8.8 Blocking.....81

8.8.1 Blocking Charge81

SECTION 9 - RESERVED FOR FUTURE USE.....82

FeatureGroup IP
713.231.2310

1.4 The Company will assess and collect Reciprocal Compensation under this tariff for VoIP and IGI-POP Traffic, regardless of whether the Company itself delivers such traffic to the called party's physical or virtual premises or delivers the call to the called party's virtual or physical premises via contractual or other arrangements with an affiliated or unaffiliated provider of VoIP service that does not itself seek to collect switched access or reciprocal compensation charges for the same traffic. Company will not charge for functions not performed by the Company, or an affiliated or unaffiliated provider of VoIP service. For purposes of this provision, functions provided by the Company as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of the carrier's service.	(N) (N) (N) (N) (N) (N) (N) (N) (N) (N)
1.4.1 In the absence of an agreement between the Company and the Customer specifying the treatment of VoIP-PSTN Traffic, all VoIP-PSTN traffic will be assessed the Reciprocal Compensation charges as set forth in Section 8.6 of this tariff.	(N) (N) (N)
1.5 The provision of Services as set forth in this tariff does not constitute a joint undertaking with the customer for the furnishing of any service.	(M) (M)
2.0 REGULATIONS FOR ACCESS SERVICE AND IGI-POP SERVICE	
2.1 <u>Undertaking of the Company</u>	
2.1.1 <u>Scope</u> Access Service consists of access to the Public Switched Telephone Network operated by an exchange carrier or the Company's network for the purpose of originating or terminating communications. Access service also includes	(C) (C) (C)

certain ancillary or incidental services relating to signaling layer interaction between the Company and LECs, IXC's and CMRS carriers without regard to the jurisdictional nature of the traffic exchanged at the bearer layer.

An LEC, IXC or CMRS Carrier that routes traffic to the Company's network for termination of exchange, intraLATA toll or interLATA toll traffic, or which Blocks traffic originating on the Carrier Customer's network shall be deemed to have submitted, and the Company shall be deemed to have received, an Order at the time traffic is first routed to Company or first blocked by the Carrier Customer, unless the Company and the Carrier have previously expressly provided for alternative treatment. Carrier and Company will exchange all required information to measure traffic and invoice charges and credits. (C)

An LEC, IXC or CMRS Carrier that routes traffic to or receives traffic from an "IGI POP" customer of Company shall create a charge to the other carrier only according to the terms of this agreement. All traffic within the LATA from the perspective of the IGI-POP customer shall be exchanged via Reciprocal Compensation and shall not create an exchange access charge under § 251(g). (C)

Also, consistent with the FCC Order on Voice over Internet Protocol, Company will offer to all other regulated local exchange carriers and CMRS providers with which it exchanges traffic, a SIP Interconnection arrangement for the mutual exchange of **all traffic** to and from VoIP providers which includes all IGI POP traffic. (C)

2.1.2 Liability of the Company.

2.1.2(A) The liability of the Company for damages arising out of the furnishing of its Services, including but not limited to mistakes, omissions, interruptions, delays, errors, other defects, or representations by the Company, or use of these services or damages arising out of the failure to furnish the service whether caused by act or omission, shall be limited to the extension of allowances for interruption as set forth following. The extension of such allowances for interruption shall be the sole remedy of the Customer and the sole liability of the Company. The Company will not be liable for any direct, indirect, incidental, special, consequential, exemplary or punitive damages to Customer as a result of any Company service, equipment or facilities, or the acts or omissions or negligence of the Company's employees or agents.

2.1.2(B) The Company shall not incur any liability with regard to delayed installation of Company facilities or commencement of Service. With respect to any other claim or suit, by a Customer or by any others, for damages associated with the ordering (including the reservation of any specific number for use with a service), installation (including delays thereof), provision, termination, maintenance, repair interruption or restoration of any service or facilities offered under this Tariff, and the Company's liability, if any, shall be limited as provided herein.

party, arising from any act or omission by the Customer or Authorized User, including, without limitation, use of the Company's services and facilities in a manner not contemplated by the agreement between the Customer and the Company.

2.3.2(C) any claim, loss, charges or damages related to a failure of Customers' equipment to perform such database inquiries and/or all necessary functions to ensure proper routing of traffic, including but not limited to local number portability.

2.3.3 Jurisdictional Reporting

There are no jurisdictional reporting requirements for IGI-POP Service since all traffic is considered to be interstate for the purpose of determining the regulatory jurisdiction.

The jurisdictional reporting requirements for Access Services will be as specified below. When a Customer orders Access Services, its projected Percent Interstate Usage (PIU) must be provided in whole numbers to the Company. These whole number percentages will be used by the Company to apportion the use and/or charges between interstate and intrastate until a revised report is received as set forth herein.

2.3.3(A) **Originating Access:** Originating access minutes may be based on traffic originating at the State, LATA or Local Switching Office level, provided that the traffic being measured is only traffic originating from or over Company provided facilities. The Customer must provide the Company with a projected PIU factor on a quarterly basis, as specified below. Originating access minutes will be measured as follows, based on type of access:

2.3.3(A)1. For Feature Group D Access Service(s), where the Company can determine jurisdiction by call detail, the projected Percent Interstate Usage (PIU) will be developed by the Company on a monthly basis by dividing the measured interstate originating access minutes by the total originating access minutes.

2.3.3(A)2. For, 700, 8XX, calling card and operator service Access, the Customer must provide the Company with a projected PIU factor for each type of access. The Customer who provides a PIU factor shall supply the Company with an interstate percentage of originating access minutes.

2.3.3(A)3. If no PIU for originating minutes is submitted as specified herein, then the projected PIU will be set on a default basis of fifty (50) percent interstate traffic.

2.3.3(B) **Terminating Access:** For Feature Group D Access Service(s), the Customer must provide the Company with a projected PIU factor by supplying the Company with an interstate percentage of terminating access minutes on a quarterly basis, as described in paragraph D. following. If no projected PIU factor is submitted by the Customer, then the projected PIU developed for originating access in Section 2.3.3(A), above, will be applied

(C)

to the terminating access minutes.

2.3.3(C) Except where the Company measured access minutes are used as set forth above, the Customer reported Projected PIU factor as set forth above will be used until the Customer reports a different projected PIU factor, as set forth below. The revised report will serve as the basis for future billing and will be effective on the next bill date.

2.3.3(D) Effective on the first of January, April, July and October of each year the Customer shall update its interstate and intrastate jurisdictional report. The Customer shall forward to the Company, to be received no later than fifteen (15) days after the first of each such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June and September, respectively, for each service arranged for interstate use, based solely on the traffic originating or terminating over Company provided facilities. The revised report will serve as the basis for the next three months billing and will be effective on the bill date for that service. If the Customer does not supply the reports for those services where reports are needed, the Company will assume the percentage to be the same as that provided previously. For those cases in which a quarterly report has never been received from the Customer, the Company will assume the percentages to be the same as those provided in the Access Service Request.

2.3.3(E) Jurisdictional Reports Verification:

If a billing dispute arises or a regulatory commission questions the projected PIU factor, the Customer will provide the data used to determine the projected PIU factor. The Customer will supply the data within thirty (30) days of the Company's request.

The Customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained and, upon request of the Company, shall make the records available for inspection as reasonably necessary for purposes of verification of the percentages. The Company reserves the right to conduct an audit at any time during the year. The Customer, at its own expense, has the right to retain an independent auditing firm.

2.3.3(F) Terminating Traffic. All traffic terminated over Company's network on behalf of an Exchange Carrier, IXC or CMRS Carrier that is subject to this Tariff shall be treated as Reciprocal Compensation Traffic, unless the terms of an interconnection, traffic exchange or other written agreement expressly provide otherwise.

(C)
(C)
(C)
(C)

2.3.3(G) Company's PIU and other Factors are set out in section 8.4.

(N)

2.4 Customer Equipment and Channels

2.4.1 General

A Customer may transmit or receive information or signals via the facilities of Company.

immediately available, then a late payment penalty shall be due to the Company. The late payment penalty shall be the portion of the payment not received by the date due, multiplied by the one and one-half percent (1.5%) late charge applied to the unpaid balance.

2.5.2(G) Amounts not paid within thirty (30) days after the date of invoice will be considered past due. If the Company becomes concerned at any time about the ability of a Customer to pay its bills, the Company may require that the Customer pay its bills within a specified number of days and make such payments in cash or the equivalent of cash. If a service is disconnected by the Company and later restored, restoration of service will be subject to all applicable installation charges.

2.5.2(H) Billing Disputes – IGI-POP

An IGI-POP Customer shall have up to ninety (90) days (commencing five (5) days after remittance of the bill) to notify the Company of a dispute over charges or to receive credits.

2.5.2(H).1 In the event that a billing dispute occurs concerning any charges billed to an IGI-POP Customer by Company the following regulations will apply.

2.5.2(H).1.a A good faith dispute requires Customer to provide a written claim to Company. Instructions for submitting a dispute can be obtained by calling the billing inquiry number shown on Customer's bill. Such claim must identify in detail the basis for the dispute, the account number under which the bill has been rendered, the date of the bill and the specific items on the bill being disputed, to permit Company to investigate the merits of the dispute.

2.5.2(H).1.b The date of the dispute shall be the date on which Customer furnishes Company the account information required by Section 2.5.2(H).1.a above.

2.5.2(H).1.c The date of resolution shall be the date on which Company completes its investigation of the dispute, notifies Customer in writing of the disposition and, if the billing dispute is resolved in favor of Customer, applies the credit for the amount of the dispute resolved in Customer's favor to Customer's bill.

2.5.2(H).1.d If the dispute is decided to be in favor of Company, then the resolution date will be the date upon which a written decision on this dispute is sent to Customer. Resolution is final when notice is provided to the Customer.

2.5.2(H).1.e Billing Disputes Resolved in Favor of Company

In the event that a billing dispute is resolved in favor of Company, any payments withheld pending settlement of the dispute shall be subject to a late payment charge determined in accordance with 2.5.2(F) preceding and applied to such disputed charges. Such annual rate will be compounded daily and applied for each month or portion thereof that such charges were unpaid.

(C)
(C)
(C)
(C)
(C)

FeatureGroup IP
713.231.2310

transfer of substantially all the assets of the Company; or pursuant to any financing, merger or reorganization of the Company.

2.9 Notices and Communications

2.9.1 The Customer shall designate on the Service Order an address to which the Company shall mail or deliver all notices and other communications, except that the Customer may also designate a separate address to which the Company's bills for service shall be mailed.

2.9.2 All notices or other communications required to be given pursuant to this Tariff shall be in writing. Notices and other communications of either party, and all bills mailed by the Company, shall be presumed to have been delivered to the other party on the third (3rd) business day following deposit of the notice, communication, or bill with the U.S. Mail or a private delivery service, prepaid and properly addressed, or when actually received or refused by the addressee, whichever occurs first.

2.9.3 The Company or the Customer shall advise the other party of any changes to the addresses designated for notices, other communications or billing, by following the procedures for giving notice set forth herein

2.10 Definitions

Certain terms used generally throughout this Tariff for Services of this Company are defined below. Special or regulatory terms used but not specifically defined herein will have the meaning ascribed to them by the federal Communications Act, FCC rules or, as applicable, the rules of the state commission.

(N)
(N)
(N)

Access

For purposes of this Tariff, "Access" will be defined and applied consistent with Federal Communications Commission's Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) ("FCC Order").

(C)
(C)
(C)
(C)

Access Code

Denotes a uniform seven digit code assigned by a Local Exchange Company to an individual Interexchange Carrier. The seven digit code has the form 101XXXX or 950-XXXX.

Access Customer Name Abbreviation (ACNA)

Denotes a three alphanumeric character code that identifies Legacy PSTN Carriers from which Access Services bills are generated when the PSTN Carrier provides originating or terminating per minute Traffic.

<u>Access Customer Terminal Location (ACTL).</u>	(M)
Denotes the eleven (11) character Common Language Location Identifier (CLLI) code identifying the Feature Group IP's Point of Presence (POP/InterLATA Facility terminal location) for the PSTN	(M)
	(M)
	(M)
<u>Access Minutes</u>	(M)
Denotes the purchase of usage based Exchange Access facilities by an Interexchange Carrier, Local Exchange Carrier or CMRS Carrier for the purpose of providing telecommunications service.	(M)
	(C)
	(C)
<u>Access Node</u>	(M)
Denotes a Local Exchange Company central office (CO Access Node) or a customer designated premises (Premises Access Node) equipped to interface with a Legacy Interexchange Carrier.	(M)
	(M)
	(M)
<u>Access Tandem - Interexchange</u>	(M)
Denotes a Telephone Company switching system that provides a concentration and distribution function for originating or terminating Switched Access traffic between Local Exchange Carriers and Legacy Interexchange Carriers and CMRS Carriers.	(M)
	(M)
	(M)
<u>Access Service or Switched Access Service</u>	(M)
Access to the switched network of an Exchange Carrier for the purpose of originating or terminating communications. Access Service is available to carriers as defined herein.	(M)
	(M)
<u>Access Service Request (ASR)</u>	(M)
An industry service order format used by Access Service customers and access providers as agreed to by the Ordering and Billing Forum.	(M)
	(M)
<u>Advance Payment</u>	(M)
Payment of all or part of a charge required before the start of service.	(M)
<u>Alternate Access</u>	(M)
Alternate Access has the same meaning as Local Access except that the provider of the service is an entity other than the local Exchange Carrier authorized or permitted to provide such service. The charges for Alternate Access may be specified in a private agreement rather than in a published or special Tariff if private agreements are permitted by applicable governmental rules.	(M)
	(M)
	(M)
<u>Authorized User</u>	(M)
A person, firm, corporation or other entity that either is authorized by the Customer to use Services or is placed in a position by the Customer, either through acts or omissions, to use Services. A Joint User is one example, but not the only kind, of Authorized User.	(M)
	(M)
	(M)

<u>Blocking</u>	(N)
As per the FCC Order, it is any action or inaction by a Carrier or VoIP provider which results in a NANPA assigned number not routing and terminating as requested by the Carrier or VoIP provider who has been assigned the NANPA number. Specific to Company this includes any action or inaction which results in a 5yy non-geographic number which has been assigned to Company or any NANPA number assigned to a Transit Customer of Company not routing for termination to an active Company Switch within a LATA. A Carrier or VoIP provider may test if they are blocking Company assigned numbers by dialing 500-888-8378 or 500-888-“TEST” from their network. If the call does not complete the Carrier or VoIP provider is blocking.	(N) (N) (N) (N) (N) (N) (N) (N) (N) (N)
<u>Bit</u>	(M)
The smallest unit of information in the binary system of notation.	(M)
<u>Callable E-mail Address</u>	(M)
A Session Internet Protocol (SIP) method of completing a call to an IGI-POP location customer not using the PSTN.	(M) (M)
<u>Carrier or Common Carrier</u>	(M)
See Interexchange Carrier or Exchange Carrier.	(M)
<u>Channel(s)</u>	(M)
An electrical or, in the case of fiber optic-based transmission systems, a photonic communications path between two or more points of termination.	(M) (M)
<u>Common Channel Signaling (CCS)</u>	(M)
A high speed packet switched communications network which is separate (out of band) from the public packet switched and message networks. It is used to carry addressed signaling messages for individual trunk circuits and/or database related services between signaling points in the CCS network.	(M) (M) (M) (M)
<u>Company</u>	(M)
UTEX Communications Corp d/b/a FeatureGroup IP, which is the issuer of this Tariff.	(M)
<u>Commission</u>	(M)
Federal Communications Commission	(M)
<u>Conventional Signaling</u>	(M)
The inter-machine signaling system has been traditionally used in North America for the purpose of transmitting the called number’s address digits from the originating Local Switching Office which terminates the call. In this system, all of the dialed digits are received by the originating switch, a path is selected, and the sequence of supervisory	(M) (M) (M) (M) (M)

signals and outpulsed digits is initiated. No overlap outpulsing ten digit ANI, ANI information digits, or acknowledgment link are included in this signaling sequence.	(M) (M)
<u>Customer</u>	(C)
For purposes of this Tariff, “Customer” denotes any individual, partnership, association, joint-stock company, trust, corporation, or governmental entity or other entity that (1) is a Telecommunications Carrier; (2) does not have an interconnection agreement with Company; and either (3a) delivers traffic to Company for termination or whose users attempt to initiate a call by dialing a telephone number assigned to Company by NANPA or that otherwise exchanges originating or terminating traffic with Company; or (3b) blocks the delivery of traffic to a NANPA number assigned to Company or a Transit Customer of Company including but not limited to 5yy numbers.	(C) (C) (C) (C) (C) (C) (C) (C) (C) (C)
<u>De Minimus.</u>	(N)
Means an amount less than or equal to \$100.00 per month.	(N)
<u>De Minimus Exchange Carrier.</u>	(N)
A De Minimus Exchange Carrier is an Exchange Carrier that is not included in the list of Non De Minimus Exchange Carriers listed in the Rate Tables in section 8.6. The basis for exclusion from the list of Non De Minimus Exchange Carriers is based upon Company’s calculation as made and periodically updated that the Exchange Carrier will be owed less than the De Minimus amount in termination charges. Thus, the administrative costs related to accounting and billing is materially less than the anticipated payments.	(N) (N) (N) (N) (N) (N) (N) (N)
<u>Duplex Service</u>	(M)
Service which provides for simultaneous transmission in both directions.	(M)
<u>800 Data Base Access Service</u>	(M)
The term “800 Data Base Access Service” denotes a toll-free originating Trunk-side Access Service when the 8XX Service Access Code (i.e., 800, 822, 833, 844, 855, 866, 877, or 888 as available) is used. The term 8XX is used interchangeably with 800 Data Base Service throughout this Tariff to describe this service.	(M) (M) (M) (M) (M)
<u>End User</u>	(M)
End User means any customer of an interstate or foreign telecommunications service that is not a carrier except that a carrier shall be deemed to be an “end user” when such carrier uses a telecommunications service for administrative purposes. A person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an “end user” if all resale transmissions offered by such reseller originate on the premises of such reseller. A person or entity that utilizes IGI-POP services shall be deemed to be an “end user” even if such an entity resells all or part of the service.	(M) (M) (M) (M) (M) (M) (M) (M)

<u>End Point</u>	(M)
A network appearance that initiates and receives messages and signals related to telephony service. End Points may be real or virtual in nature and many may be present in a given platform. An End Point is a participant in a Call Session; the user supported by the Responsible Service Provider. There will be at least two kinds of End Points. (1) The Originating End Point, which sends the call control set-up message for a call session, or on whose behalf the Responsible Service Provider sends the call control set-up message for a call session; and, (2) the Terminating End Point, to whom the call session is addressed, perhaps through one or more Service Providers.	(M) (M) (M) (M) (M) (M) (M) (M)
<u>End Point User</u>	(M)
End Point User means the same thing as “End User” except that the customer may subscribe to services or obtain functionalities other than or in addition to telecommunications service, such as enhanced and/or information service.	(M) (M) (M)
<u>Enhanced Service</u>	(C)
“Enhanced service” information services and/or enhanced services a Company’s Customer states is an enhanced and/or information service under Section 153(20) of the Act and/or 47 CFR § 64.702. Under the FCC Order, the regulatory status of VoIP is no longer relevant because VoIP Traffic has been brought within § 251(b)(5) and thus is subject to Reciprocal Compensation.	(C) (C) (C) (C) (C) (C)
<u>Enhanced Service Provider or ESP</u>	(C)
A provider of an enhanced and/or information service.	(C)
<u>ESP Exemption</u>	(C)
The “ESP Exemption” is an affirmative exercise of federal regulatory authority over interstate service whereby, despite heavy use of interstate service, the FCC allows ESPs to purchase flat rated local service to terminate and originate traffic over Local Exchange Carrier and CMRS networks without creating any liability for the payment of traditional Exchange Access charges. When an ESP takes advantage of the ESP exemption, it is exempt from being charged Exchange Access charges on a usage sensitive basis. An ESP, at its election, may choose to not avail itself of the ESP exemption and instead subscribe to interstate Access.	(C) (C) (C) (C) (C) (C) (C) (C) (C)

<u>Ethernet Voice Session (EVS)</u>	(M)
Denotes a unit for measuring the number of simultaneous unique IP voice communication paths which can occur over a physical Internet Connection to the IGI-POP.	(M)
	(M)
<u>Exchange Carrier</u>	(M)
Means a Local Exchange Carrier or a Commercial Mobile Radio Service provider.	(M)
<u>Exchange Access</u>	(M)
“Exchange Access” means the offering of access to telephone exchange services or facilities for the purpose of the origination or termination of telephone toll services.	(M)
	(M)
<u>Fiber Optic Cable</u>	(M)
A thin filament of glass with a protective outer coating through which a light beam carrying communications signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.	(M)
	(M)
<u>Firm Order Confirmation (FOC)</u>	(M)
Acknowledgment by the Company of receipt of an Service Request from the Customer and commitment by the Company of a Service Date.	(M)
	(M)
<u>Hub</u>	(M)
The Company office where all facilities are terminated for purposes of interconnection to Trunks and/or cross-connection to distant ends.	(M)
	(M)
<u>Incumbent LEC</u>	(M)
The Local Exchange Carrier that, with respect to an area:	(M)
(A) on the date of enactment of the Telecommunications Act of 1996, provided telephone exchange service in such area; and	(M)
(B)(i) on such date of enactment, was deemed to be a member of the exchange carrier association pursuant to section 69.601(b) of the Commission’s regulations (47 C.F.R. 69.601(b)); or (ii) is a person or entity that, on or after such date of enactment, became a successor or assign of a member described in clause (i).	(M)
	(M)
<u>Individual Case Basis</u>	(M)
A service arrangement in which the regulations, rates and charges are developed based on the specific circumstances of the Customer’s situation.	(M)
	(M)

<u>Interexchange Carrier (IC) or Interexchange Common Carrier (IXC)</u>	(M)
Any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged in state or foreign communication for hire by wire or radio, between two or more exchanges, insofar as the IC is acting as a common carrier.	(M)
	(M)
	(M)
<u>International Direct Distance Dialing (IDDD)</u>	(M)
Denotes the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a FGD connection with a Legacy Interexchange Carrier.	(M)
	(M)
	(M)
<u>Internet Protocol (IP) Access Connection</u>	(M)
Denotes a connection between an Internet Service Provider and an Internet Service Provider Customer which uses communication services such as; dial-up access, dedicated Basic Rate Interface ISDN access through the PSTN, Cable Modem, DSL Line, Dedicated or fractional DS1 to internet, Dedicated or fractional DS3, licensed or unlicensed wireless, or other IP connections including various forms of Ethernet connections.	(M)
	(M)
<u>Information access</u>	(M)
Denotes the provision of telecommunications services to an enhanced and/or information service provider.	(M)
	(M)
<u>Information service</u>	(M)
“Information service” means the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information via telecommunications, and includes electronic publishing, but does not include any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service.	(M)
	(M)
<u>IntraLATA Interexchange Traffic</u>	(M)
“IntraLATA Interexchange Traffic” means telephone toll service purposefully purchased out of published intrastate tariffs from a Legacy carrier.	(M)
	(M)
<u>Interconnected PSTN Provider</u>	(M)
Any provider of service that has been directly assigned geographic or non-geographic numbering resources (E.164 addresses) by the North American Numbering Plan Administrator, including but not limited to (1) a Legacy carrier, or, (2) an Interconnected VoIP Service Provider that has obtained a waiver from the FCC allowing direct assignment.	(M)
	(M)
<u>InterLATA Interexchange Traffic</u>	(M)
“InterLATA Interexchange Traffic” means telephone toll service purposefully purchased out of published intrastate or interstate tariffs from a Legacy carrier.	(M)
	(M)

FeatureGroup IP
713.231.2310

<u>ISP Customer</u>	(M)
Denotes a person (including another ISP) utilizing an ISP's service in whole or in part.	(M)
<u>ISP Customer Voice Identification Information</u>	(C)
For all IGI-POP voice traffic coming from or going to an ISP Customer, FeatureGroup IP shall endeavor to pass an interoperable or "Callable" e-mail address as the NANP Calling Party Name, and if applicable customer provided ANI, Charge Number, any privacy indicator and an originating and terminating number dialed if (1) such information exists, and (2) there is technically feasible way to pass such information. Consistent with the FCC Order, such information shall not have any bearing on how the call is rated.	(C) (C) (C) (C) (C) (C) (C) (C) (C)
<u>Joint User</u>	(M)
A person, firm or corporation designated by the Customer as a user of facilities furnished to the Customer by the Company, and to whom a portion of the charges for such facilities are billed under a joint use arrangement. A Joint User is a form of Authorized User.	(M) (M) (M) (M)
<u>Jointly Provided Access</u>	(C)
Denotes the joint provision of switched or special access service by two or more Local Exchange Carriers within a LATA to support Telephone Toll service offered by a Legacy IXC. IGI-POP service traffic shall not be considered Jointly Provided Access since it is subject to § 251(b)(5) under the FCC Order. Jointly Provided Access is affected via MPB or non-MPB.	(C) (C) (C) (C) (C) (C) (C)
<u>Kbps</u>	(M)
Kilobits, or thousands of Bits, per second.	(M)
<u>LATA</u>	(M)
A local access and transport area established pursuant to the Modification of Final Judgment entered by the United States District Court for the District of Columbia in Civil Action No. 82-0192 for the provision and administration of communications services.	(M) (M) (M) (M)

<u>Legacy</u>	(C)
Connotes traditional circuit-switched technology and corresponding rate and policy developed and used in the United States communications system between the years of 1930 and 1996. Legacy does not include VoIP traffic which is governed by the FCC Order.	(C) (C) (C)
<u>Light Regulatory Touch</u>	(C)
The Stated FCC policy of allowing the natural technological and economic evolution of VoIP services to take place without applying the burdensome regulations and hidden subsidy inter-carrier rate and compensation scheme of the regulated Legacy telecommunication network to retard the growth of the still-nascent VoIP industry and the technologies that support VoIP.	(C) (C) (C) (C) (C)
<u>Line Information Data Base (LIDB)</u>	(M)
Denotes a data base system containing certain call processing attributes of working telephone numbers or accounts. The attributes provide customers with information that can be used to facilitate completion of calls or services and the processing of them.	(M) (M) (M)
<u>Local Access</u>	(M)
A dedicated or switched connection between two points within a LATA that is subject to this Tariff.	(M) (M)

<u>Local Access and Transport Area (LATA)</u>	(M)
Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes.	(M) (M) (M)
<u>Local Calling Area (LCA)</u>	(C)
Represented by one or more rate centers from which originating and terminating traffic may complete a call without incurring Message Telecommunications Service (MTS) or Telephone Toll charges. Typically there is a 1+ retail "toll indicator" for non LCA calls. Under the FCC Order and after the transition period there will no longer be a need to distinguish an LCA for IGI-POP traffic as all IGI-POP traffic will be subject to the § 251(b)(5) bill and keep reciprocal rates. Rates during the transition are listed in section 8.6.	(C) (C) (C) (C) (C) (C) (C)
<u>Local Exchange Carrier</u>	(C)
Means any person other than a CMRS provider that is engaged in the provision of Telephone Exchange Service or Exchange Access. Such term does not include a person insofar as such person is engaged in the provision of a commercial mobile service under section 332(c), except to the extent that the Commission finds that such service should be included in the definition of such term.	(C) (C) (C) (C) (C) (C)
<u>Local Interconnection</u>	(C)
Denotes the physical joining of two or more Exchange Carriers' networks within a LATA for the mutual exchange of traffic within the LATA in which they have directly or indirectly joined their networks.	(C) (C) (C)
<u>Local Tandem</u>	(M)
Denotes a Telephone Company switching system that provides a concentration and distribution function for originating or terminating Local/IntraLATA traffic between Local Exchange Carriers within a single LATA.	(M) (M) (M) (M)
<u>Location Routing Number (LRN)</u>	(M)
Denotes a NPA-NXX-XXXX within a NXX that is assigned to a switch that serves ported numbers. The LRN is associated with ported numbers in the Local Number Portability data base along with the appropriate CCS/SS7 Point Code for the designated switch (i.e., the recipient switch) that is required to route calls directed to ported numbers working out of the switch.	(M) (M) (M) (M) (M) (M)

<u>Local Switching Office</u>	(M)
The switching office where customer station Channels are terminated for purposes of interconnection to each other and to interoffice Trunks.	(M)
	(M)
<u>Mbps</u>	(M)
Megabits, or millions of Bits, per second.	(M)
<u>Meet Point Billing (MPB)</u>	(N)
Meet-Point Billing (MPB) is an arrangement between multiple Exchange Carriers that allows each Exchange Carrier to provide service and bill for the portion of the access service that is rendered under its own tariff.	(N)
	(N)
	(N)
<u>Mobile Telephone Switching Office</u>	(M)
Denotes a Mobile Carrier's switching system that is used to connect to mobile stations for the purposes of interconnection to each other and to trunks interfacing with the public switched network.	(M)
	(M)
	(M)
<u>Non-Toll Traffic</u>	(M)
Denotes all legacy traffic which is not specifically rated as either "IntraLATA Interexchange Traffic" or "InterLATA Interexchange Traffic."	(M)
	(M)
<u>Non-Recurring Charges</u>	(M)
The one-time initial charges for services or facilities, including but not limited to charges for construction, installation, or special fees, for which the Customer becomes liable at the time the Service Order is executed.	(M)
	(M)
	(M)
<u>North American Numbering Plan (NANP)</u>	(M)
Denotes a three-digit Numbering Plan Area (NPA) code and a seven-digit telephone number made up of a three-digit Central Office code (NXX) plus a four-digit station, directory or line number.	(M)
	(M)
	(M)
<u>NANPA</u>	(N)
Means the North American Numbering Plan Administrator.	(N)
<u>Non-Access Telecommunications Traffic</u>	(N)
Non-Access Telecommunications Traffic is as defined in FCC Rule 51.701(b).	(N)
<u>Non De Minimus Exchange Carrier</u>	(N)
A Non De Minimus Carrier is an Exchange Carrier listed in Rate Tables in section 1.6. The basis for inclusion on the list of Non De Minimus Exchange Carriers is Company's calculation as made and periodically updated that the Exchange Carrier will be owed more than the De Minimus amount in termination charges.	(N)
	(N)
	(N)

<u>Non Meet-Point Billing (non-MPB)</u>	(N)
Non Meet-Point Billing is used in multiprovider situations when Meet-Point Billing is not feasible for reasons such as an inordinate number of billing percentages required, the lack of End Office-specific call detail, when multiple routes are available or there will be many providers due to LATA-wide termination. Revenue sharing is the alternative to Meet-Point Billing, and is the sole means to achieve Non Meet-Point Billing.	(N)
<u>Off-Hook</u>	(M)
The active condition of switched access or a telephone exchange service line.	(M)
<u>Off-Net</u>	(M)
A Customer is considered to be Off-Net when its Point of Presence is not served by the same Hub in which the Company's Local Switching Center, which is providing service to the Customer, is located.	(M)
<u>On-Hook</u>	(M)
The idle condition of switched access or a telephone exchange service line.	(M)
<u>On-Net:</u>	(M)
A Customer is considered to be On-Net when its Point of Presence is served by the same Hub in which the Company's Local Switching Center, which is providing service to the Customer, is located.	(M)
<u>Operating Carrier Number (OCN)</u>	(N)
Means a "company code" assigned to exchange carriers (LECs and CMRS). Company codes are used to uniquely identify telecommunications service providers per industry standard ATIS-0300251, Codes for Identification of Service Providers for Information Exchange. The National Exchange Carrier Association (NECA) assigns all Company Codes.	(N)
<u>Operator Services</u>	(M)
Denotes any telecommunications service that includes any automatic or live assistance to a consumer to arrange for billing or completion, or both, of a telephone call.	(M)
<u>Out of Band Signaling</u>	(M)
A signaling feature which allows Customers, Carriers and the Company to exchange call control and signaling information over a communications path which is separate from the message or bearer path.	(M)
<u>Point of Presence</u>	(M)
Location where the Customer maintains a facility for purposes of interconnecting to the Company's Network.	(M)

<u>Premises</u>	(M)
The space occupied by a Customer or Authorized User in a building or buildings or on contiguous property (except railroad rights-of-way, etc.).	(M)
<u>Presubscription</u>	(M)
For Access Service purposes, an arrangement whereby a Customer's Authorized User may select and designate to the Company an Interexchange Carrier (IXC) or Carriers that may be accessed, without an Access Code. The selected IXC(s) are referred to as the Primary Interexchange Carrier (PIC). The Authorized User may select any IXC that orders FGD Access Service at the Local Switching Center that serves the Authorized User.	(M)
<u>Public Switched Telephone Network (PSTN)</u>	(M)
A common carrier switched network, operated by Local Exchange Carriers, Interexchange Carriers, and/or CMRS providers, that uses the North American Numbering Plan in connection with the provision of switched services.	(M)
<u>Rate</u>	(M)
The price for all applicable fixed and traffic sensitive charges.	(M)
<u>Reciprocal Compensation</u>	(N)
Reciprocal Compensation means all traffic subject to 47 U.S.C. section 251(b)(5) and/or brought within section 251(b)(5) by FCC rules. The Reciprocal Compensation rates for VoIP-PSTN traffic as per the FCC Order have been implemented in section 8.	(N)
<u>Recurring Charges</u>	(M)
The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.	(M)
<u>Relevant Information</u>	(N)
Examples of Relevant Information include, but are not limited to, the types of information or sources thereof described in paragraphs 963-963 and footnote 2010 of the FCC Order.	(N)
<u>Responsible Service Provider</u>	(M)
A Service Provider that maintains a direct customer relationship with the End Point User represented by the UGT is deemed the Responsible Service Provider.	(M)

<u>Service Commencement Date</u>	(M)
The first day following the date on which the Company notifies the Customer that the requested service or facility is available for use, unless extended by the Customer's refusal to accept service which does not conform to standards set forth in the Service Order or this Tariff, in which case the Service Commencement Date is the date of the Customer's acceptance of service. The parties may mutually agree on a substitute Service Commencement Date. If the Company does not have an executed Service Order from a Customer, the Service Commencement Date will be the first date on which the service or facility was used by the Customer.	(M) (M) (M) (M) (M) (M) (M) (M)
<u>Service Order</u>	(M)
The written request for network services executed by the Customer and the Company in a format devised by the Company; or, in the alternative, the submission of an Access Service Request by the Customer in the manner specified in this Tariff. The signing of a Service Order or submission of an ASR by the Customer and acceptance thereof by the Company usually initiates the respective obligations of the parties as set forth therein and pursuant to this Tariff, but the duration of the service is calculated from the Service Commencement Date.	(M) (M) (M) (M) (M) (M) (M)
<u>Service Switching Point (SSP)</u>	(M)
A Service Switching Point denotes an end office or tandem which is equipped to query centralized databases.	(M) (M)
<u>Serving Wire Center</u>	(M)
The wire center from which the Customer's designated Premises obtains connectivity to the Public Switched Telephone Network.	(M) (M)
<u>Service(s)</u>	(M)
The Company's Services offered on the Company's Network.	(M)
<u>Session Initiation Protocol (SIP)</u>	(M)
SIP is an application layer control protocol for creating, modifying and terminating sessions with one or more participants. These sessions include VoIP traffic, of which IGI-POP traffic is a subset. SIP is a developing standard which follows the guidelines set out in the IETF document RFC 2543 and 3261.	(M) (M) (M) (M) (M)
<u>Shared Facilities</u>	(M)
A facility or equipment system or subsystem which can be used simultaneously by several customers.	(M) (M)

<u>Signaling Point of Interface</u>	(M)
The Customer designated location where SS7 signaling information is exchanged between the Company and the Customer, if the Customer directly connects to the SS7 “cloud” or if the customer obtains Signaling Transfer Point Access from the Company.	(M) (M) (M)
<u>Signaling System 7 (SS7)</u>	(M)
The common channel out of band signaling protocol developed by the Consultative Committee for International Telephone and Telegraph (CCITT) and the American National Standards Institute (ANSI).	(M) (M) (M)
<u>Signaling Transfer Point Access</u>	(M)
Allows the Customer to access a specialized switch which provides SS7 network access and performs SS7 messaging routing and screening.	(M) (M)
<u>Situs</u>	(M)
For IGI-POP Service, the Access Customer Terminal Location (ACTL) of the IGI-POP shall be used to determine situs for purposes of determining and assessing all regulatory fees, surcharges and taxes that are passed through to or directly imposed on Customer. Each simultaneous Ethernet Voice Session (EVS) shall be considered the equivalent of a Single Line Business for regulatory and taxing purposes.	(M) (M) (M) (M) (M)
<u>Tandem Network</u>	(M)
Denotes the network of trunk groups for originating and/or terminating Telephone Exchange, Exchange Access and/or information access traffic between a single Access Tandem or Local Tandem and Local Exchange Carrier Company end offices subtending that tandem.	(M) (M) (M) (M)
<u>Telephone Exchange Service</u>	(M)
Service within a telephone exchange, or within a connected system of telephone exchanges within the same exchange area operated to furnish to subscribers intercommunicating service of the character ordinarily furnished by a single exchange, and which is covered by the exchange service charge, or (B) comparable service provided through a system of switches, transmission equipment, or other facilities (or combination thereof) by which a subscriber can originate and terminate a telecommunications service.	(M) (M) (M) (M) (M) (M)
<u>Telephone Toll Service</u>	(C)
Telephone service between stations in different exchange areas for which there is made a separate charge not included in contracts with subscribers for exchange service. IGI-POP Services which exchange traffic within the LATA of the IGI-POP are not part of and do not support Telephone Toll Service. Instead per the FCC Order the traffic is within § 251(b)(5) and thus subject to Reciprocal Compensation.	(C) (C) (C) (C) (C) (C)

<u>Toll Free</u>	(M)
A term to describe an inbound communications service which permits a call to be completed at a location without charge to the calling party. Access to the service is gained by dialing a ten (10) digit telephone number (e.g. NPA is 800, 866, 877, 888, etc) or if the call can be completed without the user having to dial 1+.	(M)
	(M)
	(M)
	(M)
<u>Transit</u>	(N)
Transit occurs when two carriers that are not directly interconnected exchange traffic by routing the traffic through an intermediary carrier's network. Company's transit service serves the role of the "intermediary carrier."	(N)
	(N)
	(N)
<u>Transit Service Provider:</u>	(C)
For purposes of IGI-POP only, a Service Provider who offers third party termination or origination services to a Responsible Service Provider for the purpose of providing services to the End Point User. In this sole instance the relationship is not necessarily between one carrier that is routing traffic between two other carriers.	(C)
	(C)
	(C)
	(C)
	(C)
<u>Trunk</u>	(M)
A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.	(M)
	(M)
<u>Universal Emergency Telephone Number (911) Service</u>	(M)
Wherever feasible, the Company will provide a universal Central Office number "911" for the use of Public Safety Agencies having responsibility to protect the safety and property of the general public. It is intended that use of 911 Services will provide the public with a means of simple and direct telephone access to a public safety answering point. In some instances, 911 may be "basic" or "enhanced" 911. In some instances, connection to a 911 Public Safety Agency may be provided through use of a regular 7 or 10 digit NANP address.	(M)
	(M)
	(M)
	(M)
	(M)
	(M)
	(M)
<u>Universal Global Title (UGT)</u>	(M)
A unique identifier assigned by a Service Provider to identify an End Point. A given UGT has a mandatory representation as a variable-length UTF-8 encoded string as specified by URI [RFC3986].	(M)
	(M)
	(M)
<u>VoIP</u>	(M)
Denotes a "telephony" application made possible by the Internet Protocol. VoIP may involve use of a purely private IP network or it may involve use of the public Internet in whole or in part.	(M)
	(M)
	(M)

<u>VoIP-PSTN Traffic</u>	(N)
VoIP-PSTN Traffic shall have the meaning denoted in the FCC Order. It is traffic exchanged between Company and another telecommunications carrier in Time Division Multiplexing (TDM) format that originates and/or terminates in IP format. Traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol compatible customer premises equipment. Such traffic includes all IGI-POP traffic including traffic to and from 5yy numbers assigned to FGIP by NANPA.	(N) (N) (N) (N) (N) (N) (N)
<u>Wire Center</u>	(N)
A building in which one or more central offices, used for providing connectivity to the Public Switched Telephone Network as part of Telephone Exchange, Exchange Access, Information Access or Telephone Toll Services, are located. A Wire Center may also be an aggregation point for purposes of or supporting the provision of other telecommunications or enhanced/information services.	(N) (N) (N) (N) (N)

Legacy Carriers, including LECs, IXC's, and CMRS carriers, that they may in turn use for those purposes for which the SS7 information fields were created to fulfill, *e.g.*, call set-up, tear-down and for operation of CLASS features. Non-Legacy technology, including but not limited to SIP-based communication applications do not operate using, and do not typically have information that can be directly and automatically recognized and populated in SS7 format absent translation from SIP signaling to SS7 signaling.

6.2.2 Scope of Service and Application for Service

Company will offer to interconnect directly or indirectly at the signaling or application layer with any Legacy carrier using SIP for those communications traversing Company's network that are Internet-based. SIP is an application layer protocol for establishing, terminating and modifying multimedia sessions. It is typically carried over IP. Voice based sessions are considered a type of multimedia sessions where just audio is exchanged. Any LEC, IXC or CMRS carrier that refuses to interconnect using SIP for communications traversing Company's network and instead desires to have signaling layer communications occur via SS7 for Internet-based traffic shall be deemed to have ordered Signaling Layer Translation Service if it does not agree that under the FCC Order all VoIP traffic must be exchanged under § 251(b)(5). For example if any Carrier insists that a non-§251(b)(5) tariff or rate of any kind shall apply to Company for interconnection or traffic exchange, then SLTS shall continue to apply.

(C)
(C)
(C)
(C)
(C)

6.2.2(A) Information and Call Control Fields	(M)
Signaling Layer Translation Service populates the information and call control fields or parameters (hereinafter “fields”) used in SS7 to enable completion of voice calls and CLASS service functionality between traditional PSTN users and users of different technology platforms, including but not limited to SIP. The specific SS7 fields that will be populated using information (if it exists) from analogous or roughly analogous SIP fields are:	(M)
6.2.2(A).1 Calling Party Number (CPN). The CPN parameter will be populated as follows:	(M)
6.2.2(A).1.a To the extent that the signaling information contained in the Internet-based traffic application layer protocol has an identifiable number that corresponds to a working North America Numbering Plan E.164 address, and is intended to represent the identity of the party that initiated the session, that number will be populated in the CPN field, unchanged.	(M)
6.2.2(A).1.b To the extent that the signaling information contained in the Internet-based traffic application layer protocol has a number that appears to represent an Instant Messaging (IM) client number, Company will populate the IM client number in the CPN field, unless the IM client number would conflict with or potentially be confused with a valid NANPA E.164 address.	(M)
6.2.2(A).1.c To the extent that the signaling information contained in the Internet-based traffic application layer protocol has a number that appears to represent an IP number, Company will populate the IP number in the CPN field, unless the IP number would conflict with or potentially be confused with a valid NANPA E.164 address.	(M)
6.2.2(A).1.d Company’s IGI-POP Customer or an IP layer peer of the Company may choose to have Company populate the CPN field with Company’s LRN for the LATA in which the IGI-POP Customer has Situs for initiated sessions that do not have the information covered by 6.2.2(A).1.a, 6.2.2(A).1.b or 6.2.2(A).1.c above or if the IM client number or IP number would conflict with or potentially be confused with a valid NANPA E.164 address. If the IGI-POP customer or IP layer peer choose to not have Company populate the CPN field with Company’s LRN, then the CPN field will be left null.	(M)

6.3	FCC Signaling Rules. In addition to the above CPN policy outlined in 6.2.2(A) above, all Customers shall follow the call signaling rules in the FCC Order.	(N) (N)
6.4	Reserved for Future Use.	
6.5.	Optional Features Following are descriptions of the various optional features that are available in lieu of, or in addition to, the standard features provided with the Feature Groups for Access Service.	
6.5.1.	Chargeable Optional Features	
6.5.1(A)	<u>800 Data Base Access Service</u> 800 Data Base Access Service is provided with FGD Switched Access Service. When an 800-type (e.g., Service area codes: 800, 888, 877, 866, 855, 844, 833 and 822), call is originated by an Telephone Exchange Service user (whether served by Company or another LEC), the Company will utilize the Signaling System 7 (SS7) network to query an 800 data base to perform the identification function. The 800 Service Provider will be identified from the dialed 800 number (e.g., 1+800+NXX-XXXX or 1+888+NXX+XXXX). The 800 Service Provider has the option of receiving the dialed 800 number (e.g., 1+800+NXX+XXXX or 1+888+NXX+XXXX) or a translated ten-digit POTS number (i.e., 1+NPA+NXX+XXXX). The call will then be routed to the identified customer over FGD switched access. 800 Data Base Access Service Query charges as set forth in 6.9.8 following are in addition to those charges applicable for the Feature Group D switched access service.	
6.5.1(B)	<u>Signaling Transfer Point Access</u> : The Customer will be charged a per mile charge and a per port charge for access to a specialized switch which provides SS7 network access and performs SS7 messaging routing and screening. If a Customer is connected to a third party SS7 service provider, an additional charge will apply. Signaling Transfer Point Access charges as set forth in 6.9.8 following are in addition to those charges applicable for the Feature Group D switched access service.	
6.5.1(C)	<u>Network Blocking Charge</u> The customer will be notified by the Company to increase its capacity (busy hour minutes of capacity or quantities of trunks) when excessive trunk group blocking occurs on groups carrying FGD traffic and the measured access minutes for that hour exceed the capacity

6.9.11 <u>Optional Media and Programming</u>	
Magnetic Tape Charge	
Per Magnetic Tape	\$91.44
Optional Format Programming Charge	
Per Each ½ Hour or Fraction	\$37.20
SECTION 7 – IGI-POP Service	
7.1 <u>Service Description, Rates and Restrictions</u>	
7.1.1 GENERAL	
IGI-POP Services are available only to VoIP providers.	(C)

Consistent with the FCC Order on Voice over Internet Protocol, Company Feature Group IP will exchange all IGI-POP traffic with other Carriers pursuant to § 251(b)(5) with the long term goal to have all traffic compensated as “Bill and Keep”

(C)
(C)
(C)

7.1.2 Restrictions and Options

7.1.2(A) Current Restrictions:

Consistent with the FCC Order, Feature Group IP’s Customer must affirmatively represent that it is an VoIP Provider and will use IGI-POP service only for applications or services that qualify as VoIP.

7.1.2(A).1 NXX Codes

Feature Group IP shall be code owner for all NPA-NXXs which are part of this service. The IGI-POP Customer must identify any directory numbers that it desires to retain for use with IGI-POP and wishes Feature Group IP to port on Customer’s behalf. If no such directory numbers are reported, or if additional numbers are desired, then the Customer will be assigned one or more directory numbers from Feature Group IP’s inventory. The Customer shall indicate the local calling area or rate center for which it wishes to have numbering resources supplied. Customers may also choose to subscribe to Company’s IGI-POP “500” service.

7.1.2(A).2 Call Directionality

IGI-POP service offers providers of Internet Protocol (IP) enabled voice information services that use the IGI-POP service (IGI-POP Customers) the capability to originate traffic to and receive traffic from the Public Switched Telephone Network (PSTN) and to and from the Internet.

7.1.2(A).2.a PSTN to VoIP Customer Traffic

IGI-POP service allows IGI-POP Customers to receive traffic from the PSTN including traffic from CMRS Carriers, LECs and IXC. Feature Group IP will provide the numbers that will be used as a network address for PSTN purposes. Alternatively, the Customer may authorize Feature Group IP to “port” an existing number, if the existing number is rate centered within a LATA where Feature Group IP has an LRN.

7.1.2(A).2.b VoIP Customer to PSTN Traffic

IGI-POP service allows IGI-POP Customers to send traffic to the PSTN including CMRS, LEC and IXC destined users by initiating a call using a NANPA 7 or 10 digit address.

from the Company for these services

7.1.2(A).9 911 Service

In the event of a 911 call from an IGI-POP customer, Feature Group IP shall route to the appropriate PASP based upon the provided Directory Number Listings address information. In the event there is no "Physical address," Feature Group IP shall route to the default PSAP for the LATA.

7.1.2(B) IGI-POP 500 Service

7.1.2(B).1 IGI-POP 500 Service is available as a chargeable option in conjunction with IGI-POP services.

7.1.2(B).2 An IGI-POP customer who is also a Responsible Service Provider (RSP) may request a "500" non-geographic number to provide a means for others to identify the RSP's and/or RSP's ISP customers' call sessions, and/or to facilitate call back capability. The service must be purchased separately for each market in which the RSP purchases IGI-POP service. Although rates are based on the volume of numbers assigned, pricing is for the non-geographic service capability and not the number itself.

7.1.2(B).3 Pursuant to the FCC Order, Blocking of 500 numbers is prohibited. Company will use its best efforts to enable call back to each 500 number as a § 251(b)(5) call by attempting to have all Interconnected PSTN Providers operating in the LATA in which the IGI-POP 500 Service is provided to not Block.

(N)
(N)
(N)
(N)

7.1.2(B).4 Company will allow an assigned 500 number to be tied to a unique Company LRN in order to support multiple addresses or addressing methods. In the event the RSP wishes to support more than one address or addressing method with an individual 500 number, the RSP must have in place an operational automatic call distribution system that will allow further routing of calls to the intended End Point. RSPs may use this method to promote interoperation between the North American Numbering Plan and other numbering and naming methods or to facilitate alternative routing for NANP addresses and numbers.

7.1.2(b).5 Special requests tied to advanced applications (illustrative examples: disaster recovery projects, reverse emergency notification projects, floating number projects, or dial-up Internet projects) may require field testing and pre-planning. This will be likely be necessary when a project requires the 500 numbers to be loaded, translated and routable by every Interconnected PSTN Provider within a specific area or throughout the NANPA. In the event one or more Interconnected PSTN providers refuse to properly route calls from their network to Company's network, or otherwise refuse to support interoperation of their

SECTION 8 - RECIPROCAL COMPENSATION FOR VOIP-PSTN TRAFFIC	(N)
8.1 <u>General</u>	(N)
8.1.1 This Section 8 governs the identification of and Reciprocal Compensation for VoIP-PSTN traffic that is exchanged between the Company and other carriers, including other Local Exchange Carriers (LECs), CMRS providers and Interexchange Carriers (IXCs), in the absence of a separate agreement between Company and any individual carrier. This Section 8 implements the Federal Communications Commission’s Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) (“FCC Order”).	(N) (N) (N) (N) (N) (N)
8.1.1(A) This Section 8 does not govern intercarrier compensation for traffic associated with Company’s tandem transit service offering. This Section 8 does address the situation where an Exchange Carrier is blocking traffic associated with Company’s tandem transit service offering.	(N) (N) (N) (N)
8.1.1(B) To the extent this Section 8 conflicts with any other portion of Company’s FCC Tariff No. 1 in any respect this Section 8 will control.	(N) (N)
8.1.2 Other than for some traffic for which Company provides tandem transit service to third party carriers (see 8.1.1.1 above), all traffic between Company and its end user customers originates and terminates at the end user customer premises in VoIP format. Therefore, all traffic that is received by Company from other carriers for termination to a Company’s end user customer is VoIP-PSTN traffic. In addition, all traffic originating from a Company’s end user customer that is delivered by Company to another carrier is VoIP-PSTN traffic.	(N) (N) (N) (N) (N) (N) (N)
8.1.3 This Section 8 also establishes the method of separating “non-toll” VoIP-PSTN Traffic from “toll” VoIP-PSTN Traffic and then further establishes the method for separating “intrastate” toll VoIP-PSTN Traffic from “interstate” toll VoIP-PSTN Traffic.	(N) (N) (N)
8.2 Reciprocal Compensation as applied to Company’s service to end users; MPB and non-MPB arrangements.	(N) (N)
8.2.1 Feature Group A-like VoIP services.	(N)
8.2.1(A) Company offers a FeatureGroup A-like service to IP-based end user customers, including VoIP providers of interconnected and non-interconnected VoIP services. This service is offered on a LATA by LATA basis, and provides the ability to initiate calls to users on the PSTN within the LATA.	(N) (N) (N) (N) (N)
8.2.1(B) Consistent with Section 9 of the ATIS Multiple Exchange Carrier Access Billing Guidelines for billing of access and interconnection services to a customer by more than one carrier as they apply to Feature Group A, Company and all other Local Exchange Carriers will use “non-MPB through revenue sharing.”	(N) (N) (N) (N)

8.2.1(C)	Company will be the “dial tone office” and will render the bill to the end user customer and collect from the end user customer. Company will then remit to the other Exchange Carriers involved (each of which is a Customer for purposes of this Tariff) their share of the revenues. Each Non De Minimus Exchange Carrier Customer’s revenue share will be based on that Exchange Carrier’s reciprocal VoIP rate. The resulting amount is further described in the Feature Group A Rate Tables listed below in section 8.6 by Operator Carrier Number or OCN.	(N) (N) (N) (N) (N) (N) (N)
8.2.2	5YY VoIP services	(N)
8.2.2(A)	Company offers a telephone exchange service to IP-based end user customers, including interconnected and non-interconnected VoIP providers. These services employ non-geographic 5YY numbering resources (in the form of an NPA-NXX) that have been activated by Company in each LATA where Company operates. The service allows the IP-based end user customer to receive calls originating on the PSTN by dialing the same 3-digit area code NPA (5YY), the applicable NXX and 4-digit line/directory number in all LATAs. When a 5YY customer desires to initiate an outbound call to the PSTN it must use a Feature Group A like VoIP service.	(N) (N) (N) (N) (N) (N) (N) (N)
8.2.2(B)	Company’s 5YY service will be subject to Reciprocal Compensation. The factors set out in section 8.4 for non-toll VoIP and toll VoIP apply and will result in Reciprocal Compensation rates payable to Company per minute applicable to each LEC by OCN by LATA as listed in section 8.6.	(N) (N) (N) (N)
8.2.3	Signaling. Company will follow the signaling rules in the FCC Order as detailed in FCC Rules 64.1600 and 64.1601 and will require its VoIP end user customers that are intermediate providers as defined in FCC Rule 64.1600(f) and interconnected VoIP providers as defined in FCC Rule 9.3 to follow the same signaling rules. Calls routed to Company by a carrier Customer must include the Calling Party Number or the originating party and, if different, the billing number.	(N) (N) (N) (N) (N) (N)
8.3	Description of Company’s service to Interexchange Carriers.	(N)
8.3.1	Company offers to directly connect to Interexchange Carriers that desire to directly deliver traffic to Company for termination to Company’s end user customers including its VoIP customers. The direct connection will be accomplished via a SIP Peer arrangement. The SIP Peer rate is \$5.00 per DS-0 equivalent of capacity per month. The IXC will then pay the benchmark CLEC switched exchange access rate prescribed by 47 C.F.R. § 61.26(c) and specified in section 8.9. Given that 100% of Company’s traffic is VoIP, the statewide average intrastate composite usage sensitive switched access rates prescribed by the Texas PUC do not apply.	(N) (N) (N) (N) (N) (N) (N) (N) (N) (N)

8.4	Factors	(N)
8.4.1	The following factors will be used for all of Company's traffic and for all services.	(N)
8.4.2	Company's "Percent VoIP Usage" (PVU) factor is 100.	(N)
8.4.3	Company's "non-toll" percent of VoIP-PSTN traffic is 30. This factor will be used to allocate minutes subject to "otherwise applicable reciprocal compensation rates" and minutes subject to "toll VoIP traffic reciprocal compensation" for all traffic exchanged between Company and each other Exchange Carrier in a LATA.	(N) (N) (N) (N)
8.4.4	Company's "Percent Interstate Usage" (PIU) related to "toll VoIP Traffic" is 35. This means that the percent of intrastate toll VoIP Traffic is also 35.	(N) (N)
8.4.5	If any Exchange Carrier challenges the factors stated in 8.4.1-8.4.4 above, the Exchange Carrier shall communicate the challenge in writing to Company. Company and the other Exchange Carrier will mutually exchange Relevant Information to resolve the challenge. Company and Customer will take into account that a significant portion of Company's originating and terminating traffic is non-geographic in nature, in that one of the end points of the call (1) may not have an actual physical presence; (2) may have a highly mobile presence that may not be easily identified to exist at a single location; or (3) a physical location for the end-point may not be identified based on the information available to Company or Customer. Any disputes will be handled under the provisions and procedures set out in section 2.5.2.H.2. If Company and Customer agree to change the factors, the new factors will be used to calculate the per-minute Reciprocal Compensation rate and the allocated amount due to the challenging Exchange Carrier on a prospective basis.	(N) (N) (N) (N) (N) (N) (N) (N) (N) (N) (N) (N)
8.5	Rate Symmetry and Reciprocity	(N)
8.5.1	Consistent with paragraph 942 of the FCC Order, sections 251(b)(5) and 252(d)(2)(A)(i) of the Act and FCC Rule 51.711(a)(1) and given that all of Company's non-transit traffic is VoIP traffic, Company will charge and LEC Customer will pay a termination rate for PSTN-originated traffic that is symmetric with the price to be paid by Company for VoIP traffic terminated by an LEC Customer as listed by OCN in section 8.6 below.	(N) (N) (N) (N) (N) (N) (N)

8.6.2 Rate Rules	(N)
8.6.2(A) Consistent with FCC Rule 51.703(b), Customer may not assess or recover charges from Company for any Non-Access Telecommunications Traffic that originates on Customer's network.	(N) (N) (N)
8.6.2(B) Consistent with FCC Rule 51.913(b), Company is entitled to recover the full measure of Access Reciprocal Compensation for traffic delivered by Customer to Company for termination. Customer may not assess or recover charges from Company for any Access Reciprocal Compensation Traffic that originates on Customer's network.	(N) (N) (N) (N)
8.7 Payment	(N)
8.7.1 Company will remit the Feature Group A like Reciprocal Compensation payment to an Exchange Carrier only if and to the extent that the total amount of such traffic exchanged between Company and the Exchange Carrier is more than De Minimus. Company will demand Reciprocal Compensation payment from an Exchange Carrier only if and to the extent that the total amount of traffic exchanged between Company and the Exchange Carrier is more than De Minimus. You are assumed to be De Minimus if your OCN is not listed on the above tables in section 8.6.	(N) (N) (N) (N) (N) (N) (N)
8.7.2 Company will not be responsible for payment of toll and/or non-toll Reciprocal Compensation to any Exchange Carrier that is Blocking VoIP or transit traffic originating on its network that is addressed to or advertised by a transit customer of Company as to be routed to Company for transit to the transit customer, as in that event such an Exchange Carrier will be in violation of the FCC Order.	(N) (N) (N) (N) (N)
8.8 Blocking	(N)
8.8.1 Blocking Charge	(N)
8.8.1(A) Any Exchange Carrier that blocks VoIP or transit traffic originating on its network that is addressed to or advertised by a transit customer of Company as to be routed to Company for transit to the transit customer will be assessed a Blocking Charge.	(N) (N) (N)
8.8.1(B) The Blocking Charge is equal to the amount that Company would otherwise owe to the Exchange Carrier for Company-originated VoIP Traffic.	(N) (N)
