SECTION 1 INTRODUCTION AND SUMMARY

Introduction

The Consolidated Communications Companies hereby provide a Description and Justification for its limited Tariff Review Plan revisions to F.C.C. Tariff No. 2 (Consolidated Communications of Pennsylvania Company) along with supporting documentation. This information is being filed in accordance with the Commission's 2014 TRP Notices released March 25, 2014, and April 14, 2014 (DA 14-404 and DA 14-494 respectively) and fulfills the requirements established in Sections 61.41 through 61.49 of the Commission rules.

Description of the Consolidated Communications of Pennsylvania Company Operations

The Consolidated Communications of Pennsylvania Company (CCPA) was an average schedule Company through July, 2012, participating in the NECA Traffic Sensitive and Common Line pools. It provides local service, toll, private line services, access services, DSL, CLASS services, and other modern telecommunications services to its customers. CCPA is a price cap company pursuant to FCC Order 12-154¹ that fall under Sections 61.41 through 61.49 of the Commission's Rules and relevant Commission Orders.² They provide local service, toll, private line services, access services, DSL, CLASS services, and other modern telecommunications services to their customers.

CCPA is an Incumbent Local Exchange Carrier (ILEC) that serves several suburban communities north of Pittsburgh, PA. In 1906, several of the leading citizens of the community of Gibsonia and the vicinity met to discuss plans for obtaining telephone service. After discussing the matter with the Central District Printing and Telegraph Company, Pittsburgh, Pennsylvania (later Bell of Pennsylvania), certain officials of that Company suggested that those interested in telephone service north of Pittsburgh should organize a local company which could be connected to the Telephone Company by trunk lines. On November 1, 1906, a perpetual charter was secured in the name of North Pittsburgh Telephone Company operating under the laws of the Commonwealth of Pennsylvania.

Within a period of two years from the inception of telephone service, the company installed 258 telephones or certificates by bequest. On December 4, 1909, a new building was ready for occupancy. A new Western Electric switchboard was installed, and the new exchange named "Gibsonia." The Wexford exchange was installed on July 1, 1910,

¹ See, Order, Joint Petition of Price Cap Holding Companies for Conversion of Average Schedule Affiliates to Price Cap Regulation and for Limited Waiver Relief (FCC 12-154, WC Docket No. 12-63)

² See, Order, July 2014 Annual Access Charge Tariff Filings, released March 25, 2014, DA 14-404 ("2014 Filing Order"); and Tariff Review Plans, Material to be filed in support of 2014 Annual filings, DA 14-494, released April 14, 2014 ("2014 TRP Order").

and Curtisville during World War I, to serve the coal industry. Telephone lines were then extended north from Warrendale and west from Mars into Cranberry Township.

In the mid 1980s, North Pittsburgh formed a holding company and became part of North Pittsburgh Systems, INC. (NPSI). NPSI was a holding company and through its subsidiaries provided telecommunications services and equipment in western Pennsylvania and Pittsburgh. Its subsidiaries primarily included North Pittsburgh Telephone Company (NASDAQ: NPSI); Penn Telecom, Inc; and Pinntech Inc.

North Pittsburgh Telephone operated as an ILEC that provided various services to business and residential telephone lines in southwestern Pennsylvania (northern Allegheny & southern Butler counties, and a small portion of Westmoreland county).

The Company also provided Digital Subscriber Line (DSL) services. Penn Telecom, through its optical fiber cable network, offered broadband services, Competitive Local Exchange Carrier (CLEC) services, and Long Distance services, as well as providing traditional key and Private Branch Exchange (PBX) systems to business customers. Pinnatech principally provided Internet and broadband-related services primarily through their Naticom brand. North Pittsburgh Systems provided directory advertising and billing, as well as sale of telecommunications equipment.

North Pittsburgh Systems, Inc. (parent company) was sold to Consolidated Communications, headquartered in Mattoon, Illinois in 2007. Consolidated also owns and operates telephone services in Illinois, Texas, California, Kansas, and Missouri. The sale was completed in January, 2008.

CCPA currently provides services to residential and business customers in several counties in western Pennsylvania. The CCPA territory consists of eight exchanges and covers 285 square miles, serving portions of Allegheny, Armstrong, Butler, and Westmoreland counties in Western Pennsylvania. The 8 exchanges served include: Cooperstown, Criders Corners, Curtisville, Freeport, Gibsonia, Mars, Saxonburg, and Wexford. The southernmost point of the ILEC territory is 12 miles north of the city of Pittsburgh. CCPA provides basic telephone services in this territory, with 42,738 local access lines (averaging 154.3 lines per square mile) as of June 30, 2012. Approximately 44.8% of its Pennsylvania local access lines in this territory serve residential customers and the remainder service business customers.

SECTION 2

OVERVIEW OF FILING PACKAGE

Tariff Support Material

This support material is submitted pursuant to Part 61.49 of the Federal Communications Commission (Commission) Rules and Regulations and the Order issued in WC Docket No. 13-76, July, 2013 Annual Access Charge Tariff Filings released March 26, 2013, and Tariff Review Plans issued in WC Docket No. 13-76, Material to be Filed in Support of 2013 Annual Access Tariff Filings, released April 19, 2013.

In addition to the description and justification contained in this volume, the following information is submitted to provide specific support data at the proposed tariff level of detail for the Consolidated local operating companies.

Description and Justification

SECTION 3

TARIFF SUPPORT

PCI Development

In Accordance with the Commission's Rules, the PCI for each service basket were calculated as shown in Exhibit 2, RDEV-1, Page 1 of 3. A GDP-PI factor of 1.4205% was used in calculating the PCI and is based on the percentage change in the Gross Domestic Product Price Index (GDP-PI) between the quarter ending December 31, 2013 and the corresponding quarter of the 2012 GDP-PI.

As directed by the Commission,³ a workpaper identifying the transmittal or letter filing date where the last index changes were implemented for the price cap categories has been included in Exhibit 2, RDEV-1, Page 3. Also, pursuant to FCC 12-154,⁴ Consolidated has excluded ICLS receipts from its CMT PCI calculations.

The prospective PCI values for the Special Access Basket are calculated using formula found in 61.45(b) of the Commission's rules. Calculation of PCI values is shown in Exhibit 2, RDEV-1, Page 1 of 3.

Determination of Exogenous Changes

In Accordance with the Commission's Rules, Consolidated developed certain exogenous changes for inclusion in the price cap formula. These changes include: (1) North American Number Plan Administration; (2) Regulatory Fees; and (3) Telecommunications Relay Service Fees.

Exogenous cost changes were individually developed for each of the items outlined above, and in the aggregate for all changes. Consolidated used base year 2012 (time of its last tariff filing) to estimate exogenous costs embedded in rates. Consolidated has also normalized the exogenous amounts to reflect any shift in revenue growth. The result is that no exogenous adjustment is made if the support rate has not changed. In other words, the rate per line remains unchanged if the factor is unchanged. A brief description of each change follows and a summary of the exogenous changes is shown in Exhibit 2, RDEV-1.

³ 2013 TRP Notice, Supra., Paragraph 22.

⁴ See, Order, Joint Petition of Price Cap Holding Companies for Conversion of Average Schedule Affiliates to Price Cap Regulation and for Limited Waiver Relief (FCC 12-154, WC Docket No. 12-63) para 31.

North American Numbering Plan Administration

On June 27, 2001, the Federal Communications Commission release an order approving the compensation plan for the North American Numbering Plan Administration (NANPA) for fiscal year 2001.⁵ The Commission reviewed and accepted the North American Numbering Plan Administrator submission and ordered that a contribution factor of 0.0000365.⁶ This factor is used as an estimate for application to end user revenues of each telecommunications carrier in the United States to fund the program for the 2013 fiscal year (July 2013 to June 2014). The impact of the NANPA support has been included as an exogenous cost in this filing as shown in Exhibit 2, RDEV-1. No updated factor has been used for this filing.

Regulatory Fees

Earlier Commission decisions⁷ allow local exchange companies to reflect the impact of regulatory fees as an exogenous cost in annual price cap filings. The impact of regulatory fee changes for the July 2013 – June 2014 fiscal year was calculated using a factor of .00340 as prescribed in the Commission's *Regulatory Fee Order*,⁸ and has been used as an estimate and included as an exogenous cost in this filing and is shown in Exhibit 2, RDEV-1. In addition, calculations to remove the exogenous adjustment made on September 16, 2013 under CCC Transmittal No. 50, which changed the regulatory fee contribution factor from .00375 to .00347 in compliance with MD Docket No. 13-140, (FCC 13-110), released August 12, 2013. Because this factor was implemented in a mid-year filing, the exogenous amount was grossed up to recover the adjustment over the remaining months in the fiscal year. For this reason the exogenous amount was modified to reverse the gross up made in the September filing. This exogenous allocation can be seen in RDEV-1, Page 2 of 3.

Telecommunications Relay Service

The Americans with Disabilities Act (ADA) required that all common carriers providing interstate voice telecommunications provide Telecommunications Relay Service (TRS) to customers effective July 26, 1993. In its *Third Report and Order* in CC Docket No. 90-571,⁹ the Commission required that all common carriers providing interstate telecommunications services contribute to an interstate shared fund to support the TRS function. The impact of the TRS exogenous cost for this filing is calculated using the

⁵ *In the Matter of Administration of the North American Number Plan*, CC Docket No. 92-237 and *North American Number Plan Cost Recovery Contribution Factor and Fund Size*, NDS File No. L-00-72, Order (DA 01-1524), released June 7, 2001 (NANP Order)

⁶ *In the Matter of Administration of the North American Numbering Plan*, Proposed North American Numbering Plan Administration Fund Size Estimate and Contribution Factor for July 2014 through June 2015 (filed June 13, 2014) Public Notice, DA 14-792, CC Docket No. 92-237.

⁷ *Price Cap Treatment of Regulatory Fees Imposed by Section 9 of the Communications Act*, 9 FCC 6060 (1994), erratum (November 2, 1994).

⁸ *In the Matter of Assessment and Collection of Regulatory Fees for Fiscal Year 2014*, Notice of Proposed Rulemaking, (filed June 13, 2014) FCC Order 14-88, MD Docket 14-92 (*Regulatory Fee Order*).

.01174 as estimated in the May 1, 2014 FCC submission by Rolka Loube Saltzer Assoc. (RLSA)¹⁰ and is displayed on Exhibit 2, RDEV-1.

In addition, calculations to remove the exogenous adjustment made on September 16, 2013, under CCC Transmittal No. 50, which changed the TRS contribution factor from .0233 to .01484 in compliance with CG Docket No. 03-123, (FCC 13-1483), released July 1, 2013. Because this factor was implemented in a mid-year filing, the exogenous amount was grossed up to recover the adjustment over the remaining months in the fiscal year. For this reason the exogenous amount was modified to reverse the gross up made in the September filing. This exogenous allocation can be seen in RDEV-1, Page 2 of 3.

Rate Detail and other Exhibits

Rate Detail files will be submitted as part of the Consolidated TRP submission to display demand quantities, current rates, proposed rates, and the associated quantities for the specific baskets. For CMT, proposed SLC rates are set at current capped levels pursuant to Consolidated's price cap order¹¹ and PICC and CCL rates continue to be zero. For non-CMT baskets, PCI, SBI, and sub-index calculations are shown.

Consolidated also includes a revenue impact analysis in Exhibit 3, RDET1 to display overall impacts of any rate changes in the filing.

Additional Forms were added as a result of the November 18, 2011 release of the *USF/ICC Transformation Order*,¹² and are attached as exhibits to the filing as follows:

ARC Spreadsheet (CONFIDENTIAL) – The ARC Spreadsheet demonstrates the calculations necessary to arrive at an ARC rate for filing carriers. This is a new spreadsheet in the TRP created to comply with section 51.915(e) of the Commission's rules.¹³

¹⁰ *Rolka Loube Saltzer Associates LLC submits payment formulas and funding requirements estimates for the Interstate Telecommunications Relay Service Fund for the July 2014 through June 2015 fund year*, FCC Report DA 14-627, CG Docket 03-123, Released May 9, 2014

¹¹ See, Order, Joint Petition of Price Cap Holding Companies for Conversion of Average Schedule Affiliates to Price Cap Regulation and for Limited Waiver Relief (FCC 12-154, WC Docket No. 12-63) para 31.

¹² See *USF/ICC Transformation Order*, 26 FCC Rcd at 17934-35, para. 801 (although many of the switched access rate elements are subject to the transition adopted, other rates are not being specifically reduced at this time.) See also *id.* At 18109-115, paras. 1297-1314 (seeking comment on the appropriate transition for rate elements not specifically addressed in the Order).

¹³ 47 C.F.R. §51.915(e)

ARC True Up Spreadsheet (CONFIDENTIAL) – The ARC True up reconciles the 2012 projected ARCs to actual counts as an adjustment to Eligible Recovery.

Access Reduction Spreadsheet (CONFIDENTIAL) – The Access Reduction spreadsheet identifies the rates that are required to be reduced pursuant to section 51.907(b)-(g) of the Commission’s rules and calculates the amount of the reductions. The spreadsheets also show the calculation of a price cap ILEC’s eligible recovery pursuant to section 51.915(d) of the Commission’s rules. This is a new spreadsheet in the TRP created to comply with sections 51.907(b)-(g) and 51.915(d) of the Commission’s rules.¹⁴

The Access Reduction Spreadsheet establishes the rates in effect as of December 29, 2011, for both its intrastate and interstate components (see columns A and B). To determine “billed” and “collected” revenue, Consolidated used the following review and analyses:

Billed Revenue

To determine the FY2011 revenue, Consolidated downloaded monthly billing details for the period of 10/1/2010 through 9/30/2011. Using the monthly reports, Consolidated performed several data filters to extrapolate demand and revenue by carrier, jurisdiction and rate element. Consolidated filtered out any prior period billing from these data exports. The filtered data was then copied into the fiscal year summary.

Collected Revenue

To determine the actual collected revenue as of March 31, 2012, Consolidated evaluated the Carrier Aging Report as of April 1, 2012. Using this report Consolidated was able to identify any carrier with unpaid balances of that date. From there, Consolidated reviewed the actual carrier bills to determine to any unpaid balance that was specific to the fiscal year billed revenue for the intrastate jurisdiction. To achieve this result, a monthly CABS report was reviewed to determine what invoices, between the bill period October 2010 to September 2011, had an unpaid balance as of March 31, 2012. The CABS report is automatically generated by the billing system, and lists all the balances due by carrier and by invoice month. The report from the April 2012 billing was the source of the unpaid balance analysis. The report contains a column that has the original billed amount, and another column that shows the current unpaid balance for that invoice. Using the two columns a percentage of revenues collected compared to revenues billed was calculated. Consolidated excluded all Late Payment Charges (LPC) in the analysis.

Consolidated then developed a percentage split between originating and terminating collected revenues based on relative intrastate terminating MOU demand divided by the total intrastate MOU demand (both originating and terminating) for the period. Making an assessment of “collected only” terminating revenues to develop fiscal year 2011 collected intrastate terminating demand (see column D), Consolidated calculates the price

¹⁴ *Id.* At §§ 51.907(b)-(g), 51.915(d).

out of intrastate terminating demand using both intrastate and interstate rates (see columns E and F). A calculation is then made to determine the amount equal to 100% of the difference between the price out columns (see column G). Proposed intrastate terminating rates are then input (see column H). The rates highlighted in green will be changed in the company's intrastate access tariffs. Using the input proposed rates, a new price out is calculated using intrastate terminating demand (see column I). This new price out is compared to the price out using the original rates (column E) to calculate the difference between the original and proposed revenues (column J). The total of Column J is then reconciled to the required price out (column G) to ensure that the 100% reduction threshold is met.

Reciprocal Compensation Spreadsheet (CONFIDENTIAL) – The Reciprocal Compensation spreadsheet demonstrates the calculations necessary to comply with section 51.705 of the Commission's rules and calculates the eligible recovery for reciprocal compensation rate reductions pursuant to section 51.915(d). This is a new spreadsheet in the TRP created to comply with section 51.705 and 51.915(d) of the Commission's rules.¹⁵

Eligible Recovery Spreadsheet - The Eligible recovery sheet is created to summarize eligible recovery outputs by operating company from the access reduction, reciprocal compensation, and TRP exogenous forms.

Summary Eligible Recovery Sheet – This sheet is created for FCC tracking of eligible revenue and lines over the 2 year period of the order.

Tariff Rate Comparison (CONFIDENTIAL) – The Tariff Rate Comparison sheet is created to show the implementation of ARC rates in exchanges in relation to the FCC revenue benchmark restrictions in the ICC Transformation Order.
