
INTERSTATE ACCESS SERVICES TARIFF

This Tariff, FCC Tariff No. 2, issued by YMax Communications Corp. cancels and replaces FCC Tariff No. 1 in its entirety.

(M)

TITLE PAGE

INTERSTATE ACCESS SERVICES TARIFF

OF

YMAX COMMUNICATIONS CORP.

(M)

This tariff contains the rates, charges, terms and conditions of service for the provision of interstate access telecommunications services by YMax Communications Corp. within the 50 states and the District of Columbia.

(T)(M)
|
(T)(M)

Access services are provided by means of wire, fiber optics, radio or any other suitable technology or combination thereof.

INTERSTATE ACCESS SERVICES TARIFF

SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (Cont'd.)

Constructive Order - Delivery of calls to or acceptance of calls from the Customer's End Users over Facilities constitutes a Constructive Order by the Customer to purchase switched access services as described herein. Similarly the selection of the Customer by an End User as the End User's PIC constitutes a Constructive Order for switched access by the Customer.

Customer - Any individual, partnership, association, joint-stock company, trust, corporation, or governmental entity or other entity which uses and/or subscribes to the services offered under this tariff, including but not limited to End Users, Interexchange Carriers (ICs) and other telecommunications carriers and/or providers using VoIP-PSTN Traffic.

(C)
|
(C)

Customer Designated Premises - The term "Customer Designated Premises" denotes the premises specified or provided by the customer for the provision of Access Service.

Dedicated Access - Where originating or terminating access between an end user and an Interexchange Carrier are provided via dedicated facilities, circuits, channels, or connections.

Delinquent or Delinquency – An account for which payment has not been made in full on or before the last day for timely payment.

Direct-Trunked Transport – transport from a serving wire center to an end office or from a serving wire center to an access tandem on circuits dedicated to the use of a single customer.

DS1 – Digital Signal Level 1; a dedicated, high capacity, full duplex channel with a line speed of 1.544 Mbps isochronous serial data having a line signal format of either Alternate Mark Inversion (AMI) or Bipolar with 8 Zero Substitution (B8ZS) and either Superframe (D4) or Extended Superframe (ESF) formats.

Transmittal #11

Issued: February 2, 2012

West Palm Beach, FL 33405

FCa1211

INTERSTATE ACCESS SERVICES TARIFF

SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (Cont'd.)

Dual Tone Multifrequency (DTMF) - Tone signaling, also known as touch tone signaling.

End Office Switch - A Switch that provides the first point of connection between an End User and the Public Switched Telephone Network (PSTN), that sets up and takes down voice-grade communications paths between an End User and other parties on the PSTN, and that exchanges SS7-compatible signaling with other switches on the PSTN. The "first point of connection" means there is no other Switch performing these functions between it and the End User, regardless of how the End User obtains its connection to that switch.

End User - Any customer of an interstate or foreign telecommunications service and/or VoIP provider that is not a carrier, except that a carrier other than a telephone company shall be deemed to be an "end user" when such carrier uses a telecommunications service for administrative purposes, and a person or entity that offers telecommunications service exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller. (C)

Exchange -- A unit generally smaller than a local access and transport area, established by the Company or another local exchange carrier for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. The exchange includes any Extended Area Service area that is an enlargement of a local exchange carrier's exchange area to include nearby exchanges. One or more designated exchanges comprise a given local access and transport area.

Transmittal #11

Issued: February 2, 2012

Effective: February 17, 2012

West Palm Beach, FL 33405

FCa1211

INTERSTATE ACCESS SERVICES TARIFF

SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (Cont'd.)

Service Order - A written request for Services executed by the Customer and the Company. The signing of a Service Order by the Customer and acceptance by the Company begins the respective obligations of the parties in that order for Services offered under this tariff. A Service Order is not necessary if there has been a Constructive Order.

Serving Wire Center - A geographic location designated by the Company where Switched Access trunks or other access facilities are terminated for purposes of interconnection to other elements or Switched Access Service provided by the Company.

Special Access - See Dedicated Access.

Signaling System 7 (SS7) – the layered protocol used for standardized common channel signaling in the United States and Puerto Rico.

Station - Refers to telephone equipment or an exchange access line from or to which calls are placed.

Switch – The electronic devices, hardware and/or software collectively utilized by or on behalf of the Company, regardless of ownership of such devices, hardware, and/or software, to provide access to Customers to send or receive calls from End-Users.

Switched Access – Refers to the services described in Section 3 of this Tariff, including but not limited to Tandem Connect Access and Direct Connect Access. (C)

Tandem Switch - See Access Tandem.

Tandem Switched Transport – transport from a tandem to an end office that is switched at a tandem.

INTERSTATE ACCESS SERVICES TARIFF

SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (Cont'd.)

Terminal Equipment - Telecommunications devices, apparatus and associated wiring on a Customer's or End User's side of a Point of Demarcation.

Terminating Direction - The use of Switched Access Service to deliver interexchange calls from a Customer's Point of Presence to an End User.

Timely Payment – A payment on a Customer's account made on or before the due date.

Transmission Path – An electrical or electronic path capable of transmitting signals within the range of the service offering, e.g., a voice grade transmission path is capable of transmitting voice frequencies. A transmission path is comprised of physical, virtual or derived facilities consisting of any form or configuration of plant typically used in the telecommunications industry.

Trunk - A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

Trunk Group - A set of trunks, which are traffic engineered as a unit for the establishment of connections between switching systems in which all of the communications paths are interchangeable.

V & H Coordinates - Geographic points which define the originating and terminating points of a call in mathematical terms so that the airline mileage of the call may be determined. Call mileage may be used for the purpose of rating calls.

V & H Coordinates Method – a method of computing airline miles between two points by utilizing an established formula which is based on the vertical and horizontal coordinates of the two points.

Voice-grade – A connection that is suitable for the two-way transmission of voice frequency signals in analog or digital form. Nothing in this Tariff should be construed to limit the type of information that may be transmitted over such a connection.

VOIP-PSTN Traffic - traffic exchanged over PSTN facilities that originates and/or terminates in IP format. See FCC 11-161, ¶ 940.

FCa1211

INTERSTATE ACCESS SERVICES TARIFF

SECTION 3 - SWITCHED ACCESS SERVICE

3.1 General

3.1.1 Switched Access Service provides a switched, two-point voice-grade communications path (including PSTN or VoIP-PSTN Traffic) between a Customer's Point of Presence and a point of demarcation with an End User, which may be used to originate calls from such End User to the Customer's network and to terminate calls from the Customer's Network to such End User. In the case of Tandem Connect Access, described in 3.2.5.A below, this communications path may be provided jointly by the Company and another Carrier(s), in which case the Company will bill only for the functions it provides pursuant to this Tariff, and each other Carrier will provide the remaining functions under the terms and conditions of any applicable contract or tariff to which it is a party. (C)

A. The completion of an interstate originating call from an End User's Terminal Equipment to a Customer's POP or an interstate terminating call from a Customer's POP to an End User's Terminal Equipment using any Facilities provided by the Company shall constitute the provision of Switched Access Service to the Customer, regardless of whether such call was intended or authorized by the End User regardless of whether the End User or the Company, or either of them, is in compliance with any terms or conditions of any contract, tariff, or other arrangement between the End User and the Company; and regardless of whether the making of such call was authorized under or otherwise in compliance with the terms or conditions of any service provided by the Customer to its subscriber.

3.1.2 When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).

3.1.3 In the absence of an ASR as described in Section 3.4, delivery of calls to, or acceptance of calls from End User(s) via Company-provided switched access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.
