When a customer cancels an order for the discontinuance of service, no charges apply for the cancellation.
- (D) When a customer cancels an order for the installation of Digital Subscriber Line Access Service, as set forth in Section 8, no charges apply for the cancellation.
- (E) If the Telephone Company misses a service date by more than 30 days and such delay is not requested or caused by the customer (excluding those circumstances where the date is missed due to acts of God, governmental requirements, work stoppages and civil commotions), the customer may cancel the Access Order without incurring cancellation charges.

5.5.4 Partial Cancellation Charge

Any decrease in the number of ordered Special Access Service channels or Switched Access Service lines, trunks, CCS/SS7 Port Terminations, ETS Ports, or ETS Channel Terminations will be treated as a partial cancellation and charges will be determined as set forth in 5.5.3(B) preceding.

(N*)

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

6 Switched Access Service (Cont.)

6.1 General (Cont.)

6.1.3 Rate Categories (Cont.)

(B) End Office (Cont.)

(1) Local Switching (Cont.)

(d) Intercept

The Intercept function provides for the termination of a call at a Telephone Company Intercept operator or recording. The operator or recording tells a caller why a call, as dialed, could not be completed, and if possible, provides the correct number.

(2)

(D*)

(D*)

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

7 Special Access Service (Cont.)7.1 General (Cont.)7.1.2 Service Descriptions (Cont.)

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Technical specifications packages are described in Section 14 following, optional features and functions are described in this section. Channel interfaces are described in 14.2 following.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be advised and given the opportunity to change the order.

The channel descriptions provided in 7.4 through 7.8 following, specify the characteristics of the basic channel and indicate whether the channel is provided between customer designated premises, between a customer designated premises and a Telephone Company hub where bridging or multiplexing functions are performed, between hubs, or between a customer designated premises and a WATS Serving Office, or between a customer designated premises and an DSL Access Service Connection Point, or between a Telephone Company serving wire center equipped with Ethernet Transport Service (ETS) and another telephone company Ethernet-equipped serving wire center that is located in a non-adjacent serving territory.

(N*)
|
(N*)

- (A) Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. This information is displayed in matrices set forth in 14.2 following.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

7 Special Access Service (Cont.)7.2 Rate Regulations (Cont.)7.2.1 Rate Categories (Cont.)(A) Channel Termination (Cont.)

For a 44.736 Mbps High Capacity Service connecting a customer designated premises to a DSL Access Service Connection Point as described in Section 8, following, or for an OC3 or OC12 Synchronous Optical Channel Service connecting a customer designated premises to an Ethernet Transport Service as described in Section 16.3, following, there will be a charge for only one Channel Termination. However, for a 44.736 Mbps High Capacity Service connecting a customer designated premises to a DSL Access Service Connection Point where the customer is collocated in the same central office as the DSL Access Service Connection Point, the Channel Termination Charge is waived.

(N*)

|

(N*)

(B) Channel Mileage

The Channel Mileage rate category recovers the costs associated with the end office equipment and the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center associated with a customer designated premises and a Telephone Company hub or between two Telephone Company hubs. Channel Mileage rates are made up of the Channel Mileage Facility rate and the Channel Mileage Termination rate.

1) Channel Mileage Facility

The Channel Mileage Facility rate recovers the per mile cost for the transmission path which extends between the Telephone Company serving wire centers and/or hub(s), or between a Telephone Company serving wire center equipped with ETS and another telephone company Ethernet-equipped serving wire center that is located in a non-adjacent serving territory.

(N*)

|

(N*)

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

7 Special Access Service (Cont.)7.2 Rate Regulations (Cont.)7.2.1 Rate Categories (Cont.)(B) Channel Mileage (Cont.)(2) Channel Mileage Termination

The Channel Mileage Termination rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at serving wire centers and hubs). The Channel Mileage Termination rate will apply at the serving wire center(s) for each customer designated premises and Telephone Company hub where the channel is terminated. If the Channel Mileage is between Telephone Company bridging hubs, the Channel Mileage Termination rate will apply per Telephone Company designated hub. If the Channel Mileage is between a Telephone Company serving wire center equipped with ETS and another telephone company Ethernet-equipped serving wire center that is located in a non-adjacent serving territory, no Channel Mileage Termination Rate will apply. If the Channel Mileage is between the serving wire center for a customer designated premises and a WATS Serving Office, the Channel Mileage Termination rate will apply at both the serving wire center associated with the customer designated premises and the WATS Serving Office. When the Channel Mileage Facility is zero (i.e., collocated serving wire centers), neither the Channel Mileage Facility rate nor the Channel Mileage Termination rate will apply.

(N*)

(N*)

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

7 Special Access Service (Cont.)7.2 Rate Regulations (Cont.)7.2.4 Minimum Periods

The minimum service period for all services except part-time Video and Program Audio services and DS3 High Capacity Service is one month and the full monthly rate will apply to the first month. Adjustments for the quantities of services established or discontinued in any billing period beyond the minimum period are as set forth in 2.4.1(F) preceding. The minimum service period for part-time Video and program Audio services is a continuous 24-hour period, not limited to a calendar day. The minimum service period for DS3 High Capacity service is twelve months.

7.2.5 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage Facility is calculated on the airline distance between the locations involved, i.e.,

- the serving wire centers associated with two customer designated premises,
- a serving wire center associated with a customer designated premises and a Telephone Company hub,
- a serving wire center equipped with ETS and another telephone company Ethernet-equipped serving wire center that is located in a non-adjacent serving territory,
- a serving wire center associated with a customer designated premises and a DSL Access Service Connection Point,
- two Telephone Company hubs
- or between the serving wire center associated with a customer designated premises and a WATS Serving Office.

(N*)
|
(N*)

The serving wire center associated with a customer designated premises is the serving wire center from which this customer designated premises would normally obtain dial tone.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

7 Special Access Service (Cont.)7.8 High Capacity Service7.8.1 Basic Channel Description

A High Capacity channel is a channel for the transmission of nominal 64.0 Kbps± or 1.544, 3.152, 6.132, 44.736, or 274.176 Mbps isochronous serial data. The actual bit rate is a function of the channel interface selected by the customer. High Capacity channels are provided between customer designated premises or between a customer designated premises and a Telephone Company hub or hubs. In addition, a 44.746 Mbps High Capacity Service channel may be provided between a customer designated premises and a Telephone Company designated DSL Access Service Connection Point.

Additionally, a 44.736 Mbps High Capacity Service channel may be provided between a customer designated premises and a serving wire center equipped with Ethernet Transport Service (ETS) and another telephone company Ethernet-equipped serving wire center that is located in a non-adjacent serving territory.

(N*)
|
(N*)

The customer may provide the Network Channel Terminating Equipment associated with the High Capacity channel at the customer's premises.

A channel with technical specifications package HC1 will be capable of an error free second performance of 98.75% over a continuous 24 hour period as measured at the 1.544 Mbps rate through a CSU equivalent which is designed, manufactured, and maintained to conform with the specifications contained in Technical Reference PUB 62411.

Rates and charges for Special Access High Capacity Service are as set forth in 17.3.6 following.

± Available only as a channel of 1.544 Mbps facility to a Telephone Company Digital Data hub or as a cross connect of two 2.4, 4.8, 9.6, 56.0 or 64.0 Kbps channels of two 1.544 Mbps facilities to a Digital Data hub(s). The customer must provide system and channel assignment data.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

ACCESS SERVICE

16 Ethernet Transport Service

(N*)

16.1 General

Ethernet Transport Service (ETS) is a high speed data transport service that provides end-to-end transmission using Ethernet packet technology at transport speeds ranging from 5 Mbps to 1 Gbps, where available. ETS is ideal for transport of broadband multimedia traffic (i.e., voice, data, and video) using variable length Ethernet packets with the ability to interconnect multiple locations using the Telephone Company's ETS network. Ethernet packets generated by Ethernet-compatible customer premises equipment (CPE) are transmitted using available capacity on shared transmission paths through the Telephone Company's ETS network to a pre-specified destination. The ETS customer may use ETS to: (1) interconnect customer-designated premises (CDPs) served by the Telephone Company's ETS network, (2) interconnect with its local area network (LAN) to the Telephone Company's ETS network and/or (3) interconnect its CDPs to an Ethernet network located outside of the Telephone Company's serving territory.

16.2 Service Description

ETS is provided using a combination of ETS Channel Terminations and ETS Ports. As described below, ETS may be used in conjunction with Special Access High Capacity DS3 and Synchronous Optical Channel Service OC3 and OC12 Services as specified in Section 7, preceding, and with DSL Access Services as specified in Section 8, preceding. An ETS Port is required to provide the interface into the Telephone Company's ETS network.

The transmission quality of ETS is not guaranteed and is offered to ETS customers at a best-effort level. The Telephone Company will attempt to deliver all Ethernet packets received; however, network congestion may result in a loss of Ethernet packets. Transmission speeds using copper facilities may be affected by distance from the Telephone Company central office and other technical limitations in the Telephone Company's copper network and are also not guaranteed.

Service is provided, where available, between CDPs and designated Telephone Company Serving Wire Centers (SWCs). ETS will be furnished where suitable facilities exist as determined by the Telephone Company. The Telephone Company will identify its ETS-equipped SWCs in NATIONAL EXCHANGE CARRIERS ASSOCIATION, INC. Tariff F.C.C. No. 4.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.) (N*)16.2 Service Description (Cont.)

Rates and charges for ETS are specified in Section 17.4.7, following. The application of rates and charges for ETS is described later in this section.

16.3 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to ETS:

- (A) The ETS customer is responsible for providing the Telephone Company with the necessary information to provision ETS as specified in Section 5.2 Ordering Requirements, preceding.
- (B) The ETS customer is responsible for providing and maintaining all required CPE, which is compatible with ETS and complies with the standards specified in Technical Reference IEEE Standard 802.3-2005, Part 3, Sections 1 through 5.

16.4 Rate Regulations

This section contains the regulations governing the rates and charges that apply for ETS. Regulations governing the rates and charges for Special Access and DSL Access Services provided under this tariff used in conjunction with ETS are as specified in Sections 7 and 8, preceding.

(A) Rate Categories

The various ETS service elements are described below.

(1) ETS Channel Terminations (CTs)

An ETS CT provides the transport facility between the customer's designated premises and an ETS Basic Port at the Telephone Company's ETS SWC.

ETS CTs are available at bandwidth speeds of 10 Mbps, 20, Mbps, 50 Mbps, 100 Mbps, 500 Mbps, and 1 Gbps. The ETS customer orders the type of ETS CT it needs based on its bandwidth requirements.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission. (N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(A) Rate Categories (Cont.)(1) ETS Channel Terminations (CTs) (Cont.)

Bandwidth speeds of 50 Mbps and above require use of a fiber loop facility, where such fiber facilities exist. ETS CTs are available only from suitably equipped ETS SWCs for connection to ETS Basic Ports.

Monthly and nonrecurring charges apply for each ETS CT ordered. The monthly rate is based upon the bandwidth capacity ordered and whether the CDP is located within 300 feet of the ETS SWC or more than 300 feet from the ETS SWC. Rates and charges are specified in 17.4.7, following.

(2) ETS Basic Ports

ETS Basic Ports provide the interface at the Telephone Company's ETS SWC for data traffic to and from the customer premises equipment as well as for connecting the Telephone Company's ETS network with the Ethernet network of another telephone company. An ETS Basic Port receives Ethernet packets from the ETS customer's Ethernet-compatible CPE, validates the addressing parameters contained in the packet headers, and transmits the packets into the ETS network. The ETS Basic Port also receives Ethernet packets from the Telephone Company's ETS network or from an Ethernet network located outside the Telephone Company's service territory, validates the addressing parameters contained in the packet headers, and transmits the packets to the pre-designated CDP.

ETS Basic Ports provide the interface to the Telephone Company's ETS network and do not include the required transport facility between the CDP and the Telephone Company's ETS SWC.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(A) Rate Categories (Cont.)(2) ETS Basic Ports (Cont.)

ETS Basic Ports are available in bandwidth speeds of 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 500 Mbps, and 1 Gbps. Required transport to the ETS Basic Port is provided using an ETS CT as described above. The bandwidth speed of an ETS Basic Port must be equal to or greater than the bandwidth speed of the associated ETS CT. The bandwidth speed of an optional DSL Access Service Connection function must be equal to the bandwidth speed of the associated ETS Basic Port.

Monthly and nonrecurring charges apply for each ETS Basic Port ordered. The monthly recurring charge is determined by the capacity ordered. Rates and charges are specified in Section 17.4.7, following.

(3) Optional Features and Functions(a) DSL Access Service Connection

Where available, ETS Basic Ports may be equipped with the DSL Access Service Connection function. The function provides for the interconnection of ETS with DSL Access Service as described in Section 8, preceding, provided by the Telephone Company under this tariff. The function also provides for the interconnection of ETS with a wireline broadband Internet transmission service provided on a non-tariffed, common carrier basis. This optional function allows the ETS customer to receive ADSL, SDSL, and/or wireline broadband Internet transmission service data traffic to its end user customers.

The speed of the DSL Access Service Connection function ordered by the ETS customer must equal the speed of the associated ETS Basic Port.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(A) Rate Categories (Cont.)(3) Optional Features and Functions (Cont.)(a) DSL Access Service Connection (Cont.)

A non-recurring charge applies per port to equip the ETS Basic Port with the DSL Access Service Connection function. Rates and charges are specified in Section 17.4.7, following.

(B) Types of Rates and Charges

There are two types of rates and charges: monthly rates, and nonrecurring charges. These rates and charges are described below.

(1) Monthly Rates

Monthly rates are recurring rates that apply each month or fraction thereof when an ETS service element is provided. For billing purposes, each month is considered to have 30 days.

(2) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for ETS are installation of service, service rearrangements, and moves.

Except as specified below, these charges are in addition to the Access Order Charge as specified in Section 17.4.1, following.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(B) Types of Rates and Charges (Cont.)(2) Nonrecurring Charges (Cont.)(a) Installation of Service

Nonrecurring charges apply for installation of ETS CTs, ETS Ports, and ETS Optional Features and Functions ordered by the ETS customer.

(b) Service Rearrangements

Service rearrangements are changes to existing (i.e., installed) services, which may be administrative only in nature as set forth below or, that involve an actual physical change to the service.

When the ETS customer elects to decrease the bandwidth capacity on existing ETS Ports, associated DSL Access Service Connection functions (where applicable), and associated ETS CTs, the request will be considered a discontinuance of service for the former capacity and start of service for the new capacity. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new ETS elements. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued ETS elements.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(B) Types of Rates and Charges (Cont.)(2) Nonrecurring Charges (Cont.)(b) Service Rearrangements (Cont.)

When the ETS customer elects to increase the bandwidth capacity on existing ETS Ports, associated DSL Access Service Connection functions (where applicable), and associated ETS CTs, the request will be considered a discontinuance of service or the former capacity and start of service for the new capacity. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new ETS elements. Any outstanding minimum period charges associated with the discontinued ETS elements that would otherwise be applicable to the bandwidth capacity upgrades described in this paragraph will be waived.

Administrative changes will be made without charge(s) to the ETS customer. Administrative changes are as follows:

- Change of customer name,
- Change of customer or customer's end user premises address when the change of address is not a result of physical relocation of equipment,
- Change in billing data (name, address, contact name, or contact telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

ACCESS SERVICE

16 Ethernet Transport Service (Cont.)

(N*)

16.4 Rate Regulations (Cont.)(B) Types of Rates and Charges (Cont.)(2) Nonrecurring Charges (Cont.)(c) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the customer's premises, or
- The customer's premises.

The charges for moving ETS elements are dependent on whether the move is to a different location within the same building, to a different building within the same SWC, or to a different building in a different SWC. The charges specified below apply in addition to any applicable charges for moving any applicable Special Access Services as specified in Section 7.2.3, preceding.

(i) Moves Within the Same Building

ETS Basic Ports are not impacted when an ETS customer moves its Point of Termination to a different location within the same building. The charge for moving an ETS CT within the same building will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the ETS CT. There will be no change in the minimum period requirements.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.

(N*)

16.4 Rate Regulations (Cont.)(B) Types of Rates and Charges (Cont.)(2) Nonrecurring Charges (Cont.)(c) Moves (Cont.)(ii) Moves to a Different Building Within the Same SWC

ETS Basic Ports are not impacted when an ETS customer moves its Point of Termination to a different building within the same SWC. The move of an ETS CT will be treated as a discontinuance and start of service. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new services. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for discontinued service.

(iii) Moves to a Different Building in a Different SWC

A move to a different building in a different SWC will be treated as a discontinuance and start of service of all associated ETS elements. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new services. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for discontinued service.

* Issued under authority of Special Permission No. 09-012 of the Federal Communications Commission.
