ACCESS SERVICE

3. Carrier Common Line Access Service

The Telephone Company will provide Carrier Common Line Access Service (Carrier Common Line Access) to customers in conjunction with Switched Access Service provided in Section 6. of this tariff.

The Switched Access Service associated with Carrier Common Line Access shall be ordered by the customer in accordance with regulations set forth in Section 5 following.

3.1 General Description

Carrier Common Line Access provides for the use of end users' Telephone Company provided common lines by customers for access to such end users to furnish Interstate Communications at rates and charges set forth in 3.7.1 following. The customer facilities at the premises of the ordering customer shall provide the necessary on-hook and off-hook supervision.

(D)
—
(D)

A Special Access Surcharge will apply to interstate special access service provided by the Telephone Company to a customer, in accordance with rates and regulations as set forth in 7.2.1(E) following.

3. Carrier Common Line Access Service (Cont'd)3.4 Resold Services (Cont'd)3.4.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services (Cont'd)(E) Access Groups and BSAs

(T)

When all the usage on an access group or BSA originates from and/or terminates at an end offices, the Access Charge per minute as set forth in 3.7.1 following will apply. The minutes billed Carrier Common Line Access Service charges will be the adjusted originating interstate access minutes and the adjusted terminating interstate access minutes for such access groups or BSAs.

(C)

The adjusted originating access minutes will be the originating interstate access minutes less the reported resold originating MTS and/or MTS-type service minutes of use as set forth in (A)(1) preceding; but not less than zero. The adjusted terminating access minutes will be the terminating interstate access minutes less the reported resold terminating MTS and/or MTS-type service minutes of use as set forth in (A)(2) preceding; but not less than zero.

3.4.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services (Cont'd)

(G) When the Adjustment Will be Applied to Customer Bills

The adjustment as set forth in (E) preceding will be made to the involved customer account no later than either the next bill date, or the one subsequent to that, depending on when the usage report is obtained. (C)

(H) Conversion of Billed Usage to Minutes

When the MTS and/or MTS-type usage is shown in hours, the number of hours shall be multiplied by 60 to develop the associated MTS and/or MTS-type minutes of use. If the MTS and/or MTS-type usage is shown in a unit that does not show hours or minutes, the customer shall provide a factor to convert the shown units to minutes.

(I) Percent Interstate Use (PIU)

The adjustment as set forth in (E) preceding will be made to the involved customer account after making the adjustments to the customer account as set forth in 3.6.4 following (PIU). (C)

ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)3.6 Rate Regulations3.6.1 Billing and Charges

Carrier Common Line charges will be billed to each Switched Access Service provided under this tariff in accordance with the regulations except as set forth in 3.4.4 preceding (Resale) and 3.6.4 following (PIU).

(C)

3.6.2 Measuring and Recording of Call Detail

When access minutes are used to determine Carrier Common Line charges, they will be accumulated using call detail recorded by Telephone Company equipment except as set forth in 3.6.3 following (Unmeasured FGA, FGB, BSA-A and BSA-B Usage) and FGC and BSA-C operator and automated operator services systems call detail such as operator-DDD, operator-person, collect, credit-card, third number and/or other like calls recorded by the customer. The Telephone Company measuring and recording equipment, except as set forth in 3.6.3 following (Unmeasured FGA, FGB, BSA-A and BSA-B Usage), will be associated with end office or local tandem switching equipment and will record each originating and terminating access minute where answer supervision is received. The accumulated access minutes will be summed on a line by line basis, by line group or by end office, whichever type of account is used by the Telephone Company, for each customer and then rounded to the nearest minute.

ACCESS SERVICE

6. Switched Access Service6.1 General (Cont'd)6.1.1 Service Arrangements

Switched Access is provided in conjunction with either of two types of access services, bundled Feature Groups or unbundled Lineside, Trunkside and Dedicated Network Access Link (DNAL) Basic Serving Arrangements (BSAs). BSAs, described in 6.2.5, 6.2.6, 6.2.7 and 6.2.8, are provided in two basic categories differentiated by their technical characteristics and how they connect, line side or trunk side connection, to the Telephone Company's first point of switching. The trunk side BSA is further differentiated into three alternatives based upon how the end user accesses the trunk side BSA, with or without an access code. Feature Group A (FGA) and Basic Serving Arrangement A (BSA-A) are defined as line side connections to the Telephone Company's network. Feature Group B (FGB), Feature Group C (FGC), Feature Group D (FGD), Basic Serving Arrangement Alternative B (BSA-B), Basic Serving Arrangement Alternative C (BSA-C), and Basic Serving Arrangement Alternative D (BSA-D) are defined as trunk side connections to the Telephone Company's network. The use of a line side or trunk side switched access connection is dependent upon the switched access arrangement ordered by the customer.

Feature Groups and BSAs are arranged for either originating, terminating or two-way calling, based on the customer end office switching capacity ordered, while originating 500 Access Service, Toll Free Code (TFC) Access Service and 900 Access Service is arranged for originating calling only. Originating calling permits the delivery of calls from Telephone Exchange Service locations to the customer's premises. Terminating calling permits the delivery of calls from the customer's premises to Telephone Exchange Service locations. Two-way calling permits the delivery of calls in both directions, but not simultaneously.

(T)

Switched Access will be provided as both Feature Groups and BSAs to Telephone Company end offices either directly routed or routed via an access tandem, except as set forth following:

- Feature Group and BSA trunk side equivalents (FGB and BSA-B, FGC and BSA-C, and FGD and BSA-D) may not be provided for the same Carrier Identification Code (CIC) and/or Billing Account Number (BAN) at Telephone Company end offices which subtend the same tandem. When a Telephone Company end office subtends multiple tandems, Feature Group and BSA trunk side equivalents may not be provided for the same CIC and/or BAN at any Telephone Company end office which subtends either tandem.
- Feature Group and BSA line side equivalents (FGA and BSA-A) may not be mixed in the same multiline hunt group.

Switched Access ordering regulations are detailed in 5.1.

6. Switched Access Service (Cont'd)6.2 Switched Access Service Arrangements (Cont'd)6.2.3 Feature Group C (FGC) (Cont'd)(A) Description (Cont'd)

(6) The Telephone Company will establish a trunk group or groups for the customer at end offices or Telephone Company access tandem where FGC is provided. When required by technical limitations, a separate trunk group will be established for each type of FGC provided. Different types of FGC or other switching arrangements may be combined in a single trunk group at the option of the Telephone Company.

(7) Inward Operator Assistance Services (Busy Line Verification, Interrupt, and Operator Assistance) may be provided with FGC Switched Access Service at Telephone Company designated Operator Service switching locations. Operator Services are provided as set forth in National Exchange Carrier Association Tariff #4..

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Switched Access Service Arrangements (Cont'd)6.2.10 TFC Access Service (T)(A) Description

- (1) TFC Access Service provides for the forwarding of end user dialed TFC calls to a customer via a Telephone Company designated switch capable of performing a customer identification function. The TFC Access Service customer identification function utilizes TFC Data Base Query Service, as described in 6.2.10(D), to screen all ten digits of all TFC type calls generated by end users to determine the customer to which the TFC call is routed by the Telephone Company. (T)

The TFC Access Service customer identification function will be available at suitably equipped end offices or Telephone Company access tandems. Once customer identification has been established, the call will be routed to the customer. TFC Access Service may be provided via TFC Access Service switched trunk groups or in conjunction with a customer's FGC or FGD Switched Access Service. TFC Access Service may also be provided in conjunction with BSA-C and BSA-D as shown in 6.2.7 and 6.2.8. (T)

- (2) TFC Access Service is an originating trunk side switched service that is available to the customer via TFC Access Service trunk(s) at Telephone Company designated switches capable of performing the TFC Access Service customer identification function. If the customer's TFC Access traffic originates from an end office switch not equipped to perform the TFC Access Service customer identification function, the call will be routed to the nearest office at which the function is available. Once customer identification has been established, the call will be routed to the customer. (T)

Unless prohibited by technical limitations, the customer's TFC Access Service traffic may, at the option of the customer, be combined in the same trunk group arrangement with the customer's FGC, FGD, BSA-C or BSA-D Access Service traffic. When required by technical limitations a separate trunk group must be established for TFC Access Service. (T)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Switched Access Service Arrangements (Cont'd)6.2.10 TFC Access Service (Cont'd) (T)(A) Description (Cont'd)

- (3) TFC Access Service is provided as trunk side switching through the use of end offices or Telephone Company access tandems. TFC Access Service originating from equal access end offices with the TFC Access Service customer identification function will be provided using Feature Group D signaling as set forth in 6.2.4 (A)(2) and (3) or BSA-D signaling as set forth in 6.2.8(A)(2) and (3). When Feature Group D signaling is provided, ANI will be provided in the same manner in which ANI is provided for Feature Group D as set forth in 6.3.2 (F). When BSA-D signaling is provided, at the option of the customer, ANI may be provided as set forth in 6.2.14. (T)

TFC Access Service originating from end offices not having equal access capabilities will be provided using Feature Group C signaling as set forth in 6.2.3 (A)(2) and (3) or BSA-C signaling as set forth in 6.2.7(A)(2) and (3). When Feature Group C signaling is provided, ANI will be provided in the same manner in which ANI is provided for Feature Group C as set forth in 6.3.2 (F). When BSA-C signaling is provided, at the option of the customer, ANI may be provided as set forth in 6.2.14. (T)

(2) Equal Access End Offices

In equal office end offices, TFC Access Service is provided with either Type A, Type B or Type C Transmission Specifications as follows:

(T)

- When routed directly to the end office either Type B or C is provided.
- When routed to a Telephone Company access tandem only Type A is provided.
- Type A is provided on the transmission path from the Telephone Company access tandem to the end office.

Type C Transmission specifications are provided with Interface Group I. Type A and Type B Transmission Specifications are provided with interface Groups 2 through 10.

Type DA Data Transmission Parameters are provided for the transmission path between the customer's premises and the Telephone Company access tandem and between the Telephone Company access tandem and the end office. Type DB Data Transmission Parameters are provided for the transmission path between the customer's premises and the end office when directly routed to the end office.

6. Switched Access Service (Cont'd)6.2 Switched Access Service Arrangements (Cont'd)6.2.10 TFC Access Service (Cont'd) (T)(D) TFC Data Base Query Service (Cont'd) (T)

The TFC subscriber is responsible for arranging the entry of the various routing instructions discussed herein into the Number Administration Service Center's (NASC's) Service Management System (SMS). (T)

Rate regulations and charges applicable to TFC Data Base Query Service appear in 6.5.3(C) and 6.6. (T)

6.2.11 900 Access Service(A) Description

- (1) 900 Access Service is an originating trunk side service that provides for the forwarding of end user dialed 900-NXX-XXXX calls to a customer via a Telephone Company designated switch capable of performing a customer identification function. The customer identification function determines the customer to which the 900 call is routed by the Telephone Company.

The customer identification function will be available at suitably equipped end offices or Telephone Company access tandems. Once customer identification has been established, the call will be routed to the customer. 900 Access Service may be provided via 900 Access Service switched trunk groups or in conjunction with a customer's FGC, FGD, BSA-C or BSA-D Switched Access Service.

- (2) If the customer's 900 Access traffic originates from an end office not equipped to perform the customer identification function, the call will be routed to the nearest office at which the function is available. Once customer identification has been established, the call will be routed to the customer.

Unless prohibited by technical limitations, the customer's 900 Access Service traffic may, at the option of the customer, be combined in the same trunk group arrangement as the customer's FGC, FGD, BSA-C or BSA-D Access Service traffic. When required by technical limitations a separate trunk group must be established for 900 Access Service.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.4 Provision of Switched Access Service (Cont'd)(G) Testing (Cont'd)(1) Acceptance Testing (Cont'd)

(a) (Cont'd)

- Bit Error test in each transmission direction
- 1004 Hz test per trunk group per di-group in each transmission direction
- C-notched noise test per trunk group per di-group in each transmission direction
- One operational signaling test per trunk in each transmission direction

(Z)

(Z)

If a Telephone Company digital facility is provided in conjunction with a High Capacity Special Access Service, the Telephone Company will furnish, upon the customer's request and where the central office is technically equipped, appropriate equipment to allow the customer to conduct tests to verify the integrity of the facility in lieu of cooperative acceptance testing.

- (b) When a customer orders FGB, FGC, FGD, BSA-B, BSA-C, BSA-D, 800 or 888 Switched Access Service, and the Telephone Company provides analog transmission facilities between the Telephone Company serving wire center and the customer's designated premise, the analog tests performed by the Telephone Company consist of the following:

- Attenuation tests
- Balance tests (ERL-SRL)
- C-Message noise test
- C-notched noise
- 3 tone slope
- DC continuity
- Operational Signaling

ISSUE DATE:
January 30, 2014

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.4 Provision of Switched Access Service (Cont'd)(H) Trunk Group Measurement Reports

Subject to availability, the Telephone Company will make available trunk group data in the form of usage in CCS, peg count and overflow, to the customer based on previously agreed to intervals.

With the agreement of the customer, trunk group data in the form of usage in CCS, peg count and overflow for its end of all access trunk groups, where technologically feasible, will be made available to the Telephone Company. These data will be used to monitor trunk group utilization and service performance and will be based on previously arranged intervals and format.

(I) Service Performance Data

Subject to availability, end-to-end service performance data available to the Telephone Company through its own service evaluation routines, may also be made available to the customer based on previously arranged intervals and format. These data provide information on overall end-to-end call completion and non-completion performance, e.g., customer equipment blockage, failure results and transmission performance. These data do not include service performance data which are provided under other tariff sections; e.g., testing service results. If data are to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis. Performance data related to customer provided facilities will not be provided.

(D)

(D)

(K) Design Blocking Probability

The Telephone Company will design the facilities used in the provision of Switched Access Service to meet the blocking probability criteria as set forth as follows:

For FGA, FGB, BSA-A and BSA-B no design blocking criteria apply.

For FGC and BSA-C, the design blocking objective will be no greater than one percent (.01) between the point of termination at the customer's premises and the first point of switching when traffic is directly routed without an alternate route. Standard traffic engineering methods will be used by the Telephone Company to determine the number of transmission paths required to achieve this level of blocking.

For FGD and BSA-D, the design blocking objective will be no greater than one percent (.01) between the point of termination at the customer's premises and the end office, whether the traffic is directly routed without an alternate route or routed via a Telephone Company access tandem. Standard traffic engineering methods as set forth in reference document Telecommunications Transmission Engineering - Volume 3 - Networks and Services (Chapters 6-7) will be used by the Telephone Company to determine the number of transmission paths required to achieve this level of blocking.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations6.5.1 Rate Categories

Switched Access Service is composed of four general Rate Categories which are combined to form the foundation for measuring and rating such services. Each Rate Category is composed of certain specific rate elements which may apply to each Switched Access Service. The specific rate elements which comprise each Rate Category are as follows.

Local Transport (Described in 6.5.2 following)

- Entrance Facility
- Direct-Trunked Transport
- Tandem-Switched Transport
- Multiplexing
- Dedicated Trunk Port
- Shared Multiplexing

(D)

End Office (Described in 6.5.3 following)

- Local Switching
- Information Surcharge
- TFC Data Base Query Service
- Shared Trunk Port
- Dedicated Trunk Port

(C)
(T)Carrier Common Line (Described in Section 3 preceding)

- Originating Element
- Terminating Element

Nonrecurring Charge (Described in 6.5.4 following).CCS7 Access Service (Described in 6.5.12 following)

- Dedicated Switched Access Line
- Dedicated Switched Access Transport
- STP Port Termination
- SS7 Transport

Switched Access Cross Connect (Described in 6.5.13 following)

Local Transport, End Office and Carrier Common Line Charges are usage based rates applied on a per access minute basis. Access minute charges are accumulated over a monthly period. The determination of access minutes is set forth in 6.5.5 following. TFC Data Base Query charges are applied on a per query basis either as basic or premium as described in 6.5.3(C).

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.2 Local Transport (Cont'd)(E) Reserved for Future Use (Cont'd)

(C)

(D)

(F) Multiplexing

(D)

Multiplexing provides for arrangements to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Monthly rates and nonrecurring charges for multiplexing apply as follows: 1) the DS3/DS1 Multiplexing Charge applies to all DS3 to DS1 multiplexing arrangements; 2) the DS1/Voice Multiplexing Charge applies to all DS1 Entrance Facility and Direct-Trunked Transport circuits that terminate in an analog office and where the multiplexer performs DS1/Voice multiplexing functions; 3) a Multiplexing Charge will always apply on High Capacity shared use switched and special access facilities.

(G) Dedicated Switched Access

The Dedicated Switched Access Transport Rate is assessed upon customers subscribing to CCS7 Access Service for the use of facilities between the customer's common channel signaling network and the Telephone Company's signaling transfer point. It is a flat rated, distance-sensitive monthly rate. This rate element is further described in 6.2.7.

ISSUE DATE:
January 30, 2014

EFFECTIVE DATE:
February 14, 2014

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.3 End Office

The End Office rate category provides the local end office switching and end user termination functions necessary to complete the transmission of Switched Access communications to and from the end users served by the local end office. The End Office Rate category includes the Local Switching, Information Surcharge and Shared Trunk Port and Dedicated Trunk Port rate elements. (T)

End Office rates (Local Switching Information Surcharge and Shared Trunk Port) do not apply to switched access minutes of use that originate or terminate at a Mobile Telephone Switching Office (MTSO) directly interconnected to a Telephone Company access tandem office.

(A) Local Switching

The Local Switching rate element provides for the use of end office switching equipment, the termination of end user common lines at the local end office, and the termination of calls at a Telephone Company intercept operator or recording. The intercept operator or recording tells a caller why a call could not be completed and, if possible, provides the correct number.

Where end offices are appropriately equipped, international dialing may be provided. International dialing provides the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a standard FGC, FGD, BSA-C or BSA-D equipped end office.

Local Switching is available on a bundled or unbundled basis. Local Switching - Bundled (EOSB) rates apply to Switched Access services provided as Feature Groups. Local Switching - Unbundled (EOSU) rates apply to Switched Access services provided as Basic Serving Arrangements. (C)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.3 End Office (Cont'd)(B) Information Surcharge

Information Surcharge rates are assessed to a customer based on the total number of access minutes. Information Surcharge rates are set forth in 6.6 following. The application of these rates with respect to individual Switched Access Arrangements is set forth in 6.5.6.

(C) Toll Free Code (TFC) Data Base Query Service (T)

Query usage charges for TFC Data Base Query Service shown in 6.2.10(D) apply as follows: (T)

- (1) A Basic TFC Data Base Query charge will apply for each basic TFC call query completed at the Telephone Company's TFC data base. Per query charges are accumulated over a monthly period and billed to the customer on a monthly basis. (T)
(T)
- (2) A Premium TFC Data Base Query charge will apply for each premium TFC call query completed at the Telephone Company's TFC data base. Per query charges are accumulated over a monthly period and billed to the customer on a monthly basis. (T)
(T)

February 14, 2014

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.5 Determination of Access Minutes(A) Measurement and Determination of Access Minutes

Customer traffic to end offices will be measured (i.e., recorded) by the Telephone Company at end offices or Telephone Company access tandems. Originating and terminating calls will be measured by the Telephone Company, as set forth in (B) through (F) to determine the basis for computing chargeable access minutes. In the event the customer message detail is not available because the Telephone Company lost or damaged tapes or experienced recording system outages, the Telephone Company will estimate the volume of lost customer access minutes of use based on previous actual recorded usage. The Customer's facilities shall provide the necessary on-hook, off-hook, answer and disconnect supervision.

For terminating calls over FGA, FGB, FGC, BSA-A, BSA-B, BSA-C to 500, TFC, or 900, and FGD or BSA-D, and for originating calls over FGA, FGB, FGD, BSA-A, BSA-B, BSA-D and 500 Access Service, TFC Access Service or 900 Access Service from equal access offices, the measured minutes are the chargeable access minutes. For originating calls over FGC or BSA-C and 500 Access Service, TFC Access Service and 900 Access Service from non-equal access offices, chargeable originating access minutes are derived from recorded minutes as set forth in (D). When assumed minutes are used, the assumed minutes are the chargeable access minutes as set forth in (G). When mixed interstate and intrastate Switched Access Service is provided the percent of interstate usage is determined as set forth in (H).

(T)

(T)

(T)

For FGB, FGC, FGD, BSA-B, BSA-C and BSA-D access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each end office, and are then rounded up to the nearest access minute for each end office.

For FGA and BSA-A access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period of each line or hunt group, and are then rounded up to the nearest access minute for each line or hunt group.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.5 Determination of Access Minutes (Cont'd)(F) 500, TFC and 900 Access Service Usage Measurement (T)

For originating calls over 500, TFC and 900 Access Service with MF Signaling, (T)
usage measurement begins when the originating 500, TFC or 900 Access Service (T)
entry switch receives answer supervision from the customer's point of termination,
indicating the called party has answered.

For originating calls over 500, TFC and 900 Access Service using SS7 Out of (T)
Band Signaling, usage measurement for direct trunks begins when the first point
of switching sends an Initial Address Message. Usage measurement for tandem
trunks begins when the first point of switching receives an Exit Message.

The measurement of originating call usage over 500, TFC and 900 Access (T)
Service with MF Signaling ends when the originating 500, TFC or 900 Access (T)
Service entry switch receives disconnect supervision from either the originating
end user's end office, indicating the originating end user has disconnected, or the
customer's point of termination, whichever is recognized first by the entry switch.

The measurement of originating call usage over 500, TFC and 900 Access (T)
Service with SS7 Out of Band Signaling ends when a Release Message is sent or
received by the originating end user's end office, whichever occurs first.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.6 Determination of Rates

(A) Rates are applied to switched access service elements.

(C)

(C)

(C)

(D)

(D)

(1) The following rules provide the basis for applying the rates and charges:

(a) Rates apply to all:

(C)

(b) FGC, FGD, BSA-C and BSA-D access minutes,

FGA, FGB, BSA-A and BSA-B access minutes that originate from or terminate at end offices or entry switches equipped with equal access (i.e., FGD or BSA-D) capabilities, except those end offices subtending a centralized Telephone Company equal access tandem where the use of a 101XXXX access code is not available,

(c) 500, TFC and 900 access minutes that originate from end offices equipped with equal access (i.e., FGD or BSA-D) capabilities,

(T)

(d) all originating and terminating access minutes where the service is provided to AT&T, and

(e) all switched access minutes of use that originate or terminate at a Mobile Telephone Switching Office (MTSO) directly interconnected to a Telephone Company access tandem office or to an equal access type end office.

6.5.7 Minimum Periods and Charges

(D)

(A) Minimum Periods

Switched Access Service is provided for a minimum period of one month.

(B) Minimum Monthly Charge

Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity of service provided.

For all Switched Access Arrangements, the minimum monthly charge is the sum of the Local Switching, Local Transport and Information Surcharge charges set forth in 6.6 for the measured or assumed usage for the month.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.15 Basic Service Elements (BSEs)

Recurring rates and charges for Basic Service Elements (BSEs) in 6.2.14 are applied as discussed in 6.5.6. The ASR Ordering Charge will not apply when a customer orders BSEs in conjunction with the establishment of a Basic Serving Arrangement (BSA) or the conversion of a feature group to a BSA. The ASR Ordering Charge will apply to changes to or additions of BSEs associated with an established BSA. The application of monthly recurring charges or usage rates to BSEs are as follows. (C)

(A) Alternate Traffic Routing - BSE

Nonrecurring charges in 6.6 apply per trunk group equipped. (C)

(B) Automatic Number Identification (ANI) - (BSE)

Rates in 6.6 apply per ANI attempt.

(C) User Transfer - BSE

Monthly recurring charges in 6.6 apply per line arranged.

(D) Hunt Group Arrangement - BSE

Monthly recurring charges in 6.6 apply per line equipped. (C)

(E) Queuing - BSE

Monthly recurring charges in 6.6 apply per group equipped. (C)

(F) Uniform Call Distribution - BSE

Monthly recurring charges in 6.6 apply per line equipped. (C)

(G) Simplified Message Desk Interface (SMDI) - BSE

Monthly recurring charges in 6.6 apply per DNAL. (C)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.5 Rate Categories, Applications, and Regulations (Cont'd)6.5.15 Basic Service Elements (BSEs)(H) Remote Call Forwarding - BSE

Monthly recurring charges in 6.6 apply per line.

(C)

(I) Direct Inward Dialing (DID) - BSE

Monthly recurring charges as shown in 6.6 apply.

(J) Billed Number Screening (BNS) - BSE

Monthly recurring charges in 6.6 apply per line.

(K) Answer Supervision - BSE

Monthly recurring charges as shown in 6.6 apply per line.

6.5.16 Carrier Identification Parameter (CIP)

The Carrier Identification Parameter (CIP) provides for the transmission of the Carrier Identification Code (CIC) or the access code 101XXXX to the customer with the Initial Address Message (IAM). CIP will be populated by a 4-digit CIC at the rates shown in 6.6.4. The monthly recurring rate is applicable per trunk. The nonrecurring charge is applicable per CIC, per trunk group. The nonrecurring charge has two rate levels. There is a nonrecurring charge applicable to trunk groups direct to the access tandem and a nonrecurring charge applicable to trunk groups direct to an end office.
