ACCESS SERVICES

SWITCHED ACCESS SERVICE DESCRIPTIONS (Cont'd)

3.1 Switched Access Services (Cont'd)

3.1.3 End Office

A) Local Switching

Local Switching provides for the use of Company switching equipment and related network to originate or terminate an access minute of use of any type. It applies to the establishment and release of connections on a per call basis between two or more circuits, communications system, alternative switches or services.

Where switches are appropriately equipped international dialing may be provided. International dialing provides the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a standard equipped end office.

B) End Office Common Trunk Port

Charges for DS-1 End Office Common Trunk Ports, located on the trunk side of the end office, recover costs to terminate common trunks. End Office Common Trunk Ports are per minute-of-use charge as specified in 6.1.3 following assessed to the customer of common transport trunks terminating at these ports.

C) Composite Terminating End Office Charge

The Composite Terminating End Office charge will apply to all terminating access minutes of use.
