3.1 Payment Arrangements

3.1.1 Payment for Service

The Company will endeavor to bill on a current basis all charges incurred by and credits due to the Buyer under this Tariff attributable to Service(s) established or discontinued during the preceding billing period, as described in Section 3.1.2.

The Buyer is responsible for the payment of all charges for Service(s) furnished by the Company. All bills are due 31 days after the bill date (payment date) or by the next bill date, whichever is the shortest interval, and are payable in immediately available funds. If such payment date would cause payment to become due on a Saturday, Sunday, or holiday (as recognized by the federal government or applicable state government), such payment shall be due on the next business day.

- 3.1.1.1 The Buyer is responsible for payment of appropriate sales, use, gross receipts, excise, access or other local, state and federal taxes, charges or surcharges (however designated) (excluding taxes on the Company's net income) imposed or based upon the provision, sale or use of the Company's Service(s), unless otherwise agreed to in writing, pursuant to an ICB contract, the terms of which are available to similarly situated Buyers.
- 3.1.1.2 Without limitation to the foregoing, the Buyer is responsible for any and all cost(s) incurred as the result of:
- (a) any delegation of authority resulting in the use of Buyer's communications equipment and/or network services which result in the placement of Calls via the Company;
  - (b) any and all use of Company Services, including Calls which the Buyer did not individually authorize, including any and all fraudulent or allegedly fraudulent calls that originate on the Buyer's network;
  - (c) any Calls placed by or through the Buyer's equipment via any remote access feature(s);
  - (d) any use of the Company's Services and/or activities, whether or not accompanied by a written order.

3. PAYMENT AND BILLING (Cont'd)

3.1 Payment Arrangements (Cont'd)

3.1.2 Billing and Collection of Charges

3.1.2.1 The Company will endeavor to bill usage charges monthly for the preceding billing period; however, the Company's failure to do so shall not affect the Buyer's liability for such charges irrespective of the length of delay between the date of usage and the Company's billing for such usage. Company is permitted to bill for usage within eighteen (18) months of the date upon which service was provided, assuming that the Buyer was aware of the unbilled Services during the period the Services were unbilled.

3.1.2.2 Each bill will include industry standard descriptions of service(s) rendered for the period covered, any known unbilled non-usage sensitive charges for prior periods and unbilled usage charges for any prior period.

Buyer's billing will begin upon delivery of Calls to, or receipt of Calls from the Company. Billing accrues through and includes the day that the service, circuit, arrangement or component is discontinued and ceases to be used by Buyer.

3.1.2.3 A nonrecurring Charge is due and payable within 31 days after the invoice date.

3.1.2.4 Charges based on measured usage will be included on the next invoice rendered following the end of the month in which the usage occurs.

3.1.2.5 When non-usage based Service does not begin on the first day of the month, or end on the last day of the month, the charge for the fraction of the month in which Service was furnished will be calculated on a pro-rated basis with every month considered to have 30 days.

3.1.2.6 If any portion of the Buyer's payment is received by the Company after the date due, or if any portion of the payment is received by the Company in funds which are not immediately available, then a Late Payment Fee shall be due to the Company. The Late Payment Fee shall be calculated at 1.5% of the unpaid balance per month or portion thereof for the period from the due date until the payment is received.

3.1.2 Billing and Collection of Charges (Cont'd)

3.1.2.7 In addition to other penalties or fees, the Buyer will be assessed a charge of twenty-five dollars (\$25) for each check submitted by the Buyer to the Company which a financial institution refuses to honor for insufficient funds or a non-existent account.

3.1.2.8 If Service is discontinued by the Company in accordance with Section 3.1.6 following, and later restored, restoration of Service will be subject to all applicable reconnection or reestablishment charges.

3.1.3 Advance Payments

To safeguard its interests, the Company may require a Buyer to make an Advance Payment before Services are furnished. The Advance Payment will not exceed an amount equal to the Nonrecurring Charge(s) and one month's charges for the Service. The Advance Payment will be credited to the Buyer's initial bill. An Advance Payment may be required in addition to a deposit.

3.1.4 Jurisdictional Reporting Requirements

3.4.1.1 To determine the jurisdiction of a call, the Company compares the originating number information with the terminating number information. Traffic without sufficient call detail shall be that traffic for which the originating number information lacks a valid Charge Party Number or Calling Party Number.

3.4.1.2 The Buyer must indicate a projected Percent of Interstate Use (PIU) factor in a whole number (i.e., a number 0 - 100) when ordering Switched Access Service. When terminating call details are insufficient to determine the jurisdiction for the call, the Buyer may supply the projected PIU factor. The projected PIU factor will be used to apportion the terminating call minutes for which call details were insufficient to determine jurisdiction between the interstate and intrastate jurisdictions.

3.1.4 Jurisdictional Reporting Requirements (Cont'd)

3.1.4.3 When terminating call details are insufficient to determine the jurisdiction, and the Buyer does not supply a projected PIU factor, calls will be billed using a PIU of 50 (50% interstate – 50% intrastate).

3.1.4.4 The Buyer may update the PIU factor on a quarterly basis. The Buyer shall forward to the Company a revised report, to be received no later than fourteen (14) days after the first of January, April, July and October. The revised report shall show the PIU factor for the most current data available, for each service arranged for interstate use. This data shall consist of at least three (3) and no more than twelve (12) consecutive months' of data, ending no more than seventy-five (75) days earlier than the date the report is due (e.g., for the report due January 15th, the last month of data should be no earlier than October 31st). The updated PIU factor shall be based on call detail records. The PIU factor can be based on a statistically valid sample. The PIU factor reported in January, April, July and October will be effective on the bill date of each such month and will serve as the basis for subsequent monthly billing pending the receipt of a revised PIU report.

(a) No prorating or back billing will be done based on the jurisdictional report. However, usage will be billed utilizing the interstate percentage that was in effect at the time the usage was generated.

(b) The Buyer shall maintain and retain the work papers that show how the interstate percentage was determined and a summary derived from the actual call detail records for a minimum twelve (12) month period which statistically substantiates each interstate percentage provided to the Company. This summary at a minimum shall include month, year, state, traffic type (e.g., originating, terminating, 8XX, etc.) and service type. The Company may request the work papers and summary in support of the Buyer's projected PIU factor.

3.1.4 Jurisdictional Reporting Requirements (Cont'd)

3.1.4.5 If a billing dispute arises concerning the projected interstate percentage, the Company will ask the Buyer to provide the data the Buyer uses to determine the projected PIU by sending a letter to the Buyer (by certified U.S. Mail, return receipt requested) requesting that the Buyer contact the Company to discuss and explain their report within thirty (30) days of the Company's request. If no response is received from the Buyer, the Company will send a letter to the Buyer (by certified U.S. Mail, return receipt requested) requesting the work papers and any support dating used by the Buyer to substantiate the most recent interstate percentage. The requested information must be submitted by the Buyer to the Company within thirty (30) days after receipt of the certified letter.

(a) If the Buyer submits the work papers and summary as requested, the Company will review this information within thirty (30) days after receipt of the Buyer's information.

(1) If after review of the documentation, the Company and the Buyer establish a revised interstate percentage, the Company will begin using that percentage with the next billing period.

(2) If the Company and the Buyer do not establish a revised interstate percentage, the Company will begin the procedures as set forth below to conduct an audit.

(b) If no response is received from the Buyer, the Company will begin the auditing procedures as set forth below.

3.1.4 Jurisdictional Reporting Requirements (Cont'd)

3.1.4.6 When jurisdictional reports are not provided by the Buyer or a billing dispute arises, the Company may request an audit. The audit procedures and responsible party(ies) for payment of audit expenses will be determined as follows:

- If the Company and the Buyer mutually agree upon an independent auditing firm and the party(ies) agree to equally share in the payment of audit expenses, both the Company and the Buyer will be bound by such agreement; or
- The Buyer may select an independent auditing firm and pay all audit expenses.
- If the audit is not conducted as set forth preceding, the Company may select an independent auditing firm and pay all expenses.

3.1.4.7 The Company will adjust the Buyer's PIU based upon the audit results. The PIU resulting from the audit shall be applied to the usage for the quarter the audit is completed, the usage for the quarter prior to completion of the audit and the usage for the two (2) quarters following the completion of the audit. After that time, the Buyer may report a revised PIU. The Company will implement the revised interstate percentage to the next billing period or quarterly report date, whichever is first.

3.1.4.8 Identification and Rating of VoiP-PSTN Traffic

VoiP-PSTN traffic is defined as traffic exchanged between a Company End User and the Buyer in Time Division Multiplexing (TDM) format that originates and/or terminates in Internet Protocol (IP) format. This section governs the identification of VoiP-PSTN Traffic that is required to be compensated at interstate access rates unless the parties have agreed otherwise by the F.C.C. in its Report and Order in WC Dockets Nos. 10-90, etc., F.C.C. Release No. 11-161 (November 18, 2011) (F.C.C. Order). Specifically, this section establishes the method of separating VoiP-PSTN Traffic from the Buyer's traditional intrastate access traffic, so that VoiP-PSTN Traffic can be billed in accordance with the F.C.C. Order. VoiP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company's applicable tariffed interstate switched access rates as set forth in Section 7, following.

1. Calculation and Application of Percent-VoiP-Usage Factors

- (a) The Company will determine the number of VoiP-PSTN Traffic minutes of use (MOU) to which interstate rates will be applied under B, preceding, by applying an originating Percent VoiP Usage (PVU) factor to the total intrastate access MOU originated by a Company end user and delivered to the Buyer and by applying a terminating PVU factor to the total intrastate access MOU terminated by a Buyer to the Company's end user.
- (b) The Buyer will calculate and furnish to the Company an originating PVU factor representing the whole number percentage of the Buyer's total originating intrastate access MOU that the Buyer exchanges with the Company in the LATA that is received from the Company and that is terminated in IP format and that would be billed by the Company as intrastate access MOU.

3.1.4.8 Identification and Rating of VoIP-PSTN Traffic (Cont'd)

1. Calculation and Application of Percent-VoIP-Usage Factors (Cont'd)

- (c) The Buyer will calculate and furnish to the Company a terminating PVU factor representing the whole number percentage of the Buyer's total terminating intrastate access MOU that the Buyer exchanges with the Company in the LATA that is sent to Company and which originated in IP format and that would be billed by the Company as intrastate access MOU.
- (d) The Buyer shall not modify their reported PIU factor to account for VoIP- PSTN Traffic.
- (e) Both the Buyer provided originating PVU and the terminating PVU shall be based on information such as the number of the Buyer's retail VoIP subscriptions in the state (e.g. as reported on F.C.C. Form 477), traffic studies, actual call detail or other relevant and verifiable information which will be provided to the Company upon request.
- (f) The Buyer shall retain the call detail, work papers, and information used to develop the PVU factors for a minimum of one year.
- (g) If the Buyer does not furnish the Company with a PVU factor, the Company will utilize a PVU equal to zero.

2. Initial Implementation of PVU Factors

- (a) If the PVU factors cannot be implemented in the Company's billing systems by December 29, 2011, once the factors can be implemented the Company will adjust the Buyer's bills to reflect the PVU factors prospectively in the next bill period if the PVU factors are provided by the Buyer to the Company prior to April 15, 2012.
- (b) The Company may choose to provide credits based on the reported PVU factors on a quarterly basis until such time as the billing system modifications can be implemented.

The Buyer may update the PVU factors quarterly using the method set forth in the preceding. If the Buyer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January, April, July and/or October of each year, revised PVU factors based on data for the prior three months, ending the last day of December, March, June and September, respectively. The revised PVU factors will serve as the basis for future billing and will be effective on the bill date of each such month and shall serve as the basis for subsequent monthly billing until superseded by new PVU factors. No prorating or back billing will be done based on the updated PVU factors.

4. PVU Factor Verification

(a) Not more than twice in any year, the Company may request from the Buyer an overview of the process used to determine the PVU factors, the call detail records, description of the method for determining how the end user originates and terminates calls in IP format, and other information used to determine the Buyer's PVU factors furnished to the Company in order to validate the PVU factors supplied. The Buyer shall comply, and shall reasonably supply the requested data and information within 15 days of the Company's request.

(c) If after review of the data and information, the Buyer and the Company establishes revised PVU factors, the Company will begin using those revised PVU factors with the next bill period.

(d) If the dispute is unresolved, the Company may initiate an audit. The Company shall limit audits of the Buyer's PVU factor to no more than twice per year. The Buyer may request that the audit be conducted by an independent auditor. In such cases the associated auditing expenses will be paid by the Buyer.

- In the event that the Buyer fails to provide adequate records to enable the Company or an independent auditor to conduct an audit verifying the Buyer's PVU factors, the Company will bill the usage for all contested periods using the most recent undisputed PVU factors reported by the Buyer. These PVU factors will remain in effect until the audit can be completed.

- During the audit, the most recent undisputed PVU factors from the previous reporting period will be used by the Company.

4. CONSTRUCTIVE ORDERING

4.1 General

By receiving from or handing off traffic to the Company's Network, the Buyer will have constructively ordered the Company's Switched Access Service and is responsible for all charges incurred in connection with the use of such Service.

4.1.1 Constructive Ordering

A Constructive Order is initiated when Calls are delivered to or accepted from the Company by a Buyer. By accepting Traffic from the Company or delivering Traffic to the Company's Network, the Buyer agrees that it has ordered, and will pay for, the Company's Services pursuant to this Tariff. Similarly, the selection of an IXC as a PIC constitutes a Constructive Order for Switched Access Service by that IXC.

5. SWITCHED ACCESS SERVICE

5.1 General

Switched Access Service provides for the use of switching and/or transport facilities or services to enable a Buyer to utilize the Company's Network to accept Calls or to deliver Calls. Switched Access Service may be provided via a variety of means and facilities, where available, to be determined by the Company at its sole discretion.

5. SWITCHED ACCESS SERVICE (Cont'd)

5.1 General (Cont'd)

5.1.1 Rate Categories and Descriptions

The Company's Interstate Switched Access Service rate elements include the following rate elements or their functional equivalents:

5.1.1.1 Switching:

(a) "Tandem Switching" denotes an intermediate switching function between the originating point of a Call and its final destination. This function can be provided by a tandem switch or functionally equivalent equipment.

(b) "Local Switching" denotes the switching functionality closest to the calling party or called party, as applicable. This function can be performed by a switch or functionally equivalent equipment. These switching functions are charged on a per-MOU basis, unless otherwise specified by the Company.

(c) "Information" services denote functions associated with the provision of directory assistance and call routing. Examples include Information/Intercept Surcharges.

5.1.1.2 Transport: Charges for the transmission of Calls.

Transport rate categories consist of two elements: a Transport Termination per path per MOU charge (in some ILEC areas, the rate may be per termination) and a Transport Facility rate per mile per MOU charge.

5.1.1.3 Network Charges:

Charges that recover a portion of the costs of connecting the End User to the telephone network. Examples include the Primary Interexchange Carrier Charge and Transport Interconnection Charge.

5. SWITCHED ACCESS SERVICE (Cont'd)

5.1 General (Cont'd)

5.1.1 Rate Categories and Descriptions (cont'd)

5.1.1.4 800 Database Access Service:

800 Data Base Access Service is provided with FGD Switched Access Service. When a 1+800 series+NXX-XXXX call is originated by an End User, the Company will utilize the Signaling System 7 (SS7) network to query an 800 data base to perform the identification function. The call will then be routed to the identified End User over FGD switched access. The 800 series includes the following service area codes: 800, 888, 877, 866, 855, 844, 833, and 822.

The manner in which 800 Database Access Service is provided is dependent on the availability of SS7 service at the end office from which the service is provided as outlined following:

When 800 Database Access Service originates at an end office equipped with Service Switching Point (SSP) capability for querying centralized data bases or at a non-SSP equipped end office that can accommodate direct trunking of originating 800 service calls, all such service will be provisioned from that office.

When 800 Database Access Service originates at an end office not equipped with SSP End User identification capability, the 800 services call will be delivered to the access tandem on which the end office is homed for 800 series service and which is equipped with SSP feature to query centralized databases.

When 800 Database Access Service originates at an end office equipped with SSP capability that is not capable of accommodating direct trunking of originating 800 series (other than the 800 service access codes) call will be delivered to the access tandem on which the end office is homed and which is equipped with the SSP feature to query centralized data bases.

Query charges as set forth in following are in addition to those charges applicable for the Feature Group D switched access service. Charges for this service are provided in Section 7.2.3.

5.2.2 Transmission Specifications

Each Switched Access Service transmission path is provided with industry standard transmission for its type of service. The Company will work in cooperation with the Buyer to insure that those parameters are met. In the event the established specifications are not maintained, the Company may require immediate corrective action and may work independently or in cooperation with the Buyer to remedy the situation.

5.2.3 Testing

Acceptance Testing and Routine Testing shall be mutually arranged by the Company and the Buyer, as necessary.

5.2.4 Report Requirements

At the Company's request, the Buyer is responsible for providing reports to the Company, if applicable. Such reports include:

5.3 Rate Regulations

This section contains a brief description and the general regulations governing the rates and charges that apply for Switched Access Service.

5.3.1 Description and Application of Rates

Switched Access Service rates are generally of two types; Recurring Charges and Nonrecurring Charges. Recurring Charges include usage-based rates that are measured and billed on a per-minute of use (MOU) basis. Examples include the per-MOD Switched Access charges that are included in this Tariff. Recurring Charges also include "flat" rates that are charged one time per month, regardless of usage. Nonrecurring Charges are one-time charges that apply for a specific work activity. Examples would include charges for technician charges for maintenance and repair.

5.3.2 Contracts and Individual Case Basis (ICB) Rates

In lieu of the rates terms and/or conditions otherwise set forth in this Tariff, the Company's services may be established and provided at negotiated rates on an Individual Case Basis (ICB), taking into account any factors the Company deems necessary or appropriate, including the nature of the facilities and services involved, the costs of construction and operation, the volume of traffic, the length of service commitment and use of facilities. Such ICB arrangements will be established solely at the Company's discretion. ICB rates, terms, conditions, services, or charges will be made available to similarly situated Buyers on a non-discriminatory basis.

In addition to any rate or charge established by the Company, the Buyer will be responsible for any Recurring or Nonrecurring Charges imposed by local exchange telephone companies incurred by or on behalf of the Buyer in establishing and maintaining service. Such charges may be billed by the Company or directly by the local exchange telephone company, at the Company's option.

5.3.3 Pass-Through of Taxes and Regulatory Fees

The Company may, in its discretion and on a non-discriminatory basis, assess fees and surcharges, including, but not limited to state and federal taxes and regulatory fees.
