**Section 12 – Ordering Options For Switched Access Service****12.1 General**

This section sets forth the regulations and order related charges for Access Service Requests (ASRs) for Switched Access Service as defined in this Tariff. These charges are in addition to other applicable charges set forth in other sections of this Tariff.

**12.1.1 Ordering Conditions**

All Services offered under this Tariff will be ordered using an ASR. The format of the ASR will be as specified in the industry Access Service Order Guidelines, unless otherwise, specified herein. A Customer may order any number of Services of the same type and between the same premises on a single ASR. All details for Services for a particular order must be identical.

The Customer shall provide all information necessary for the Company to provide and bill for the requesting Service. When placing an order for Switched Access Service, the Customer shall provide the following minimum information:

- 12.1.1.1** Customer name and premise(s) address(es);
- 12.1.1.2** Billing name and address (when different from Customer name and address);
- 12.1.1.3** Customer contact name (s) and telephone numbers for the following provisioning activities; order negotiating, order confirmation, interactive design, installation and billing.

The order date (Application Date) is the date on which the Company receives a firm commitment and sufficient information from the Customer to allow processing of the ASR. The Customer is advised of the critical events in the provisioning process, the Application Date, the Plant Test Date and the Service Commencement Date, at the time the Company gives the Customer a Firm Order Confirmation (FOC). The FOC is forwarded to the Customer within two(2) business dates after the date on which all information needed to process the ASR has been received by the Company.

Switched Access Services

---

**Section 12 – Ordering Options For Switched Access Service (Continued)****12.1.2 Provision of Other Services**

Unless otherwise specified herein, all Services offered under this Tariff shall be ordered with an ASR.

With the agreement of the Company, other Services may subsequently be added to the ASR at any time, up to and including the Service date for the Access Service. When added subsequently, charges for a Design Change as set forth in Section 14.1.3.2 will apply when an engineering review is required.

Additional Engineering is not an ordering option but will be applied to a ASR when the Company determines that additional engineering is necessary to accommodate a Customer request. Additional Engineering will be provided by the Company at the request of the Customer only when a Customer requests additional technical information after the Company has already provided the technical information included on the Design Layout Report as set forth herein. The Customer will be notified when additional engineering is required and will be furnished with a written statement setting forth the justification for the additional engineering as well as an estimate of the charges. If the Customer does not want the Service or facilities after being notified by the Company that additional engineering is required, the Customer may cancel the order and no charges will apply.

**12.2 Access Order**

An ASR required by the Company to provide a Customer Switched Access Service as described herein. An ASR will be required for each new similar Service arrangement or group of common circuits.

When a Customer requests new or additional Switch Access Service, one or more ASRs may be required. The number of orders required is dependent on the type of Services and/or facilities being requested.

---

**Section 12 – Ordering Options For Switched Access Service (Continued)****12.2 Access Order (Continued)**

When placing an order for either Direct Connect Service or Tandem Connect Service as describe in Sections 14.2.3.2 and 14.2.3.3 respectively, the Customer shall provide all standard ASR ordering information as specified in industry guidelines. The Customer will also be required to provide this information to order additional Service for an existing Service type. For new Customers ordering Tandem Connect Service, the Customer will only be required to complete an ASR for installation of new Service.

**12.2.1 Access Service Date Intervals**

Access Service is provided with one of the following Service Date intervals:

- Standard Interval
- Negotiated Interval

The Company will specify a FOC and the Service Commencement Date contingent on the ASR being complete as received. To the extent the Access Service can be made available with reasonable effort, the Company will provide the Access Service in accordance with the Customer's required interval subject to the following conditions:

**12.2.1.1 Standard Interval:** The Standard Interval for Switched and Special Access Service will be ten (10) business days from the Application Date. This interval only applies to standard Service offerings for a Customer which is on-net and at locations where there are pre-existing facilities to the Customer Premises. Access Services provided under the Standard Interval will be installed during Company business hours.

**12.2.1.2 Negotiated Interval:** The Company will negotiate a Service Date Interval with the Customer when:

**12.2.1.2.1** The Customer requests a Service Date before or beyond the applicable Standard Interval Service date;  
or

---

**Section 12 – Ordering Options for Switched Access Service (Continued)****12.2 Access Order (Continued)****12.2.1.2 Negotiated Interval (Continued)**

**12.2.1.2.2** There is no existing facility connecting the Customer Premises with the Company or

**12.2.1.2.3** The Customer requests a Service that is not considered by the Company to be a standard Service offering (for example, if Additional Engineering is required to complete the order); or

**12.2.1.2.4** The Company determines that Access Service cannot be installed within the Standard Interval.

The Company will offer a Service Date based on the type and quantity of Access Services the Customer has requires. The negotiated Interval may not exceed by more than six months the Standard Interval Service Date, or when there is no Standard Interval, the Company offered Service Date. All Services for which rates are applied on an Individual Case Basis are provided with a Negotiated Interval.

**12.2.2 Access Service Request Modifications**

The Customer may request a modification of its ASR prior to the Service Commencement Date. All modifications must be in writing using the industry ASR process. The Company, in its sole discretion, may accept a verbal modification from the Customer. The Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. Charges for Access Service Order (ASR) modification will apply as set forth below, on a per occurrence basis.

Any increase in the number of Special Channels, Switched Access Service lines, trunks, transport facilities, Out of Band Signaling connections or any change in engineering or functionality of a Service will be treated as a new ASR with a new Service Date Interval.

---

**Section 12 – Ordering Options For Switched Access Service (Continued)****12.2 Access Order (Continued)****12.2.2 Access Service Request Modifications (Continued)****12.2.2.1 Service Commencement Date Charges**

ASR Service dates for the installation of new Services or rearrangement of existing Services may be changed, but the new Service date may not exceed the original Service Commencement Date by more than 30 calendar days. Then, if for any reason the Customer indicates that Service cannot be accepted for a period not to exceed 30 calendar days, and the Company accordingly delays the start of Service, a Service Change will apply. In addition, when the Customer submits a request for a Service Date Change that is less than five business days from the date of notification by the Customer, a Service Date Charge and an Expedite Charge will apply. No Expedite Charge will apply if the Customer requests a Service Date Change that is more than five (5) business days from the date of request by the Customer, but earlier than the original requested Service Commencement Date.

If the Customer requested Service date is more than 30 Calendar days after the original Service date, the order will be cancelled by the Company on the 31<sup>st</sup> day. Appropriate Cancellation Charges will be applied. If the Customer still requires the Service, the Customer must place a new ASR with the Company. The Service Date Change charge will apply on a per order, per occurrence basis for each Service date changed. The applicable charges are set forth in Section 14.1.3.2.

---

**Section 12 – Ordering Options For Switched Access Service (Continued)****12.2 Access Order (Continued)****12.2.2.2 Design Change Charge**

The Customer may request a Design Change to the Service ordered. A Design Change is any change to an ASR which requires Engineering Review. An Engineering Review is a review by the Company personnel of the Service ordered and requested changes to determine what change(s) in design, if any, are necessary to meet the Customer's request. Design Changes include such changes as the addition or deletion of optional features or functions, a change in the type of transport termination or type of channel interface. Any other changes are not considered Design Changes for purposes of this subsection and will require issuance of a new ASR and the cancellation of the original ASR with appropriate Cancellation Charges applied.

The Design Change Charge will apply on a per order, per occurrence basis for each order requiring a Design Change. The applicable charges, as set forth in Section 14.1.3.2 are in addition to any Service Date Change Charges that may apply.

Switched Access Services

---

**Section 12 – Ordering Options For Switched Access Service (Continued)****12.2 Access Order (Continued)****12.2.2.3 Expedited Order Charge**

When placing an Access Order for Service(s) for which a Standard Interval exists, a Customer may request a Service Commencement Date that is earlier than the Standard Interval Service Date, in which case an Expedite Charge will apply. The Expedite Charge will not apply if the new Service Commencement Date is more than five days from the date of the request to the Company of the Expedited Order request. However, if upon reviewing availability of equipment and scheduled workload, Company agrees to provide Service on an expedited basis and Customer accepts Company's proposal, an Expedite Charge will apply. If the Company is subsequently unable to meet an agreed upon expedited Service date, then the Expedited Charge will not apply.

In the event the Company provides Service on a expedited basis on the Customer's request, and the Customer delays Service or is not ready for delivery of Service at the time of installation, a Service Date Change Charge will apply in addition to the Expedite Charge.

In the event that the Customer cancels an expedite request, the Expedite Charge will be added to any applicable Cancellation Charge specified herein.

In the event that the Customer requests a Service Date Change after the Company has received the original expedite request, the Expedite Charge will still apply.

An Expedite Charge will not be applied to orders expedited for Company reasons.

If costs other than additional administrative expenses are to be incurred when the Access Order is expedited, the regulations and charges for Special Construction as set forth in this Tariff will apply.

The Expedited Order Charge will apply on a per order, per occurrence basis, as specified in Section 14.1.3.2.

---

**Section 12 – Ordering Options for Switched Access Service (Continued)****12.2 Access Order (Continued)****12.2.3 Cancellation of an Access Service Request**

A Customer may cancel an ASR for the installation of Switching Access Service at any time prior to notification by the Company that Service is available for the Customer's use. The Cancellation Date is the date the Company receives written or verbal notice from the Customer that the order is to be canceled. The verbal notice must be followed by written confirmation within ten (10) days. A Customer may negotiate an extension of the Service date of an ASR for installation of new Service or rearrangement of existing Service, in which case a Service Date Change Charge will apply. However, the new Service date cannot exceed the originally established Service date by more than 30 calendar days. On the 31<sup>st</sup> day beyond the original Service date, the ASR will be canceled and the appropriate Cancellation Charge will be applied.

Except as stated herein, Cancellation Charges will apply as specified in Section 14.1.3.3.

If the cancellation occurs prior to the Company's receiving the ASR, no charges shall apply.

Cancellation Charges for Expedited Orders will be applied for an order canceled from the Application Date forward.

If the Company misses a Service date for a Standard or Negotiated Interval Access Order by more than 30 days due to circumstances such as Acts of God, governmental requirements, work stoppages and civil disturbances, the Company shall not be liable for such delay and the Customer may cancel the ASR without incurring Cancellation Charges.

The minimum period for which Switched Access Service is provided and for which charges are applicable is one month.

**12.2.4.1** The following changes will be treated as a discontinuance of the existing Service and a request for installation of a new Service. All associated non-recurring charges will apply for the new Service, and a new minimum period will be established:

**Section 14 – Switched Access Service (Continued)****13.2 Provision and Description of Switched Access Service Agreements**

Switched Access Service is provided in the following Service type;

**13.2.1 Feature Group D (FGD) Access**

(If available) FGD Access is provisioned at the SDI level and provides trunk-side access to Company Local Switching Center switches, with an associated uniform 10XXX Access Code for Customer's use in originating and terminating communications. Basic FGD Service will be provided with Multi-Frequency In-Band Signaling. SS7 is also available as a Common Switching Option for Feature Group D. In addition, Conventional Signaling for Direct Carrier Trunk Groups is available at Customer's option. End Users of Customer's Service may also originate calls to certain FGD Access Customers without dialing the 10XXX Access Code if End User is presubscribed as described herein.

## Switched Access Services

---

**Section 13 – Switched Access Service (Continued)****13.3 Obligations of Company (Continued)****13.3.1 Network Management (Continued)**

Service levels are considered acceptable only when both End Users and Customers are able to establish connections with little or no delay encountered within the Company Network. Company reserves the right to apply protective controls, (i.e., those actions, such as call gapping, which selectively cancel the completion of traffic), over any traffic carried over its Network, including that associated with a Customer's Switched Access Service. Generally, such protective measures would only be taken as a result of occurrences such as failure or overload of Company or Customer facilities, natural disasters, mass calling or national security demands. Customer will notify Company of anticipated peaked Services as stated below. Based on the information provided Company, Company will work cooperatively with Customer to determine the appropriate level of control. In the event that the protective controls applied by Company result in the complete loss of Service by Customer, Customer will be granted a credit allowance for Service interruption as set forth in Section 9.

When a Customer uses the Company's facilities to offer Services for which a substantial call volume or peaked Service is expected during a short period of time, the Customer must notify the Company at least 24 hours in advance of each peak period. Notification should include the nature, time, duration, and frequency of the event, an estimated call volume, and the NPA NXX and one line number(s) to be used. On the Basis of the information provided, the Company may invoke network management controls, if required, to reduce the probability of excessive Network congestion. The Company will work cooperatively with the Customer to determine the appropriate level of such control. Failure to provide prescribed notification may result in Customer caused Network congestion which could result in discontinuance of Service under Section 4.5.2.

## Switched Access Services

**Section 13 – Switched Access Service (Continued)****13.4 Obligations of the Customer**

In addition to obligations specified elsewhere in the Tariff, the Customer has certain specific obligations pertaining to the use of Switched Access Service as follows:

**13.4.1 Report Requirements**

Charges will be apportioned in accordance with those reports. The method for determining the intrastate charges is set forth therein (Section 3.4).

**13.4.2 Supervisory Signaling**

The Customer's premises equipment shall provide the necessary on-hook, off-hook answer and disconnect supervision.

**13.4.3 Design of Switched Access Services**

It is the Customer's responsibility to assure that sufficient Access Services have been ordered to handle its traffic.

## Switched Access Services

---

**Section 14 – Rates and Charges****14.1 Rates for Switched Access Services**

There are three types of rates and charges that apply to Switched Access Service. These are Monthly Recurring Charges, Usage Rates and Non-Recurring Charges.

**Monthly Recurring Charges:** Monthly Recurring Charges are flat rates for facilities that apply each month or fraction thereof that a specific rate element is provided.

**Usage Rates:** Usage rates are rates that are applied on a per access minute or per query basis. Usage Rates are accumulated over a monthly period.

**Non-Recurring Charges:** Non-Recurring Charges are one time charges that apply for a specific work activity (i.e., installation of new Service or change to an existing Service).

**Installation of Service:** Non-Recurring Charges apply to each Switched Access Service installed. The charge is applied per one line or trunk.

**14.1.1 Application of Rates****14.1.1.1 Direct Connect:**

The Direct Connect Rate is assessed based on the total of the monthly Entrance Facilities Charge and the Monthly Usage charge. The Monthly Facilities Charge consists of a fixed rate based on the type of the facilities, (i.e., DS1 or DS3), and may include a per mile rate.

**14.1.1.2 Tandem Connect:**

The Tandem Connect Rate is assessed based on the Monthly Usage charges for End-Office switching and Tandem Switched Transport.

## Switched Access Services

---

**Section 14 – Rates and Charges (Continued)****14.1 Rates for Switched Access Services (Continued)****14.1.2 Billing of Access Minutes**

When recording originating calls over FGD with multi-frequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over FGD ends when the originating FGD entry Switch received disconnect supervision from either the originating End User's Local Switching Center (indicating that the originating End User has disconnected), or the Customer's facilities, whichever is recognized first by the entry switch.

For terminating calls over FGD with multi-frequency address signaling, the measurement of access minutes begins when a seizure signal is received from the Carrier's trunk group at the Point of Presence within the LATA. The measurement of terminating call usage over FGD ends when a disconnect signal is received, indicating that either the originating or terminating user had disconnected.

When recording originating calls over FGD with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct trunk groups, and with the receipt of an exit message by the switch for tandem trunk groups. The measurement of originating FGD usage ends when the entry switch receives or sends a release message, whichever occurs first.

For terminating calls over FGD with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives the initial address message from the terminating End User. On directly routed trunk groups or on tandem routed trunk groups, the Company switch received the initial address message and sends the indication to the Customer in the form of an answer message. The measurement of termination FGD call usage ends when entry switch receives or sends a release message, whichever occurs first.

If charges are found to be lower than authorized by the Company's Tariffs or Terms and Conditions of Service, or if the Company failed to bill the Customer for Service then:

**14.4.1** The Customer may be back billed for the amount that was underbilled for no more than six months from the date the error was discovered unless underbilling is a result of theft of Service by the Customer.

**14.4.2** Service may be disconnected if the customer fails to pay charges arising from an underbilling.

**14.4.3** If the underbilling is \$50.00 or more, the company may offer the customer a Deferred Billing Plan option for the same length of time as that of the under-billing. A Deferred Payment Plan may not be offered to a Customer whose underpayment is due to theft of Service.

**14.4.4** Interest on underbilled amounts shall:

**14.4.4.1** not be charged unless such amounts are found to be the result of theft or Service by the Customer, and

**14.4.4.2** not exceed an amount based on the rate set by the Commission on December 1 of the preceding year, compounded monthly, and accruing from the day the Customer is found to have first tampered with, bypassed, or diverted Service.
