

CenturyLink Operating Companies

Transmittal No. 28

Description and Justification

The CenturyLink Operating Companies (CLOCs) hereby submit the following information in support of the accompanying revisions to CenturyLink Operating Companies Tariff F.C.C. Nos. 1, 2, 3, 5, 6, 7, 8 and 9, as required by Sections 61.38 and 61.41 through 61.49 of the Federal Communications Commission's Rules and Regulations.

This filing adjusts CenturyLink's federal universal service fund (USF) contribution factor for 4th quarter 2012 to 17.4% consistent with the requirements of the Commission's USF Order¹. In addition, special construction nonrecurring charges for the installation of fiber optic cable in order to satisfy the requirements of customers in the states of Alabama, Arkansas, Colorado, Illinois, Louisiana, Michigan, Minnesota, Missouri, North Carolina, Oregon, Pennsylvania, Virginia and Wisconsin are included.

1.0 Universal Service Fund Contribution Factor - Fourth Quarter 2012

For all companies, excluding those in CLOC Tariff F.C.C. No. 9, a surcharge equal to the fourth quarter 2012 USF contribution factor of 0.174 is applied to end users being billed local exchange service (i.e., primary residential, non-primary residential, ISDN-BRI, single-line business, multi-line business, ISDN-PRI, and Centrex), switched dedicated, special access, or other interstate access services (i.e., Presubscription Change Charges). The percentage surcharge is reflected as a separate line item, clearly identified on the customer's bill. The detailed calculations for Tariff F.C.C. No. 9 are defined below.

Calculations for CenturyLink Operating Companies Tariff F.C.C. No. 9

¹ *In the Matter of Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Public Notice (DA 12-1484) released September 12, 2012.

CenturyLink adjusts their federal universal service fund (USF) end user charges to reflect its full contribution obligation, which is based on interstate end user revenues used by the Universal Service Administration Company (USAC) to calculate CenturyLink's fourth quarter 2012 assessment.

Consistent with the requirements of the Commission's *USF Interim Methodology Orders*,² CenturyLink recovers its federal universal service contributions through per line monthly charges assessed to end users subscribing to local exchange service (i.e., primary residential, non-primary residential, ISDN-BRI, single-line business, multi-line business, ISDN-PRI, and Centrex). Contributions for end users being billed switched dedicated, special access, or other interstate access services (i.e., Presubscription Change Charges) are recovered by applying a surcharge equal to the fourth quarter 2012 USF contribution factor of 0.174 to the total of the end user customer's interstate access charges. Both the per line charge and percentage surcharge are reflected as a separate line item, clearly identified on the customer's bill.

As detailed on Exhibit 1, Page 1, the Federal USF end user charges for primary residential, non-primary residential, ISDN-BRI and single-line business are calculated by applying the fourth quarter 2012 contribution factor of 0.174 to the sum of the charges representing the interstate portion of the customer's bill (i.e., the customer's end user common line or subscriber line charges).

Page 2 of Exhibit 1 details the calculation of the Federal USF end user charges for Centrex, ISDN-PRI and multi-line business customers. The *USF Interim Methodology Orders* allow the Federal USF end user charges for Centrex customers to be recovered using an "equivalency ratio." Initially, the Federal USF charges for Centrex, ISDN-PRI and multi-line business customers are calculated by applying the 0.174 fourth quarter 2012 contribution factor to the sum of the charges representing the interstate portion of the customer's bill in the same manner as outlined above. For multi-line business and ISDN-

² *In the Matter of Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order and Second Further Notice of Proposed Rulemaking (FCC 02-329), released December 13, 2002; Order and Second Order on Reconsideration (FCC 03-58), released March 14, 2003; and Public Notice (DA 03-1909) (Collectively *USF Interim Methodology Orders*).

PRI, the Federal USF charges are calculated by first determining the difference, on a per line basis, between assessing Centrex lines based on the equivalency ratio and applying the remaining USF recovery across multi-line business and ISDN-PRI lines on an averaged basis. Once the difference is determined, a portion (\$0.50) is allocated back to Centrex, and the remainder is added to the initial multi-line business Federal USF charge to produce the Federal USF end user charge for multi-line business customers. The Federal USF end user charge for ISDN-PRI customers is calculated by multiplying the multi-line business charge by 5. The Federal USF end user charge for Payphone Service Providers is calculated by apply the 0.174 fourth quarter 2012 contribution factor to the multi-line business subscriber line charge.

2.0 Special Construction Individual Case Base Filings

CenturyLink proposed to add nonrecurring charges for the special construction of DS1 and DS3 fiber optic facilities to satisfy the specific requirements of customers in the states of Alabama, Arkansas, Colorado, Illinois, Louisiana, Michigan, Minnesota, Missouri, North Carolina, Oregon, Pennsylvania, Virginia and Wisconsin. The proposed rates and charges recover the cost of materials, engineering and installation incurred by the Telephone Company, which is in addition to the investment costs included in the monthly recurring rates associated with the special access services requested. Rate development worksheets detailing the calculation of the proposed rates and charges for each special construction case are included as Exhibit 2.

3.0 Conclusion

The CenturyLink Operating Companies are submitting the accompanying information consistent with the requirements of the Commission's price cap regulations for local exchange carriers and in compliance with universal service decisions. The rate adjustments proposed herein are demonstrated to be just and reasonable, and are supported by detailed exhibits, where applicable, reflecting the calculation of the proposed USF end user charges and detailed cost and rate development for special construction requests.
