24.2.1 General

Telephone Company provided point to point SONET service is provided where technically and operationally feasible as determined by the Telephone Company and provides a customer with SONET based broadband access transport over the Telephone Company's shared SONET network. The customer has the option to order the service with multiplexing capability from which lesser capacity channels can be derived via riders.

- (2) The DS3 Transmux Facility provides a two-point channelized facility between a customer designated location and the SONET Premises Node at that location.

24.2.2 Deployment and Availability

The point to point SONET service DS3 Transmux Facility is provided with the service interval applicable to High Capacity Digital DS3 Service.

24.2.3 Connection to Other Services

DS1 riders may be connected to a DS3 Transmux Facility via the multiplexed point to point SONET service facility. The customer must specify the connecting facility assignment (CFA) for both the DS3 Transmux Facility and the multiplexed point to point SONET service facility.
