

ACCESS SERVICE

14. Special Construction

14.1 General

This section contains regulations, rates, charges and liabilities applicable for the special construction of interstate facilities.

When special construction of facilities is required, the provisions of this tariff apply in addition to all regulations, rates and charges set forth in the appropriate service section of this tariff.

ISSUE DATE:

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations14.2.1 Filing of Charges

Rates, charges and liabilities for special construction to provide facilities for use for one month or more are filed in Section 14.3 following, as appropriate.

Rates, charges and liabilities for the construction of facilities for use for less than one month are filed in supplements to this tariff.

14.2.2 Ownership of Facilities

The Telephone Company providing specially constructed facilities under the provisions of this tariff retains ownership of all such facilities.

14.2.3 Interval to Provide Facilities

Based on available information and the type of service ordered, the Telephone Company will establish a completion date for the specially constructed facilities. If the scheduled completion date cannot be met due to circumstances beyond the control of the Telephone Company, a new completion date will be established and the customer will be notified.

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.4 Special Construction Involving Both Interstate and Intrastate Facilities

When special construction involves facilities to be used to provide both interstate and intrastate services, charges for the portion of the construction used to provide interstate service shall be in accordance with this tariff. Charges for the portion of the construction used to provide intrastate service shall be in accordance with the appropriate intrastate tariff.

14.2.5 Payments for Special Construction(A) Payment of Charges

All bills associated with special construction charges are due in accordance with the regulations in the appropriate service section of this tariff.

(B) Start/End of Billing

Billing of recurring charges for specially constructed facilities starts on the day after the facilities are made available for use. Billing accrues through and includes the day that the specially constructed facilities are discontinued.

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.5 Payments for Special Construction (Cont'd)(C) Credit Allowance for Service Interruptions

In the event of a service interruption involving a specially constructed facility, the customer shall receive a recurring monthly charge credit in accordance with the credit allowance provisions in the appropriate service section of this tariff associated with the affected services.

When an interruption continues due to the failure of the customer to authorize the replacement of facilities subject to a Replacement Charge, as specified, in 14.2.6(D)(1)(d) following, the credit allowance will be terminated on the seventh calendar day after the Telephone Company has provided the customer with written notification of the need for replacement. The credit allowance will resume on the day after the Telephone Company receives written authorization for the replacement from the customer.

14.2.6 Liabilities and Charges for Special Construction(A) General

This section describes the various charges and liabilities that may apply when the Telephone Company provides special construction of facilities in accordance with an order for service. Written approval of all liabilities and charges must be provided to the Telephone Company prior to the start of construction.

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(B) Conditions Requiring Special Construction

Special construction is required when 1) facilities are not available to meet an order for service, and 2) the Telephone Company constructs facilities, and 3) one or more of the following conditions exist:

- The Telephone Company has no other requirement for the facilities requested.
- It is requested that service be furnished using a type of facility, or via a route, other than that which the Telephone Company would normally utilize in furnishing the requested service.
- More facilities are requested than would normally be required to satisfy an order.
- It is requested that construction be expedited, resulting in added cost to the Telephone Company.

(C) Development of Liabilities and Charges

Special construction charges and liabilities will be developed based on estimated costs, except when actual costs are requested in writing prior to the start of special construction.

In order to meet a scheduled service date when actual costs are requested, an initial special construction filing may be based on estimated costs. Such a filing will be revised when actual costs are available.

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges

Depending on the specifics associated with each individual case, one or more of the following special construction charges and/or liabilities may be applicable:

(1) Nonrecurring Charge

A nonrecurring charge always applies and includes one or more of the following components:

(a) Case Preparation Charge

A nonrecurring charge always includes a case preparation charge component to cover the administrative expenses associated with preparing a special construction case and the associated tariff filing.

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(1) Nonrecurring Charge (Cont'd)(b) Expediting Charge

A nonrecurring charge may include an expediting charge when it is requested that special construction be completed on an expedited basis. The charge equals the difference in estimated cost between expedited and nonexpedited construction.

(c) Optional Payment

An optional payment charge may be included in the nonrecurring charge in association with a type of facility or route other than that which the Telephone Company would normally use in furnishing the requested service if lower recurring monthly charges are desired for the specially constructed facilities. This charge is equal to the excess installed cost or the total nonrecoverable cost, whichever is less. This election must be made in writing before special construction starts. If this election is coupled with the actual cost option, the optional payment charge will reflect the actual cost of the specially constructed facilities.

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(1) Nonrecurring Charge (Cont'd)(d) Replacement Charge

If any portion of specially constructed facilities for which an optional payment charge has been paid requires replacement involving capital investment, a replacement charge will apply. This charge will be in the same ratio to the total replacement cost as the initial optional payment charge was to the installed cost of the original specially constructed facilities. If any portion of the facilities subject to the replacement charge fails, service will not be restored until notification is provided in writing that replacement is required and such replacement is ordered.

(e) Rearrangement Charge

If the Telephone Company is requested to rearrange existing specially constructed facilities, a nonrecurring charge equal to the cost of any additional special construction will apply.

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations  
100 CenturyLink Drive

March 1, 2011

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(1) Nonrecurring Charge (Cont'd)(f) Special Construction of Facilities for Use for less than One Month

When the Telephone Company is requested to construct facilities to provide service for less than one month, a nonrecurring charge only applies. In addition to the case preparation charge component, this nonrecurring charge recovers all elements of cost, including engineering, shipping of equipment, equipment installation, line-up, equipment leasing, space rental, equipment removal, and any other costs associated with the construction of the facilities.

(2) Maximum Termination Liability and Termination Charge

A Maximum Termination Liability is equal to the nonrecoverable costs associated with specially constructed facilities and is the maximum amount which could be applied as a Termination Charge if all specially constructed facilities were discontinued before the Maximum Termination Liability expires.

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations

March 1, 2011

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(2) Maximum Termination Liability and Termination Charge  
(Cont'd)

The liability period is equal to the average life of the account associated with the specially constructed facilities. The liability period is generally expressed in terms of an effective and expiration date.

The Maximum Termination Liability is filed with the initial tariff filing in decreasing amounts at ten-year intervals over the average account life of the facilities. In the event that the average account life of the facilities is not an even multiple of ten, the last increment will reflect the appropriate number of years remaining.

Example Illustrating a 27-Year Average Account Life

<u>Maximum Termination Liability</u>	<u>Effective Date</u>	<u>Expiration Date</u>
\$10,000	6/1/84	6/1/94
7,000	6/1/94	6/1/04
3,000	6/1/04	6/1/11

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(2) Maximum Termination Liability and Termination Charge  
(Cont'd)

Prior to the expiration of each liability period, the customer has the option to (A) terminate the special construction case and pay the appropriate charges, or (B) extend the use of the specially constructed facilities for the new liability period.

The Telephone Company will notify the customer six months in advance of the expiration date of each ten-year liability period. The customer must provide the Telephone Company with written notification at least 30 days prior to the expiration of the liability period if termination is elected. Failure to do so will result in an automatic extension of the special construction case to the next liability period at the filed Maximum Termination Liability amount.

ISSUE DATE:

Monroe, Louisiana 71203

EFFECTIVE DATE:  
March 1, 2011

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(2) Maximum Termination Liability and Termination Charge  
(Cont'd)

A Termination Charge may apply when all services using specially constructed facilities which have a tariffed Maximum Termination Liability are discontinued prior to the expiration of the liability period. The charge reflects the unamortized portion of the nonrecoverable costs at the time of termination, adjusted for net salvage and possible reuse. Administrative costs associated with the specific case of special construction and any cost for restoring a location to its original condition are also included. A Termination Charge may never exceed the filed Maximum Termination Liability.

A partial termination of specially constructed facilities will be provided, at the election of the customer. The amount of the Termination Charge associated with such partial termination is determined by multiplying the termination charge which would result if all services using the specially constructed facilities were discontinued, at the time partial termination is elected, by the percentage of specially constructed facilities to be partially terminated. A tariff filing will be made following a partial termination to list remaining Maximum Termination Liability amounts and the number of specially constructed facilities the customer will remain liable for.

## 14. Special Construction (Cont'd)

14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(2) Maximum Termination Liability and Termination Charge  
(Cont'd)Example

A customer with a filed Maximum Termination Liability of \$100,000 for 3600 specially constructed facilities requests a partial termination of 900 facilities. The Termination Charge for all facilities, at the time of election, is \$60,000. The partial termination charge, in this example, is \$60,000 x 900/3600, or \$15,000.

(3) Annual Underutilization Liability and Underutilization Charge

Prior to the start of special construction, the Telephone Company and the customer will agree on (1) the quantity of facilities to be provided, and (2) the length of the planning period during which the customer expects to place the facilities in service. The planning period is hereinafter referred to as the Initial Liability Period (ILP). The ILP is listed in the tariff with an effective and expiration date.

Underutilization occurs only if, at the expiration date of the ILP and annually thereafter, less than 70 percent of the specially constructed facilities are in service at filed tariff service rates.

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations  
100 CenturyLink Drive  
Monroe, Louisiana 71203

EFFECTIVE DATE:  
March 1, 2011

## ACCESS SERVICE

14 Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(3) Annual Underutilization Liability and Underutilization Charge  
(Cont'd)

An annual underutilization liability amount is filed on a per unit basis (e.g., per cable pair) for each case of special construction. This amount is equal to the annual per unit cost and includes depreciation, maintenance, administration, return, taxes and any other costs identified in the supporting documentation provided at the time the special construction case is filed.

Upon the expiration of the ILP, the number of underutilized facilities, if any, are multiplied by the annual under-utilization liability amount. This product is then multiplied by the number of years (including any fraction thereof) in the ILP to determine the underutilization charge.

Annually thereafter, the number of underutilized facilities, if any, existing on the anniversary of the ILP expiration date will be multiplied by the annual under utilization liability amount to determine the underutilization charge for the preceding 12 month period.

ISSUE DATE:

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(3) Annual Underutilization Liability and Underutilization Charge  
(Cont'd)Example

A customer orders 100 services and the special construction of a 600 pair building riser cable is agreed to, based on the customer's 5 year facility requirements. The ILP, in this example, would be filed at 5 years. The annual underutilization liability is filed at \$2.00 per pair. If 400 pairs were in service at the end of the ILP, there would be an underutilization of 20 pairs, i.e.,  $420 (70\% \text{ of } 600) - 400 = 20$ . The total underutilization charge for the first 5 years would be \$200.00, or \$2.00 per pair x 20 pairs x 5 years.

If 420 pairs are in service at the end of the 6th year, there is no underutilization, i.e.,  $420 - 420 = 0$ .

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(4) Recurring Monthly Charges(a) Charge for Route or Type other than Normal

When special construction is requested using a route or type of facility other than that which the Telephone Company would normally use, a recurring monthly charge, in addition to the monthly rates for service, is applicable. The charge is equal to the difference between the recurring costs of the specially constructed facilities and the recurring costs of the facilities the Telephone Company would have normally used.

(i) When an Optional Payment Charge as set forth in 14.2.6.(D)(1)(c) preceding has been elected, the recurring monthly charge will be reduced to include specially constructed facility operating expenses only.

(ii) If the actual cost option as set forth in 14.2.6(C) preceding has been elected, the recurring charge will be adjusted to reflect the actual cost of the new construction when the costs have been determined. This adjusted recurring charge is applicable from the start of service.

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.6 Liabilities and Charges for Special Construction (Cont'd)(D) Types of Liabilities and Charges (Cont'd)(5) Lease Charge

This charge applies when the Telephone Company leases equipment in order to meet service requirements. The amount of the charge is equal to the net added cost to the Telephone Company caused by the lease.

(6) Cancellation Charge

If a service order with which special construction is associated is cancelled prior to the start of service, a cancellation charge will apply. The charge will include all nonrecoverable costs incurred by the Telephone Company in association with the special construction up to and including the time of cancellation.

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.7 Deferral of Start of Service

The Telephone Company may be requested to defer the start of service which will use specially constructed facilities subject to the provisions set forth in the service section of this tariff under which service is being provided. Requests for special construction deferral must be in writing and are subject to the following regulations:

(A) Construction Has Not Begun

If the Telephone Company has not incurred any installation costs before receiving a request for deferral, no charge applies.

(B) Construction Has Begun

If the construction of facilities has begun before the Telephone Company receives a request for deferral, charges will vary as follows:

(1) All Services Are Deferred

When all services which will use specially constructed facilities are deferred, a charge based on the costs incurred by the Telephone Company during each month of the deferral will apply. Those costs include the recurring costs for that portion of the facilities already completed and any other costs associated with the deferral. The cost of any components of the nonrecurring charge which have been completed at the time of deferral will also apply.

When some services which will use the specially constructed facilities are deferred, the construction case will be completed and all special construction charges will apply.

(C) Construction Complete

If the construction of facilities has been completed before the Telephone Company receives a request for deferral, all special construction charges will apply.

14.2.8 Definitions

Actual Cost - The term "Actual Cost" denotes all costs charged against a specific case of special construction, including any appropriate taxes.

Annual Underutilization Liability - The term "Annual Underutilization Liability" denotes a per unit amount which may be billed annually if fewer services are in use utilizing specially constructed facilities at filed tariff rates than were originally specially constructed.

Estimated Cost - The term "Estimated Cost" denotes all estimated costs that will be incurred in providing a specific case of special construction, including any appropriate taxes.

ISSUE DATE:

## ACCESS SERVICE

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.8 Definitions (Cont'd)

Facilities - The term "Facilities" denotes any cable, poles, conduit, microwave or carrier equipment, wire center distribution frames, central office switching equipment, etc., utilized to provide interstate services.

Initial Liability Period - The term "Initial Liability Period" denotes the initial planning period during which the customer expects to place specially constructed facilities in service.

Installed Cost - The term "Installed Cost" denotes the total investment (estimated or actual) required by the Telephone Company to provide specially constructed facilities.

Maximum Termination Liability - The term "Maximum Termination Liability" denotes the maximum amount which may be billed if all services using specially constructed facilities are terminated prior to the expiration of the Maximum Termination Liability Period.

Maximum Termination Liability Period - The term "Maximum Termination Liability Period" denotes the length of time for which a termination charge may apply if all services using specially constructed facilities are terminated.

Net Salvage - The term "Net Salvage" denotes the estimated scrap, sale, or trade-in value, less the estimated cost of removal. Cost of removal includes the costs of demolishing, tearing down, or otherwise disposing of the material and any other applicable costs. Since the cost of removal may exceed salvage value, net salvage may be negative.

14. Special Construction (Cont'd)14.2 Regulations (Cont'd)14.2.8 Definitions (Cont'd)

Nonrecoverable Cost - The term "Nonrecoverable Cost" denotes the cost of specially constructed facilities for which the Telephone Company has no foreseeable use should the service be terminated.

Normal Construction - The term "Normal Construction" denotes all facilities the Telephone Company would normally use to provide service in the absence of a requirement for special construction.

Normal Cost - The term "Normal Cost" denotes the estimated cost to provide services using normal construction.

Permanent Facilities - The term "Permanent Facilities" denotes facilities providing service for one month or more.

Recoverable Cost - The term "Recoverable Cost" denotes the cost of the specially constructed facilities for which the Telephone Company has a foreseeable reuse, either in place or elsewhere, should the service be terminated.

Termination Charge - The term "Termination Charge" denotes the portion of the Maximum Termination Liability that is applied as a nonrecurring charge when all services are discontinued prior to the expiration of the specified liability period.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services15.1 Line Information Data Base (LIDB) Access Service15.1.1 General

Line Information Data Base (LIDB) Access Service provides the customer the ability to access billing validation data contained on the Telephone Company's LIDB located in Johnson City, Tennessee and Bristol, Tennessee. The LIDB is accessed through the Telephone Company SS7 network which utilizes American National Standards Institute (ANSI) signaling protocol. Access to the Telephone Company's LIDB provides customers the ability to provide toll fraud protection by validating calling card and toll billing exception data and performing public telephone checks.

15.1.2 Description

LIDB Access Service is provided by the Telephone Company to its customers in support of alternate billing services. LIDB Access Service provides access to billing validation data which resides on the Telephone Company data base for use with alternate billing services. Alternate billing services allow customer's end users the ability to bill calls to an account not necessarily associated with the originating line. LIDB Access Service supports alternate billing services such as Calling Card, Collect Calls, and Third Number Billing.

Customers participating in LIDB Access Service for purposes of obtaining billing validation data, which resides on the Telephone Company data base, originate queries to the LIDB from an operator services system (OSS) identified by an originating point code (OPC). The LIDB query is routed through one of two Telephone Company inter-connecting Signaling Transfer Points (STPs), located in Johnson City, Tennessee and Bristol, Tennessee, to the Telephone Company Regional Service Control Point (SCP) where the LIDB resides.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.2 Description (Cont'd)

The requested billing validation data, in the form of signaling information, is passed back via either one of the two Telephone Company interconnecting STPs to the customer's designated OSS where the LIDB query was originated. The Telephone Company LIDB will receive and respond to Calling Card Service and Billed Number Screening queries as defined in Technical Reference Publications GR-246, FR-271, GR-905 and GR-954.

LIDB Access Service will provide the following functions on a per query basis:

- Validation of a telecommunications calling card stored on LIDB.
- Determination of whether the billed line automatically rejects certain calls billed as collect or third number.
- Determination of whether the billed line in the Billed Number Screening Query is a public telephone number using the "Service or Equipment Indicator" in the LIDB.

All access to the Telephone Company's LIDB will occur through two Telephone Company interconnecting STPs located in Johnson City, Tennessee and Bristol, Tennessee. The Telephone Company will provide customer interconnection to the Telephone Company interconnecting STPs through its Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service provided in Section 6.8.2(G) preceding.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.2 Description (Cont'd)(A) Limitations

Unless expressly authorized in writing by the customer and the Telephone Company, LIDB Access Service is not to be used for purposes other than those LIDB functions described in 15.1.2 preceding. LIDB Access Service is to be used for those services only on a call-by-call basis and data accessed on LIDB may not be stored elsewhere for future use.

Proprietary information resident in the Telephone Company LIDB is protected from unauthorized access and may not be stored in a customer's data base for any reason. All information related to alternate billing services is proprietary. Some examples of proprietary information are as follows:

- Billed Number (resides in the Telephone Company LIDB)
- PIN Number(s) (resides in the Telephone Company LIDB)
- Billed Number Screening (BNS) indicators (resides in the Telephone Company LIDB)
- Reports on LIDB usage
- Information related to billing for LIDB usage
- LIDB usage statistics

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.2 Description (Cont'd)(B) Rate Categories

There are two basic elements which apply to LIDB Access Service: Query Transport and Query.

(1) Query Transport

The Query Transport rate element provides for the transmission facilities between the Telephone Company's STPs located in Johnson City, Tennessee and Bristol, Tennessee and the Telephone Company SCP where the LIDB resides.

(2) Query

The Query rate element provides for the validation of calling card and toll billing exception data and performance of public telephone checks. For these validation purposes, LIDB Access Service customers will query the LIDB located in the Telephone Company SCP via the Telephone Company CCS/SS7 network. The LIDB will respond with a verification signal message back to the LIDB Access Service customer via the Telephone Company CCS/SS7 network.

The charges associated with Query Transport and Query are set forth in 15.1.6 following:

(C) Acceptance Testing

The Telephone Company will perform testing of the LIDB Access Service in conjunction with CCS/SS7 Interconnection Service as outlined in Technical Reference Publications GR-905 and GR-954.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.2 Description (Cont'd)(D) Ordering Options and Conditions

LIDB Access Service is ordered under the Access Order provisions set forth in Section 5. preceding. Also, included in that section are other charges which may be associated with ordering LIDB Access Service (e.g., Service Date Change Charges).

15.1.3 Undertakings of the Telephone Company

In addition to the obligations of the Telephone Company set forth in Section 2. preceding, the Telephone Company has certain other obligations pertaining only to the provision of LIDB Access Service. These obligations are as follows:

(A) LIDB Data Specifications

The Telephone Company's LIDB will contain a record for every working line number and Billed Number group, served by the Telephone Company. Other exchange carriers who may store their data in the Telephone Company LIDB are requested to provide this data as well.

The Telephone company will administer its LIDB update process by use of a Data Base Administration system (DBAS). Updates contain information for calling card, collect and bill-to-third Party Alternate Billing Services (ABS) verification.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.3 Undertakings of the Telephone Company (Cont'd)(A) LIDB Data Specifications (Cont'd)

The Telephone Company generates customer record service order update activity which is electronically transferred to LIDB from the DBAS system. Mechanized updates (e.g. add, delete, modify customer accounts as customers move, order new service, disconnect service, or become delinquent on their account) are processed daily, 6 days per week, Monday through Saturday. Emergency updates for calling cards reported lost, stolen or otherwise compromised will be made 7 days per week, 24 hours per day.

ABS query usage within LIDB is monitored for unusual patterns which may be indicators of abuse or attempted fraud. By using a threshold method, when validation queries for a specific LIDB record reach the Telephone Company established usage threshold level, the number is placed on an exception list and an investigator will determine the validity of the usage. If the usage is determined to be invalid, the investigator will immediately deactivate the record in LIDB.

Usage thresholds will be established by the Telephone Company. Thresholds may vary by class of end user account (e.g. residence, business). Usage thresholds are applied uniformly within LIDB, and will monitor combined query usage from all LIDB Access Service Customers.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.3 Undertakings of the Telephone Company (Cont'd)(A) LIDB Data Specifications (Cont'd)

The Telephone Company will also establish usage thresholds which, when met by query activity to a calling card record, will automatically disable the record in LIDB. The number is placed on an exception list and an investigator will determine validity of the usage. If a calling card is automatically disabled and the usage is determined valid, the calling card will be reactivated in LIDB.

The Telephone Company will administer its LIDB to insure the provision of acceptable service levels to all customers. During periods of LIDB congestion, an automatic call gapping procedure will be utilized to control such congestion. The automatic call gapping procedure signals the switch and identifies the gap (how long the switch should wait before sending another query) and the duration (how long the switch should continue to perform gapping) according to the level of congestion. For example, during an overload condition, the automatic call gapping procedure will signal the switch when to begin to drop one out of three of the queries received. This call gapping procedure will be applied uniformly to all users of the Telephone Company's LIDB service.

The Telephone Company maintains the right to invoke manual intervention of the automatic call gapping procedure to preserve the integrity of the network.

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.3 Undertakings of the Telephone Company (Cont'd)(B) Provision of Billing Information

LIDB Access Service Queries received at the SCP are accumulated and records are generated identifying the number of queries processed by the originating point code (OPC) of the customer's Operator Service System (OSS) location. This information is delivered to the accounting office via tape or by teleprocessing for processing and billing. The query charges will be accumulated and billed to the LIDB Access Service customer each month.

The Telephone Company will provide sufficient information with the bill to enable the customer to determine how the billed amount was calculated. Included on the bill will be separate entries displaying the Billed Number Screening queries and the Calling Card Number queries.

Other reports may be provided as mutually agreed upon. Such agreements, provided on an individual case basis, may involve additional charges or conditions.

## ACCESS SERVICE

15. Common Channel Signaling/Signaling System 7 (CCS/SS7) Data Base Services (Cont'd)15.1 Line Information Data Base (LIDB) Access Service (Cont'd)15.1.4 Obligations of the Customer

In addition to the obligations of the customer set forth in Section 2. preceding, the customer has certain specific obligations pertaining to the use of LIDB Access Service. These obligations are as follows:

(A) LIDB Access Service PIU Report

The customer shall provide to the Telephone Company a LIDB Access Service Percent Interstate Usage (PIU) Report in accordance with the provisions specified in Section 2.3.11 preceding.

15.1.5 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for LIDB Access Service.

(A) Description of Rates and Charges

There are two types of rates and charges that will apply to LIDB Access Service. These are usage rates and nonrecurring charges. These rates and charges are applied as set forth in (1) and (2) following. For billing purposes, each month is considered to have 30 days.

The usage rates (Query Transport and Query) for LIDB Access Service are applicable on a per query basis as described in (B) following.

(2) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific activity (i.e., installation or change to an existing service). The nonrecurring charges that apply for installation of LIDB Access Service are described in (a) following. The nonrecurring charges that apply for service rearrangements are described in (b) following.

(a) Establishment of Service

Nonrecurring charges apply for each request for establishment of LIDB Access Service. The nonrecurring charges for the establishment of LIDB Access Service are set forth in Section 5.2.2 preceding.

Service Rearrangements are changes to existing services which do not result in either a change in the minimum period requirements as set forth in Section 5.2.6 preceding or a change in the location designated by the OPC.

Changes which result in the establishment of new minimum period obligations are treated as a discontinuance of the existing service and establishment of a new service and all applicable nonrecurring charges will apply.

Certain service rearrangements which are administrative in nature (as specified in Section 6.7.1(C)(3)) will be made without charge except as noted.

Provisions for service rearrangements for which nonrecurring charges will apply are also set forth in Section 6.7.1(C)(3) preceding.

## ACCESS SERVICE

16. Operator Services16.1 Operator Services Description

Operator Services includes the service categories of Operator Transfer and Operator Inward Assistance. Operator Transfer and Operator Inward Assistance services are provided from OSS Tandems to the customer's premises in conjunction with the rules and regulations of the specified Access Services found in Sections 2, 3, 5, and 6 preceding. Operator Services are available at all Telephone Company end offices, however may be unavailable in certain LATAs due to existing trunking arrangements. In locations where the provider of operator services is not the Telephone Company, availability of operator services is at the discretion of the operator services provider. If operator services are available, the Telephone Company rates are applicable and billed by the Telephone Company. In locations where the Telephone Company is the provider of operator services for other telephone companies, availability of operator services is contingent on the availability of operator services tariffs of that telephone company. The OSS Tandem locations are provided in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

16.1.1 Operator Transfer Service (OTS)

Operator Transfer is an originating service that provides call routing of 0- (the digit "0" with no additional digits) calls to a participating customer as requested by the calling end user. An Operator Transfer call is routed to the Telephone Company's OSS operator for completion to a destination outside the originating LATA when the calling party dials "0" and waits for an operator to assist with the call. The Telephone Company operator will, upon request, transfer the call to the calling end user's participating customer (i.e., the Telephone Company's Operator Transfer Service customer) of choice. If the calling end user has no specific customer preference, the OSS operator will consult reference information and offer to the calling party the name of a participating customer. The reference information is arranged to give all participating customers an equal opportunity of being offered to and chosen by the calling end user. After a selection is made by the calling end user, the operator will then key in the selected customer's Carrier Identification Code (CIC) and transfer the call.

## ACCESS SERVICE

16. Operator Services (Cont'd)16.1 Operator Services Description (Cont'd)16.1.2 Operator Inward Assistance (OIA) Service

Operator Inward Assistance provides operator service functions on inward calls received from customers. Operator Inward Assistance is provided when a customer's operator contacts a Telephone Company operator requesting line status verification or verification with call interruption. Inward Assistance functions will be performed for only one telephone number per inward call received. The Inward Assistance service functions available are detailed as follows:

- (A) Busy Line Verification - The operator will check the status of the requested telephone line to verify if there is conversation on the line and advise the requesting customer of the line status.
- (B) Verification with Call Interruption - After verification of a conversation on the requested line is made, and upon request, the operator will interrupt and inform the called party of the waiting call. The operator only interrupts the ongoing call and does not complete the subsequent telephone call for the customer.

16.2 Manner of Provisioning

- (A) Operator Services trunking between the customer's premises and the OSS Tandem is provisioned as either Switched Access Feature Group B, Feature Group C, or Feature Group D service and may be arranged, per the customer's request, as either 1-way or 2-way service. These trunk groups are established as final trunks and will be assigned data registers to obtain usage, peg count, and overflow attempt information. If a trunk(s) does not currently exist between the customer's premises and the OSS Tandem(s), the customer must establish Feature Group B or Feature Group D service to the Telephone Company's OSS Tandem(s). The Telephone Company will provide trunk side switching along with trunk answer and disconnect supervisory signaling to the customer.

## ACCESS SERVICE

16. Operator Services (Cont'd)16.2 Manner of Provisioning (Cont'd)

- (B) When the OSS Tandem also functions as the Message Toll Service (MTS) Access Tandem, the customer may combine Operator Services traffic with its MTS Switched Access traffic between the OSS Tandem and the customer's premises provided the trunk group has the same signaling and routing requirements as specified for Operator Transfer or Operator Inward Assistance. However, Operator Services traffic may not be combined with MTS Switched Access traffic if the customer provides operator functionality or coin station control.

16.2.1 Operator Transfer

- (A) The customer must order sufficient capacity between the OSS Tandem(s) and the customer's premises to serve Operator Transfer traffic originating from those end offices. The Telephone Company OSS Tandems send 10-digit ANI (NPA + 7-digit telephone number) for Feature Group D trunk groups with Equal Access signaling or Operator Services Address signaling and Feature Group C trunk groups with Traditional signaling. However, the Telephone Company OSS Tandems send 7-digit ANI for Feature Group C trunk groups with Operator Services signaling. Therefore, if the customer requires Operator Transfer calls separately identified by the originating NPA for the Feature Group C trunk group with Operator Services signaling, the customer must utilize a separate and final trunk group, from the OSS Tandem to their customer's premises, for each NPA served by that OSS Tandem.
- (B) In order for the customer to provide full operator functionality (e.g., Operator Recall, Sequence Dialing, Time and Charge Quotation, and Emergency Ring-back) or coin control, the customer must order Operator Trunk - Pay Telephone for Feature Group C service or Operator Trunk - Full Feature for Feature

## (B) (Cont'd)

Group D service. Full operator functionality is not required to provide operator transfer service. When coin control is provided, the customer must establish a separate and final trunk group for each type of end office operator/coin signaling (i.e., inband, expanded inband, and multiwink) existing in the end offices served by the OSS Tandem. Operator Transfer is not available for coin sent-paid traffic.

16.2.2 Signaling

- (A) For Operator Transfer, the Telephone Company will provide Traditional signaling for Feature Group B or Feature Group C service or Equal Access signaling for Feature Group D service. Customers providing operator functionality for operator traffic or coin control for pay telephone traffic will be provided with Operator Services signaling for Feature Group C or Operator Services Address signaling for Feature Group D service.
- (B) For Operator Inward Assistance, the Telephone Company will provide Traditional signaling for Feature Group B or Feature Group C service or Equal Access signaling for Feature Group D service.

16.2.3 Design Layout Report

Upon request, the Telephone Company will provide, to the customer, the make-up of facilities and services provided from the customer's premises to the OSS Tandem. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided at no charge and will be reissued or updated whenever the facilities provided for the customer's use are materially changed.

## ACCESS SERVICE

16. Operator Services (Cont'd)16.2 Manner of Provisioning (Cont'd)16.2.4 Design Blocking

Trunks between the customer's premises and the OSS Tandems will follow the normal Feature Group B, C, or D blocking criteria as set forth in 6.5.6 preceding. The Telephone Company will perform routine measurement functions to inform the customer that an adequate number of transmission paths are in service to meet the normal Feature Group B, C, or D design blocking levels. However, capacity levels and trunk quantities will be the responsibility of the customer.

16.2.5 Testing

Acceptance testing for Operator Services will be provided as set forth in 6.1.5 preceding. Testing Capabilities for Feature Group B, Feature Group C, and Feature Group D services utilized in conjunction with Operator Services will be provided as set forth in 6.2.2(D), 6.2.3(D) and 6.2.4(D) preceding.

16.2.6 Interface Groups and Transmission Parameters

Operator Services will utilize the same interface groups and transmission specifications as specified in 6.2.2(C), 6.2.3(C) and 6.2.4(C) preceding.

16.2.7 Ordering and Billing Options and Conditions

- (A) Operator Transfer Service is ordered under the access order provisions as set forth in Section 5 preceding. The Access Order Charge applicable for Switched Access will apply per Access Order - one per state - for the installation, addition, change, or rearrangement of Operator Transfer Service. In addition, other Access Order Charges (i.e., Service Date Change Charges, etc.) may apply. No access order is required to receive Operator Inward Assistance services.
- (B) Billing for all Operator Services will occur on a monthly basis as other billing is performed, but will be rendered on a statement detailing the flat-rated charges for the entire state applicable to that customer for the specified monthly period.

## ACCESS SERVICE

16. Operator Services (Cont'd)16.3 Liability of the Telephone Company

In addition to the liability statements as set forth in Section 2 preceding, the following also applies.

- (A) The Telephone Company's liability, if any, for its gross negligence or willful misconduct is not limited by this Tariff. With respect to any other claim or suit, by a customer or any others, for damages arising out of negligent mistakes, omissions, interruptions, delays or errors, defects in transmission, omission from or defects in the applicable list of customers or transfers to customers occurring in the course of furnishing service hereunder, the Telephone Company's liability, if any, shall not exceed an amount equivalent to the proportionate charge to the customer for the period of time during which such mistake, omission, interruptions, delays, errors, defects in transmission or service, omissions from or defects in the applicable list of customers or transfers to customers continues. However, any such mistakes, omissions, interruptions, delays, errors, or defects in transmission or service, omissions from or defects in the applicable list of customers or transfers to customers which are caused by or contributed to by the negligent omission or willful act of the customer provided facilities or equipment shall not result in the imposition of any liability whatsoever upon the Telephone Company. The Telephone Company expressly disclaims any express or implied warranty for the aforesaid service or offering including no warranty of merchantability or warranty of fitness for any particular purpose. It is expressly acknowledged by all subscribers to the aforesaid service that errors, mistakes and omissions can and will occur and that the Telephone Company neither warrants nor guarantees faultless or perfect service or transmission.

## ACCESS SERVICE

16. Operator Services (Cont'd)16.3 Liability of the Telephone Company (Cont'd)

- (B) The customer indemnifies and saves the Telephone Company harmless against claims for libel, slander, or infringement of copyright and trademark arising from the information transmitted over facilities furnished hereunder and against all other claims arising out of any act or omission of the customer in connection with facilities provided by the Telephone Company.
- (C) The customer indemnifies and saves the Telephone Company harmless against claims or suits for damages arising where the connection between the calling end user and a local emergency agency is in some way faulty or impaired, due in whole or in part to the negligent mistake or delay of the Telephone Company. Examples of this may include, but are not limited to, instances in which the Telephone Company, through negligent mistake or delay, may provide an incorrect local emergency agency number, delay in locating a local emergency agency number, or disconnect an in-progress call between a calling end user and a local emergency agency.

16.4 Obligations of the Customer

In addition to the general regulations as set forth in Section 2 preceding, the following also applies.

- (A) The customer shall provide the necessary on-hook, off-hook, answer supervision, and disconnect supervision at the customer's premises.
- (B) Jurisdictional reporting will apply as required in Section 2.3.11 for determining the Percent Interstate Usage (PIU).

## ACCESS SERVICE

16. Operator Services (Cont'd)16.5 Rate Regulations16.5.1 Description and Application of Rates and Charges(A) Operator Transfer Service

The Operator Transfer charge is a flat-rated charge applicable per call transferred to the subscribing customer.

In addition to the Operator Transfer charge, Switched Access rates apply as set forth in 6.8 preceding and Carrier Common Line (CCL) charges as set forth in 3.8 and 3.9 preceding apply for usage originating from all end offices served by the OSS Tandem.

Nonrecurring Switched Access charges are applicable as specified in 6.7 and 6.8 preceding.

(B) Operator Inward Assistance Service

The Operator Inward Assistance flat-rated charges are specific to the operator function performed and are applied per attempt to the requesting customer. The charges include all operator work time and equipment necessary to perform the requested operator function. The specific charges for Inward Assistance are shown below:

- (1) Busy Line Verification - applicable per busy line verify attempt.
- (2) Verification with Call Interrupt - applicable per busy line verify/call interrupt attempt.

Switched Access rates, including CCL charges and nonrecurring charges, are not applicable for Operator Inward Assistance services.

## ACCESS SERVICE

17. Expanded Interconnection Services

The Telephone Company will provide expanded interconnection services in conjunction with the Switched Access and Special Access Services provided in Sections 6 and 7 preceding, and in conjunction with the Frame Relay or Asynchronous Transfer Mode (ATM) Services provided in Section 8 of this tariff or the Interstate Service Guide.

17.1 Basic Service Description(A) Physical Collocation\*\*

Physical collocation provides an Interconnector with collocation space (cageless or enclosure secured) and associated requirements such as power and environmental conditioning within a Telephone Company premises\* to locate certain fiber optic, microwave or other wireless facilities and equipment, and a connection to certain Telephone Company provided services.

(B) Virtual Collocation

Virtual collocation provides a connection between Interconnector provided and Telephone Company provided fiber optic, microwave or other wireless transport facilities at a manhole or other Telephone Company designated interconnection point outside the Telephone Company premises to allow interconnection with certain Telephone Company provided services.

(C) Rate Categories

Expanded Interconnection Services consist of the rate categories described generally below. Specific regulations governing the provision of these rate elements are set forth following in Sections 17.5 and 17.6 for physical and virtual collocation, respectively.

\* For the purposes of this section, the term "Telephone Company premises" includes Telephone Company central offices, serving wire centers and access tandems, as well as all buildings or similar structures owned or leased by the Telephone Company that house Telephone Company network facilities.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.1 Basic Service Description (Cont'd)(C) Rate Categories (Cont'd)(1) Application Fee

The application fee is a nonrecurring charge that recovers the cost of processing the application for expanded interconnection and provides for the preliminary work needed to determine if Telephone Company premises space and facilities are available to meet the Interconnector's collocation request. The application fee will be assessed once for each application submitted per telephone company premises, and is not dependent upon the amount of collocation space requested.

(2) Floor Space

The floor space rate element is assessed on a per square foot per month basis and provides for the use of Telephone Company premises equipment areas occupied by the Interconnector. Floor space includes associated environmental support systems such as AC power (one 15 amp outlet), lighting, heating and air conditioning. The 15 amp AC power outlet is intended for occasional use to provide power to test equipment, hand tools and other devices on a temporary basis and shall not be used by the customer as a permanent power supply for equipment used to provide end user services.

(3) Roof Space

The roof space rate element is assessed on a per square foot per month basis and provides for the use of space on the exterior of the Telephone Company premises where the Interconnector has installed microwave or other wireless antenna facilities.

(4) Transmitter/Receiver Space

The transmitter/receiver space rate element is assessed on a per square foot per month basis and provides for the Interconnector's use of Telephone Company premises equipment areas for the placement of microwave or other wireless transmitter/receiver equipment. Transmitter/receiver space includes associated environmental support systems such as AC power (one 15 amp outlet), lighting, heating and air conditioning.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.1 Basic Service Description (Cont'd)(C) Rate Categories (Cont'd)(5) DC Power

The DC power rate element consists of both a recurring monthly rate and a nonrecurring charge. The nonrecurring charge recovers the cost of delivering Telephone Company DC power to the Interconnector's collocation space and is assessed per foot of power lead provided to the collocation space occupied by the Interconnector. A separate power lead is required for each 7 foot equipment bay located in the Interconnector's collocation space. The recurring monthly rate recovers the cost of providing 48 volt DC power to the Interconnector's collocation space, and is assessed per fuse amperage ordered.

(6) Collocation Space

Collocation space is available in single-bay increments (i.e. an Interconnector may purchase space in increments small enough to collocate a single rack, or bay, of equipment) and will be charged for at the per square foot floor space monthly rate.

(7) Security Enclosure

The security enclosure rate element consists of both a fixed and per linear foot nonrecurring charge. Security enclosures are available at the Interconnector's option, and the associated nonrecurring charges recover the cost of constructing a lockable, eight foot high, wire mesh security fence surrounding the perimeter of the Interconnector's collocation space.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.1 Basic Service Description (Cont'd)(C) Rate Categories (Cont'd)(8) Conduit Space - Per Foot

The conduit space - per foot rate element is assessed on a per linear foot per month basis and provides for the Interconnector's use of conduit duct space from the designated interconnection point to the Interconnector's collocation space.

(9) Conduit Space - Vault

The conduit space - vault rate element is assessed on a per foot of a 9-conduit vault per month basis and provides for the Interconnector's use of the Telephone Company's cable vault and supporting structures.

(10) Cross Connect

The cross-connect rate element is assessed on a per connection per month basis and recovers the cost of connecting the Interconnector's terminating equipment to services provided by the Telephone Company. Cross-connections are available at DS0, DS1, DS3, OC-n and Ethernet levels. Optical cross-connections are available in 4-fiber configurations.

(11) Riser Space

The riser space rate element is assessed on a per foot per month basis and provides a cable path between the cable vault and the Interconnector's collocation space.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.1 Basic Service Description (Cont'd)(C) Rate Categories (Cont'd)(12) Diverse Riser Space

The diverse riser space rate element is assessed on a per foot per month basis and provides a second cable path between the cable vault and the Interconnector's collocation space.

(13) Internal Cabling

The internal cabling rate element is assessed on a per linear foot of 4-fiber cable per month basis and recovers the cost of cabling, both 4-fiber and coaxial as necessary, from the point of interconnection outside the Telephone Company premises (when that point of interconnection is a manhole near the Telephone Company premises) to the Interconnector's terminating equipment in the Telephone Company premises.

(14) Internal Conduit

The internal conduit rate element is assessed on a per linear foot per month basis and recovers the cost of 12-fiber conduit and riser from the point of interconnection outside the Telephone Company premises (when that point of interconnection is a manhole near the Telephone Company premises) to the Interconnector's terminating equipment in the Telephone Company premises.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.1 Basic Service Description (Cont'd)(C) Rate Categories (Cont'd)(15) External Cabling and Conduit

The external cabling and conduit rate element is assessed on a per 1/4 mile per 4-fiber cable per month basis and recovers the cost of 4-fiber cabling and conduit as necessary from the point of interconnection outside the Telephone Company premises (when that point of interconnection is not a manhole near the Telephone Company premises) to a manhole near the Telephone Company premises.

(16) Cable Pull and Splice

The cable pull and splice rate element is assessed based on per half hour additional labor rates and recovers the cost of Telephone Company personnel pulling the Interconnector's fiber optic cable from the interconnection point in a manhole outside the Telephone Company premises to the cable vault, and splicing the Interconnector's cable to the riser cable in the cable vault.

(17) Installation and Maintenance

The installation and maintenance rate element is assessed based on per half hour additional labor rates and recovers the cost of installing and/or maintaining Interconnector provided outside plant (e.g., entrance cable, riser cable, and conduit).

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.2 Regulations

- (A) The Telephone Company will provide an interconnection to the Switched or Special Access services specified in Sections 6 and 7 preceding, or to the Frame Relay or Asynchronous Transfer Mode (ATM) Services specified in Section 8 of this tariff or the Interstate Service Guide.
- (B) Expanded Interconnection to switched access services is available only from Telephone Company central offices where suitable technical capability exists.
- (C) The Telephone Company reserves the right, on 30 days written notice by Certified U.S. Mail, to terminate the interconnection arrangement in the event the Interconnector violates the terms of this tariff.
- (D) The Telephone Company reserves the right, with 30 days notification to the Interconnector, to modify technical, administrative, or environmental procedures based on improvements suggested by Expanded Interconnection use. In the event the Interconnector requests reconsideration of the proposed modifications, the Telephone Company will work cooperatively with the Interconnector to determine if alternative modifications could be implemented.
- (E) Facilities and equipment provided by the Interconnector are subject to the terms, conditions, and rates specified in this tariff.
- (F) An Interconnector that fails to pay any of the charges associated with the provision of Expanded Interconnection is subject to the tariff provisions set forth in Section 2.1.8 preceding.
- (G) The Credit Allowance for Service Interruptions as set forth in Section 2.4.4 preceding and the Service Performance Provisioning Guarantee as set forth in Section 2.4.9 preceding also apply to the cross connect elements in Expanded Interconnection.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.2 Regulations (Cont'd)

- (H) The provision of Expanded Interconnection as set forth in this tariff does not constitute a joint undertaking of the Telephone Company and the Interconnector for the furnishing of any service.
- (I) When facilities are not available to meet an order for Expanded Interconnection, the Telephone Company will construct additional facilities in accordance with the regulations, liabilities, rates and charges for Special Construction as set forth in Section 14 preceding.
- (J) The provision of Expanded Interconnection and its restoration following a service interruption shall comply with the provisions of the Telecommunications Service Priority System (TSP) set forth in Section 13.3.6 preceding. In order to meet the emergency requirements of the TSP System, the Telephone Company may rearrange Telephone Company conduit, manholes, cable entrances, riser systems, or other Telephone Company facilities occupied by an Interconnector's transport facilities. The Telephone Company will make a reasonable effort to notify the Interconnector of the necessary rearrangements. If an emergency is caused by an act or omission of the Interconnector or by the Interconnector's equipment or facilities, the Interconnector will be charged for such rearrangement on a time and material basis.
- (K) The Telephone Company reserves the right to stop any service when the Telephone Company deems such stoppage necessary by reason of accident or emergency, or for repairs, improvements or as otherwise provided. The Telephone Company will make every reasonable effort to ensure that interruption to the Interconnector's service is avoided. When service interruption is unavoidable, the Telephone Company will provide immediate notification of such stoppage. The Telephone Company does not warrant that any service will be free from interruptions caused by labor controversies, accidents, inability to obtain fuel, water or supplies, governmental regulations, or other causes beyond the reasonable control of the Telephone Company.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.2 Regulations (Cont'd)

- (L) When an existing Telephone Company provided high capacity service or an existing multiplexed high capacity service is reconfigured into a high capacity service under an Expanded Interconnection arrangement or vice versa, or from one Telephone Company provided Expanded Interconnection arrangement to another within the same Telephone Company premises, an Interconnection Rearrangement Charge as set forth in 17.7(A)(15) and (B)(11) following will apply for each service reconfigured.
- (M) When two or more Interconnectors elect to share collocation space within a Telephone Company premises, the applicable charges will be prorated between the Interconnectors.
- (N) When an Interconnector elects to convert an existing virtual collocation arrangement to a physical collocation arrangement, a charge equal to the difference between virtual and physical collocation application fees will be assessed for each such conversion. The Interconnector shall also be responsible for any costs incurred by the Telephone Company during the conversion which exceed those normally incurred in the provision of physical collocation space for Expanded Interconnection.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.3 Liability

- (A) The Telephone Company is not responsible for the compatibility of services provided under this tariff when used in conjunction with Interconnector-provided transport facilities, except to the extent that services and facilities provided by the Telephone Company shall comply with industry approved standards.
- (B) The Telephone Company is not required to purchase additional land or buildings, relinquish building space forecasted for Telephone Company use, or undertake the construction of new buildings or expansion of existing buildings in order to satisfy an Interconnector's request for Expanded Interconnection. When undertaking the renovation of existing facilities, or the construction or lease of new facilities, the Telephone Company will take into account Interconnector collocator demand in the same manner in which demand for other services is considered.
- (C) The Telephone Company shall not be responsible for changes in technical criteria or facilities, operations or procedures of the Telephone Company which might render Interconnector-provided facilities obsolete or require modification, alteration, or otherwise affect performance of such equipment or facilities, when such action is consistent with applicable laws, rules, regulations, or industry standards. The Telephone Company will make every reasonable effort to ensure that such changes do not adversely affect Interconnector-provided facilities. When changes affecting Interconnector-provided facilities are unavoidable, the Telephone Company will provide reasonable notification of such modification.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.3 Liability (Cont'd)

- (D) The Telephone Company is not liable for any act or omission of the Interconnector in the furnishing of services to the Interconnector's subscribers or affecting other users of the network or the public.
- (E) The Telephone Company is not liable for any omission or error in the application or other documents provided by the Interconnector relative to a request for Expanded Interconnection, and has no responsibility to verify the accuracy of such information.
- (F) The Interconnector shall indemnify, defend, and hold the Telephone Company harmless against any claim of libel, slander or infringement of patents or copyrights arising from the improper use of equipment or information transmitted over its facilities.
- (G) The Interconnector shall indemnify, defend, and hold the Telephone Company harmless against any and all liability including, but not limited to, damage to property, or death or injury to any person(s), directly or indirectly arising out of or caused, in whole or in part, by the Interconnector's acts or omissions or the acts or omissions of any party or individual acting on the Interconnector's behalf.
- (H) The Interconnector shall provide the Telephone Company with evidence of sufficient insurance to protect the Telephone Company against any claims for damages as described in (D) through (G) preceding.
- (I) The provisions set forth in this section apply in addition to any limits, liability, or indemnification set forth in other sections of this tariff.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.4 Network Compatibility and Standards

- (A) The operating characteristics of customer transport facilities shall not interfere with any Telephone Company services and are subject to the provisions that said facilities do not:
- (1) Endanger the safety of Telephone Company employees, other Expanded Interconnection customers or the public;
  - (2) Damage or require change or alteration of Telephone Company equipment or facilities;
  - (3) Interfere with the proper functioning of Telephone Company equipment or facilities; or
  - (4) Impair the operation of the Telephone Company network or otherwise injure any party in its use of Telephone Company services.

The Telephone Company reserves the right, with or without notice, to disconnect any Interconnector's transport facilities which are in violation of the provisions in this Section.

- (B) The Interconnector is responsible for ensuring continued technical compatibility with the Telephone Company network. When changes in standards occur or differences exist between technical references, the Interconnector shall follow the more stringent standard.
- (C) The Telephone Company may not refuse to permit collocation of equipment on the grounds that it does not meet performance, rather than safety, requirements. In addition, the Telephone Company may not impose safety requirements on Interconnectors that are more stringent than the safety requirements it imposes on its own equipment that is located in its premises. If the Interconnector is denied collocation space for their equipment, citing safety standards, the Telephone Company must provide to the Interconnector, within five business days, a list of all equipment that the Telephone Company locates within the premises in question.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.5 Physical Collocation\*\*

- (A) The Interconnector shall provide to the Telephone Company a written application for the provision of physical collocation of fiber optic, microwave or other wireless facilities. The application shall include complete details of the collocation and interconnection requested, including, but not limited to, specific roof space, floor space, power, and environmental conditioning requirements. Completed applications must be accompanied by the Application Fee set forth in 17.7(A)(1) following, and will be processed by the Telephone Company within 10 business days on a first-come, first-served basis. The Interconnector must begin use of the collocated space within six months of the date of the application, or other time period mutually agreed to by the Interconnector and the Telephone Company, or the space must be relinquished to the Telephone Company. The Telephone Company may extend the beginning of use beyond the six month period upon a demonstration by the Interconnector that circumstances beyond the Interconnector's control prevented the six month deadline from being met.
- (B) If collocation space is unavailable or an Interconnector withdraws its request, the Application Fee, less the costs incurred by the Telephone Company (e.g., engineering record search and administrative activities required to process the application), will be refunded.
- (C) In situations where collocation space and associated requirements are available, physical collocation will be provided by the Telephone Company within 90 days, subject to additional time for asbestos removal or extraordinary construction, as specified below:

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## (C) (Cont'd)

- (1) The Telephone Company shall permit the Interconnector to occupy collocation space by per square foot increments within the Telephone Company premises. Additional collocation space cannot be reserved by the Interconnector for future use. Collocation floor space will be charged for on a per square foot basis, as set forth in 17.7(A)(2) following, and includes primary AC power, backup AC power where available, lighting, heating, air conditioning, and other environmental support, which the Telephone Company will provide in the same manner that it provides such support items for its own equipment in the Telephone Company premises.
- (2) For interconnection of microwave or other wireless facilities, the Telephone Company will permit the Interconnector to install antenna facilities on the exterior of the Telephone Company premises (Roof Space) and make available a path for the Interconnector's waveguide and/or coaxial cable (Riser Space - Per Foot). If an asbestos containing area is opened to facilitate the installation of the Interconnector's facilities, the Interconnector shall pay on a time and material basis for correction of any asbestos related situations. Roof space will be charged for on a per square foot basis as set forth in 17.7(A)(3) following; the rates for Riser Space - Per Foot are specified in 17.7(A)(13) following.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## (C) (Cont'd)

- (3) The Telephone Company will designate the location in the Telephone Company premises where the Interconnector's transmitter/receiver equipment shall be placed. Transmitter/Receiver Space will be charged for on a per square foot basis as set forth in 17.7(A)(4) following, and includes primary and backup AC power, lighting, heating, air conditioning, and other environmental support which the Telephone Company will provide in the same manner such support items are provided for its own equipment in the Telephone Company premises. In situations where special work must be completed by the Telephone Company to provide emergency power or environmental support to the Interconnector's transmitter/receiver equipment or antenna, the charges will be calculated and billed to the Interconnector on a time and material basis.
- (4) Electricity shall be provided by the Telephone Company in sufficient amount to provide ordinary lighting, heating and air conditioning of the collocation space. In addition, the Telephone Company shall provide one 15 amperage, 120 volt AC power circuit for the Interconnector's use. The 15 amp AC power outlet is intended for occasional use to provide power to test equipment, hand tools and other devices on a temporary basis and shall not be used by the customer as a permanent power supply for equipment used to provide end user services.
- (5) The Telephone Company reserves the right to monitor the Interconnector's use of electricity to determine if the electricity provided is sufficient to support the Interconnector's collocation space. If the Telephone Company determines that the electricity provided to

(5) (Cont'd)

the Interconnector is insufficient to support the Interconnector's collocation space, the Telephone Company may require the installation of additional electrical circuits to provide the Interconnector with additional electricity. The Interconnector shall reimburse the Telephone Company for any expenses incurred in making such additional electrical circuits available to the Interconnector.

- (6) The Telephone Company shall furnish air conditioning and/or other environmental controls for the Interconnector's space in a manner consistent with those provided elsewhere in the building and that responds to the information provided in the Interconnector's application.
- (7) The Telephone Company will provide supplementary air conditioning units or other environmental control devices made necessary solely by the Interconnector's equipment or facilities, and the cost thereof shall be paid by the Interconnector to the Telephone Company.
- (8) If the Telephone Company determines that it is necessary to upgrade the air conditioning and/or other environmental control devices for the building in general, and such upgrade is made necessary by the presence of the Interconnector in the building generally, the cost of such air conditioning units or other environmental control devices shall be allocated between the Telephone Company and the Interconnectors which benefit from the upgrades. Such allocation will be based on a ratio of the number of square feet occupied by each Interconnector to the total square feet of the Telephone Company premises space being upgraded.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. 17. Expanded Interconnection Services (Cont'd)17.5 Physical Collocation\*\* (Cont'd)

## (C) (Cont'd)

- (9) With the exception of day-to-day equipment additions or modifications within existing frames, the Interconnector shall not make installations, alterations, or additions in or to the collocation space without submitting plans or specifications to the Telephone Company and securing the prior written consent of the Telephone Company in each instance. Consent shall not be unreasonably withheld or unduly delayed for non structural interior alternations to the collocation space that do not adversely affect the building's appearance, value, structural strength and mechanical integrity. Such work will be done at the sole expense of the Interconnector.
- (10) Expanded interconnection is provided for the sole purpose of connecting an Interconnector's transport facilities to other tariffed services offered by the Telephone Company, including unbundled local exchange network elements offered to Interconnectors certified as a competitive local exchange service provider. Connection may only be made with the provision of Expanded Interconnection and only through the interconnection point designated by the Telephone Company. The Telephone Company will provide at least two separate points of interconnection to the central office where there are two entry points for the Telephone Company's cable facilities, except for situations where one entry of a two entry office is filled to capacity. In situations where two entry points are not immediately available, the Telephone Company shall perform the work necessary to make separate points of entry available to the Interconnector at the same time it makes such points of entry available for itself. Normal conduit space charges as set forth in 17.7(A)(7) and (8) will apply per entry point.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## (C) (Cont'd)

- (11) The Telephone Company will also provide primary and backup DC power, at the rates set forth in 17.7(A)(5) following, to the Interconnector's equipment in the same manner that it provides such power to its own equipment within the Telephone Company premises.
- (12) At the option of the Interconnector, the Telephone Company shall arrange for the construction of, or allow a mutually agreed upon contractor selected by the Interconnector to construct, a secure enclosure around the collocated floor space. The enclosure shall consist of a lockable, eight foot high, wire mesh security fence surrounding the perimeter of the Interconnector's collocation space and shall conform to the standards for health, safety and security to which the Telephone Company presently adheres within a Telephone Company premises. The rates for secure enclosures constructed by the Telephone Company are set forth in 17.7(A)(6) following. In situations where the Telephone Company must install environmental support to prepare the space for collocation, the charges will also be calculated and billed to the Interconnector on a time and material basis.
- (13) Except where the Interconnector purchases unbundled local exchange network transmission elements from the Telephone Company, the Interconnector shall bring its fiber optic cable to a manhole or other Telephone Company designated interconnection point and provide sufficient cable length, as mutually determined by the Telephone Company and the Interconnector, to extend the cable into the Telephone Company premises cable entrance(s).
- (14) Except where the Interconnector purchases unbundled local exchange network transmission elements from the Telephone Company, the Interconnector shall provide fire retardant fiber optic riser cable of sufficient length, as jointly determined by the Telephone Company and the Interconnector, to extend from the cable entrance(s) to the designated collocation space.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. ## (C) (Cont'd)

- (15) The Interconnector shall extend the fiber optic cable from the manhole, or other designated interconnection point, into the Telephone Company premises cable vault and splice the cable to the Interconnector-provided fire retardant riser cable. The Interconnector shall provide a secure dedicated fire retardant splice enclosure and shall tag all facilities to indicate ownership. The Telephone Company shall extend the riser cable through the Telephone Company premises and deliver it to the Interconnector's collocation space. The Telephone Company shall be responsible for providing conduit space (Conduit Space - Per Foot) and cable vault space with support structures (Conduit space - vault) at the rates set forth in 17.7(A)(7) and (8) following.
- (16) The Interconnector shall bring its microwave or other wireless facilities to an interconnection point designated by the Telephone Company and extend the cable into the Telephone Company premises to the designated collocation space. The Interconnector shall tag all facilities to indicate ownership. The Telephone Company shall be responsible for providing conduit space (Riser Space - Per Foot) at the rates set forth in 17.7(A)(13) following.
- (17) The Telephone Company shall designate a point of connection (Cross-Connect) where its network connects with the Interconnector's transport facilities in the collocation space. The point of connection defines the physical demarcation between the Interconnector's transport facilities and the Telephone Company's network. The Telephone Company will provide a cross-connect at the rates specified in 17.7(A)(9) through (12) following. The Interconnector is responsible for optical to electrical or speed conversions, multiplexing, or any other change required to connect the Interconnector's transport facilities to Telephone Company equipment and facilities at compatible interfaces, levels or speeds.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. ## (C) (Cont'd)

- (18) When the Interconnector orders a DS3 or DS1 electrical cross-connect for use with switched access services, the Interconnector must also order appropriate multiplexing. DS3 to DS1 multiplexing provides an arrangement that multiplexes a single DS3 digital circuit at a rate of 44.736 Mbps to 28 DS1 digital circuits. DS1 to DS0 multiplexing provides an arrangement that multiplexes a single DS1 digital circuit at a rate of 1.544 Mbps to 24 DS0 digital circuits. The rates for DS3 to DS1 and DS1 to DS0 multiplexing are set forth in 6.8.2(D) preceding.
- (19) The Telephone Company will permit the Interconnector to locate all equipment necessary for interconnection or access to unbundled network elements within the Interconnector's collocated space in the Telephone Company premises. This may include such equipment as DSLAMs, routers, ATM multiplexers and remote switching modules.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. ## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.5 Physical Collocation\*\* (Cont'd)

- (F) The Interconnector will provide the Telephone Company with access to the collocation space at all times to allow the Telephone Company to react to emergencies, provide services, and inspect for compliance with fire, safety, and health regulations or standards.
- (G) For all Interconnector work performed or installed in Telephone Company conduit systems, Telephone Company premises outside the collocation space, or other Telephone Company locations used by other parties, the Telephone Company reserves the right to:
  - (1) Prohibit the placement of any and all equipment or facilities other than cable in Telephone Company owned or controlled areas.
  - (2) Designate the location of cable splices.
  - (3) Approve all installations.
  - (4) Require that the Interconnector, at its sole expense, obtain any necessary right-of-way or other permits.
- (H) The Interconnector is subject to recurring and/or nonrecurring rates and charges for the use of Telephone Company owned or controlled space and facilities, and for installation work functions provided by the Telephone Company. The rates and charges associated with physical collocation are set forth in 17.7(A) following. Nonrecurring charges for additional engineering and labor incurred by the Telephone Company will be calculated on a time and material basis as specified in Section 13 preceding.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.5 Physical Collocation\*\* (Cont'd)

- (I) At the Telephone Company's option, the Telephone Company may provide facilities or equipment including, but not limited to, conduit, riser supports and termination frames, in such a fashion that the facilities or equipment is shared or used in common with other parties. Requests by an Interconnector for dedicated or special arrangements may result in additional charges.
- (J) If mutually agreed to by the Telephone Company and the Interconnector, the Telephone Company will perform Interconnector installation and/or maintenance work functions for an additional fee. The Telephone Company will be responsible for all maintenance and related activities on the Telephone Company side of the space. Telephone Company provided mechanical or fusion splices and other installation functions will be performed using methods consistent with Telephone Company practices. The charges for installation work functions performed by the Telephone Company on behalf of the Interconnector will be calculated on a time and material basis as specified in Section 13 preceding.
- (K) In the event the Telephone Company determines that it is necessary for the Interconnector to move its collocated space within a Telephone Company premises or to another Telephone Company premises, the Interconnector is required to comply. The Telephone Company is responsible for the costs associated with the removal, transport and reinstallation of the Interconnector's equipment within the Telephone Company premises.
- (L) Should the Interconnector request that its collocated space be moved within the Telephone Company premises or to another Telephone Company premises, the Telephone Company will permit the Interconnector to relocate its collocated space, subject to the availability of space and associated requirements. The Interconnector is solely responsible for the costs associated with the preparation of new collocated space at the new location and for the removal, transport and reinstallation of its equipment.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. ## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.5 Physical Collocation\*\* (Cont'd)

- (M) The Telephone Company and the Interconnector are each responsible for notifying the other of significant outages which could impact or degrade either party's network and services, and provide estimated clearing time for restoral. The Telephone Company and the Interconnector are responsible for testing, cooperatively if necessary, to identify and clear a trouble when the trouble has been sectionalized to the portion of the service each provides.
- (N) If trouble detected by or reported to the Telephone Company results in the Telephone Company dispatching its employees to the Interconnector's collocation space, and the trouble is not caused by Telephone Company equipment or facilities, the Interconnector will be so notified and will be liable for the maintenance of service charge as specified in Section 13.1.9 preceding.
- (O) The Interconnector and Telephone Company are each responsible for providing to the other a contact list of technical personnel accessible 24 hours a day, 7 days a week.
- (P) In the event that the Interconnector's use of its microwave or other wireless systems cause broadcast interference, the Telephone Company, at its sole discretion, shall have the right to cause the Interconnector to cease the operation of its system until such broadcast interference can be corrected. The Telephone Company shall incur no liability to the Interconnector or any other person as a result of ordering the Interconnector to cease using its system in accordance with the foregoing.
- (Q) Upon disconnection of service, the Interconnector shall, at its expense, disconnect and remove all Interconnector facilities and equipment from the collocation space and from all other Telephone Company owned or controlled areas in the Telephone Company premises in which the Telephone Company has allowed the Interconnector to place facilities and equipment.

\*\* Effective October 4, 2008, Physical Collocation will no longer be available to new customers requesting new arrangements at new locations. Physical Collocation is limited to existing customers purchasing Physical Collocation service as of October 4, 2008 at offices where they currently exist. Orders for new arrangements received prior to October 4, 2008 will be processed. Customers with existing arrangements may continue to augment (add to; or make changes to; or partial disconnection of) their existing arrangements in offices where they currently exist under the rates, terms and conditions of this tariff.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.6 Virtual Collocation

- (A) The Interconnector shall provide to the Telephone Company a written application for the provision of Virtual Collocation. Completed applications must be accompanied by the Application Fee set forth in 17.7(B)(1) and will be processed by the Telephone Company within 10 business days on a first-come, first-served basis. The Application Fee will be applied on a per end office basis.
- (B) If central office space is unavailable or if an Interconnector withdraws its request, the Application Fee, less the costs incurred by the Telephone Company (e.g., administrative activities required to process the application), will be refunded.
- (C) Virtual Collocation will be provided as specified below:
  - (1) The Interconnector shall bring its fiber optic cable to a manhole or other Telephone Company designated interconnection point. This interconnection point will define the physical demarcation between the Interconnector's transport facilities and the Telephone Company's network.
  - (2) The Interconnector must obtain the electronic and peripheral equipment necessary for terminating its network in the Telephone Company's central office. The Telephone Company will lease such equipment from the Interconnector for \$1 in each central office where the Interconnector subscribes to virtual collocation. Upon termination of the lease, the Interconnector is responsible for the cost of removing the equipment from the Telephone Company's central office.

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations

Monroe, Louisiana 71203

EFFECTIVE DATE:  
March 1, 2011

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.6 Virtual Collocation (Cont'd)

## (C) (Cont'd)

- (3) The Telephone Company has exclusive control of and responsibility for installation and maintenance of all terminating equipment dedicated to the Interconnector and located in the Telephone Company's central office.
- (4) The Interconnector must pay to train a minimum of three (3) Telephone Company personnel to install and maintain terminating equipment dedicated to the Interconnector which is not a type normally used in the Telephone Company's network, as well as provide sufficient spare parts to allow timely repairs. Installation and/or maintenance performed on equipment dedicated to an Interconnector under a virtual collocation arrangement will be charged to the Interconnector on a time and material basis. The associated labor charges are set forth in Section 13 preceding.
- (5) If the Telephone Company's labor contracts permit the use of third party contractors for the installation and/or maintenance of equipment of the type dedicated to the Interconnector, the Interconnector will be allowed the opportunity to contract with the Telephone Company to perform such installation and/or maintenance.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.6 Virtual Collocation (Cont'd)

## (C) (Cont'd)

- (6) The Telephone Company will restrict the amount of installed dedicated equipment based on the level of the current operational requirements of the Interconnector.
- (7) The Telephone Company will designate a point of connection (Cross-Connect) where its network connects with the virtually collocated terminating equipment. The Telephone Company will provide a cross-connect at the rates specified in Sections 17.7(B)(2) through (6) following.
- (8) When the Interconnector orders a DS3 electrical cross-connect for use with switched access services, the Interconnector must also order DS3 to DS1 multiplexing. DS3 to DS1 multiplexing provides an arrangement that multiplexes a single DS3 digital circuit at a rate of 44.736 Mbps to twenty-eight DS1 digital circuits. The rates for DS3 to DS1 multiplexing are specified in Section 6.8.2(D) preceding.

## ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)17.6 Virtual Collocation (Cont'd)

## (C) (Cont'd)

- (9) Expanded Interconnection is provided for the sole purpose of connecting an Interconnector's transport facilities to tariffed services of the Telephone Company, including unbundled local exchange network elements. Connection may only be made with the provision of Expanded Interconnection and only at the interconnection point designated by the Telephone Company. The Telephone Company will provide two separate points of entry to the central office for service to Interconnectors, where there are two entry points for the Telephone Company's cable facilities, except where one entry of a two-entry office is filled to capacity.
- (10) If trouble detected by, or reported to, the Telephone Company is caused by equipment leased from the Interconnector, the Interconnector will be so notified and will be liable for the maintenance visit charge as specified in Section 13.1.9 preceding, in addition to any other applicable charges as set forth in this tariff.

ACCESS SERVICE

17. Expanded Interconnection Services (Cont'd)

17.6 Virtual Collocation (Cont'd)

- (D) The Telephone Company and the Interconnector are each responsible for notifying the other of significant outages which could impact or degrade either party's network and services, and provide estimated clearing time for restoral. The Telephone Company and the Interconnector are responsible for testing, cooperatively if necessary, to identify and clear a trouble when the trouble has been sectionalized to the portion of the service each provides.

## ACCESS SERVICE

18. State Government Transmission Resource Management Services

This section includes the rates and regulations for the provision of Transmission Resource Management (TRM) services to a state government.

18.1 Service Components and Description

TRM is a bandwidth management service that also provides voice compression and the integration of voice and data at the DS0, DS1, and DS3 level. TRM services interface with the voice grade, digital data and high capacity special access services offered in Sections 7.2.2, 7.2.7 and 7.2.8 preceding.

The individual rate elements offered as a part of TRM service are described following:

- (A) IDNX/20 Node - provides multiplexing capability for up to 15 DS1 access services or 360 DS0 access services.
- (B) IDNX/90 Node - provides multiplexing capability for up to 14 DS1 access services or up to 336 DS0 access services with the potential to expand to support DS3 access services.
- (C) IDNX/90 Expansion Node - provides multiplexing capability for up to 16 DS1 access services, with the potential to expand to support DS3 access services.
- (D) DS1 Internodal Connection - provides a DS1 access interface between two nodes.
- (E) DS1 Port Connection - provides a DS1 access interface between a node and an end user.
- (F) DS3 Internodal Connection - provides a DS3 access interface between two nodes.
- (G) Analog/Voice Grade Connection - provides a 4 wire analog or voice grade access service interface between a node and the end user.

## ACCESS SERVICE

18. State Government Transmission Resource Management Services (Cont'd)18.1 Service Components and Description (Cont'd)

- (H) Data Service Connection (QASD Module) - provides a digital data interface at rates from 1.2 Kbps to 56.0 Kbps between the node and the end user.
- (I) Data Service Connection (DSOA Module) - provides a digital data interface at rates of 64.0 kbps between the node and the end user.
- (J) Data Service Connection (HSD-2 Module) - provides a digital data interface at rates from 9.6 kbps to 1.344 Mbps between the node and the end user.
- (K) Voice Compression (VC31 Module) - provides compression of up to thirty-one voice channels with no reduction in voice quality.
- (L) Voice Compression (VC62) - provides compression of up to sixty-two voice channels with no reduction in voice quality.
- (M) Packet Routing (PX-2 Module) - provides multi-protocol routing and bridging for up to eight serial lines which may be mapped to any of the data service interfaces or to other serial lines on other packet routing arrangements.
- (N) Packet Routing (PX Plus Module) - provides multi-protocol routing and bridging for up to eight serial lines which may be mapped to any of the data service interfaces or to other serial lines on other packet routing arrangements. The buffer size is greater for the PX Plus Module than for the PX-2 Module and the PX Plus Module is better utilized in a hubbing arrangement.
- (O) MAC Bridging Software - provides software support for routing and bridging protocols associated with Packet Routing.
- (P) Source Route Bridging Software - provides software support for routing and bridging protocols associated with Packet Routing.

## ACCESS SERVICE

18. State Government Transmission Resource Management Services (Cont'd)18.1 Service Components and Description (Cont'd)

- (Q) ISO/CLNS Software - provides software support for routing and bridging protocols associated with Packet Routing.
- (R) SDLC Connectivity Software - provides software support for routing and bridging protocols associated with Packet Routing.
- (S) X.25/Frame Relay DTE Software - provides software support for routing and bridging protocols associated with Packet Routing.
- (T) Frame Switching (PX-2 Module) - provides frame switching for up to eight serial lines which may be mapped to any of the data interfaces or to other serial lines on other frame switching arrangements.
- (U) Frame Switching (PX Plus Module) - provides frame switching for up to eight serial lines which may be mapped to any of the data interfaces or to other serial lines on other frame switching arrangements. The buffer size is greater for the PX Plus Module than for the PX-2 Module and the PX Plus Module is better utilized in a hubbing arrangement.
- (V) IDNX/20 Node Monitoring - provides remote electronic monitoring of an IDNX/20 Node to ensure service quality and prompt identification of network difficulties.
- (W) IDNX/70/90 Node Monitoring - provides remote electronic monitoring of an IDNX/70/90 Node to ensure service quality and prompt identification of network difficulties.
- (X) Promina 800 Node – provides multiplexing capability for DS1 or DS3 access.

## ACCESS SERVICE

18. State Government Transmission Resource Management Services (Cont'd)18.2 Rate Regulations

The rates and charges for state government TRM services are as set forth in Section 18.3 following, and are in addition to any applicable rates and charges set forth in other sections of this tariff. There are two types of rates and charges that may apply to state government TRM services. These are monthly recurring rates and nonrecurring charges, both of which are billed in advance.

18.2.1 Description and Application of Rates and Charges(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service). Nonrecurring charges may apply to each state government TRM component installed.

18.2.2 Moves

A move involves a change in the physical location of the state government TRM component. Moves will be treated as a discontinuance and start of service, and all associated nonrecurring charges will apply. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

## ACCESS SERVICE

19. Promotional Offerings19.1 General

The Telephone Company may, from time to time, engage in special promotional service offerings, special arrangements or demonstrations designed to attract new customers, to stimulate customer usage and/or to increase existing customer awareness of Telephone Company products and services.

These promotional offerings will be limited to certain dates, times and locations as determined by the Telephone Company. The rates, charges, terms and/or conditions applicable to each promotional offering will be filed in this section.

19.2 Terms, Conditions, Rates and Charges

The specific rates, charges, terms and/or conditions for the promotions offered by the Telephone Company are described following:

(A) Custom Access Solutions

The Custom Access Solutions promotion waives the nonrecurring charges, as set forth in 8.7.5 preceding, when a customer installs a new Custom Access Solutions arrangement under a three year minimum service period.

In the event the customer terminates its Custom Access Solutions arrangement prior to the expiration date of the three year term, any nonrecurring charges waived under this promotion will be included in the calculation of the customer's termination liability charges as set forth in 8.7.2(A) preceding.

The promotion will begin on November 4, 2006, and will apply to all new Custom Access Solutions orders through January 31, 2007. The promotion is available to all customers served by suitably equipped Telephone Company wire centers identified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

## ACCESS SERVICE

20. Local Number Portability (LNP) Query Service20.1 General

LNP provides the capability that allows a customer to maintain the same Directory Number (DN) when changing from one local telecommunications service provider to another, while remaining at the same location. In addition, it allows other Telephone Company customers to complete calls to numbers that have been ported.

LNP Query Service utilizes Location Routing Number (LRN) architecture to query a data base to secure network routing instructions prior to completion of a call. For NXXs equipped with LNP capability, the data base will contain information identifying an end user's selected Local Service Provider (LSP), along with the appropriate LRN for the LSP's switch. The LRN will be used to direct the call to the correct switch for completion to the end user. When more than one network is involved in completing the call, the network immediately preceding the terminating network (i.e., the N-1 Network) is responsible for querying the LNP data base to secure the LRN used in routing the call.

LNP Query Service will initially be deployed in Telephone Company serving areas residing within the 100 largest national Metropolitan Statistical Areas (MSAs) on a switch specific basis. If subsequent deployment is requested in additional switches within these MSAs, the Telephone Company will provide portability in the requested switches, where technically feasible, based on the timeframes established by the Federal Communications Commission in CC Docket No. 95-116:

- Equipped remote switches within 30 days
- Hardware capable switches within 60 days
- Capable switches requiring hardware within 180 days
- Non-capable switches within 180 days

ISSUE DATE:  
February 28, 2011

Issued Under Transmittal No. 1  
Vice President-Regulatory Operations  
100 CenturyLink Drive  
Monroe, Louisiana 71203

EFFECTIVE DATE:  
March 1, 2011

## ACCESS SERVICE

20. Local Number Portability (LNP) Query Service (Cont'd)20.2 Service Provisioning(A) Manner of Provisioning

LNP Query Service will be provisioned using the LRN architecture. The LRN associates an NPA-NXX-XXXX network routing number with each central office switch that serves ported lines. This number will be known as the LRN for that switch. The LRN will be used as a network routing number for calls to ported numbers served by that switch. All switching equipment types will utilize the LRN architecture to provide LNP call processing.

(B) Limitations

LNP Query Service is to be used only on a call-by-call basis for routing calls to number portable NXX codes and cannot be used for purposes other than those functions described herein.

Information residing in the Telephone Company's LNP data base is protected from unauthorized access and may not be stored in a carrier's data base or elsewhere for any reason.

(C) Network Management

The Telephone Company will administer its network to ensure the provision of acceptable service levels to all users of the LNP Query Service.

The Telephone Company reserves the right to block any LNP Query traffic in a nondiscriminatory manner, where the processing of the LNP queries threatens to disrupt operation of its network and impair network reliability.

ISSUE DATE:  
February 28, 2011

## ACCESS SERVICE

20. Local Number Portability (LNP) Query Service (Cont'd)20.3 LNP Query Service Application

The applications of the LNP network capability available through the Telephone Company's network are:

(A) Prearranged LNP Query

N-1 carriers may arrange in advance to have the Telephone Company query the LNP data base to route a call properly to the terminating carrier serving the ported number. This query is initiated on behalf of the N-1 carrier in the performance of its N-1 responsibility.

- If the Telephone Company's end office is the first point of switching for terminating a non-queried call and the telephone number is a ported number, the end office switch will suspend the call process and launch a query to the LNP data base. Once the routing information is returned to the end office, call processing will be resumed and the call will be routed to the correct switch for completion.
- In situations where the Telephone Company's tandem is the first point of switching for terminating a non-queried call, the tandem switch will suspend the call process and launch a query to the LNP data base. Once the routing information is returned to the tandem switch, call processing will be resumed and the call will be routed to the correct switch for completion.

The carrier will be assessed an end office or tandem Prearranged LNP Query charge, as set forth in 20.5 following, regardless of the outcome of the query.

(B) Default LNP Query

N-1 carriers who do not prearrange with the Telephone Company to query the LNP data base and terminate calls into the Telephone Company's network without having performed the appropriate data base query will be

## ACCESS SERVICE

20. Local Number Portability (LNP) Query Service (Cont'd)20.3 LNP Query Service Application (Cont'd)(B) Default LNP Query (Cont'd)

assessed an end office or tandem Default LNP Query charge. This query is initiated on behalf of the N-1 carrier in the performance of its N-1 responsibility, and may require the Telephone Company to assume extraordinary measures to meet the demand of the unforecasted default queries.

- If the Telephone Company's end office is the first point of switching for terminating a non-queried call and the telephone number is a ported number, the end office switch will suspend the call process and launch a query to the LNP data base. Once the routing information is returned to the end office, call processing will be resumed and the call will be routed to the correct switch for completion.
- In situations where the Telephone Company's tandem is the first point of switching for terminating a non-queried call, the tandem switch will suspend the call process and launch a query to the LNP data base. Once the routing information is returned to the tandem switch, call processing will be resumed and the call will be routed to the correct switch for completion.

The Default LNP Query charge, as set forth in 20.5 following, will apply, regardless of the outcome of the query.

## ACCESS SERVICE

20. Local Number Portability (LNP) Query Service (Cont'd)20.4 Rate Regulations

The rates and charges associated with LNP Query Service are query based and will be billed on a monthly basis, based on recorded usage. Query charges will be applied by the Telephone Company based upon the recordings of carrier queries to the data base. The Telephone Company will develop monthly charges based on an average number of queries per month if recordings are not available.

Specific rates and charges are set forth in 20.5 following.

## ACCESS SERVICE

21. Pricing Flexibility Switched Access Service21.1 General Regulations

(A) This section of the tariff provides the regulations, rates and charges applicable to dedicated switched transport services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) for which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's rules. The specific MSAs for which pricing flexibility has been granted are listed in Section 21.3 following.

(B) The pricing flexibility dedicated switched transport services provided in MSAs pursuant to this section include:

- Voice Grade, DS1 and DS3 Entrance Facilities
- Voice Grade, DS1 and DS3 Direct-Trunked Transport
- Dedicated Trunk Ports
- DS1 to Voice and DS3 to DS1 Multiplexing
- Switched Transport Installation
- CCS/SS7 Interconnection Service

The general regulations, service descriptions, optional features, service provisioning, obligations of the Telephone Company and customer, and rate regulations set forth in Sections 6.1 through 6.7 preceding for switched access services are applicable to the pricing flexibility services specified in this section. Where the regulations in Section 6 conflict with those set forth in this section, the regulations specified herein for the provision of switched access services in the Telephone Company's pricing flexibility MSAs will supercede any inconsistencies.

(C) Unless otherwise provided in this section, the regulations set forth in Sections 1, 2, 5, and 13 are applicable to switched access services provided in the Telephone Company's pricing flexibility MSAs.

## ACCESS SERVICE

21. Pricing Flexibility Switched Access Service (Cont'd)21.2 Application of Rates and Charges

The rates and charges for switched access services provided in pricing flexibility MSAs are set forth in 21.8 following. Rates and charges for the non-flexibility service areas are set forth in Section 6.8 preceding. When switched access service in a pricing flexibility MSA is provided under a zone density plan as set forth in Section 6.7.17, channel mileage will be deemed to be offered in the highest priced zone.

The following examples depict a typical switched dedicated point-to-point service provided within a pricing flexibility MSA, and between a pricing flexibility MSA and a non-flexibility service area.

**(A) Switched Access Service within a Pricing Flexibility MSA**

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service22.1 General Regulations

(A) This section of the tariff provides the regulations, rates and charges applicable to special access services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) for which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's rules. The specific MSAs for which pricing flexibility has been granted are listed in Section 22.3 following.

(B) The pricing flexibility special access services provided in MSAs pursuant to this section include:

- Voice Grade
- Program Audio
- Video
- 270 Mbps Digital Video Transport Service
- Digital Data
- High Capacity
- Shared SONET Ring
- Gateway SONET Ring

The general regulations, service descriptions, channel interface and network channel codes, and rate regulations set forth in Sections 7.1 through 7.4 preceding for special access services are applicable to the pricing flexibility services specified in this section. Where the regulations in Section 7 conflict with those set forth in this section, the regulations specified herein for the provision of special access services in the Telephone Company's pricing flexibility MSAs will supercede any inconsistencies.

(C) Unless otherwise provided in this section, the regulations set forth in Sections 1, 2, 5, and 13 are applicable to special access services provided in the Telephone Company's pricing flexibility MSAs.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.2 Application of Rates and Charges

The rates and charges for special access services provided in pricing flexibility MSAs are set forth in 22.5 following. Rates and charges for the non-flexibility service areas are set forth in Section 7.5 preceding. When special access service in a pricing flexibility MSA is provided under a zone density plan as set forth in Section 7.4.10, channel mileage will be deemed to be offered in the highest priced zone.

The following example depicts a typical special access service configuration provided between a pricing flexibility MSA and a non-flexibility service area.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions

For purposes of ordering, there is one category of Special Access Service. It is:

270 Mbps Digital Video Transport Service (TD)

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service is described in this section.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Labor Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service(A) Basic Service Description

270 Mbps Digital Video Transport Service (270 Mbps DVTS) is a broadband digital video transport channel with one way transmission capability. 270 Mbps DVTS provides 270 Mbps high quality video as defined by the Society of Motion Picture and Television Engineers (SMPTE) Standard 259M. This standard describes a serial digital interface, 525 line/60 field National Television Systems Committee (NTSC) digital television equipment operating with 4:2:2 serial component signals that conform to American National Standards Institute (ANSI) digital format. The service may include up to four 20 kHz Audio Engineering Society (AES) /European Broadcasting Union (EBU) digital audio signals. 270 Mbps DVTS is available where technically feasible.

270 Mbps DVTS is available, where facilities exist, on a per event basis with per event rates or on a full-time basis at month-to-month rates or for periods of three or five years. Separate nonrecurring installation , channel termination and channel mileage (termination and facility per mile) rates, as set forth in 22.5.5(A) and (B) following, apply for monthly 270 Mbps DVTS. The per event rate applies to customers ordering 270 Mbps DVTS for not more than 10 days. For events exceeding 10 days, the monthly recurring and nonrecurring charges will apply.

When special construction of facilities is required for the provision of 270 Mbps DVTS, the rates and regulations set forth in Section 14 preceding with apply.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service (Cont'd)

## (A) (Cont'd)

For 270 Mbps DVTS, the standby of technician(s) may be required. The Telephone Company will inform the customer of standby charges before providing a Firm Order Confirmation Date. Standby charges are set forth in Section 13.2 following.

(1) Technical Specifications

The technical specifications for 270 Mbps DVTS are delineated in Technical Publication ANSI / SMPTE 259M, Revised 1997.

(2) Channel Interfaces

The following channel interface (CI) defines the bandwidth and the provision of audio signals associated with 270 Mbps DVTS.

<u>CI</u>	<u>Description</u>
02TD6-E	The transport of an uncompressed serial digital signal containing component video and ancillary signals.

Compatible channel interfaces are set forth in 22.4.1(B)(3) following.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service (Cont'd)(A) Basic Service Description (Cont'd)(3) Termination Liability

If the customer requests that the service be disconnected prior to the end of the three or five year commitment period, termination liability charges equal to 80% of the remaining months of the term will apply. For example, a customer disconnecting service in the 12th month of a 3 year plan will be charged 80% of the remaining 24 months of billing. The Federal Government and its authorized agents are exempt from the 80% termination liability penalty charge if service is discontinued prior to the expiration of the three or five year minimum commitment period.

Additionally, customer may disconnect 270 Mbps DVTS, without penalty, should the total monthly recurring rates associated with 270 Mbps DVTS increases by 10% or more at any one time. The customer must notify the Telephone Company in writing within 90 days after the effective date of the rate increase if they elect to discontinue service. Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service period.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)2.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service (Cont'd)(A) Basic Service Description (Cont'd)(4) Renewal

If the customer has not specified renewal terms in writing 90 days prior to the expiration of the three or five year minimum commitment period, the commitment period and 270 Mbps DVTS rates in effect at the time of expiration will automatically renew. Alternatively, 90 days prior to the expiration of the three or five year period the customer may specify in writing their intent to continue use of their 270 Mbps DVTS at the prevailing month-to-month rates in 22.5.5 following or terminate 270 Mbps DVTS at the end of the minimum commitment period with no penalty or obligation to continue the service.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service (Cont'd)(C) Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for 270 Mbps DVTS. The type of rates and charges are:

(1) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(2) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The Telephone Company does not apply nonrecurring charges to the channel mileage (fixed or per mile) elements. When service is jointly provided under the Single Bill Method of Multiple Company (Interconnection Point) Billing, the nonrecurring charges are applicable to all nonrecurring functions in the provision of Special Access Service. Under the Multiple Bill Method, the nonrecurring charges are applicable only when the nonrecurring function occurs within the Telephone Company's territory. The types of nonrecurring charges that apply for Special Access Service are: installation of service, installation of optional features and functions, and service rearrangements.

## ACCESS SERVICE

22. Pricing Flexibility Special Access Service (Cont'd)22.4 Service Descriptions (Cont'd)22.4.1 270 Mbps Digital Video Transport Service (Cont'd)(C) Rate Regulations (Cont'd)(3) Per Event Rates

The per event rate is a nonrecurring charge that applies to 270 Mbps Digital Video Transport Service requested for events to be in service not more than 10 days. For events exceeding 10 days, the monthly rates and nonrecurring charges will apply. For purposes of applying per event rates, the 24 hour period is not limited to a calendar day.

(4) Minimum Periods

The minimum service period for 270 Mbps Digital Video Transport Service, except per event 270 Mbps Digital Video Transport Service, is one month. The minimum service period for per event 270 Mbps Digital Video Transport Services is one day (i.e., a continuous 24 hour period, not limited to a calendar day).

## ACCESS SERVICE

23. Pricing Flexibility Ordering Options, Additional Labor and Miscellaneous Services23.1 General Regulations

- (A) This section of the tariff provides the regulations, rates and charges applicable to ordering options, additional labor and miscellaneous services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) for which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's rules. The specific MSAs for which pricing flexibility has been granted are listed in Section 23.3 following.
- (B) The general regulations set forth in Section 5 for Ordering Options and in Section 13 for Additional Labor and Miscellaneous Services preceding are applicable to the pricing flexibility services specified in Sections 21 and 22 preceding. Where the regulations in Sections 5 and 13 conflict with those set forth in this section, the regulations specified herein for the provision of switched and special access services in the Telephone Company's pricing flexibility MSAs will supercede any inconsistencies.
- (C) Unless otherwise provided in this section, the regulations set forth in Sections 1 and 2 are applicable to ordering options, additional labor and miscellaneous services provided in the Telephone Company's pricing flexibility MSAs.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings24.1 General

The Telephone Company may, from time to time, offer special contract pricing to customers located in Metropolitan Statistical Areas (MSAs) for which the Telephone Company has received pricing flexibility pursuant to Subpart H of Part 69 of the Commission's rules. The specific MSAs for which pricing flexibility has been granted are identified following:

Fort Myers – Cape Coral, Fort Walton Beach – Crestview, Ocala, Orlando and Tallahassee, Florida; Fayetteville, Greenville, Hickory and Rocky Mount, North Carolina; Middlesex – Somerset – Hunterdon, New Jersey; Las Vegas, Nevada; Lima and Mansfield; Ohio, Harrisburg, Pittsburgh and York, Pennsylvania; Johnson City – Kingsport – Bristol, Tennessee/Virginia; Dallas, Texas; and Charlottesville, Virginia.

The rates, charges, terms and conditions applicable to each pricing flexibility contract will be filed in this section. Services provided under the following contract offers are subject to the regulations set forth in all other sections of this tariff, unless otherwise specified. Where the regulations in other sections conflict with those set forth in this section, the regulations specified herein for the provision of interstate access services under a pricing flexibility contract offering will supercede any inconsistencies.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.2 Contract No. 03-001 - DS3 New Connect Discount Offer

The DS3 New Connect Discount Offer provides a credit equal to one month's recurring charges when customers order new DS3 special access circuits under a three year minimum service period, or a credit equal to two months' recurring charges when customers order new DS3 special access circuits under a five year minimum service period.

The contract offer will be in effect from September 1, 2003 through November 30, 2003, and will be available for new DS3 circuits ordered in one of the following pricing flexibility MSAs:

Orlando, Florida  
Las Vegas, Nevada  
Fayetteville, North Carolina  
Greenville, North Carolina

The DS3 monthly recurring rate elements that will be credited include the channel termination, channel mileage termination (fixed), channel mileage facility (per mile) and multiplexing. The total credit will be applied on the customer's second month's billing.

In the event the DS3 service is disconnected prior to the expiration date of the three or five year minimum service period, appropriate termination liability charges will be assessed, along with any monthly recurring charges credited under this contract offer.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.3 Contract No. 10-001

DESCRIPTION: Discounted Ethernet Virtual Private Line (EVPL)

CONTRACT  
AVAILABILITY: Effective from September 17, 2010 through October 16, 2010

CONTRACT  
EFFECTIVE DATE: August 14, 2010

AMENDED CONTRACT  
EFFECTIVE DATE: September 17, 2010

CONTRACT  
EXPIRATION DATE: 7 Years

AVAILABLE MSAs: Las Vegas, Nevada

This contract offering provides for discounted pricing for Ethernet Virtual Private Line (EVPL) special access circuits ("Discounted Rate") provided by the Telephone Company to the customer within the Las Vegas, Nevada MSA. Each rate element associated with the EVPL circuit will be discounted.

In order for the customer to qualify to receive billing at the Discounted Rate for the EVPL circuit, the customer must meet the following conditions on the effective date of this contract:

- customer must currently subscribe to the Revenue Volume Discount Plan;
- customer must order each EVPL circuit at a minimum bandwidth of 50 Mbps.

The term of each EVPL circuit ordered under this contract shall be seven (7) years. When a seven (7) year term commitment option for EVPL service is included in a generally available tariff offering, the customer shall withdraw from this contract and have such EVPL circuits governed by the provisions set forth in that tariff offering, as amended, except that, upon such election, the circuit service term applicable to each EVPL circuit installed pursuant to this contract expiration date shall not be extended, and the contract expiration date specified in this contract shall control. There will be no termination liability incurred under this contract tariff should the customer elect to have the EVPL circuits governed by the generally available tariff offering. In addition, the customer may terminate this contract tariff offering in its entirety and any services purchased hereunder, without incurring any early termination liability charges, if by January 1, 2011, the Telephone Company does not make generally available in its tariffs a seven (7) year term commitment option for EVPL service containing the terms in this contract.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.3 Contract No. 10-001 (Cont'd)

The EVPL Channel Mileage and QoS rate elements will not apply to secondary EVCs under this contract tariff. The primary EVC and secondary EVC must terminate at the same location and the secondary EVC going to the customer designated premises shall be equal in bandwidth to that of the primary EVC. The customer will determine the primary EVC and will be responsible for managing the traffic onto such primary EVC. In the event of a failure of the primary route EVC, the customer may redirect the traffic to the secondary EVC. Either EVC, but not both EVCs, may be used by the customer at any given time to transport the customer's traffic. The Telephone Company will make both EVCs available to the customer at all times, and the designation of "primary" shall mean at any given time, the EVC in fact carrying the customer's traffic. The secondary EVC is only used in the event of interruption of the primary EVC.

The Telephone Company will apply the Discounted Rate on the first full invoice following the effective date of this contract offering and will continue to bill the customer using the Discounted Rate for each EVPL circuit for a period of 7 years after each such circuit is installed. The customer will receive the Discounted Rate for all EVPL circuits ordered under this contract tariff.

The monthly recurring revenue from the Discounted Rate EVPL circuits will be included in the calculation to determine which RVDP discount tier is applicable to the customer for services purchased under the RVDP, however, no additional discount under the Revenue Volume Discount Plan will be applied to the Discounted Rate EVPL circuits provided under this contract tariff.

Termination Liability

If during the term of this contract the customer terminates an EVPL circuit prior to the end of the 7 year commitment period, termination liability charges will apply as follows:

- 1) an amount equal to 100% of the MRCs for each EVPL circuit for the months remaining in year 1, if any, plus
- 2) an amount equal to 50% of the MRCs for each EVPL circuit for the months remaining in year 2 through year 5, if any, plus
- 3) an amount equal to 20% of the MRCs for each EVPL circuit for the months remaining in year 6 and year 7.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.3 Contract No. 10-001 (Cont'd)Chronic Interruption

For purposes of this contract tariff, a Chronic Interruption is defined as (1) an interruption in service due to a failure on the core portion of the EVPL network on four (4) or more separate occasions of five (5) minutes or more each, or twenty-four (24) hours or more in the aggregate, in any calendar month; or (2) both EVCs do not meet the standards provided in 7.4.20(D) preceding in any three (3) separate months during any period of six (6) consecutive months.

When a Chronic Interruption occurs with respect to EVPL, the Telephone Company will provide to the customer, within ten (10) calendar days of the last interruption, a detailed report with respect to such interruptions on the EVPL service that will include the root causes of such interruptions, remedial actions being taken to prevent similar future Chronic Interruptions and timelines for the completion of such actions. The Telephone Company will provide bi-weekly written updates on the progress of such remedial actions until completed to the reasonable satisfaction of the customer. The timeline for the completion of such remedial actions will not exceed thirty (30) days. If after the completion of such remedial actions an interruption or performance failure occurs on the same EVPL service, or the Telephone Company fails to complete such remedial action within such thirty (30) day period, the customer may terminate the affected EVPL service without incurring early termination liability charges, upon providing written notice of such termination to the Telephone Company within twelve (12) months of the date of the last interruption triggering a Chronic Interruption.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.3 Contract No. 10-001 (Cont'd)Terms and Conditions

Neither the Telephone Company or the Customer may assign, delegate, subcontract or otherwise transfer its rights or obligations under this contract tariff, except with the prior written consent of the other Party; provided however, that the Telephone Company or Customer will have the right to assign this contract tariff to any affiliate or any entity into which the Telephone Company or Customer may be merged or any Party which purchases substantially all of the assets of the Telephone Company or customer without securing the consent of the other Party, and both the Telephone Company and Customer may assign their respective right to receive money due hereunder. Any assignment or transfer for which consent is required hereby and which is made without such consent will be void. It is expressly agreed that any assignment of money will be void if (i) the assignor fails to give the non-assigning Party at least thirty (30) days prior written notice; or (ii) the assignment imposes or attempts to impose upon the non-assigning Party additional costs or obligations in addition to the payment of such money; or (iii) the assignment attempts to preclude a party from dealing solely and directly with the other Party in all matters pertaining to this contract tariff; or (iv) the assignment denies, alters or attempts to alter any of the non-assigning Party's rights hereunder.

This contract tariff shall be binding upon, and inure to the benefit of each Party's successors and assigns.

All bill amounts, any late payments or disputed amounts will be subject to the regulations in Section 2.4.1 of this tariff.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.4 Reserved For Future Use24.5 Contract No. 06-001

DESCRIPTION: Within CO Channel Terminations – DS1 and DS3

CONTRACT  
AVAILABILITY: Effective from January 5, 2011 through  
February 4, 2011

CONTRACT  
EFFECTIVE DATE: January 6, 2006

AMENDED CONTRACT  
EFFECTIVE DATE: January 5, 2011

CONTRACT  
EXPIRATION DATE: 5 Years

AMENDED CONTRACT  
EXPIRATION DATE: 12 Months

AVAILABLE MSAs: Las Vegas, Nevada

This contract tariff is for DS1 and DS3 channel terminations (CTs) that are provisioned for the customer within the Telephone Company's Central Office Buildings that are located in the Las Vegas, Nevada MSA. To qualify for the pricing as presented in this contract tariff a channel termination must be wholly contained within one of the Telephone Company's Central Office Buildings in the Las Vegas, Nevada MSA (qualifying channel termination). That is the customer designated premises and the serving wire center of a channel termination must be the same location.

In order to qualify for this contract tariff a customer must, on the day immediately preceding the effective date of this tariff, be subscribing to a minimum of 225 DS1 and a minimum of 225 DS3 qualifying interstate special access channel terminations as described above, and must also have at least 70% of it non-expanded interconnection collocations in the Las Vegas, Nevada MSA eligible for conversion to expanded interconnection collocation. Each channel termination counted for the purpose of meeting these minimum requirements must be currently billed the designated Within CO rate for the applicable service type, zone, and must be committed to a Telephone Company special access term discount plan (TDP) as set forth in Section 22 of this tariff. For the remainder of the contract effective period, the customer must maintain a minimum of 175 DS1 and a minimum of 175 DS3 qualifying interstate special access channel terminations as described above.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.5 Contract No. 06-001 (Cont'd)

Upon the effective date of this contract tariff, and upon customer meeting the above described qualifications, the Telephone Company will apply the applicable rate from the following table to each qualifying channel termination billed to customer, beginning with the first bill issued following the effective date of this contract tariff. The rates will be applied to all qualifying channel terminations in service as of the effective date of this contract tariff as well as to any future additions of qualifying channel terminations. This contract tariff and the prices provided herein apply only to qualifying channel terminations. No other DS1 or DS3 channel terminations, no other rate elements applicable to DS1 and DS3 services, and no other rate elements (including any channel termination rates) applicable to any other services are affected by this contract tariff.

From the effective date of this contract tariff, and subject to customer's continued compliance with the minimum quantities of qualifying channel terminations, the Telephone Company will bill customer the rates as specified in the following rate table for a period of five years. The rate to be billed for an individual qualifying channel termination is dependent on the service type, plan, and zone applicable to that channel termination as described in Section 22 of this tariff.

24. Pricing Flexibility Contract Offerings (Cont'd)24.5 Contract No. 06-001 (Cont'd)

If during the term of this contract tariff customer fails to meet the minimum quantity of qualifying channel terminations set forth above, then for each month in which this occurs the Telephone Company will debit customer's Special Access Billing Account Numbers (BANs) in Las Vegas, Nevada the difference between the then applicable channel termination rates as set forth in Section 22 or other applicable sections of this tariff and the channel termination rates set forth in the table below for all channel terminations under this contract tariff. This debit will appear on the invoice issued to the customer for the month immediately following the non-qualifying month. If the customer falls below the minimum commitment of 175 DS1 and 175 DS3 qualifying interstate special access channel terminations they may, at their sole discretion, cancel this contract tariff. There shall be no early termination penalties or liabilities applied should the customer terminate this contract tariff before the end of the 5 year commitment. Any termination of this contract by the customer must be in writing with a minimum of thirty (30) days notice. The rates and terms in Section 22 of this tariff shall apply from the date of the termination notice until the applicable circuits are disconnected.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.5 Contract No. 06-001 (Cont'd)Terms and Conditions

Customer may not assign or transfer, whether by operation of law or otherwise, this contract, or any right or obligations hereunder, to a third party without the written consent of the Telephone Company, which written consent shall not be unreasonably withheld.

In calculating the minimum number of qualifying channel terminations of DS1 and DS3 special access services required under this contract tariff, and in determining which of customer's channel terminations are eligible for the rates set forth in this contract tariff, qualifying channel terminations shall not include those provided by the Telephone Company to any other customer as of the effective date of this contract tariff, nor shall any channel terminations be included even if customer merges with, acquires, or is acquired by any third party as long as, at the time of such merger or acquisition, said third party is not also a customer of this contract tariff.

Billed amounts must be paid in full and on time. Any late payments or disputed amounts shall be subject to Section 2.4.1 of this tariff.

Amendment – Extension of Contract

The amendment to Contract No. 06-001 allows the customer to extend, for an additional twelve (12) months, all rates, terms and conditions specified in this contract tariff upon expiration of the initial five (5) year term.

DESCRIPTION: Special Access DS3 Circuit Flat Rate

CONTRACT  
AVAILABILITY: Effective from January 29, 2011 through February 28, 2011

CONTRACT  
EFFECTIVE DATE: January 29, 2011

CONTRACT  
EXPIRATION DATE: June 28, 2013

AVAILABLE MSAs: Johnson City- Kingsport-Bristol, Tennessee

This contract tariff offering provides for flat rated billing for special access DS3 circuits ("Flat Rate") provided by the Telephone Company to the customer within the Johnson City-Kingsport-Bristol, Tennessee MSA.

In order for the customer to qualify to receive billing at the Flat Rate for the DS3 circuit, the customer must meet the following conditions on the effective date of this contract tariff:

- customer must currently subscribe to the Revenue Volume Discount Plan;
- customer agrees to install 13 DS3 circuits in the Johnson City-Kingsport-Bristol, Tennessee MSA.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.6 Contract No. 11-001 (Cont'd)

Upon the effective date of this contract tariff offering and with customer's full compliance with all of the conditions of this offer; the Telephone Company will begin to bill the customer, upon completion of each order, using the Flat Rate monthly recurring rate of \$1,315.00 for each DS3 circuit installed.

The monthly recurring revenue from the Flat Rate DS3 circuits will be included in the calculation to determine which RVDP discount tier is applicable to the customer for services purchased under the RVDP, however, no additional discount will be applied to the Flat Rate DS3 circuits.

Term Extension

Upon the contract tariff expiration date, the customer may extend this contract tariff for up to a maximum of an additional 12 months at the rates, terms and conditions defined herein.

Termination Liability

If the customer terminates any portion of this contract prior to contract tariff expiration date, the customer will be billed termination liability charges equal to 50% of the monthly recurring charges for each DS3 circuit disconnected for the remaining months in the committed term. For example, assuming a three year committed term, a customer who disconnects a Flat Rate DS3 circuit in month 24 will be charged 50% of the Flat Rate monthly recurring rate of \$1,315.00 times 36 months. (\$657.50 times 36 months = \$23,670.00). Termination liability charges will not apply during any term extension.

24. Pricing Flexibility Contract Offerings (Cont'd)24.6 Contract No. 11-001 (Cont'd)Terms and Conditions

Neither the Telephone Company or the Customer may assign, delegate, subcontract or otherwise transfer its rights or obligations under this contract tariff, except with the prior written consent of the other Party; provided however, that the Telephone Company or Customer will have the right to assign this contract tariff to any affiliate or any entity into which the Telephone Company or Customer may be merged or any Party which purchases substantially all of the assets of the Telephone Company or customer without securing the consent of the other Party, and both the Telephone Company and Customer may assign their respective right to receive money due hereunder. Any assignment or transfer for which consent is required hereby and which is made without such consent will be void. It is expressly agreed that any assignment of money will be void if (i) the assignor fails to give the non-assigning Party at least thirty (30) days prior written notice; or (ii) the assignment imposes or attempts to impose upon the non-assigning Party additional costs or obligations in addition to the payment of such money; or (iii) the assignment attempts to preclude a party from dealing solely and directly with the other Party in all matters pertaining to this contract tariff; or (iv) the assignment denies, alters or attempts to alter any of the non-assigning Party's rights hereunder.

This contract tariff shall be binding upon, and inure to the benefit of each Party's successors and assigns.

All bill amounts, any late payments or disputed amounts will be subject to the regulations in Section 2.4.1 of this tariff.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.7 Contract No. 07-001

DESCRIPTION: DS3 Flat Rated Interoffice Mileage

CONTRACT  
AVAILABILITY: Effective from June 19, 2007 through  
July 18, 2007

CONTRACT  
EFFECTIVE DATE: February 17, 2007

AMENDED CONTRACT  
EFFECTIVE DATE: June 5, 2007

CONTRACT  
EXPIRATION DATE: 5 Years

AVAILABLE MSAs: Las Vegas, NV

This contract offering provides for flat rated, non-mileage sensitive billing for the interoffice mileage of DS3 special access circuits ("New Flat Rate") provided by the Telephone Company to the customer within the Las Vegas, Nevada MSA. The New Flat Rate shall apply in lieu of the Channel Mileage Termination and Channel Mileage Facility rate elements normally billed for interoffice mileage. In order for a DS3 special access circuit to be eligible to be billed using the New Flat Rate a DS3 must involve the use of the Telephone Company's interoffice facilities between two or more of the following Central Office locations: HNSNNVXF, LSVGNVXK, LSVGNVXL, LSVGNVXH, LSVGNVXM, LSVGNVXI, LSVGNVXR, LSVGNVXW, LSVGNVXU, LSVGNVXV, LSVGNVXG, LSVGNVXB, LSVGNVXT, NLVGNVXG, AND NLVGNVXF, and for which the Telephone Company would bill customer the Channel Mileage Termination and Channel Mileage Facility rate elements ("Eligible DS3").

In order for customer to qualify to receive billing at the New Flat Rate for customer's Eligible DS3 circuits, customer must meet the following conditions on the effective date of this contract offering:

- customer must currently subscribe to the Premier Term Discount Plan for special access services as offered in Section 22 of this tariff; and
- customer must currently subscribe to Gateway Sonet Ring Service as offered in Section 22 of this tariff; and
- customer must currently subscribe to a minimum of 150 DS3 circuits in the Las Vegas, Nevada MSA.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.7 Contract No. 07-001 (Cont'd)

Upon the effective date of this contract offering and with customer's full compliance with all the conditions of this offer, the Telephone Company will begin to bill customer using the New Flat Rate in lieu of billing the otherwise applicable interoffice mileage billing elements of Channel Mileage Termination and Channel Mileage Facility. The amount of the New Flat Rate shall be \$550.00 per Eligible DS3 circuit. The Telephone Company will apply the New Flat Rate on the first full invoice following the effective date of this contract offering and will continue to bill customer using the New Flat Rate for a period of 5 years, contingent on customer meeting the minimum thresholds of DS3 circuits in the Las Vegas, Nevada MSA prior to the end of each 12 month period following the effective date of this contract offer as set forth in the following table:

By this month after the effective date	Minimum number of DS3 circuits
Month 12	176
Month 24	194
Month 36	213
Month 48	234
Month 60	258

During the term of this contract offering customer must maintain a minimum of 150 DS3 circuits in order to continue to receive interoffice mileage billing using the New Flat Rate. The New Flat Rate as set forth in this contract offer applies solely to the interoffice mileage billing for Eligible DS3 circuits and for no other rate elements or services.

Effective Date and Termination

This contract offer will expire five years from the effective date of this tariff. Customer may request extension of this contract offer for one (1) additional year by submitting such request in writing to the Telephone Company at least 60 days prior to the expiration of this contract offer. In the event of such a one (1) year extension the terms and conditions as set forth in this contract offer will apply, including the termination liability, and customer must meet a minimum threshold of 284 DS3 circuits by the 72nd month after the effective date of this contract offer. At the end of the term of this contract offer billing for the interoffice mileage components for the Eligible DS3 circuits will revert to the then effective tariff rates as set forth in other sections of this tariff.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.7 Contract No. 07-001 (Cont'd)Termination Liability

If during the term of this contract offer customer fails to meet the applicable minimum commitment for DS3 circuits as set forth herein the Telephone Company reserves the right to discontinue this contract offer. In the event the Telephone Company discontinues this contract offer the Telephone Company will cease applying the New Flat Rate to the billing of the Eligible DS3 circuits, and billing for the interoffice mileage applicable to those circuits will revert to the standard Channel Mileage Termination and Channel Mileage Facility rates in effect at that time under the discount pricing plan to which customer is subscribed or the applicable month-to-month rates as found in other sections of this tariff.

Terms and Conditions

Customer may not assign or transfer (whether by operation of law or otherwise) this contract offer (or any rights or obligations hereunder) to a third party without the prior written consent of the Telephone Company, which written consent shall not be unreasonably withheld, provided that customer may assign this contract offer (and any rights or obligations hereunder) to a corporate Affiliate or an entity under its common control or an entity acquiring all or substantially all of its assets or equity by providing prior written notice to the Telephone Company of such assignment or transfer. At the time of any assignment or transfer by customer under this Agreement, if such assignment or transfer results in a shortfall of the volume commitments contained herein, then customer may request to re-negotiate in good faith such volume commitments and other applicable terms or conditions contained hereunder, including but not limited to the New Flat Rate provided herein and a reasonable period of time within which customer is afforded an opportunity to increase its volume levels to a point that meets or exceeds the applicable volume commitments. If customer and the Telephone Company are unable to re-negotiate new rates, terms, and conditions within 90 days of the assignment or transfer, the Telephone Company may impose the termination liability specified above.

CONTRACT  
EFFECTIVE DATE: May 1, 2007

AMENDED CONTRACT  
EFFECTIVE DATE: March 31, 2009

CONTRACT  
EXPIRATION DATE: 3 Years

AVAILABLE MSAs: Las Vegas, Nevada

This contract tariff offering provides for additional credits to customers who are enrolled in a Revenue Volume Discount Plan (RVDP) as defined in Section 7 of this tariff. In order to qualify for the discounts described below, the customer must be enrolled in the RVDP; and subscribe to a minimum of 185 DS3 circuits in the Las Vegas, Nevada MSA, each of which includes the channel termination and channel mileage billing elements ("Minimum Qualifying Circuits").

Upon the effective date of this contract offering and with the customer's full compliance with all of the conditions of this offer, including maintaining at least 95% of the Minimum Qualifying Circuits, the Telephone Company will credit the customer's invoice in the amount of \$300,000 ("Bi-Annual Credit") at the conclusion of the first six month period after the effective date of this tariff offering, and at the conclusion of each six month period thereafter.

In addition to the Bi-Annual Credit, the Telephone Company will apply a credit to the customer's invoice in the amount of \$30,000 ("Bonus Credit") for additional circuits purchased above the 185 Minimum Qualifying Circuits in service at the end of each six month period of the term of this contract tariff. In order to receive the Bonus Credit, the customer must purchase additional circuits as defined in the table following. The Minimum Qualifying Circuit count will be conducted by the Telephone Company at the end of each six month period.

24. Pricing Flexibility Contract Offerings (Cont'd)24.10 Contract No. 07-004 (Cont'd)Terms and Conditions

Customer may not assign or transfer (whether by operation of law or otherwise) this Agreement (or any rights or obligations hereunder) to a third party without the prior written consent of the Telephone Company, said consent not to be unreasonably withheld or delayed. Notwithstanding the prior sentence, either party may assign this contract tariff in its entirety without the other party's consent to any of the following: (i) the assigning party's successor in a consolidation or merger, (ii) the assigning party's successor in an acquisition of all or substantially all of the assets, equity or beneficial interests of the assigning party, or (iii) an entity under common control with, controlled by or in control of the assigning party. The assigning party will give the other party written notice within 30 days of any assignment described in the immediately preceding sentence.

Billed amounts must be paid in full and on time. Any late payments or disputed amounts shall be subject to Section 2.4.1 of this tariff.

Amendment - Cancellation of Contract

The value provided by the credits under this contract offering will be incorporated into the revisions to the minimum monthly revenue tiers defined under the Revenue Volume Discount Plan (RVDP) set forth in Sections 7 and 22 preceding. Therefore, with the effective date of the revisions to the RVDP, this contract will be cancelled. The Telephone Company will issue a prorated value of the credit provided under this contract offering to the customer based on the credit that has accrued for DS3 quantities between the period of November 1, 2008 to April 1, 2009.

AVAILABILITY: Effective from January 5, 2010 through  
February 4, 2010

CONTRACT  
EFFECTIVE DATE: January 5, 2008

AMENDED CONTRACT  
EFFECTIVE DATE: January 5, 2010

CONTRACT  
EXPIRATION DATE: 2 Years

AVAILABLE MSAs: Las Vegas, Nevada

This contract tariff covers eight (8) analog video circuits, each provided with channel mileage termination and channel mileage facility billing elements ("Circuits") in the Las Vegas, Nevada MSA. In order to qualify for the discounts under this contract tariff the customer must currently subscribe to eight (8) analog video circuits within the Las Vegas, Nevada MSA at the locations listed below:

- 3700 West Flamingo
- 4615 West Sunset Road (2 circuits)
- 1 Harrah's Court
- 657 Town Center Drive
- 1301 West Sunset Road
- 4111 Boulder Highway
- 6900 Westcliff

The customer must maintain 4 circuits with channel mileage at the locations listed below ("Qualifying Circuits") during the term of this contract:

- 3700 West Flamingo, Las Vegas, Nevada
- 4615 West Sunset Road, Las Vegas, Nevada (must maintain 1 circuit at this location)

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.12 Contract No. 08-001 (Cont'd)

The analog video circuit located at 100 City Parkway must be purchased within the first year of this contract. This additional circuit, with channel mileage termination and channel mileage facility billing elements will begin receiving the discount under this contract once installation has been completed by the Telephone Company.

Upon the effective date of this contract and with the customer's compliance with the requirement for the analog video circuits as outlined above, the Telephone Company will provide a discount on the total monthly recurring rate for all of their in service analog video circuits, which include channel termination, channel mileage termination (fixed) and channel mileage facility (per mile) billing elements ("Billing Element" or "Billing Elements"), provided in Section 22 of this tariff. The Telephone Company will apply a 20% discount monthly off of the then effective tariff rates for the Billing Elements associated with the circuits provided the customer maintains the 4 Qualifying Circuits located at the addresses shown above during the term of this contract.

This contract offer will expire two years from the effective date of this tariff. If the customer fails to meet any requirements of this contract offer at any time prior to the end of the two year term of this contract, the 20% discount will no longer apply to the analog video circuits and the monthly recurring rate will revert to the then effective tariff rate under Section 22 of this tariff. At the expiration of the initial two year term of this contract, the customer may extend this contract for an additional two years under the same terms and conditions specified herein.

Termination Liability

During the term of this contract, the customer may terminate circuits located at the following locations without incurring termination liability charges:

- 4615 West Sunset Road (only 1 of the 2 circuits may be disconnected at this location without incurring termination liability charges)
- 657 Town Center Drive
- 1301 West Sunset Road
- 4111 Boulder Highway
- 6900 Westcliff

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.12 Contract No. 08-001 (Cont'd)Termination Liability (Cont'd)

If the customer disconnects any of the 4 Qualifying Circuits during the term of this contract, including the additional circuit to be added within the first year at 100 City Parkway, the discount on the Billing Elements will no longer apply and any remaining circuits will revert to the then effective tariff rate under Section 22 of this tariff. Further, if the customer terminates any of the 4 Qualifying Circuits prior to the end of the term of this contract, termination liability charges in the amount of 50% of the total monthly recurring charges times the number of months remaining in the term for each circuit will apply.

Terms and Conditions

Customer may not assign or transfer (whether by operation of law or otherwise) this Agreement (or any rights or obligations hereunder) to a third party without the prior written consent of the Telephone Company, said consent not to be unreasonably withheld or delayed. Notwithstanding the prior sentence, either party may assign this contract tariff in its entirety without the other party's consent to any of the following: (i) the assigning party's successor in a consolidation or merger, (ii) the assigning party's successor in an acquisition of all or substantially all of the assets, equity or beneficial interests of the assigning party, or (iii) an entity under common control with, controlled by or in control of the assigning party. The assigning party will give the other party written notice within 30 days of any assignment described in the immediately preceding sentence.

Billed amounts must be paid in full and on time. Any late payments or disputed amounts shall be subject to Section 2.4.1 of this tariff.

CONTRACT  
AVAILABILITY: Effective from March 19, 2008 through  
April 18, 2008

CONTRACT  
EFFECTIVE DATE: March 19, 2008

CONTRACT  
EXPIRATION DATE: 5 Years

AVAILABLE MSAs: Las Vegas, Nevada

This contract tariff offering is for DS3 circuits that bill channel mileage termination (fixed) and facility (per mile) rate elements offered under a 5 year special access Term Discount Plan (TDP) D, ("Qualifying DS3"), under Section 22 of this tariff. Customers are eligible to receive a 13% discount off of their total monthly recurring rates for Qualifying DS3 circuits.

In order to receive the 13% discount on Qualifying DS3 circuits, the customer must meet the following conditions:

- customer must purchase an OC48 SONET OC Ring service in the Las Vegas, Nevada MSA to be configured with one central office node that is equipped with 9 DS3 central office configuration interfaces, located at 125 Las Vegas Boulevard, Las Vegas, Nevada; and one customer node without Telephone Company provided terminal equipment located at 1 Aero Jet Way, Las Vegas, Nevada; and
- customer must purchase a minimum of 30 DS3 circuits with channel mileage termination (fixed) and facility (per mile) rate elements ("DS3 Minimum") under a special access Term Discount Plan (TDP) D within the first 6 months after the effective date of this contract; and must maintain at least the DS3 Minimum requirement throughout the 5 year term; and

- customer must purchase a minimum of 250 DS1 circuits under a special access Term Discount Plan (TDP) D ("DS1 Minimum") within the first 12 months after the effective date of this contract; and must maintain at least the DS1 Minimum throughout the 5 year term.

Upon the effective date of this contract offering and with the customer's full compliance with all of the conditions of this offer as defined above, the Telephone Company will credit the customer's monthly invoice in an amount equal to 13% off of the total monthly recurring charges associated with the Qualifying DS3 circuits with channel mileage termination (fixed) and facility (per mile) billing elements. The discount does not apply to DS3s over SONET services.

Termination Liability

If during the term of this contract tariff offering, the customer fails to maintain the OC48 SONET OC Ring with the minimum configuration requirement; the DS3 Minimum or the DS1 Minimum circuit requirements, the customer will forfeit the 13% discount for the Qualifying DS3 circuits. Further, should the customer terminate the DS3 Minimum and DS1 Minimum circuits under the special access TDP D prior to the end of 5 year term commitment period, termination liability charges as defined in Section 7.4.11 preceding will apply.

DESCRIPTION: Special Access DS1 Channel Terminations  
CONTRACT

AVAILABILITY: Effective from May 1, 2008 through  
May 31, 2008

CONTRACT  
EFFECTIVE DATE: May 1, 2008

CONTRACT  
EXPIRATION DATE: 7 Years

AVAILABLE MSAs: Las Vegas, Nevada

This contract tariff covers special access DS1 channel terminations ("DS1 Circuits") in the Las Vegas, Nevada MSA. In order to qualify for the discounts under this contract tariff, the customer must have a minimum of 3500 DS1 Circuits as of the effective date of this contract tariff; must increase the quantity of the DS1 Circuits by 3% annually over the seven year term of the contract; and must currently subscribe to a Premier Term Discount Plan (PTDP) as defined in Section 7 of this tariff. In the event the customer does not increase the number of DS1 circuits by 3% annually as defined in the chart below, any shortfall circuit amounts below the number of DS1 circuits required will be billed to the customer at the current PTDP tariff rates. These shortfall circuits will not receive the discounted contract rates set forth following.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.14 Contract No. 08-003 (Cont'd)

The chart below details the number of DS1 Circuits the customer is required to purchase and maintain during the seven year term of this contract tariff. The customer agrees to purchase and maintain the minimum number of DS1 Circuits as of the effective date(s) shown in this chart.

*Example:* Assuming the customer's base demand of special access DS1 Circuits is 3500 units on May 1, 2008, the customer would have to increase their DS1 Circuits by 105 for a total of 3605 by March 31, 2009.

Annual Review Date After Initial Term of the Contract	Minimum Total Number of DS1s Purchased/Billed	3% Annual Increase of DS1s
By May 1, 2008	3500	
March 31, 2009	3605	105
March 31, 2010	3713	108
March 31, 2011	3824	111
March 31, 2012	3939	115
March 31, 2013	4057	118
March 31, 2014	4179	122
March 31, 2015	4304	125

On March 31, 2009 and each subsequent March 31 on an annual basis, not more than 55 % of the total DS1 Circuits should be in the Within CO channel mileage band and not more than 30% of the total DS1 Circuits should in the Over 3 Miles mileage band. For any DS1 Circuits above these thresholds, the customer will be charged current tariffed rates for the special access DS1 circuits.

*Example:* If 56% of the customer's special access DS1 channel terminations are in the "Within Co" mileage band, the customer will be charged at the rates below for 55% of the DS1 Circuits and current tariff rates for the 1% of the special access DS1 channel terminations above the 55% threshold for Within CO DS1 channel terminations.

If during the term of this contract tariff the customer fails to purchase the minimum quantity of DS1 Circuits as defined above, the Telephone Company will bill the customer for the number of DS1 Circuits required even if the purchase threshold has not been met.

24. Pricing Flexibility Contract Offerings (Cont'd)24.14 Contract No. 08-003 (Cont'd)

Upon the effective date of this contract tariff and with the customer's compliance with the requirements to purchase a minimum of 3500 DS1 Circuits by May 1, 2008; increase the number of DS1 Circuits by 3% annually; and subscribe to a Telephone Company Premier Term Discount Plan, the Telephone Company will apply the applicable rate from the following table to each qualifying DS1 channel termination billed to the customer. The rates will be applied to all DS1 Circuits in service as of the effective date of this contract tariff as well as to all future DS1 Circuits. This contract tariff and the prices provided herein apply only to the qualifying DS1 Circuits.

From the effective date of this contract tariff, and subject to the customer's continued compliance with the minimum quantities of qualifying DS1 Circuits, the Telephone Company will bill the customer the rates as specified in the following rate table for a period of seven years. All applicable rates for channel mileage termination and channel mileage facility will be billed at the current Premier Term Discount Plan rates in Section 22 of this tariff. Nonrecurring installation charges associated with new DS1 Circuits will be waived during the term of this contract tariff.

<b>DS1 Channel Termination Band</b>	<b>Monthly Recurring Rate</b>
Within CO	\$9.00
0-3 Miles	\$91.00
Over 3 Miles	\$112.00

DESCRIPTION: DS3 Flat Rated Interoffice Mileage

CONTRACT  
AVAILABILITY: Effective from October 18, 2008 through  
November 17, 2008

CONTRACT  
EFFECTIVE DATE: October 18, 2008

CONTRACT  
EXPIRATION DATE: 5 Years

AVAILABLE MSAs: Las Vegas, NV

This contract offering provides for flat rated, non-mileage sensitive billing for the interoffice mileage of DS3 special access circuits ("New Flat Rate") provided by the Telephone Company to the customer within the Las Vegas, Nevada MSA. The New Flat Rate shall apply in lieu of the Channel Mileage Termination and Channel Mileage Facility rate elements normally billed for interoffice mileage. In order for a DS3 special access circuit to be eligible to be billed using the New Flat Rate a DS3 must involve the use of the Telephone Company's interoffice facilities between two or more of the following Central Office locations: LSVGNVXK, LSVGNVXL, LSVGNVXH, LSVGNVXM, LSVGNVXI, LSVGNVXR, LSVGNVXW, LSVGNVXU, LSVGNVXV, LSVGNVXG, LSVGNVXB, LSVGNVXT, NLVGNVXG, AND NLVGNVXF ("Eligible Central Offices"), and for which the Telephone Company would bill customer the Channel Mileage Termination and Channel Mileage Facility rate elements.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.18 Contract No. 08-007 (Cont'd)

In order for the customer to qualify to receive billing at the New Flat Rate for mileage associated with the customer's DS3 circuits, the customer must meet the following conditions on the effective date of this contract offering:

- at a minimum, all new DS3s ordered by the customer must have at least one channel termination or DS3/DS1 multiplexer attached to the DS3 circuit;
- customer must renew a Term Discount Plan D (5 Year) for the DS3 services in the Las Vegas, Nevada MSA;
- customer must maintain the minimum DS3 commitment set at the time the Term Discount Plan D is renewed; and
- only DS3s newly installed after the effective date of the contract ("Eligible DS3s") are eligible to receive the New Flat Rate for billing of the mileage.

The New Flat Rate for mileage will not apply to existing DS3 circuits installed prior to the effective date of this contract.

Upon the effective date of this contract offering and with customer's full compliance with all the conditions of this offer, the Telephone Company will begin to bill the customer using the New Flat Rate in lieu of billing the otherwise applicable interoffice mileage billing elements of Channel Mileage Termination and Channel Mileage Facility from Section 22 of this tariff. The amount of the New Flat Rate shall be \$600.00 per Eligible DS3 circuit. The Telephone Company will apply the New Flat Rate on the first full invoice following the effective date of this contract offering and will continue to bill customer using the New Flat Rate for a period of 5 years as long as the customer maintains the initial minimum commitment of DS3 circuits established at the time of the renewal of the 5 Year Term Discount Plan.

All other rate elements associated with the DS3 circuits (i.e., channel termination, multiplexing, etc.) will be billed current tariff rates set forth in Section 22 of this tariff.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.18 Contract No. 08-007 (Cont'd)Termination Liability

If during the term of this contract offer the customer fails to meet the applicable minimum commitment for DS3 circuits as set forth herein the Telephone Company reserves the right to discontinue this contract offer. In the event the Telephone Company discontinues this contract offer, the Telephone Company will cease applying the New Flat Rate to the billing of the Eligible DS3 circuits, and billing for the interoffice mileage applicable to those circuits will revert to the standard Channel Mileage Termination and Channel Mileage Facility rates in effect at that time under the discount pricing plan to which customer is subscribed or the applicable month-to-month rates as found in other sections of this tariff.

If during the term of this contract the customer terminates this contract prior to the end of the 5 Year commitment period, termination liability charges equal to 50% of the New Flat Rate channel mileage billed for Eligible DS3s in effect at the time of termination, times the number of months remaining in the 5 year term agreement will apply. For example, if the customer has 100 Eligible DS3s at the end of the 36th month and they elect to terminate the contract, the New Flat Rate channel mileage rate of \$300.00 (50% of the \$600.00 rate) for each of the 100 Eligible DS3s times the remaining 24 months will apply.

Termination liability charges for billing elements, other than the New Flat Rate for the mileage, will be billed in accordance with the Term Discount Plan provisions set forth in Section 7 of this tariff.

24. Pricing Flexibility Contract Offerings (Cont'd)24.19 Contract No. 09-001 (Cont'd)

In order for the customer to qualify to receive billing at the New Flat Rate for mileage associated with the customer's DS3 circuits within the Las Vegas, Nevada MSA, the customer must meet the following conditions on the effective date of this contract offering:

- customer must currently subscribe to the Premier Term Discount Plan for special access services as offered in Sections 7 and 22 of this tariff;
- customer must subscribe to one 4-node OC192 SONET OC Ring (SOCR) in the Las Vegas, Nevada MSA, where the DS3s eligible under this contract will be required to connect to the OC192 SOCR; and
- customer must currently subscribe to a minimum of 118 interstate special access DS3 circuits, with channel mileage termination and channel mileage facility billing elements, within the Las Vegas, Nevada MSA ("Eligible DS3s");

The Eligible DS3s must connect to the OC192 SOCR from one of the Eligible Central Offices listed above. The customer shall provide the Telephone Company with a written list of Eligible DS3s to receive the New Flat Rate for mileage. The Telephone Company will validate that the circuits provided meet the requirements identified above within 7 days of receipt of the list. The customer will have 90 days to migrate the initial minimum 118 Eligible DS3s to the OC192 SOCR.

Upon the effective date of this contract offering and with customer's full compliance with all the conditions of this offer, the Telephone Company will begin to bill the customer using the New Flat Rate in lieu of billing the otherwise applicable interoffice mileage billing elements of Channel Mileage Termination and Channel Mileage Facility from Section 22 of this tariff. The amount of the New Flat Rate shall be \$550.00 per Eligible DS3 circuit. The Telephone Company will apply the New Flat Rate on the first full invoice following the effective date of this contract offering and will continue to bill customer using the New Flat Rate for a period of 5 years, plus 150 days, as long as the customer maintains the minimum requirements defined above.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.19 Contract No. 09-001 (Cont'd)

The customer may disconnect or move DS3s riding the OC192 SOCR and not be subject to termination liability charges so long as the minimum commitment levels in this contract and the customer's Premier Term Discount Plan, or any other plan to which the customer may later subscribe, are maintained. Eligible DS3s added after the effective date of this contract will be coterminous with this contract tariff.

All other rate elements associated with the DS3 circuits (i.e., channel termination, multiplexing, etc.) will be billed current tariff rates set forth in Section 22 of this tariff.

Should any future tariff filing by the Telephone Company reduce the DS3 channel mileage termination and facility rate elements identified in this contract tariff and such reduction results in a rate that would be less than the New Flat Rate in this contract tariff, the customer may elect to pay the current tariff rates and remove itself from the New Flat Rate billing. The customer must provide the Telephone Company written notification of its intent to exercise this right. The Telephone Company will make the change in billing effective on the date the Telephone Company receives this written notification.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.19 Contract No. 09-001 (Cont'd)Termination Liability

If during the term of this contract offer the customer fails to meet the applicable minimum commitment for Eligible DS3 circuits and one 4-node OC192 SOCR, as set forth herein, the Telephone Company reserves the right to discontinue this contract offer. Should the customer fall below the minimum requirement of 118 Eligible DS3s, the Telephone Company will notify the customer of the shortfall. The customer will have 60 days from the date of the notice by the Telephone Company to cure the shortfall, unless the failure to meet this deadline is due solely to the Telephone Company's failure to provide sufficient facilities, in which case this deadline is extended by the amount of time that the Telephone Company delayed the provision of the facilities. If the customer fails to cure the commitment level shortfall within this time period and the Telephone Company discontinues this contract offer, the Telephone Company will cease applying the New Flat Rate to the billing of the Eligible DS3 circuits, and billing for the interoffice mileage applicable to those circuits will revert to the Channel Mileage Termination and Channel Mileage Facility rates in effect at that time under the discount pricing plan to which customer is subscribed or the applicable month-to-month rates as found in other sections of this tariff.

Termination liability charges for billing elements, other than the New Flat Rate for the mileage, will be billed in accordance with the Premier Term Discount Plan provisions set forth in Section 7 of this tariff.

At the expiration of the term of this contract tariff, the customer may renew this contract tariff for a period of one (1) year by providing written notification at least sixty (60) days prior to the expiration of the term of this contract tariff. If the customer elects to renew this contract tariff, the terms and conditions defined in this contract tariff will continue to apply. This includes the minimum requirement of 118 DS3 circuits and subscribing to at least one 4-node OC192 SOCR where the DS3s will be required to connect to the OC192 SOCR within the Las Vegas, Nevada MSA.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.20 Contract No. 10-002

DESCRIPTION: Discounted Ethernet Virtual Private Line (EVPL)

CONTRACT  
AVAILABILITY: Effective from October 30, 2010 through November 29, 2010

CONTRACT  
EFFECTIVE DATE: October 30, 2010

CONTRACT  
EXPIRATION DATE: 7 Years

AVAILABLE MSAs: Orlando, Florida and Fayetteville, North Carolina

This contract offering provides for discounted pricing for Ethernet Virtual Private Line (EVPL) special access circuits ("Discounted Rate") provided by the Telephone Company to the customer within the Orlando, Florida and Fayetteville, North Carolina MSAs. Each rate element associated with the EVPL circuit will be discounted.

In order for the customer to qualify to receive billing at the Discounted Rate for the EVPL circuit, the customer must meet the following conditions on the effective date of this contract:

- customer must currently subscribe to the Revenue Volume Discount Plan;
- customer must order each EVPL circuit at a minimum bandwidth of 50 Mbps.

The term of each EVPL circuit ordered under this contract shall be seven (7) years. When a seven (7) year term commitment option for EVPL service is included in a generally available tariff offering, the customer shall withdraw from this contract and have such EVPL circuits governed by the provisions set forth in that tariff offering, as amended, except that, upon such election, the circuit service term applicable to each EVPL circuit installed pursuant to this contract expiration date shall not be extended, and the contract expiration date specified in this contract shall control. There will be no termination liability incurred under this contract tariff should the customer elect to have the EVPL circuits governed by the generally available tariff offering. In addition, the customer may terminate this contract tariff offering in its entirety and any services purchased hereunder, without incurring any early termination liability charges, if by January 1, 2011, the Telephone Company does not make generally available in its tariffs a seven (7) year term commitment option for EVPL service containing the terms in this contract.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.20 Contract No. 10-002 (Cont'd)

The EVPL Channel Mileage and QoS rate elements will not apply to secondary EVCs under this contract tariff. The primary EVC and secondary EVC must terminate at the same location and the secondary EVC going to the customer designated premises shall be equal in bandwidth to that of the primary EVC. The customer will determine the primary EVC and will be responsible for managing the traffic onto such primary EVC. In the event of a failure of the primary route EVC, the customer may redirect the traffic to the secondary EVC. Either EVC, but not both EVCs, may be used by the customer at any given time to transport the customer's traffic. The Telephone Company will make both EVCs available to the customer at all times, and the designation of "primary" shall mean at any given time, the EVC in fact carrying the customer's traffic. The secondary EVC is only used in the event of interruption of the primary EVC.

The Telephone Company will apply the Discounted Rate on the first full invoice following the effective date of this contract offering and will continue to bill the customer using the Discounted Rate for each EVPL circuit for a period of 7 years after each such circuit is installed. The customer will receive the Discounted Rate for all EVPL circuits ordered under this contract tariff.

The monthly recurring revenue from the Discounted Rate EVPL circuits will be included in the calculation to determine which RVDP discount tier is applicable to the customer for services purchased under the RVDP, however, no additional discount under the Revenue Volume Discount Plan will be applied to the Discounted Rate EVPL circuits provided under this contract tariff.

Termination Liability

If during the term of this contract the customer terminates an EVPL circuit prior to the end of the 7 year commitment period, termination liability charges will apply as follows:

- 1) an amount equal to 100% of the MRCs for each EVPL circuit for the months remaining in year 1, if any, plus
- 2) an amount equal to 50% of the MRCs for each EVPL circuit for the months remaining in year 2 through year 5, if any, plus
- 3) an amount equal to 20% of the MRCs for each EVPL circuit for the months remaining in year 6 and year 7.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.20 Contract No. 10-002 (Cont'd)Chronic Interruption

For purposes of this contract tariff, a Chronic Interruption is defined as (1) an interruption in service due to a failure on the core portion of the EVPL network on four (4) or more separate occasions of five (5) minutes or more each, or twenty-four (24) hours or more in the aggregate, in any calendar month; or (2) both EVCs do not meet the standards provided in 7.4.20(D) preceding in any three (3) separate months during any period of six (6) consecutive months.

When a Chronic Interruption occurs with respect to EVPL, the Telephone Company will provide to the customer, within ten (10) calendar days of the last interruption, a detailed report with respect to such interruptions on the EVPL service that will include the root causes of such interruptions, remedial actions being taken to prevent similar future Chronic Interruptions and timelines for the completion of such actions. The Telephone Company will provide bi-weekly written updates on the progress of such remedial actions until completed to the reasonable satisfaction of the customer. The timeline for the completion of such remedial actions will not exceed thirty (30) days. If after the completion of such remedial actions an interruption or performance failure occurs on the same EVPL service, or the Telephone Company fails to complete such remedial action within such thirty (30) day period, the customer may terminate the affected EVPL service without incurring early termination liability charges, upon providing written notice of such termination to the Telephone Company within twelve (12) months of the date of the last interruption triggering a Chronic Interruption.

## ACCESS SERVICE

24. Pricing Flexibility Contract Offerings (Cont'd)24.20 Contract No. 10-002 (Cont'd)Terms and Conditions

Neither the Telephone Company or the Customer may assign, delegate, subcontract or otherwise transfer its rights or obligations under this contract tariff, except with the prior written consent of the other Party; provided however, that the Telephone Company or Customer will have the right to assign this contract tariff to any affiliate or any entity into which the Telephone Company or Customer may be merged or any Party which purchases substantially all of the assets of the Telephone Company or customer without securing the consent of the other Party, and both the Telephone Company and Customer may assign their respective right to receive money due hereunder. Any assignment or transfer for which consent is required hereby and which is made without such consent will be void. It is expressly agreed that any assignment of money will be void if (i) the assignor fails to give the non-assigning Party at least thirty (30) days prior written notice; or (ii) the assignment imposes or attempts to impose upon the non-assigning Party additional costs or obligations in addition to the payment of such money; or (iii) the assignment attempts to preclude a party from dealing solely and directly with the other Party in all matters pertaining to this contract tariff; or (iv) the assignment denies, alters or attempts to alter any of the non-assigning Party's rights hereunder.

This contract tariff shall be binding upon, and inure to the benefit of each Party's successors and assigns.

All bill amounts, any late payments or disputed amounts will be subject to the regulations in Section 2.4.1 of this tariff.

## ACCESS SERVICE

25. Market Trial Offerings25.1 General

The Telephone Company may, from time to time, engage in market trial service offerings, designed to test the marketplace, technical functionality and reliability of a prototype, and/or determine the requirements for the final development of Telephone Company standard products and services.

These market trial offerings will be limited to certain dates, times and locations as determined by the Telephone Company. The rates, charges, terms and/or conditions applicable to each market trial offering will be filed in this section. Services provided under the following market trials are subject to the regulations set forth in all other sections of this tariff, unless otherwise specified. Where the regulations in other sections conflict with those set forth in this section, the regulations specified herein for the provision of interstate access services under a market trial will supercede any inconsistencies.

Market trial offerings are provided on a temporary basis subject to the following criteria:

- (A) The market trial offering is not available under other sections of this tariff and will be offered for a limited time as specified in Section 25.3 following.
- (B) At the end of the market trial period, the Telephone Company may elect to offer the trial service on a generally available basis and will file it under the appropriate tariff section(s) after the trial period. Normal rates and tariff regulations will then apply to all subscribers of the service. Market trial participants will be required to order the general tariff offering.

25. Market Trial Offerings (Cont'd)25.1 General (Cont'd)

- (C) The Telephone Company shall engage in an evaluation of the market trial. This evaluation will include any tests or rearrangements conducted on the service, as well as, determining how effectively the service works with other telecommunications services.

25.2 Limitations

- (A) The Telephone Company is not prohibited or restricted in ability or capacity to engage with other participants in similar or other market trial offerings.
- (B) The Telephone Company makes no guarantee, warranty or representation to continue a market trial offering beyond the end date or convert to a generally available service offering.
- (C) The Telephone Company reserves the right to make changes which might cause interruptions in service. Credit allowances for service interruptions will apply as set forth in 2.4.4 preceding.
