The Tariffed Service Components offered in this Section 23 are for the exclusive use of customers for connecting to the interstate services provided by the Telephone Company as described in more detail herein.

23.2 Point To Point SONET Service Facilities

23.2.1 General

Telephone Company provided point to point SONET service is provided where technically and operationally feasible as determined by the Telephone Company and provides a customer with SONET based broadband access transport over the Telephone Company's shared SONET network. (1) The DS3 Transmux Facility aggregates the facilities associated with the DS1 rider circuits as part of a higher level DS3 handoff that is dropped from multiplexed point to point SONET service.

(2) The DS3 Transmux Facility provides a two-point channelized facility between a customer designated location and the SONET Premises Node at that location.

23.2.2 Deployment and Availability

(A) The point to point SONET service DS3 Transmux Facility is provided with the same service interval applicable to High Capacity Digital DS3 Service.

23.2.3 Connection to Other Services

DS1 riders may be connected to a DS3 Transmux Facility via the multiplexed point to point SONET service facility. The customer must specify the connecting facility assignment (CFA) for both the DS3 Transmux Facility and the multiplexed point to point SONET service facility.
