FACILITIES FOR INTERSTATE ACCESS

2. GENERAL REGULATIONS (Cont'd)2.6 Definitions (Cont'd)SONET

The term "SONET" (Synchronous Optical Network) denotes a family of fiber optic transmission bit rates starting at 51.84 Mbps, designed to provide the flexibility needed to transport many digital signals with different capacities.

Synchronous Test Line

The term "Synchronous Test Line" denotes an arrangement of an end office which performs marginal operational tests of supervisory and ring-tripping functions.

Synchronous Transfer Module (STM)

STM-1 is the international equivalent SONET's OC3 transmission rate.

(D)
(D)Telecommunications Service Priority (TSP) System

The term "Telecommunications Service Priority (TSP) System" or "TSP System" refers to the regulatory, administrative and operational system authorizing and providing for priority treatment (i.e., the provisioning and restoration) of NSEP Services.

Temporary Facilities

The term "Temporary Facilities" denotes facilities used to provide FIA to a customer for less than the minimum service period or less than one month, whichever is longer, or to provide FIA while permanent facilities are being constructed.

Terminating Direction

The term "Terminating Direction" denotes the use of Switched Access for the completion of calls from a CDL to an end user.

Toll VoIP-PSTN Traffic

The term "Toll VoIP-PSTN Traffic" denotes a customer's interexchange voice traffic exchanged with the Telephone Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. "Toll VoIP-PSTN Traffic" originates and/or terminates in IP format when it originates from and/or terminates to an end user customer of a service that requires IP-compatible customer premises equipment.

Trunk

The term "Trunk" denotes a communications path connecting two switching systems in a network, used in an end-to-end connection.

Trunk Group

The term "Trunk Group" denotes a grouping of trunks which are traffic engineered as a unit for the establishment of connections between switching systems in which all of the communications paths are interchangeable.

Trunk Side Connection

The term "Trunk Side Connection" denotes the connection of a transmission path to the trunk side of an end office switch.

FACILITIES FOR INTERSTATE ACCESS

5. Special Access Service (Cont'd)5.6 Rate Regulations (Cont'd)5.6.20 Ethernet Virtual Private Line (Cont'd)(D) 7 Year Term Plans(1) General

Four 7 Year Term Plans are available for EVPL service. These plans are described in detail in 5.6.20 D (2), (3),(4) and (5):

(C)
(C)

Service Element Term Plan
Bandwidth Based Plan
High Volume Based Plan
Low Volume Based Plan

(N)

The Service Element Term Plan is available for customers who generally have only one EVC. The Bandwidth Based Plan is available for customers who want a pricing advantage to order multiple EVC's. The High Volume Base Plan is available for customers who purchase a minimum of 1,896 locations during the first calendar year. The Low Volume Base Plan is available for customers who purchase a minimum of 100 locations during the first calendar year. The following example illustrates the price difference between the four 7 year term plans.

(N)
(N)
(C)

Example: Customer in Florida, North Carolina or Nevada requests a 1000Mb UNI port at the customer premise/cell tower with two (2) 200MB EVCs with /Gold QoS; four (4) 50Mb EVCs with Gold QoS; three (3) OAM EVCs; 40 miles between serving wire centers; and two (2) 10Gb NNI Ports at the POP/MTSO (diverse facilities).

	Service Element Term Plan	Bandwidth Based Plan	High Volume Based Plan (1)*	Low Volume Based Plan (2)*
1000Mb UNI Port	\$760.00	\$3,557.15	\$3,726.00	\$2,965.00
200Mb EVC w/ Gold QoS (primary)	\$1,409.45	\$25.00	\$25.00	\$250.00
200Mb EVC w/ Gold QoS (secondary)	\$773.90	\$25.00	\$25.00	\$250.00
(4) 50Mb EVC w/Gold QoS	\$2,006.40	\$100.00	\$100.00	\$1,000.00
(3) 5Mb OAM EVC	N/A	\$150.00	\$150.00	N/A
Interoffice Mileage	\$1,250.00	\$1,250.00	N/A	N/A
10G NNI Port	\$2,280.00	\$2,280.00	N/A	\$2,280.00
10G NNI Port	\$2,280.00	\$2,280.00	N/A	\$2,280.00
Total	\$10,759.75	\$9,667.15	\$4,026.00	\$9,025.00

(C)

(1)* Must purchase a minimum of 1,896 locations.

(2)* Must purchase a minimum of 100 locations

ACCESS SERVICE

5. Special Access Service (Cont'd)5.6 Ethernet Virtual Private Line (Cont'd)5.6.20 Rate Regulations (Cont'd)(D) 7 Year Term Plans (Cont'd)(5) Low Volume Based Plan

The Low Volume Based rate plan is available for EVPL service and requires the customer to purchase a minimum of 100 locations of EVPL service from the CenturyLink Operating Companies during the first calendar year they participate in the plan. Special construction charges may apply. The Low Volume Based rate plan includes the UNI Bandwidth Port, NNI Port and Gold QoS Service. EVC's are a separate rate and are offered on a 7 year term. The rates in effect when a circuit is installed are the rates that apply for the entire 7 year term, rate changes that occur after the installation of a circuit do not apply to existing circuits. The rates apply only to the customer locations specified in this tariff. The Low Volume Based rate plan provides the customer discounted rates for the rate elements listed below.

The customer orders the EVPL Low Volume Based Plan under a term commitment period of 7 years. In order for a circuit to be eligible for Low Volume Based pricing, the customer must commit the UNI Bandwidth Port and NNI Port to the plan. All EVPL circuits ordered under the Low Volume Based plan will begin in month one.

The monthly rates for EVPL service under the Low Volume Based plan are set forth in 5.7.21 following.

Although the customer commits the UNI Bandwidth Port and NNI Port to the Low Volume Based plan, the following rate elements will receive the Low Volume Based plan rates:

UNI Bandwidth Port (includes Gold QoS and Channel mileage)
NNI Port
EVC Connection
ICO NNI Trunking Arrangement

An example of the pricing is included in Section 5.6.20 (D) (1). The customer will order the total UNI Bandwidth and the total EVC's to split the bandwidth between.

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.6 FIA Offerings to the Federal Government (Cont'd)11.6.1 Type and Description (Cont'd)(F) Banded Optical Transport

Banded Optical Transport provides transport between the serving wire center of the interexchange access customer's location and the access customer's end user premises. Banded Optical Transport may be provided at DS0, DS1, DS3, OC3, STS1 or OC12 bandwidth levels as required by the customer. Wholly provided Banded Optical Transport may also be provided at OC3c and OC12c bandwidth levels. When Banded Optical Transport is ordered at a DSO level, the customer must request a minimum of a DS1 interface at the IC customer wire center and will be charged for the appropriate rider (i.e., DS1 or DS3). Banded Optical Transport is provided with a service guarantee as shown in 2.4.4(A)(8). For subscription to Banded Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3s, i.e., 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Banded Optical Transport to another Incremental SONET Transport option as shown in Section 20.

(T)
(T)

Banded Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year or six to fifteen (6 to 15) year contract periods at the rates shown in 11.8.3(J). The rates for Banded Optical Transport are in addition to the appropriate rate elements as shown in Section 20. The contract period for Banded Optical Transport cannot exceed the contract period of the Connect. Banded Optical Transport includes the special access line from the end user serving wire center to the end user premises, for both on-net and off-net. Banded Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded up to the next whole mile except when the CDLs are collocated.

Banded Optical Transport may be ordered as switched or special access.

Rate regulations for Banded Optical Transport are as shown in 20.D(2)(5).

11.6.2 Mileage Application

Mileage for rate application is the airline distance measured between the two related Special Access terminating points (i.e., customer designated location and end user premises).

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking

(A) General

This section contains the rules and regulations pertaining to the provisioning of SONET Access and Dense Wave Division Multiplexing (DWDM) Service. The regulations and rates specified herein are in addition to the applicable rates and regulations specified in other Sections of this tariff.

This service supports asynchronous bandwidth capacities at 1.5 Mbps and 45 Mbps in addition to synchronous Optical Carrier (OC) bandwidth capacities at OC-3, OC-3c, OC-12, OC-12c, OC-48, OC48c and OC192 bit rates and 1.25 Gbps or 2.5 Gbps wavelengths. The SONET add/drop multiplexer aggregates lesser bit speed services onto the dedicated SONET ring or the two-point SONET circuit configuration.

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges(1) CONNECT

The Connect rate element provides the platform for customer access to the Telephone Company's Optical Network. The Connect element provides the link between the CDL and the SWC of the CDL.

There are three types of Connects:

- Single Route Connect *
- Dual Route Connect *
- Ring Connect *
- CO Connect *
- Shared Connect *
- Jointly Provided Custom Connect *
- Wholly Provided Custom Connect *
- Custom Connect

(a) Single Route Connect *

(T)

The Single Route provides a connection to the Telephone Company's wire center(s) via a point-to-point route configuration. The Single Route Connect may be provided as electrical or optical interface in OC bandwidths of OC3, OC12, OC24 or OC48. The Single Route Connect may be ordered as switched or special access.

(b) Dual Route Connect *

(T)

The Dual Route Connect provides a connection to the Telephone Company's wire center(s) in which the working transmission path traverses a distinct and separate path from the protection transmission path. The Dual Route Connect may be provided as electrical or optical interface in OC bandwidths of OC3, OC12, OC24 or OC48. The Dual Route Connect may be ordered as switched or special access.

(c) Ring Connect *

(T)

The Ring Connect provides a connection to the Telephone Company's wire centers via a ring topology that provides no single point of failure. The Ring Connect has a minimum of three nodes one of which must be a Telephone company wire center. The Ring Connect may be provided as either electrical or optical interface in OC bandwidths of OC3, OC12, OC24 or OC48. When two of the nodes are customer designated locations, at least one of those nodes must be electrical. The Ring Connect may be ordered as switched or special access.

* Grandfathered to existing service effective December 26, 1998.

ISSUE DATE:
March 31, 2014

Issued Under Transmittal No. 54

100 CenturyLink Drive
Monroe, Louisiana 71203

EFFECTIVE DATE:
April 15, 2014

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(1) CONNECT (Cont'd)

(d) CO Connect *

(T)

The CO Connect provides access to the Telephone Company's Optical Networking platform. The CO Connect is provided at DS3, DS1 and DS0 levels. The appropriate special access line from Section 5 will apply.

When a CO Connect is provided at a DS3 or DS1 level, the customer may order multiplexing, as shown in Section 5, at the end user serving wire center. The customer will be charged for the multiplexing in addition to the CO Connect.

When a CO Connect is ordered at a DS0 level, the customer must request a minimum of a DS1 interface at the IC customer wire center and will be charged for the appropriate payload (i.e., DS1 or DS3) at the IC customer wire center. The CO connect may be ordered as switched or special access.

(e) Shared Connect *

(T)

The Shared Connect is a SONET based DS1 or DS3 that is provided on a shared SONET facility basis to multiple customer designated locations. The Shared Connect is only available where existing SONET infrastructure is in place.

The Shared Connect may be provided as either a dual route or as ring topology.

(f) Jointly Provided Custom Connect (Custom Connect- JP) *

(T)

The Jointly Provided Custom Connect provides a connection to the Telephone Company's SONET wire center(s) to an access customer's designated location (CDL) where service is provided by another telephone company. The Jointly Provided Custom Connect is mileage sensitive and may be provided in OC bandwidths of OC3, OC12, OC24 and OC48 as an electrical option only, i.e., CenturyLink provided electronics. Mileage will be calculated based on the V&H coordinates of the wire centers comprising each segment of the connect. The meet point billing mileage calculation is specified in 2.7.3.

Payloads are included in the monthly rate for the Jointly Provided Custom Connect. However, access to CDLs provided by the Telephone Company require other Optical Networking rate elements as ordered by the customer, i.e., Ring Connect and Payloads, CO Connect and SAL(s), Transport, etc. The serving wire center(s) of the Telephone Company provided CDLs must be part of the Jointly Provided Custom Connect.

The Jointly Provided Custom Connect may be ordered as switched or special access.

* Grandfathered to existing service effective December 16, 1998.

EFFECTIVE DATE:
April 15, 2014

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(1) CONNECT (Cont'd)

(g) Wholly Provided Custom Connect (Custom Connect - WP) *

(T)

The Wholly Provided Custom Connect provides a connection to the Telephone Company's SONET wire center(s), an interexchange access customer designated location (CDL), and the access customer's end user CDL(s) via a ring topology. The Wholly Provided Custom Connect may be provided in OC bandwidths of OC3, OC12 or OC48.

The Wholly Provided Custom Connect is comprised of four rate elements, CDL Node, CO Node, Custom Connect (CC) Transport and CC Rider. The CDL Node rate element is applicable for each customer designated location, the CO Node is applicable for each central office that is equipped with a fiber optic terminal in which the customer requests the ability to add/drop traffic to a CDL and the CC Transport rate element is applicable for transport from the serving wire centers of the customer designated locations and CO Nodes. The CC Rider is the customer service riding the CC Transport. The CC Rider may be provided at DS1, DS3, OC3 and OC3c bandwidth levels as required by the customer. The bandwidth of the CDL Nodes, CO Nodes and CC Transport rate elements must be the same.

The CC Transport provides distance sensitive transport on a ring topology. The transport is measured from the primary serving wire centers of the customer designated locations and the CO Nodes.

In addition to the Wholly Provided Custom Connect rate elements, the appropriate special access line (SAL) from Section 5 is applicable from the CO Node to the customer designated location where traffic is entering the Wholly Provided Custom Connect at a DS1 or DS3 bandwidth level as required by the customer.

The Wholly Provided Custom Connect may be ordered as switched or special access.

(h) Reserved For Future Use

* Grandfathered to existing service effective December 26, 1998.

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(1) CONNECT (Cont'd)

(j) Custom Connect (Cont'd)

Transport

Transport may be ordered as shared or dedicated. Shared Transport is applicable when the transport between nodes and/or Links is ordered at different bandwidth levels. The Dedicated Transport is applicable when transport between the Nodes and/or Links is of the same bandwidth level.

Shared Transport may be ordered in bandwidths of DS1, DS3/STS1, OC3, OC3c, OC12, OC12c, OC48 or OC48c. The customer has the option to subscribe to Banded Optical Transport in place of Customer Connect Shared Transport.

(T)
(T)

The Transport is provided at a flat-rated monthly recurring charge.

Rider

The Rider is the customer's service(s) traversing the CDL Link. Riders may be provided at DS1, DS3, OC3, OC12, OC48, STS1, 10M, 20M, 50M, 100M, 150M, 300M, 450M, 600M or 1G bandwidth levels as required by the customer. The DS1 and DS3 riders cannot be utilized on the OC192 facility.

(T)
(T)

The Rider is provided at a flat-rated monthly recurring charge which includes add/drop multiplexing and is applicable per rider circuit with the exception of OC3c, OC12c, and OC48c CDL Links.

Intrastate Riders may be transported on the customer's interstate Optical Networking facility.

ISSUE DATE:

April 15, 2014

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(1) CONNECT (Cont'd)

(j) Custom Connect (Cont'd)

Regeneration Charge

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between the customer's premises and the Telephone Company serving wire center for that premise. Additional regeneration equipment will only be provided by the Telephone Company when the actual fiber facility distance between the customer's premise and serving wire center exceeds SONET design limits.

A monthly recurring sonnet Regeneration charge, as set forth in 20 (J) following, will apply for each regenerator required for the provision of Custom Connect service.

Capacity Reconfiguration Charge

Upon ordering Custom Connect service, the customer is responsible for identifying the STS signal configuration. This information is used in determining the route and connection in the network.

If a new configuration is requested subsequent to the initial activation, a service reconfiguration charge will apply on a per service basis, as set forth in 20 (J). The service reconfiguration charge is in addition to all applicable configuration node and configuration rider charges associated with the new configuration.

ISSUE DATE:
March 31, 2014

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(2) Optical Network Transport *

(T)

The transport element provides for the interoffice Optical Network transport between wire centers on Telephone Company defined LANs. Each IC customer Connect must have its own transport. Transport cannot be shared among IC customer Connects.

Optical Network Transport may be provided as LAN-wide, LAN-wide Premium, Point-to-Point, or Ring Per-Mile Transport in bandwidth capacities of OC1, OC3, OC12, OC24 and OC48. J-SONET Transport may be purchased in DS0, DS1 or DS3 bandwidths. Band SONET Transport may be purchased in DS0, DS1, DS3, OC3 or OC12 Bandwidths.

- (a) LAN-wide Transport provides transport between two or more Incremental SONET designated wire centers located on the IOF transport. LAN-wide Transport is provided at a non-distance sensitive flat-rated monthly charge per LAN traversed. LAN-Wide Transport is not guaranteed. However, the customer will have protection routing topology. Multiple Connects served from any of the Incremental SONET designated terminating wire center on the LAN may utilize this element. LAN-wide Transport may be ordered as switched or special access.
- (b) LAN-wide Premium Transport provides the same as LAN-wide Transport. Provisioning of LAN-wide Premium Transport provides a quicker restoral time. LAN-wide Premium Transport is provided at a flat-rated monthly charge per LAN traversed. LAN-wide Premium Transport may be ordered as switched or special access.
- (c) Point-to-Point Transport provides transport between the serving wire centers associated with two CDLs. Point-to-Point Transport is provided at a distance sensitive rate on a per airline mile basis. Mileage is measured between the wire centers of the customer designated locations. Point-to-Point Transport may be ordered as switched or special access.
- (d) Ring Per-Mile Transport provides distance sensitive transport on a ring topology. The transport is measured in airline miles from the primary serving wire centers of the customer designated locations. Ring-Per-Mile Transport may be ordered as switched or special access.

Ring Per-Mile Transport provides a service guarantee as shown in 2.4.4(A)(8).

- (e) J-SONET Transport provides transport between the serving wire centers of the CDLs. J-SONET Transport may be provided at DS0, DS1 or DS3 bandwidth levels as required by the customer. The bandwidth of the transport must be the same as the bandwidth of the CO Connect or the payload, e.g., DS0 J-SONET requires a DS0 connect and DS3 J-SONET Transport requires a DS3 CO Connect. J-SONET Transport may be ordered as switched or special access.

J-SONET Transport is provided at a non-distance sensitive flat rated monthly charge per LAN traversed.

* Grandfathered to existing service effective December 26, 1998.

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(D) Application of Rates and Charges (Cont'd)(2) Optical Network Transport * (Cont'd)

(T)

- (f) * Banded Optical Transport provides transport between the serving wire center of the interexchange access customer's location and the access customer's end user premises. Banded Optical Transport may be provided at DS0, DS1, DS3, OC3, E1, STS1, STM1, STM4, OC12 or OC48 bandwidth levels as required by the customer. Wholly provided Banded Optical Transport may also be provided at OC3c, OC12c and OC48c bandwidth levels. When Banded Optical is ordered at a DSO level, the customer must request a minimum of a DS1 interface at the IC customer wire center and will be charged for the appropriate rider (i.e., DS1 or DS3). Banded Optical Transport is provided with a service guarantee as shown in 2.4.4(A)(8). For subscription to Banded Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3s, i.e., 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Banded Optical Transport to another Optical Networking Transport option.

(T)

Banded Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year, or seven (7) year Term Payment Plans (TPPs). The term period for Banded Optical Transport cannot exceed the term period of the Connect. Banded Optical Transport includes the special access line from the end user serving wire center to the end user premises, for both on-net and off-net, with the exception of jointly provided Banded Optical Transport. Banded Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded up to the next whole mile except when the CDLs are collocated.

When both customer designated locations are provided by the Telephone Company, wholly provided, the monthly rates as shown in 20(J) are applicable. When one of the customer designated locations is provided by another telephone company, or the customer terminates at a multiplexer in a wire center on the IOF, jointly provided, the monthly rates as shown in 20(J) shall apply. For jointly provided transport with another telephone company, the meet point billing mileage calculation is specified in Section 2.7.3.

Banded Optical Transport may be ordered as switched or special access.

* Grandfathered to existing service effective December 26, 1998.

(T)

- (g) * Expanded Band Optical Transport provides transport between the interexchange access customer's location and the access customer's end user location. Expanded Band Optical Transport may be provided at DS1, DS3, OC3, OC3c, OC12, OC12c, STS1, E1 or STM1 bandwidth levels as required by the customer. For subscription to Expanded Band Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3's, i.e., 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Expanded Band Optical to another Optical Network Transport option.

(T)

Expanded Band Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year or seven (7) year contract periods at the rates shown in 20(J). Expanded Band Optical Transport includes the special access line from the access customer's serving wire center to the access customer's premises and from the end user serving wire center to the end user premises. Expanded Band Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded to the next whole mile except when CDLs are collocated.

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(E) Reserved For Future Use(F) Incremental Growth *

(T)

Incremental Growth facilitates a customer's growth in increments of OC3. Incremental Growth applies only to Connect.

Incremental Growth may be ordered as switched or special access.

(G) Rate Regulations

Optical Networking may be ordered under a one (1), three (3), five (5), or seven (7) year Term Payment Plan (TPP). Any TPP for these services is subject to an TPP Termination Liability Charge as specified herein.

(1) Changes in Length of a TPP

Prior to the expiration of a TPP period, the customer may elect to convert to a new TPP period of the same or different length, subject to the following conditions:

- No credit will be given for the new period for payments made under the original TPP arrangement.
- NRCs will not be reapplied for existing services.
- If the new TPP period is shorter in length than the time remaining under the existing TPP, the change to the new TPP period constitutes a disconnect of the existing TPP service and termination liability charges will apply.
- The rates for the new period will be the rates currently in effect at the time of the change.
- If the customer subscribes to a new TPP which is greater in length than the initial TPP term and discontinues one or all of the service elements prior to the expiration of the new termination liability period, the termination liability, as set forth below, will apply based on the remainder of the TPP period in effect at the time of the disconnect.

<u>Year in which Service Is Discontinued</u>	<u>Liability Rate</u>
1	100%
2	75%
3	50%
4 or more	25%

* Grandfathered to existing service effective December 26, 1998.

ISSUE DATE:
March 31, 2014

Issued Under Transmittal No. 54
Vice President-Regulatory Operations
100 CenturyLink Drive
Monroe, Louisiana 71203

EFFECTIVE DATE:
April 15, 2014

FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)(G) Rate Regulations (Cont'd)(7) Upgrade to Higher Bandwidth

The Customer who has grown incrementally, may elect to upgrade service to a higher bandwidth during a TPP period to gain economic efficiencies. Termination charges will not apply as long as the upgraded service remains connected at the same point of termination(s), unless the network is being redesigned to gain network efficiency. Nonrecurring charges associated with the new bandwidth upgrade shall apply.

(H) Off-Net Wire Center

Off-Net wire center is a wire center not a designated Optical Networking wire center office. The customer may order a DS0, DS1 or DS3 to the Off-Net wire center. Mileage charges will be determined based on airline miles to the nearest on-net wire center at the transport rates shown in Section 5. (T)

Circuits connected to the Off-Net wire center will be billed existing tariffed rates as shown in Section 5.

(I) Shared Use

Shared Use is the provisioning of Switched Access over Optical Networking. Rating as Optical Networking will continue until such time as a portion of the available Optical Networking capacity is used to provide Switched Access service.

For shared use, a special access DS3 interface must be ordered between the IC customer and the IC customer wire center. When switched trunks are ordered, a DS1 switched interface must be ordered for the switched trunks. A DS3 or DS1 interface ordered as Switched Access will be used exclusively for Switched Access.

As individual channels are activated for Switched Access, monthly charges will be adjusted between Switched Access and Optical Networking Access based on the number of channels used for Switched Access and the remaining Optical Networking Access facility.

The total Shared Use for Switched Access charge is equal to the number of channels used for Switched Access divided by 24 for DS1 or 672 for DS3 times the Monthly Switched Access Charges. The monthly Switched Access rates used will be the current rates for Switched Access Entrance Facility, Direct-Trunked Transport Facility, Direct-Trunked Transport Termination and Multiplexer.

Following is an example of how Shared Use will apply to Optical Networking.

Single Route OC3 Connect - Electrical	\$4,100.00
Point-to-Point Transport - OC1 (10 Miles X \$160.00)	1,600.00
DS3 CO Connect	130.00
DS3 Payload	<u>160.00</u>
Total SONET Monthly Recurring Charge	\$5,990.00

Customer wants to utilize 850 channels for Switched Access DS3 with 10 miles of transport.

$850/672 = 1.2$ DS3s

DS3 Direct-Trunked Transport Facility = \$67.44 X 10	\$ 674.40
DS3 Direct-Trunked Transport Termination	190.46
DS3 Entrance Facility	<u>1,263.67</u>
Total Monthly Rate per DS3	\$2,128.53

$\$2,128.53 \times 1.2$ DS3s = \$2,554.23 Switched Access Shared Use Monthly Rate
