**SECTION 1 - GENERAL REGULATIONS****1.1 APPLICATION OF TARIFF**

This tariff contains regulations, rates and charges applicable to the provision of interstate carrier access services by Vitcom, LLC (the “Company”) to Customers. (T)

The provision of service by the Company as set forth in this tariff does not constitute a joint undertaking with the Customer for the furnishing of any service.

This tariff also contains rates and charges assessed on the Company’s own local exchange and toll customers, in addition to rates, terms, and conditions set forth in the Company’s intrastate local and toll tariffs.

The applicable operating territories of the Company are as set forth elsewhere in this Tariff.

The rates and charges for carrier access service set forth in this tariff apply to traffic delivered by Customer to Company, either directly or through a third-party network, and to traffic delivered by Company to Customer, either directly or through a third-party network.

**1.2 DEFINITIONS**

**ACCESS MINUTES** - Denotes that usage of exchange facilities in interstate service for the purpose of calculating chargeable usage.

**ACCESS SERVICE** – Includes all services and facilities provided by the Company for the origination or termination of any interstate or foreign telecommunications or other communications services that have the ability to reach the public switched telephone network regardless of the technology used in transmission. This includes, but is not limited to, local exchange, long distance, and data communications services that may use either TDM or Internet Protocol (“IP”) or other technology.

**CALL** - A Customer attempt for which the complete address code is provided to the service switch.

**CARRIER OR COMMON CARRIER** - Any individual, partnership, association, corporation or other entity engaged in interstate communication for hire by wire or radio between two or more exchanges.

**CARRIER COMMON LINE** – Where separately invoiced, Carrier Common Line access provides for the use of the Exchange Carrier common lines by interexchange carriers (Customers) for access to the end user.

**CHANNEL** - A communications path between two or more points of termination.

---

**SECTION 1 - GENERAL REGULATIONS (Cont'd)****1.3 UNDERTAKING OF THE COMPANY (Cont'd)****1.3.5 OWNERSHIP OF FACILITIES**

Title to all facilities provided in accordance with this Tariff remains in the Company, its agents or contractors. Customer shall not have, nor shall it assert, any right, title, or interest in any of the facilities and associated equipment provided by the Company hereunder.

**1.3.6 RIGHTS-OF-WAY**

Any and all costs associated with obtaining and maintaining the rights-of-way from the point of entry at the Customer's location to the Customer, including but not limited to, the costs of installing conduit or of altering the structure to permit installation of Company provided facilities, shall be borne entirely by the Customer. Customer's use of such rights-of-way shall in all respects be subject to the terms, conditions, and restriction of such rights-of-way and of agreements between the Company and such third parties relating thereto, including without limitation, the duration applicable to and the condemnation of such rights-of-way, and shall not be in violation of any applicable governmental ordinance, law, rule, regulation or restriction. Where applicable, Customer agrees that it shall assist Company in the procurement and maintenance of such right-of-way.

**1.3.7 SERVICES PROVIDED BY OTHER CARRIERS**

Company shall have no responsibility with respect to billings, charges, or disputes related to services used by Customer, which are not included in the services herein, including, without limitation, any local, regional, and long distance services not offered by the Company. Customer shall be fully responsible for the payment of any bills for such services and for the resolution of any disputes or discrepancies with the service provider.

---

**SECTION 1 - GENERAL REGULATIONS (Cont'd)****1.3 UNDERTAKING OF THE COMPANY (Cont'd)****1.3.11 ALLOWANCES FOR INTERRUPTION IN SERVICE**

A credit allowance will be given for any period during which any line subject to a monthly recurring charge under this tariff subscribed to by Customer hereunder is out of service, except as specified below. Out of service conditions are defined as complete loss of call origination and/or receipt capability. Credit allowances, if any shall be deducted from the charges payable by Customer hereunder and shall be expressly indicated on the next bill to Customer. A credit allowance will be made when an interruption occurs because of a failure of any component furnished under this Tariff by Company.

An interruption period begins when the Customer reports a service to be interrupted and releases it for testing and repair. An interruption period ends when the service is operative. If the Customer reports the service to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

For calculating credit allowances, every month is considered to have thirty (30) days. A credit allowance is applied on a pro rata basis against the monthly recurring rates specified hereunder and is dependent upon the length of the interruption. Only those services on the interrupted portion of the circuit will receive a credit.

In case of an interruption to any service, allowance for the period of interruption, if not due to the negligence of the Customer, shall be as follows:

1.3.11.1 For Monthly Recurring Charges, no credit allowance will be given on interruptions less than thirty (30) minutes. The Customer shall be credited for an interruption of 30 minutes or more at the rate of 1/1440 of the monthly charge for the service for each period of 30 minutes or at least 15 minutes thereof that the interruption continues.

1.3.11.2 For usage based charges, no credit allowance will be given. Only calls successfully handled by Company will be charged.

## SECTION 1 - GENERAL REGULATIONS (Cont'd)

**1.4 PROHIBITED USES**

The services the Company offers shall not be used for any unlawful purpose or for any use as to which Customer has not obtained all governmental approvals, authorization, licenses, consents and permits required to be obtained by the Customer with respect hereto.

The Company may require applicants for service who intend to use the Company's offerings for resale and/or for shared use to demonstrate that their use of the Company offerings complies with relevant laws, regulations, policies, orders, and decisions.

The Company may require a Customer to immediately shut down its transmission of signals if said transmission is causing interference to others.

A Customer may not use the services so as to interfere with or impair service over any facilities and associated equipment, or so as to impair the privacy of any communications over such facilities and associated equipment.

Customer use of any service obtained from other service providers by the Company and resold to Customer shall also be subject to any applicable restrictions in the underlying providers' publicly available tariffs.

A Customer, joint user, or authorized user shall not represent that its services are provided by the Company, or otherwise indicate to its customers that its provision of services is jointly with the Company, without the written consent of the Company. The relationship between Company and Customer shall not be that of partners or agents for one of the other, and shall not be deemed to constitute a partnership or agency agreement.

---

**SECTION 3 - SWITCHED ACCESS SERVICE**

---

**3.1 GENERAL**

Switched Access Service, which is available to Customers for their use in furnishing their services to End Users, provides for the use of Company network and network functionality to provide all or any part of the connection between a Customer's premises or point of presence and an End User's premises or equipment. It provides for the use of common terminating, switching and transport facilities. Switched Access Service provides the ability to originate calls from an End User's Premises to a Customer's Premises, and to terminate calls from a Customer's Premises to an End User's Premises. An End User's premises or equipment may include, but is not limited to, a mobile handset device for services provided to an End User by a Commercial Mobile Radio Service ("CMRS") provider or a conference bridge or Enhanced Service Provider Platform, network or system, or functionally similar equipment collocated at the Company's switch site. A Customer's Premises may include, but is not limited to, a mobile handset device for services provided to an End User by a CMRS provider or a conference bridge or Enhanced Service Provider Platform, network or system, or functionally similar equipment collocated at the Customer's or another third-party's switch site

The application of rates for Switched Access Service is described in Sections 3.5 and 3.6 following. Rates and charges for services other than Switched Access Service, e.g., a Customer interLATA toll message service, may also be applicable when Switched Access Service is used in conjunction with these other services.

**3.2 RATE CATEGORIES**

The following rate categories apply to Switched Access Service:

- Direct Connect
- Tandem Connect
- 800 Data Base Access Service
- Toll Free 8YY Transit Traffic Service
- Optional Features

All of the rate categories are billed as part of a combined or blended, per minute rate, and may be made up of other elements equivalent to those of the ILEC. Where separately invoiced, End-User Common Line services are described in Section 4 of this tariff and the rate schedule.

**SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)****RATE CATEGORIES (Cont'd)**

**3.2.1 Direct Connect** The Company will provide Direct Connect between the Customer's Premises and the Company's Local Switching Center switch(es). This transmission path is dedicated to the use of a single Customer. DS1 and DS3 facilities are available for Direct Connect Service. A DS1 facility is capable of transmitting electrical signals at a nominal 1.544 Mbps, with the capability to channelize up to 24 voice frequency transmission paths. A DS3 facility is capable of transmitting electrical signals at a nominal 44.736 Mbps, with the capability to channelize up to 672 voice-frequency transmission paths. For DS3 facilities, if the Company is required to install additional fiber optic equipment for the benefit of the Customer, then the Customer has the option to choose either an optical or electrical interface.

The Customer must order Direct Connect under the Option 1 rate option: Option 1: This Direct Connect rate category is comprised of a per minute of use charge.

**3.2.2 Tandem Connect:** Tandem Connect consists of circuits from the Customer's tandem provider to the Company's Local Switching Center. The Customer must order Tandem Connect under the Option 1 rate option. Option 1: The Tandem Connect rate category is comprised of a Minutes of Use (MOU) based charge.

**3.2.3 800 Data Base Access Service** 800 Data Base Access Service is a service offering utilizing originating Trunk side Switched Access Service. When an 8XX + NXX + XXXX call is originated by an End User, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location to which the call is to be routed.

The 800 Data Base charge, which consists of a single, fixed rate element, applies on a per query basis.

ALL MATERIAL ON THIS PAGE IS NEW

---

**SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)****RATE CATEGORIES (Cont'd)**

3.2.4 Toll Free 8YY Transit Traffic Service Toll Free 8YY Transit Traffic Service is an access service in which the Company transports Toll Free traffic originated by a third party that is not an end user or other user of the Company's local exchange or exchange access service through its wire center to an Interexchange Carrier Customer. The connection to the interexchange carrier can be either directly via a Direct End Office Trunk (DEOT) from the Company's switch to the IXC or indirectly via another LEC tandem switch. In addition to the 800 Database Access Service described in Section 3.2.3 above, this service provides for the use of the Tandem Switching, Tandem Termination, and Tandem Transport facilities of the Company. In a Toll Free 8YY Transit Traffic Service call, the Company will charge only for 800 Data Base Access Service Basic Query, the tandem switching, common multiplexing and the tandem transport (termination and facility) functionalities. No charges for the carrier common line charge, the local switching charge nor the end office port charge are incorporated into the rate. The rates for Toll Free 8YY Transit Traffic Service set forth in the Rate Attachment are usage sensitive. Records exchange, rating, and billing for Toll Free 8YY Transit Traffic Service is subject to the provisions of the Multiple Exchange Carrier Access Billing Guidelines (MECAB). To the extent the Company jointly provides Toll Free 8YY Transit Traffic Service in conjunction with a third-party carrier that will bill Interexchange Carrier Customers of that third-party carrier's switched access service, pursuant to that third-party carrier's tariff or other authority, for that third party carrier's portion of the total service, the Company and third-party carrier(s) will enter into a billing agreement with all billing carriers which is consistent with the provisions contained in MECAB. Toll Free 8YY Transit Traffic Service calls routed to an Incumbent Local Exchange Carrier's (ILEC) Tandem Switching facility will conform to the LATA restrictions as defined both in said ILEC's switched access tariff and in MECAB.

**SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)****RATE CATEGORIES (Cont'd)****3.2.5 Switched Access Service Optional Features**

**3.2.5.1 Nonchargeable Optional Features:** Where transmission facilities permit, Company will, at the option of the Customer, provide the following nonchargeable optional feature, as described in Section E.4.1, in association with Switched Access Service.

(a) Supervisory Signaling

**3.2.5.2 Chargeable Optional Features:** Where transmission facilities permit, the Company will, at the option of the Customer, provide the following chargeable optional features, as described in Section 3.5.3, in association with Switched Access Service.

(a) 800 Data Base Access Service Basic Query

(b) Signaling Transfer Point Access

**3.2.5.3 Feature Group D Optional Features** Following are the various optional features that are available in lieu of, or in addition to, the standard features provided with Feature Group D. Optional features are provided as Common Switching Optional Features as described in Section E.4.3

(a) Alternate Traffic Routing

(b) Automatic Number Identification (ANI)

(c) Cut-Through

(d) Service Class Routing

(e) Feature Group D with 950 Access

(f) Signaling System Seven (SS7)

(g) Basic Initial Address Message Delivery

(h) Called Directory Number Delivery

(i) Flexible Automatic Number Identification Delivery

ALL MATERIAL ON THIS PAGE IS NEW

---

**SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)****3.5 RATE REGULATIONS, (Cont'd)**

**3.5.3 Switched Access Service Optional Features:** Following are descriptions of the various optional features that are available in lieu of, or in addition to, the standard features provided with the Feature Groups for Switched Access Service.

**3.5.3.1 Nonchargeable Optional Feature**

(a) **Supervisory Signaling:** Where the transmission parameters permit, and where signaling conversion is required by the Customer to meet its signaling capability, the Customer may order an optional supervisory signaling arrangement in the form of Multi-frequency (MF) Signaling for each transmission path.

**3.5.3.2 Chargeable Optional Feature**

(a) **800 Data Base Access Service:** The Customer will be charged a per query charge based on a query of the 8XX-NXX-XXXX dialed and/or delivered to the Customer in conjunction with 800 Data Base Access Service.

(b) **Signaling Transfer Point Access:** The Customer will be charged a per mile charge and a per port charge for access to a specialized switch which provides SS7 network access and performs SS7 messaging routing and screening. If a Customer is connected to a third party SS7 service provider, an additional charge, as specified in Section E.4.4.2 will apply.

**3.5.3.3 Feature Group D Optional Features**

(a) **Common Switching Optional Features**

(1) **Alternate Traffic Routing:** This option provides the capability of directing originating traffic from a Local Switching Center to a direct access Trunk group, with additional traffic overflowing to the Access Tandem Trunk group and then to a Customer designated Premises. Multiple Customer Premises Alternate Routing is also available where originating traffic from a Local Switching Center is directed via a Trunk group to a Customer designated Premises until that group is fully loaded, and then additional originating traffic from the same Local Switching Center or Access Tandem is delivered via a different Trunk group to a second Customer designated Premise. The Customer shall specify the last Trunk CCS desired for the high use group.

ALL MATERIAL ON THIS PAGE IS NEW

---

**SECTION 3 - SWITCHED ACCESS SERVICE (Cont'd)****3.5 RATE REGULATIONS, (Cont'd)****3.5.3 Switched Access Service Optional Features (cont'd)****3.5.3.3 Feature Group D Optional Features (cont'd)****(a) Common Switching Optional Features (cont'd)**

(2) Automatic Number Identification (ANI): This option provides the automatic in-band transmission signaling of a seven or ten digit number and information digits to the Customer's Premises for calls originating in the LATA for the identification of the calling station. The ANI feature is a Local Switching Center software function which is associated on a call-by-call basis with: 1) all individual transmission paths in a Trunk group routed directly between a Local Switching Center and a Customer's Premises; or where technically feasible, 2) all individual transmission paths in a Trunk group between a Local Switching Center and an Access Tandem, and a trunk group between an Access Tandem and a Customer's Premises.

(3) Cut-Through: This option allows End Users of the Customer to reach the Customer's Premises by using the end of dialing digit (#) at the end of the dialing sequence. The Company will not record any other dialed digits for these calls.

(4) Service Class Routing: This option provides the capability of directing originating traffic from a Local Switching Center to a Trunk group to a Customer designated Premises, based on the line class of service and service prefix indicator. A domestic Interexchange Carrier may not order more than four different routes per Local Switching Center or Access Tandem. An international Interexchange Carrier may order up to four additional routes.

(5) Feature Group D with 950 Access: This option provides for the routing of originating calls, dialed using a 950-10XX or 950-1XXX Access Code, to the FGD Customer using FGD signaling protocols and technical specifications. The Customer is responsible for distinguishing between standard FGD calls and 950-dialed calls delivered over the same Trunks.

ALL MATERIAL ON THIS PAGE IS NEW

---

**3.5 RATE REGULATIONS, (Cont'd)****3.5.3 Switched Access Service Optional Features (cont'd)****3.5.3.3 Feature Group D Optional Features (cont'd)****(a) Common Switching Optional Features (cont'd)**

(6) **Signaling System Seven (SS7):** This option provides out of band transmission of SS7 protocol signaling information between the Local Switching Center switching system and the Customer's designated Premises. Prior to installation of any SS7 circuits, the Customer must agree to participate in SS7 certification testing. The Company will provide a testing plan to the Customer, and reserves the right to deny SS7 connectivity if the Customer's circuits do not meet the testing requirements.

(7) **Basic Initial Address Message Delivery:** This option permits the following optional SS7 signaling call setup parameters: User Service Information, Called Party Number, Calling Party Number, Charge Number, Originating Line Information, Transit Network Selection, Carrier Selection, Service Code and Access Transport.

(8) **Called Directory Number Delivery:** This option provides the Customer with the telephone number to which the call was directed. The seven or ten digit number is provided as part of the in-band transmission with MF signaling. The Called Directory Number Delivery feature is associated on a call-by-call basis with all individual transmission paths in a Trunk group routed from an Access Tandem or the originating Local Switching Center. This option is available except when FGD is provided with 950 access or Cut-Through features.

(9) **Flexible Automatic Number Identification Delivery:** This feature is a network enhancement to ANI. The feature is available on inbound signaling or in the Originating Line Information Parameter in the Basic Initial Address Message Delivery optional feature for SS7 signaling. Flexible ANI will provide additional values for Information Indicator (II) digits that are associated with various classes of service not associated with the standard ANI digits. This feature may only be used in conjunction with ANI. The following Information Indicator codes are available: Confinement/Detention Facility; Outward Wide Area Telecommunications Service; Cellular Service; Private Pay Station; and, Access for Private Virtual Networks.

RATE ATTACHMENT – SWITCHED ACCESS  
SERVICES RATES AND CHARGES Rates

1. Switched Access Charge (SWAS)

This section contains the specific regulations governing the rates and charges that apply for Switched Access Services:

There are two types of rates and charges that apply to Switched Access Service. These are usage rates and Non-Recurring Charges.

1.1 Usage Rates: Usage rates are rates that are applied on a per access minute or per query basis. Usage rates are accumulated over a monthly period.

1.2 Non-Recurring Charges: Non-Recurring Charges are one time charges that apply for a specific work activity (i.e., installation of new service or change to an existing service).

1.2.1 Installation of Service: Non-Recurring Charges apply to each Switched Access Service installed. The charge is applied per line or Trunk.

1.3 Rate Zone: A Rate Zone is a geographic area that comprises a specific Incumbent Local Exchange Carrier's ("ILEC's") serving territory within a state. All Usage Rates and Charges will be assessed based on the serving territory of the Incumbent Local Exchange Carrier ("ILEC") from which a call originates or to which a call terminates. Section 2 contains a chart identifying the Rate Zone associated with each specific ILEC serving area within each state. Switched Access Service charges and Local Termination Service charges are based on the competing Incumbent Local Exchange Carriers' functionally equivalent services and associated rates in the indicated areas.

1.4 Application of Rates

1.4.1 Direct Connect: The Direct Connect rate is assessed based on the per-minute of use charges found in a particular state and in some cases, within specific zones in specific states. Rates and charges for each state and zone are found in Section 2.

The Tandem Connect rates will apply for all Direct Connect usage which overflows to the Access Tandem.

1.4.2 Tandem Connect: The Tandem Connect rate is assessed on a per-minute-of-use basis and is applicable to all tandem routed Switched Access Service minutes of use. The rate will vary based on whether the Company pays the ILEC for leased tandem switching capability on a call. Tandem Connect Rates are also Rate Zone based, and use the same Rate Zones found in Section 2. Rates and charges for Tandem Connect minutes for which the Company does not lease the tandem switching function from the ILEC or provide the functional equivalent of the ILEC tandem switching function are set forth in Section 3 following. Rates and charges for Tandem Connect minutes for which the Company does lease the tandem switching function from the ILEC or provides the functional equivalent of the ILEC tandem switching function are set forth in Section 3 following.

1.4.3 8XX Number Translation Charge: The 8XX Number Translation Charge applies for the translation of a specific 8XX number to a ten digit telephone number on a per query basis.

Effective: October 21, 2014

1.4.4 Toll Free 8YY Transit Traffic Service: The Toll Free 8YY Transit Traffic Service rates are assessed on a per minute of use basis. If the 8YY call is delivered to the IXC over DEOTs, the Toll Free 8YY Direct Transit Minute of Use Rate will apply. If the call is instead delivered to the IXC indirectly via another LEC tandem, Toll Free 8YY Indirect Transit Minute of Use Rate will apply. These charges incorporate only the tandem switching, and appropriate portions of common multiplexing and tandem transport functionalities into the rate. Additionally, the 800 Data Base Basic Query Charge identified in Section 5 will apply on a per query basis.
