Washington, DC 20554

This material is filed on 15 days' notice
under Section 204(a)(3) of the
Communications Act.

Re: Electric Lightwave, LLC
FRN # 0015577745
2nd Revision to Tariff FCC No. 2.

Dear Ms. Dortch:

Please find attached the second revision to Tariff FCC No. 2, interstate access services, of Electric Lightwave, LLC. This filing is made pursuant to §204(a)(3) of the Act, and is filed on fifteen (15) days' notice, with an issue date of July 16, 2013 and an effective date of July 31, 2014. It consists of the following revised pages:

<u>Page</u>	<u>Revision</u>
2	6
57	1
57.1-57.2	New
59	2
59.1	New
60	5
60.1	New

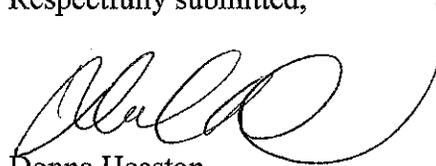

With this filing, Electric Lightwave, LLC complies with the July 1, 2014 step down requirements set forth by the Federal Communications Commission's Order FCC No. 11-161 (released on November 18, 2011) and Rule 47 C.F.R. § 61.26 "Tariffing of competitive interstate switched exchange access services." To comply with this rule, Electric Lightwave is changing its rate structure to introduce separate originating and terminating end office switched access rate elements and match its end office terminating switched access rates to the levels of the corresponding dominant incumbent local exchange carrier's rates.

Electric Lightwave, LLC is a non-dominant carrier and, therefore, cost support documentation under Part 61.38 of the Commission's Rules is not required.

Marlene H. Dortch, Esq. Secretary
July 16, 2014

ACCESS SERVICE

5.0 SWITCHED ACCESS SERVICES (Continued)

5.7 Billing and Jurisdictional Reporting Requirements

The following requirements are in addition to the terms and conditions contained in the general regulations section of this tariff.

5.7.1 Obligations of the Customer

The Customer must indicate a projected Percent of Interstate Use (PIU) factor in a whole number (i.e., 1-100) when ordering Switched Access Service. A Customer provided PIU factor is required on each Access Service Request (ASR).

Where jurisdiction can be determined from the call detail, the Company will bill the Customer based on the actual call detail. Where call detail is insufficient to determine the jurisdiction, the Customer may provide a Jurisdictional Report indicating the projected PIU factor. The Company will use the Jurisdictional Report to bill all interstate and intrastate rates and/or nonrecurring charges.

When terminating call detail is insufficient to determine the jurisdiction and the customer has not supplied a projected PIU factor, calls will be apportioned using a PIU of 50 (50% interstate - 50% intrastate).

The Customer-provided PIU factor will be used until the Customer reports a different projected PIU factor. No prorating or back billing will be done based on the Jurisdictional Report.

5.7.1.1 Obligation to Pay

(M)

5.7.2 Originating VoIP-PSTN Interexchange Traffic

(N)

- (A) Definition & Scope: Originating VoIP-PSTN Traffic is the traffic exchanged in Time Division Multiplexing ("TDM") format that originates and /or terminates in Internet Protocol ("IP") format. Telecommunications traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premise equipment. These Terms & Conditions ("Ts & Cs") govern the identification of toll Originating VoIP-PSTN traffic subject to interstate switched access rates. These Ts & Cs establish the method of distinguishing toll Originating VoIP-PSTN traffic from the Carrier Customer's total originating intrastate access traffic, so that toll Originating VoIP-PSTN traffic will be billed at originating interstate rates.

(N)

ACCESS SERVICE

5.0 SWITCHED ACCESS SERVICES (Continued)

5.7.2 Originating VoIP-PSTN Interexchange Traffic (Continued)

(B) Calculation and Application of Percent-VoIP-Usage Factor: Upon request by the Carrier Customer, the Company will determine the number of toll originating VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU exchanged between the Company and the Carrier Customer. Absent a request from the Carrier Customer the Company will charge intrastate originating rates for all intrastate originated traffic.

The PVU will be derived and applied as follows:

1. The Carrier Customer will calculate and furnish to the Company a factor ("PVU-Customer"), along with supporting documentation, representing the percentage of the total originating intrastate access MOU that the Carrier Customer exchanges with the Company in the relevant State, that 1) is sent by the Company and terminates in IP format. This PVU-Customer shall be based on verifiable information such as the number of the Carrier Customer's retail VoIP subscriptions in the relevant State (e.g., as reported on the FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
2. Company will, likewise, calculate a factor (PVU-Company) representing the percentage of the Company's total intrastate access MOU in the relevant State that the Company originates in IP format. This PVU-Company shall be based on the number of the Company's retail VoIP subscriptions in the relevant State as reported on FCC Form 477.
3. After the Company verifies the PVU-Customer factor provided by the Carrier Customer the Company will use the PVU-Customer and PVU-Company factors to calculate an effective PVU factor that represents the percentage of total access MOU exchanged between the Company and the Carrier Customer that is originated or terminated in IP format, whether at the Company's end, at the Carrier Customer's end, or at both ends. The PVU factor will be calculated as: $PVU-Customer + PVU-Company \times (1 - PVU-Customer)$.
4. In the event that the Company cannot verify the Carrier Customer's PVU-Customer factor based upon the information provided by the Carrier Customer, the Company will request additional information to support the PVU-Customer. The Carrier Customer shall supply reasonably requested additional information and other information used to determine the PVU-Customer factor. If after review of the additional information, the Carrier Customer and the Company establish a revised and mutually agreed upon PVU-Customer, the Company will begin using the new factor with the next bill period.

(N)

(N)

ACCESS SERVICE

5.0 SWITCHED ACCESS SERVICES (Continued)

5.7.2 Originating VoIP-PSTN Interexchange Traffic (Continued)

(N)

(C) PVU Factor Updates: The Carrier Customer may update the PVU-Customer factor or the Company may update the PVU-Company factor quarterly using the method set forth in Section III.a., above. If the Carrier Customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January and/or July of each year a revised PVU-Customer factor and supporting documentation. Once verified by the Company the revised PVU-Customer factor will apply prospectively and serve as the basis for billing until superseded by a new verified factor.

(D) PVU Factor Verification

1. Not more than twice in any year, the Company may request from the Carrier Customer an overview of the process used to determine the PVU factor(s), the call detail records, description of the method for determining how the Carrier Customer's end-users originate and terminate calls in IP format, and other information used to determine the Carrier Customer's PVU factor(s) furnished to the Company in order to validate the PVU factor(s) supplied./ The Carrier Customer shall comply with each such Company request, and shall reasonably supply the requested data and information within 15 days of the Company's request.
2. The Company may dispute the Carrier Customer's PVU factor(s) based upon:
 - a) A review of the requested data and information provided by the Carrier Customer;
 - b) The Company's reasonable review of other market information, FCC reports on VoIP lines, such as FCC Form 477, or state level results based on the FCC's Local Competition Report, or other relevant data;
 - c) A change in a reported PVU factor by more than five percentage points from the preceding quarter.
3. If, after review of the data and information, the Carrier Customer and the Company establish revised a PVU factor(s), the Company will begin using the revised PUV factor(s) in the next billing cycle.

(N)

5.7.3 Obligation to Pay

(T)(M)

If the Customer accepts traffic from the Company, the Customer has an obligation to pay the originating access charges set forth in this tariff for that traffic. Likewise, if the Customer delivers traffic to the Company for termination, the Customer has an obligation to pay the terminating access charges set forth in this tariff.

ACCESS SERVICE

5.0 SWITCHED ACCESS SERVICES (Continued)

5.8 Rates (Continued)

5.8.2 Rate Categories (Continued)

5.8.2.4 Direct Connect Service

The Direct Connect rate category is comprised of, but no limited to, monthly entrance facility and/or transport charges as determined on an ICB basis. Carrier Common and Local Switching Service charges apply as described herein.

5.8.2.5 800 Data Base Access Service

800 Data Base Access Service is an originating service utilizing Trunkside access which provides for the forwarding of end user dialed 8XX-NXX-XXXX calls to a Customer based on the dialed 8XX number. When an 8XX-NXX-XXXX call is originated by an End User, the Company will perform a query to determine the Customer based on screening of the full ten-digits of the 800 number.

The 800 Data Base charge applies per 800 call.

5.8.3 Rating and Billing of Transport Where More Than One Company is Involved

Switched Access Service to a Customer may involve more than one Company for the provision of transport service. Each Company will provide it's portion of transport to the interconnection point with the next Company. The mileage used to calculate charges for the Company's Transport Service will be based the Company's percentage of network facilities used to provide the service. Other companies involved with the transport service may bill according to their own tariffs or price lists.
