ACCESS SERVICES

4. SWITCHED ACCESS SERVICE, *cont'd.***4.3 Rate Categories, *cont'd.***

There are three rate categories which apply to Switched Access Service:

- Switched Transport
- Local Switching
- Carrier Common Line

In addition to these three rate categories, there is 1) an Information Surcharge that applies to all Switched Access Service Arrangements, 2) a data base query charge which applies to TFC Access Service, 3) Tandem Switched Transport consists of a Tandem Switching rate, a Tandem Switching Facility rate, and a Tandem Switched Termination rate. Additionally a Common Multiplexing rate is assessed on all access minutes that traverse a common trunk group from the Company access tandem to an end office and 4) a Common Trunk Port rate assessed to all access minutes which utilize Tandem Switched Transport. When the Tandem Switched Transport is provided by more than one company the Common Trunk Port charge shall be billed by the company in whose territory the end office is located.

(N)

(N)

4.3.1 Switched Transport

The Switched Transport rate category provides the transmission facilities between the Customer's premises and the end office (or remote) switch(es) where the Customer's traffic is switched to originate or terminate the customer's communications.

Switched Transport provides a one-way or two-way voice frequency transmission path composed of facilities determined by the Telephone Company which permit the transport of calls in the originating direction and in the terminating direction, though not simultaneously. This voice frequency transmission path may be comprised of any form or configuration of plant capable of, and typically used in, the telecommunications industry for transmitting voice and associated telephone signals within the frequency bandwidth of approximately 300 to 3000 Hz.
