DESCRIPTION AND JUSTIFICATION

The National Exchange Carrier Association, Inc. (NECA) proposes to increase its Federal Universal Service Surcharge (FUSC) percentage and optional Multi-line Business End User Common Line (MLB EUCL) FUSC banded percentages in response to the recently published fourth quarter 2013 Universal Service Contribution Factor as described in the Federal Communications Commission's (FCC) September 11, 2013 Public Notice.¹

Background

On April 1, 2003 NECA changed its FUSC rate structure from a monthly end user line charge to a percentage surcharge on interstate retail revenue² to comply with the Commission's *Second Order on Reconsideration*³ which prohibits a carrier from

¹ Proposed Fourth Quarter 2013 Universal Service Contribution Factor, CC Docket No. 96-45, *Public Notice*, DA 13-1880 (rel. September 11, 2013). In this Public Notice, the Office of Managing Director announces the proposed universal service contribution factor for the fourth quarter of 2013 of 15.6%.

recovering a FUSC amount larger than the end user's interstate retail revenue multiplied by the FCC's quarterly universal service contribution factor.

The Commission's *Second Order on Reconsideration* granted an interim waiver of section 54.712 (47 C.F.R. § 54.712) to allow local exchange carriers (LECs) that continue to recover contribution costs from Centrex customers using the 1/9 equivalency ratio as allowed by section 69.153 (47 C.F.R. § 69.153) to recover remaining contribution costs associated with Centrex customers from multi-line business customers.⁴

On May 31, 2003 NECA introduced MLB EUCL FUSC optional rate banding.⁵ This is a tiered pricing structure that allows local exchange carriers (LECs) to recover contribution costs from Centrex customers using the 1/9 equivalency ratio and to recover the remaining contribution costs associated with Centrex customers from other multi-line business customers in the same tier. Each company opting for MLB EUCL FUSC rate banding was placed in a rate band designed to recover its contribution costs. NECA's optional MLB EUCL FUSC rate banding structure allows pool members to assess a percent surcharge that is consistent with its proportionate number of business Centrex customers compared to total multi-line business customers.

On August 10, 2004 NECA filed with the Commission to reduce the number of SLCs that are assessed on DS1 Channel Service from twenty-four to five⁶ in response to

Truth-in-Billing and Billing Format, CC Docket No. 98-170, *Order and Second Order on Reconsideration*, 18 FCC Rcd 4818 (*Second Order on Reconsideration*).

the partial waiver of section 69.104(q) of the Commission's rules.⁷ Five SLCs for each DS1 channel service arrangement and five SLCs for each ISDN-PRI arrangement, under section 69.104 (p) (2), were used in the calculation of total multi-line business EUCL revenues. These revenues were used to develop a FUSC percent surcharge for optional MLB EUCL FUSC rate banding.

On February 14, 2008, the FCC released an Order⁸ stating local exchange carriers should not charge Payphone Service Providers (PSP) additional USF line-item amounts related to Centrex adjustments. NECA excluded the PSP lines from the calculation of MLB EUCL FUSC surcharges.

On September 11, 2013, the FCC announced the fourth quarter 2013 Universal Service Contribution Factor of 15.6%. NECA proposes to update its FUSC surcharges to reflect this updated factor.

Calculation of Revised Support Contributions and Multi-Line FUSC Surcharges

Exhibit 1 shows adjusted projections for Federal Universal Service Support Mechanism (USSM) contributions for the fourth quarter 2013 as well as the 2013-2014 test period. The adjusted test period USSM contribution of \$99.4 M reflects an increase of \$2.4 M from the filed amount of \$97.0 M in the *2013 Annual Filing*.⁹

Exhibit 2 displays the development of the fourth quarter 2013 optional MLB EUCL FUSC band rates and the projection of optional MLB EUCL FUSC band revenue for the fourth quarter 2013. Based on the test period Business Centrex and MLB band revenues in Vol. 4 Exhibit 6 of the *2013 Annual Filing*, the revised MLB EUCL FUSC band rates reflect the changes from the third quarter 2013 contribution factor of 15.1% to the fourth quarter 2013 contribution factor of 15.6%. The exhibit shows the projected MLB EUCL FUSC band revenue of \$2.1 M on Line 21.

Exhibit 3 displays the development of the projected FUSC non-banded revenue of \$73.0 M on Line 5, the projected FUSC banded revenue of \$2.1 M on Line 6, and the projected total FUSC revenue of \$75.1 M on Line 7 for the three remaining quarters of the 2013-2014 test period.

Finally, Exhibit 4 displays the development of adjusted 2013 – 2014 test period FUSC revenue of \$99.4 M on Line 3. The adjusted test period FUSC revenue equals the adjusted test period 2013 - 2014 USSM contribution amount of Exhibit 1 Column E Line 5. Therefore, the proposed FUSC charges conform to the FCC rules.

Conclusion

The proposed FUSC surcharges comply with the Commission's rules and should be allowed to become effective on October 1, 2013.

1. Following FCC Order on Reconsideration in CC Docket No. 96-45 (FCC 08-51) released on February 14, 2008, Payphone Service Provider Lines are excluded from calculation of MLB EUCL FUSC surcharges. See 2013 Annual Filing V4 EX 6 COL A.

3. The following formula is used to calculate Multi-line FUSC surcharge for each band:

$$\text{Contribution Factor} / (1 - 8/9 * \text{Business Centrex Rev} / \text{MLB Rev}).$$

For bands with no MLB revenue projected, the following formula is used to calculate Multi-line FUSC surcharge for each band:

$$\text{Contribution Factor} / (1 - 8/9 * \text{Mid-point of Band Business Centrex Percentages}).$$
