3. Definitions and Terms

Access Code: Denotes uniform code assigned to an individual Customer. The code has the form 10XXX or 0XXXXX.

Access Service: Switched Access to the network of an Interexchange Carrier for the purpose of originating or terminating communications.

Access Service Request (ASR): The industry service order format used by Access Service Customers and access providers as agreed to by the Ordering and Billing Forum.

Access Tandem: A Local Exchange Carrier's switching system that provides a concentration and distribution function for originating or terminating traffic between Local Switching Centers and the Customers' Premises.

Advance Payment: Part or all of a payment required before the start of Service.

Applicant: Any entity or individual who applies for Service offered under this Tariff.

AT&T: BellSouth Telecommunications, LLC d/b/a AT&T.

(T)

Authorized User: Any entity or individual authorized by the Customer to use the Service.

Carrier: Denotes any individual, partnership, association, joint stock-company, trust, governmental entity or corporation engaged for hire in interstate or foreign communication by wire or radio, between two or more exchanges. Also, see "Customer" and "Interexchange Carrier (IXC)."

Channel or Circuit: A path for transmission between two or more points having a bandwidth and termination of the Customer's own choosing.

Commission: The Federal Communications Commission (FCC).

Company: DoveTel Communications, LLC, the issuer of this Tariff.

Customer: A person, firm, corporation or other entity that subscribes to the services offered under this Tariff. The Customer is responsible for the payment of charges for Service and for compliance with Tariff regulations. See "Carrier" and "Interexchange Carrier (IXC)."

Deposit: Refers to a cash or equivalent of cash security held as a guarantee for payment of the charges for Services.

4. Provisioning of Service

4.1. Description of Switched Interstate Access

4.1.1. General

Switched Access provides two-point communications paths between the point of termination at a Carrier's Point of Presence and the points of termination at the Company's end user premises within the Access Area. Each path is established through the use of Switched Transport, End Office Services, and Common Lines. Switched Access provides for the ability to originate calls from an end user's premises to the Customer's Point of Presence and to terminate calls from the Customer's Point of Presence to an end user's premises.

Switched Access Feature Groups are ordered in quantities of lines or trunks. FGD Access Service is furnished on a per-trunk basis in accordance with the capacity ordered in trunks.

Currently, the Company will only provide Switched Access Service via trunking arrangements between the Company's Switch and the Tandem Switch of the incumbent Local Exchange Carrier serving the rate center.

(T)
(T)

Switched Access may be ordered by the Customer for mixed intrastate and interstate communications. If the jurisdiction of the call cannot be determined, then the development of a Percentage Interstate Usage (PIU) factor is required in order to estimate the amount of interstate traffic versus intrastate traffic.

4.1.2. Types of Switched Access Offered

Feature Groups are arranged for originating, terminating, or two-way calling, based on the end office switching capacity ordered. Originating calling permits the delivery of calls from the Company's exchange service locations to the Customer's premises.

Terminating calling permits the delivery of calls from the Customer's premises to Company's exchange service locations.

4. Provisioning of Service (Cont'd.)

4.1. Description of Switched Interstate Access (Cont'd.)

4.1.3. Description of Feature Groups

Company will provide Switched Access Feature Groups as follows:

Originating and Terminating FGD:

Switched Access will be provided as Feature Group D Service to Company end offices routed via the incumbent Local Exchange Carrier's access tandem to the Company's switch. FGD is defined as a trunk-side connection to the Company's network. The use of a line side connection is not offered through this Tariff. The Company's network provides answer and disconnect supervisory signaling and wink start pulsing signals except when SS7 Out-of-Band Signaling is specified. (T)

4.1.4. Jurisdictional Determination

- (A) Where the jurisdiction of Switched Access traffic can be determined from the call detail, the Company will bill according to such jurisdiction. Otherwise the Company will apply the applicable PIU reported by the Customer. If jurisdiction cannot be determined from call detail or jurisdictional reports, the default interstate percentage will be applied. The default PIU is 50%.

7. Rates, Charges and Fees (Cont'd.)

7.3 Switched Access Service

This section contains the specific regulations governing the rates and charges that apply for Switched Access Services:

There are three types of rates and charges that apply to Switched Access Service:

- Non-Recurring Charges: One-time charges that apply for a specific work activity.
- Recurring Charges: Fixed charges apply each month and depend on the number and type of facilities in place.
- Usage Charges: Charges that are applied on a per access minute basis. Usage rates are accumulated over a monthly period.

The Company's switched access rates consist of a single charge per minute of use for origination or termination that is equal to the sum of the local switching, tandem transport, tandem transport termination and, if applicable, common trunk port and transport multiplexing per minute charges of the incumbent Local Exchange Carrier serving the Rate Center in which a call is originated or terminated. Transport mileage is the air line mileage from the incumbent Local Exchange Carrier tandem switch serving the Rate Center to the Company's switch in Bremen, Georgia. Specific rates by Rate Center are set forth in Section 7.3.1 below.

7.3.2. Access Order Charge

A nonrecurring, per occurrence charge assessed for the processing of access orders, is applied per access order for the installation, addition, change, rearrangement or move of Access Services.

Access Order Charge

| | |
|----------------------|----------|
| Non-Recurring Charge | \$100.00 |
|----------------------|----------|

7.3.3. Design Change Charge

A nonrecurring per occurrence charge is assessed for any change to an access order that requires an engineering review or reevaluation of facilities needed in order to implement the requested access service.

In the case of a Customer-initiated modification of Service, charges for the subsequent orders are in addition to the costs incurred before the Customer changed the original order.

Design Change Charge

| | |
|----------------------|----------|
| Non-Recurring Charge | \$150.00 |
|----------------------|----------|
