TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Each page is numbered sequentially. However, a new page is occasionally added to the Tariff. When a new page is added between those already in effect, a decimal is added. For example, a new page added between page 15 and page 16 would be page 15.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page 15 cancels the 3rd Revised Page 15.
- C. Paragraph Numbering Sequence - Each level of paragraph numbering herein is subservient to its next higher level as shown:
 - 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.(1)
 - 2.1.1.A.(1)(a)

Some material previously found on this page now found on 1st Revised Page No. 4.

SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (CONT'D)

TDM – Time Division Multiplexing – a method of transmitting and receiving voice signals over the Public Switched Telephone Network (PSTN). (N)
(N)

Terminal Equipment - Telecommunications devices, apparatus and associated wiring on the Customer-designated premises.

Terminating Direction - The use of Switched Access Service for the completion of calls from a Customer's Point of Presence to an End User Premises.

Timely Payment – A payment on a Customer's account made on or before the due date.

Toll VOIP-PSTN Traffic – The term Toll VoIP-PSTN Traffic denotes a Customer's interexchange voice traffic exchanged with the Telephone Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. Toll VoIP-PSTN Traffic originates and/or terminates in IP format when it originates from and/or terminates to an end user customer of a service that requires IP-compatible customer premises equipment. (N)
|
|
|
(N)

Trunk - A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

Trunk Group - A set of trunks, which are traffic engineered as a unit for the establishment of connections between switching systems in which all of the communications paths are interchangeable.

Underlying Carrier – A provider of interstate telecommunications services from whom the Company acquires facilities or services that it utilizes to provide Company services to Customers.

V & H Coordinates - Geographic points which define the originating and terminating points of a call in mathematical terms so that the airline mileage of the call may be determined. Call mileage may be used for the purpose of rating calls.

VoIP Service – Transmission of communication by aid of wire, cable, radio, or other like connection using Voice over Internet Protocol that is originated or terminated in Internet Protocol (IP) format. VoIP Services are those services that require the use of IP compatible customer premises equipment. (N)

Transmittal No. 12

Issued: December 30, 2011

Effective: January 1, 2012

Issued By:
Vice President – Business Development
25925 Telegraph Rd., Suite 210
Southfield, MI 48033

FCa1112

SECTION 3 - SWITCHED ACCESS SERVICE

3.1 General

3.1.1 Switched Access Service, which is available to Customers for their use in furnishing their services to End Users, provides a two-point communications path between a Customer's Premises and an End User's Premises. It provides for the use of common terminating, switching and trunking facilities, and for the use of common subscriber plant of the Company. Switched Access Service provides for the ability to originate calls from an End User's Premises to a Customer's Premises and to terminate calls from a Customer's Premises to an End User's Premises in the LATA where it is provided.

3.1.2 When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).

3.1.3 In the absence of an ASR as described in Section 3.4, delivery of calls to, or acceptance of calls from, the Customer's End User location(s) via Company-provided switched access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.

3.1.4 Application of Access Charges to Toll VoIP-PSTN Traffic (N)

- A. All Toll VoIP-PSTN traffic will be assessed switched access charges at the rates set forth in Section 4.1 of this tariff. |
- B. The Company shall assess and collect switched access rate elements under this tariff for access services, regardless of whether the Company itself delivers such traffic to the called party's premises or delivers the call to the called party's premises via contractual or other arrangements with an affiliated or unaffiliated provider of VoIP service that does not itself seek to collect switched access charges for the same traffic. The Company will not charge for functions not performed by the Company, its affiliated or unaffiliated provider of VoIP service. For purposes of this provision, functions provided by the Company as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of carrier access service. (N)

Transmittal No. 12

Southfield, MI 48033

FCa1112

SECTION 5 - MISCELLANEOUS SERVICES AND CHARGES, (CONT'D)

5.6 Access Recovery Charge

(N)

A monthly Access Recovery Charge will be assessed in order to facilitate access recovery partly as a result of both state and federal decisions and policies. The fee will be applied as follows:

Single Line, per line	\$0.50 per month
Multiline, per line	\$0.50 per month

(N)
