

CenturyLink Operating Companies

Tariff F.C.C. Nos. 1, 6, 7

Transmittal No. 10

Description and Justification

The CenturyLink operating companies (CLOC) hereby submit the following information in support of the accompanying tariff filing, as required by Sections 61.38 and 61.41 through 61.49 of the Federal Communications Commission's Rules and Regulations.

This filing is being made on 15 days' notice under the Federal Communications Commission's streamlined filing procedures, and proposes the following revisions to Synchronous Optical Channel Service:

- (1) Addition of rates and regulations for special access Synchronous Optical Channel Service at transport speeds of OC48 (2.5 Gbps), where applicable, and OC192 (10 Gbps). OC3c, OC12c and OC48c references were added to existing OC3, OC12 and OC48 services as the rates for these services are identical to those currently in effect for OC3, OC12 and OC48.
- (2) Addition of rates and regulations for Customer Premises Ports at operating speeds of DS1, DS3, STS1, OC12/OC12c, OC48/OC48c and Ethernet levels of 10, 20, 50, 100, 150, 300, 450 and 600 Mbps and 1 Gbps.
- (3) Addition of rates and regulations for Add/Drop Multiplexing (Central Office Ports) at DS1, DS3, STS1, OC12/OC12c, OC48/OC48c and Ethernet levels of 10, 20, 50, 100, 150, 300, 450 and 600 Mbps and 1 Gbps. In some instances, STS1, OC3c and OC12c references were added to existing DS3, OC3 and OC12 services as the rates for these services are identical to those currently in effect for DS3, OC3 and OC12 services.

- (4) Addition of a monthly recurring SONET Regeneration charge at OC3, OC12, OC48 and OC192 levels.
- (5) Addition of a nonrecurring Service Reconfiguration charge based on DS3/STS1 equivalency ratios.

1.0 Synchronous Optical Channel Service

CLOC currently provides Synchronous Optical Channel Service within service territories within the CenturyLink Operating Companies Tariff F.C.C. Nos. 1, 6 and 7 at operating speeds of OC3/OC3c, OC12/OC12c, and in some areas, OC48. CLOC now proposes to add rates and regulations for special access Synchronous Optical Channel Service at transport speeds of OC48/OC48c, where applicable, and OC192 in all territories. The rate structure is comprised of Channel Termination and Channel Mileage rate elements and includes Customer Node, Customer Premises Port and Add/Drop Multiplexing optional features. In addition, SONET Regeneration and Service Reconfiguration charges are being introduced. The monthly recurring rates and nonrecurring charges previously developed for OC3, OC12 and OC48 bandwidth will apply to customers ordering OC3c, OC12c and OC48c service.

Synchronous Optical Channel Service is being offered at month-to-month rates; or 36 months (3 years); or 60 months (5 years) commitment rates. The changes for Synchronous Optical Channel Service are described below by rate element:

- (1) *Channel Termination* – provides the high speed optical communications path between the Optical Line Termination at the customer designated premises and the serving wire center of that premises. This filing will add OC48, where applicable, and OC192 level channel terminations. The rates for OC3c, OC12c and OC48c are identical to those currently in effect for OC3, OC12 and OC48 service.

- (2) Channel Mileage – recovers the costs associated with the end office equipment and the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center associated with a customer designated premises and a Telephone Company hub, between two Telephone Company hubs, between a serving wire center associated with a customer designated premises and a wire center equipped for Add/Drop Multiplexing (ADM) or between two ADM equipped wire centers. Channel Mileage is made up of the Channel Mileage Facility and Channel Mileage Termination rate elements. This filing will add OC48, where applicable, and OC192 level channel mileage. The rates for OC3c, OC12c and OC48c are identical to those currently in effect for OC3, OC12 and OC48 service.
- (3) Customer Node – determines the level of optical signal delivered to the premises and provides for termination of Synchronous Optical Channel Service channel termination. This filing will add OC48 and OC192 level customer nodes. The rates for OC3c, OC12c and OC48c are identical to those currently in effect for OC3, OC12 and OC48 service.
- (4) Customer Premises Port – provides the interface to derive a lower capacity service at the customer premises. This filing will add Customer Premises Ports at operating speeds of DS1, DS3, STS1, OC12/OC12c, where applicable, OC48/OC48c, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps and 1 Gbps. The rates for OC3c and OC12c are identical to those currently in effect for OC3 and OC12.
- (5) Add/Drop Multiplexing (Central Office Port) – provides for adding or dropping lower capacity services from the Synchronous Optical Channel Service channel termination or channel mileage transport facilities. This filing will add rates for Add/Drop Multiplexing at operating speeds of DS1, DS3, STS1, OC12/OC12c, where applicable, OC48/OC48c, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps and 1 Gbps.

- (6) SONET Regeneration – is a new monthly recurring charge that is designed to recover the costs for additional regeneration equipment that may be required for essential detection and retransmission of SONET signals between nodes. The SONET Regeneration charge will apply for each regenerator required for the provision of the SONET service and is based on operating speeds of OC3, OC12, OC48 and OC192.
- (7) Service Reconfiguration – is a new nonrecurring charge that will apply to new service configurations requested subsequent to the initial activation of service. This charge will apply on a per DS3/STS1 equivalent basis for the service reconfigured.

Exhibits 1-1 through 1-3, 2-1 and 3-1 through 3-4 display the material investment and labor associated with the proposed monthly recurring rates and nonrecurring charges for Synchronous Optical Channel Service. The annual cost is determined by applying company specific factors for maintenance and income taxes. Depreciation is based on straight-line depreciation of the net material investment over the estimated life of the investment. Return is calculated at 11.25% and applied to the average investment amount over the estimated location life. The annual cost is divided by 12 to produce the monthly direct cost floor. The proposed monthly recurring rates are set above the direct cost floor at a level that ensures recovery of an appropriate amount of overhead costs. The nonrecurring charges developed for Synchronous Optical Channel Service are designed to recover the upfront installation and engineering labor cost associated with the provision of the requested service arrangement.

The forecasted demand for Synchronous Optical Channel Service is based on customer requests for these service arrangements, and is displayed on Exhibits 4-1 through 4-3.

2.0 Conclusion

The CenturyLink operating companies are submitting the accompanying tariff revisions in response to customer requests for the proposed services, and in accordance with the Commission's Rules governing the provision of interstate access services. The rates and charges proposed in this filing are demonstrated to be fully cost-based and reasonable, and are supported, where required, by exhibits detailing cost and rate development.
