SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)**3.6 Rates and Charges (Cont'd)****3.6.2 800 Database Access Service**

800 Database Access is a service offering using originating trunk side switched access service. This service provides for the forwarding of End User dialed 800 calls to a Company service switching point which will initiate a query to the database to perform the Customer identification function. The call is forwarded to the appropriate customer based on the dialed 800 number. The Customer has the option of having the dialed 800 number (e.g., 800-NXX-XXXX) or, if the 800 to POTS Number Translation feature is specified, a translated ten (10) digit POTS number (i.e., NPA-NXX-XXXX) delivered to the Customer Designated Premises.

When an 800 call is originated by an End User, the Company will perform the customer identification function based on the dialed digits to determine the Customer location to which the call is to be routed. The Customer identification function will be available at suitably equipped end office or access tandem switches. Calls originating from an end office switch not included in the Customer's area of service for 800 Database Access Service will not be completed.

Unless otherwise specified, the term 800 Database Access Service will include the following NPAs: 888, 877, 866, 855, 844, 833 and 822 as they become available for industry use.
