INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 1 - DEFINITIONS, (Cont'd.)

Customer - The person, firm, corporation or other entity that orders Service and is responsible for the payment of charges and for compliance with the Company's tariff regulations. The Customer could be an End User, interexchange carrier, a wireless provider, other telecommunications carriers or providers originating or terminating VoIP-PSTN Access Traffic or any other carrier authorized to operate. (C)

DNAL - Dedicated Network Access Line; a point to point circuit that provides interconnection to the CCS network on a dedicated Signal Transfer Point (STP) port. The DNAL provides the connection from the Customer designated premises to the Company STP. (C)

DS0 - Digital Signal Level 0; a dedicated full duplex digital channel with line speeds of 2.4, 4.8, 9.36, 19.2, 56 or 64 Kbps.

DS1 - Digital Signal Level 1; a dedicated, high capacity, full duplex channel with a line speed of 1.544 Mbps isochronous serial data having a line signal format of either Alternate Mark Inversion (AMI) or Bipolar with 8 Zero Substitution (B8ZS) and either Superframe (D4) or Extended Superframe (ESF) formats. DS1 Service has the equivalent capacity of 24 Voice Grade or DSO services.

DS3- Digital Signal Level 3; a dedicated, high capacity, full duplex channel with a line speed of 44.736 Mbps isochronous serial data having a line code of bipolar with three zero substitution (B3ZS). Equivalent capacity of 28 DS 1 Services.

End User - Any individual, association, corporation, governmental agency or any other entity subscribing to intrastate service provided by an Exchange Carrier where such individual association, corporation, governmental agency or other entity is not an Interexchange Carrier, Local Exchange Carrier, Wireless Carrier or other entity otherwise utilizing the Company's service to provide a telecommunications service (as defined by applicable law) to its own customers.

Exchange - A group of lines in a unit generally smaller than a LATA established in the tariff of an incumbent local exchange carrier for the administration of communications service in a specified area.

Exchange Carrier - Any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged in the provision of local exchange telephone service.

Facility (or Facilities) - Any item or items of communications plant or equipment used to provide service or connect to the Company.

FGD - Feature Group D; a trunk side switched access connection to the public switched network.

FOC - Final Order Confirmation; the point prior to the start of installation when the order is confirmed.

Transmittal # 4

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 1 – DEFINITIONS, (Cont'd.)

Non-Recurring Charges - One-time initial charges for services or facilities, including but not limited to charges for construction, installation, or special fees, for which the Customer becomes liable at the time service is ordered.

Premises - The space occupied by a Customer or Authorized User in a building or buildings or on contiguous property (except railroad rights-of-way, etc.).

OPC - Originating Point Code; a field within a signaling message that identifies the originating network Signaling Node.

POP - The physical location of an interexchange carrier's facilities.

Presubscription - An arrangement whereby an End User or other user of the Company's services may select and designate to the Company an Interexchange Carrier (IXC) or Carriers it wishes to access, without an Access Code, for completing both intraLATA toll calls and/or interLATA calls. The selected IXC(s) are referred to as the End User's or user's Primary Interexchange Carrier (PIC).

Query - An inquiry to a database to obtain information, processing instructions or service data.

Recurring Charges - The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.

Signaling Point of Interface - The Customer designated location where the SS7 signaling information is exchanged between the Company and the Customer.

SSP - Service Switching Point; an end office or tandem switch equipped with signaling link hardware and software to perform Signal Point functions. SSPs participate in processing a CCS/SS7 call by requesting and responding to call processing instructions issued by the SCP.

Station - Refers to telephone equipment or an exchange access line from or to which calls are placed.

STP - Signal Transfer Point; a specialized packet switch that routes and translates signaling messages in the CCS network.

TDM – Time Division Multiplexing – a method of transmitting and receiving voice signals over the Public Switched Telephone Network (PSTN).

(N)
(N)

Terminal Equipment - Telecommunications devices, apparatus and associated wiring on the Customer-designated premises.

Transmittal # 4

Issued: December 29, 2011

Effective: December 30, 2011

4001 Weston Parkway
Cary, NC 27513

SECTION 1 – DEFINITIONS, (Cont'd.)

Trunk - A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

VOIP-PSTN Access Traffic - VoIP-PSTN Access Traffic is the access traffic exchanged between the Company and the Customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. Traffic originates and/or terminates in IP format if it originates from and/or terminates to an end user customer of a service that requires Internet protocol compatible customer premises equipment.

VoIP service – Transmission of communication by aid of wire, cable, radio, or other like connection using Voice Over Internet Protocol that is originated or terminated in Internet Protocol (IP) format. VoIP services are those services that require the use of IP compatible customer premises equipment.

Wireless Provider - Any carrier authorized to operate as a provider of cellular, personal communications, paging or other form of wireless transmission.

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 5 – SWITCHED ACCESS RATES

5.1 General

This section contains the specific regulations governing the rates and charges that apply for Switched Access Services:

The Company offers Tandem Switching Access Services, Local Switching Access Service – Direct Connection, and Local Switching Access Service – Indirect Connection.

There are three types of rates and charges that apply to Switched Access Service:

- Non-Recurring Charges: One-time charges that apply for a specific work activity.
- Recurring Charges: Fixed charges apply each month and depend on the number and type of facilities in place.
- Usage Charges: Charges that are applied on a per access minute basis. Usage rates are accumulated over a monthly period.

5.1.1 The Company will assess and collect switched access rate elements under this tariff for access services, regardless of whether the Company itself delivers such traffic to the called party's premises or delivers the call to the called party's premises via contractual or other arrangements with an affiliated or unaffiliated provider of VoIP service that does not itself seek to collect switched access charges for the same traffic. The Company will not charge for functions not performed by the Company, its affiliated or unaffiliated provider of VoIP service. For purposes of this provision, functions provided by the Company as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of carrier access service.

5.1.2 In the absence of an agreement between the Company and the Customer specifying the treatment of VoIP-PSTN Traffic, all VoIP-PSTN Access traffic will be assessed switched access charges at the rates set forth in Section 5.4 of this tariff.

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 5 – SWITCHED ACCESS RATES

5.2 Rate Categories

5.2.1 Tandem Switching Access Service (Originating and Terminating)

Tandem Switching is an access service providing transmission and tandem switching between the Customer designated premises and the Company switch(es) where the Customer's traffic is switched from or to an entity other than an End User for purposes of originating or terminating the Customer's communications. The following rate elements will apply to Tandem Switching Access Service: tandem switching charges, tandem switched transport termination charges (including common multiplexing), and tandem switched transport facility mileage charges.

(M)(C)
(M)

5.2.2 Local Switching Access Service - Direct Connection (Originating and Terminating)

Local Switching Access Service - Direct Connection is an access service providing the Customer connections to and use of end office switching equipment for the origination or termination of the Customer's communications to the Company's End Users. Charges for Local Switching Access Service - Direct Connection rate consists of end office switching charges and may also include a DS3 trunk port charge. With Direct Connection, Customer is responsible for ordering or providing the DS3 facility to the Company's point of presence in the access tandem serving area. The DS3 trunk port charge applies on an Individual Case Basis when the Customer is not collocated with the Company's switch. The rate will not exceed that of the competing ILEC rate for the same function.

SECTION 5 – SWITCHED ACCESS RATES, (Cont’d.)

5.2 Rate Categories, (Cont’d.)

5.2.3 Local Switching Access Service - Indirect Connection (Originating and Terminating)

Local Switching Access Service - Indirect Connection is an access service providing the Customer use of end office switching equipment for the origination or termination of the Customer’s communications to the Company’s End Users as well as transport to or from the Customer’s tandem provider. Charges for Local Switching Access Service - Indirect Connection include the following rate elements: end office switching charges (including common trunk port), tandem switched transport termination charges (including common multiplexing), and tandem switched transport facility mileage charges.

(C)
|
|
(C)

5.2.4 Toll-Free 8YY Data Base Query

The Toll-Free 8YY Data Base Query Charge, will apply for each Toll-Free 8YY call query received at the Company’s (or its provider’s) Toll-Free 8YY database.

5.2.5 Toll-Free 8YY Switched Access Service

The Toll-Free 8YY Switched Access Service is an originating access service in which the Company delivers Toll Free calls to Customers. Rate elements apply as set forth in Section 5.4.5.

5.2.6 Optional Features

Other optional features may be available on an Individual Case Basis (ICB).

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 5 – SWITCHED ACCESS RATES, (Cont'd.)

5.4 Rates and Charges, (Cont'd.)

5.4.4 Switched Access Optional Features

(T)(M)

All Optional Features are offered on an Individual Case Basis (ICB).

5.4.5 Miscellaneous Charges

(T)(M)

Customer Requested Due Date Change ^{1 2}	\$50, per order	(M)
Customer Requested Expedite ²	\$250, per location, per order	
Cancellation (after 3 business days from order placement) ²	Full NRCs + \$250, per order	
Design Change, DSO/DS ^{1 2}	\$150, per circuit	
Design Change, DS3 and higher ²	\$300, per circuit	
Administrative Processing ²	\$25, per order	
Returned Check Charge	\$35.00	
Paper / Electronic Media Fee	Customers who elect to receive a paper or CD-ROM version of their invoice will incur a surcharge of \$15.00 per bill cycle.	(M)

Material now found on this page was previously located on Page 40.3.

Material previously found on this page is now located on Page 40.7.

¹ Company Due Date Change Policy - No due date change accepted at or after four (4) days prior to the current due date. If a Customer request is received during that time period, the supplemental charge will apply and, in addition, the billing will start on the current due date without exception.

(M)

² For services involving facilities leased from other telecommunications providers, Supplementary Charges will be priced on an Individual Case Basis, and will be based upon a pass-through of all charges assessed by other providers, plus the Company's administrative costs.

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 5 – SWITCHED ACCESS RATES, (Cont'd.)

Tandem Switching Access Service (Originating and Terminating)

**Originating Call Flow:**

- A. CLEC's Non-End User Customer delivers long distance call to CLEC switch
- B. If 8YY call, CLEC Switch looks up IXC that should receive the call
- C. Call is routed to IXC switch from CLEC switch

Originating Charges:

- CLEC charges IXC (1) Tandem Switching Access Service, which is comprised of a) tandem switching, b) tandem termination, and c) tandem facility mileage
- 8YY Query Charge, as applicable
- Additional charges may apply depending upon whether the IXC connects directly to the CLEC or if call must be routed through the ILEC Access Tandem to IXC

Terminating Call Flow:

- C. IXC delivers terminating long distance call to CLEC switch
- A. Call is routed to CLEC's Non-End User Customer

Terminating Charges:

- CLEC charges IXC for (1) Tandem Switching Access Service, which is comprised of a) tandem switching, b) tandem termination, and c) tandem facility mileage.
- Additional charges may apply depending upon whether the IXC connects directly to CLEC or if call must be routed through an ILEC Access Tandem to CLEC

INTERSTATE SWITCHED ACCESS SERVICES TARIFF

SECTION 5 – SWITCHED ACCESS RATES, (Cont'd.)

Local Switching Access Service - Direct Connection (Originating and Termination)

Originating Call Flow:

- A. CLEC's End User places a long distance call that is routed to CLEC switch
- B. If 8YY call, CLEC Switch looks up IXC that should receive the call
- C. Call is routed to IXC over dedicated transport

Originating Charges:

- CLEC charges IXC (1) Local Switching Access Service, which is comprised of a) end office switching, and b) dedicated trunk port charge, where applicable; and (2) 8YY Query Charge, as applicable
- Customer is responsible for providing or ordering DS3 facility to CLEC's point of presence in the access tandem serving area

Terminating Call Flow:

- C. IXC delivers terminating long distance call to CLEC over dedicated transport
- A. Call is routed to CLEC's End User

Terminating Charges:

- CLEC charges IXC (1) Local Switching Access Service, which is comprised of a) end office switching, and b) dedicated trunk port charge, where applicable
- Customer is responsible for providing or ordering DS3 facility to CLEC's point of presence in the access tandem serving area
