INTERSTATE ACCESS SERVICE

SECTION 3 - DEFINITIONS

Entrance Facility: The dedicated Switched Access transmission facilities that connect two carriers' networks.

(T)
(T)

Exchange Carrier: Any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged in the provision of local exchange telephone service.

Fiber Optic Cable: A thin filament of glass with a protective outer coating through which a light beam carrying communications signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.

Firm Order Confirmation (FOC): Acknowledgment by the Company of receipt of an Access Service Request from the Customer and commitment by the Company of a Service Date.

INTERSTATE ACCESS SERVICE

SECTION 5 - SWITCHED ACCESS SERVICEII. Provision and Description of Switched Access Service Arrangements (Continued)

For calls outside of the NANP, and if the end office is equipped for International Direct Distance Dialing (IDDD), a 7- to 15- digit number may be dialed after dialing the prefix 011 or 01.

8XX Data Base Query Service, which is available to all Customers, provides trunk-side equivalent access to the Company's Network in the originating direction only, for the Customer's use in originating calls dialed by an End User to toll free telephone numbers beginning with prefixes, 800, 888, 877, 866, 855, and/or subsequent toll-free area codes.

Customer's or its End User's use of any Incidental Service shall constitute Customer's agreement to all of the terms and conditions of this tariff. Services provided on an Incidental basis (Incidental Services) are billed to Customer on a monthly basis in accordance with Customer's recorded usage for each Service and the corresponding rates contained in the Rates section, below.

B. Trunk Configuration

Trunks used for Switched Access Service may be configured for one-way (either originating only or terminating only) or for two-way directionality. It is the Customer's responsibility to order a sufficient number of trunks of each type in order to meet its desired grade of service objective. At the Customer's request, the Company will assist the Customer in sizing Switched Access Trunk groups.

C. Rate Categories

The following rate categories apply to Switched Access Service:

- | | | |
|----|-------------------------------------|-----|
| 1. | Carrier Common Line | |
| 2. | Switched Access End Office Services | (T) |
| 3. | 8XX Data Base Query | |
| 4. | Switched Access Tandem Services | (T) |

The Company may bill these categories of Switched Access Service either on a per element basis or on a composite basis. Subject to Section 5 II (C.) (4), stand-alone Switched Access Tandem Services are billed on a per element basis in all states at the rates found in Section 5.VIII.B. Switched access services that include company-provided End Office functions will have the End Office and Transport components billed either on a per element basis at the rates found in Sections 5.VIII.A or on a composite basis at the rates found in Section 5.VIII.C, depending on the state.	(T) (T)
--	-------------------------------------

INTERSTATE ACCESS SERVICESECTION 5 - SWITCHED ACCESS SERVICEII. Provision and Description of Switched Access Service Arrangements (Continued)C. Rate Categories (Continued)

Two types of Composite Switched Access End Office Services arrangements are available:

(T)

1. Tandem Routed Access: This composite applies when the customer has no direct facilities to the End Office. Traffic is routed to and from the End Office via the Access Tandem. (T)
2. Direct Access: This composite applies when the Company or another service provider provides dedicated facilities between the customer's premises and the End Office. This transmission path is dedicated to the use of a single Customer. The Customer is responsible for providing such facilities itself or for negotiating such arrangements with possible suppliers. To the extent that the Company is able to provide such arrangements, the dedicated portion of Direct Connect Access would be provided on an Individual Case Basis as Special Service Arrangements pursuant to Section 4 of this tariff.

Definitions of Switched Access Service Rate Categories

1. Carrier Common Line

Carrier Common Line: The Carrier Common Line rate category provides for the use of Channels, and any associated End Office termination functions, by Customers for access to End Users to furnish Customer interstate communications. Carrier Common Line is provided where the Customer obtains Company provided Switched Access Service under this Tariff to Company End Office(s) or to VoIP Provider End Office equivalents.

Limitations:

- (a) A telephone number is not provided with Carrier Common Line.
- (b) Detail billing is not provided for Carrier Common Line.
- (c) Directory listings are not included in the rate and charges for Carrier Common Line.
- (d) Intercept arrangements are not included in the rates and charges for Carrier Common Line.
- (e) All trunk side connections provided in the same combined access group will be limited to the same features and operating characteristics.

INTERSTATE ACCESS SERVICE

SECTION 5 - SWITCHED ACCESS SERVICEII. Provision and Description of Switched Access Service Arrangements (Continued)C. Rate Categories (Continued)

Definitions of Switched Access Service Rate Categories (Continued)

2. Switched Access End Office Services

(T)

a. End Office Switching: End Office Switching provides for the use of End Office switching functions, i.e., the common switching functions associated with the various Switched Access Service arrangements. The End Office Switching rate is assessed on a per-MOU basis to all originating and terminating access minutes utilizing the end office.

b. End Office Shared Port: The End Office Shared Port rate provides for the termination of common transport trunks in shared end office ports and in remote switching system ports. The End Office Shared Port rate is assessed on a per-MOU basis to all trunkside originating and terminating access minutes utilizing tandem routing to the end office. If tandem routing is being utilized to a remote switching system (via a host office), the End Office Shared Port rate is assessed to the access minutes originating or terminating from the remote switching system.

c. Tandem Switched Transport: Tandem Switched Transport is comprised of a Tandem Switched Transport Termination rate and a Tandem Switched Transport Facility rate. Both rate elements apply for the transmission facility between an End Office and the Company POI. This consists of circuits used in common by multiple Customers.

(M)

The Tandem Switched Transport Termination rate element covers the circuit equipment at the end of the transmission facilities. For Tandem Switched Transport Termination, the amount billed will be the product of the quantity of Access Minutes multiplied by the Tandem Switched Transport Termination rate. The Tandem Switched Transport Termination charge will be applied for each location where the Company provides termination.

The Tandem Switched Transport Facility rate element provides for the transmission facilities, including intermediate circuit equipment between an End Office and a Company POI or Access Tandem. For purposes of determining the per-mile rate, mileage will be measured as airline mileage using the V&H coordinates method.

(M)

*Material found on this page was originally on page 5-3.1.
Material previously located on this page now appears on Page 5-2.5.*

SECTION 5 - SWITCHED ACCESS SERVICE

 II. Provision and Description of Switched Access Service Arrangements (Continued)

(M)

 C. Rate Categories (Continued)

Definitions of Switched Access Service Rate Categories (Continued)

 2. Switched Access End Office Services (Continued)

 c. Tandem Switched Transport (Continued)

For Tandem Switched Transport Facility, the amount billed will be the multiplication product of:

- Airline miles between the end office and the POI or tandem
- By the Billing Percentage (BP) provided by the Company transport facility
- By the Quantity of Access Minutes
- By the Tandem Switched Transport Facility rate

The resulting amount is the Company's Tandem Switched Transport Facility charge. The Tandem Switched Transport Facility charge will be applied for all routes where the Company provides the Transport Facility between the POI or tandem and a subtending End Office where the call originates or terminates.

The mileage to be used to determine the Tandem Switched Transport Facility rates are calculated on the airline distance between the End Office switch where the call originates or terminates and the Company POI. The V&H coordinates method is used to determine mileage. This method is set forth in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff FCC No. 4 for Wire Center Information.

If the Company provides a portion of the transport mileage between the POI or Access Tandem and the End Office, to a Meet Point (MP) with another Exchange Carrier, the mileage to be used in the above charge is calculated on the airline distance between the Company POI and the Meet Point with the other Exchange Carrier. The interconnection Meet Points (MP) will be determined by the Exchange Carriers involved. The billing percentage (BP) factor for the Company for the service between the involved offices will be listed in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff FCC No. 4. Should any changes be made to the Meet Point billing with the Company arrangements as set forth, the Company will give affected Customers 30 days notice.

(M)

II. Provision and Description of Switched Access Service Arrangements (Continued)

(M)

C. Rate Categories (Continued)

Definitions of Switched Access Service Rate Categories (Continued)

2. Switched Access End Office Services (Continued)

c. Tandem Switched Transport (Continued)

If the End Office and the Company POI or Access Tandem are in the same wire center building, then no mileage component applies, and no Tandem Switched Transport Facility charge applies. When the End Office is not located in the same wire center building as the Company POI or Access Tandem, mileage measurement is calculated using the V&H coordinates method as described above. The mileage rates are shown in Section 5.VIII.B in terms of per mile per access minute. The amount to be billed shall be the product of the number of miles multiplied by the per mile rate multiplied by the number of access minutes.

A Customer's Point of Presence may be located at the Company's Access Tandem or at the Company POI serving the End Office. When a Customer's Point of Presence is located at the Company's Access Tandem, billing is done as though the connection was made at the Company POI, if applicable, pursuant to Section 2.III.K.(1).

SECTION 5 - SWITCHED ACCESS SERVICE

II. Provision and Description of Switched Access Service Arrangements (Continued)

(M)

C. Rate Categories (Continued)

Definitions of Switched Access Service Rate Categories (Continued)

3. 8XX Data Base Query

When an 8XX + NXX + XXXX call is originated by an End User, or delivered by a connecting carrier to the Onvoy network unqueried, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location to which the call is to be routed. A Basic Query Charge covers the identification of the toll carrier to whom the call should be delivered. A Vertical Query includes the Basic Query function plus such functions as call validation (ensuring that calls originate from subscriber service areas); POTS translation of 8XX series numbers; alternate POTS translation where End Users can vary the routing of the 8XX calls based on time of day, place, etc.; and multiple carrier routing.

INTERSTATE ACCESS SERVICE

SECTION 5 - SWITCHED ACCESS SERVICEII. Provision and Description of Switched Access Service Arrangements (Continued)C. Rate Categories (Continued)

Definitions of Switched Access Service Rate Categories (Continued)

4. Switched Access Tandem Services: The Switched Access Tandem Service Rate Category provides for access tandem service between local exchange carriers (LEC) and IXC Customers. The Switched Access Tandem Service Rate Category is provided for originating (from LEC to IXC) and terminating (IXC to LEC) traffic. The Switched Access Tandem Service Rate Category provided under this tariff covers the use of the Company's Access Tandem, Dedicated Tandem Ports, and Common Transport Multiplexing. Tandem Switched Transport services described in Section 5.II.C.2.c may also be provided in connection with Switched Access Tandem Service. The following rate elements comprise the Switched Access Tandem Rate Category and are applied on a per-minute basis.
- a. Tandem Switching: Tandem Switching is a per-minute of use rate assessed for utilizing tandem switching functions. The Company will provide originating and terminating tandem switching services for Company end offices as well as for non-Company end offices. The tandem switching rate element covers the transport from a Company POI to the Company access tandem.

4. Switched Access Tandem Services (Continued)

- b. Dedicated Tandem Trunk Port: A dedicated tandem trunk port (DTTP) is provided for each trunk terminated on the serving wire center side of the access tandem.

The rate for this element is included in the Tandem Switching rate in the following service areas:

CA -- All

CO -- CenturyLink (former Qwest)

MN -- CenturyLink (former Qwest)

- c. Common Transport Multiplexing Charge: Transport multiplexing equipment is utilized in the End Office side of the Access Tandem when transport is provided between the Access Tandem and the subtending End Offices. The rate (if applicable) is assessed for DS3 to DS1 multiplexing on a per-MOU basis, and is in addition to Tandem Switched Transport charges.

(T)
(N)

(N)

INTERSTATE ACCESS SERVICESECTION 5 - SWITCHED ACCESS SERVICEII. Provision and Description of Switched Access Service Arrangements (Continued)

- E. Company POI Locations and Access Tandems: Company POI CLLI Codes and Access Tandems can be found on the Company website: www.onvoy.com.
- F. Acceptance Testing: At no additional charge, the Company will, at the Customer's request, cooperatively test, at the time of installation, the following parameters: loss, C-notched noise, C-message noise, 3-tone slope, d.c. continuity and operational signaling.
- G. Ordering Options and Conditions: Access Service is ordered under the Access Order provisions set forth in Section 6 and provided in MECOD. Also included in that section are other charges which may be associated with ordering Switched Access Service.
- H. Competitive Pricing Arrangements: Competitive pricing arrangements can be furnished to meet the specialized communication needs of specific customers on a case by case basis under individual contract. (T)
|
(T)
- I. Common Channel Signaling Service
1. SS7 Standard: Common Channel Signaling (CCS) is a protocol suite that allows for out-of-band signaling for voice and data message services. Signaling System Seven (SS7) is currently a widely deployed CCS protocol. The Company's CCS network is a digital data network carrying signaling information, which interfaces with the voice/data network. To ensure network reliability, Signal Transfer Points (STPs) are deployed in geographically dispersed mated pairs. STP access requires interconnection to ports of both STPs of the mated pair.
