FACILITIES FOR INTERSTATE ACCESS

5. Special Access Service (Cont'd)5.2 Description of Special Access (Cont'd)5.2.12 Ethernet Virtual Private Line(A) Basic Service Description

Ethernet Virtual Private Line (EVPL) service provides the ability to order Ethernet service where a single customer connection can support multiple applications with varying Quality of Service (QoS). EVPL is available at transport speeds of: 10 Mbps, 100 Mbps, 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

EVPL is provided on a monthly basis, under a Term Discount Plan for periods of one, two, three or five years as set forth in 5.6.20(C) following or under a Fixed Rate Term Plan for a period of seven years as set forth in 5.6.20(D) following. When a customer orders EVPL, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the EVPL circuits. EVPL is only available where facilities and operating conditions exist.

(C)

EVPL provides customer capabilities to support different Quality of Service (QoS) (i.e., Gold, Silver and Best Effort) as described in (5) following over the same connection and offers customers increased flexibility to match bandwidth to their real needs for voice, data and video applications on each connection. The customer orders the portion of their EVPL bandwidth that will be allocated for each quality of service.

For each EVPL, the customer's bandwidth will be rate limited or policed to a fixed speed for each QoS level specified in the QoS profile selected for the Ethernet Virtual Connection (EVC).

FACILITIES FOR INTERSTATE ACCESS

5. Special Access Service (Cont'd)5.6 Rate Regulations (Cont'd)5.6.19 Fixed Rate Term Plan (Cont'd)(C) Upgrades (Cont'd)

When a customer upgrades a DS3 service being billed FRTP rates to an Ethernet Transport (ET) or Ethernet Virtual Private Line (EVPL) service offered by the Telephone Company, the customer must commit to ET for periods of one (1), three (3) or five (5) years or an EVPL Term Discount Plan for periods of one (1), two (2), three (3) or five (5) years or an EVPL Fixed Rate Term Plan for a period of seven (7) years. Termination liability charges will not apply to upgrades if the ET or EVPL commitment period is equal to the existing DS3 FRTP commitment period.

(C)

When a disconnect order for a DS3 circuit is submitted to the Telephone Company, the customer must note on the disconnect order that the DS3 circuit to be disconnected is being or has been upgraded to ET or EVPL service.

(D) Termination Liability

If during the term of the FRTP the customer disconnects a DS3 circuit prior to the 7 year minimum commitment period, termination liability charges will apply as follows:

- (1) an amount equal to 100% of monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 1 of the 7 year term commitment period of the FRTP, if any, plus
- (2) an amount equal to 50% of the monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 2 through year 5 of the 7 year term commitment period of the FRTP, if any, plus
- (3) an amount equal to 20% of monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 6 through year 7 of the 7 year term commitment period of the FRTP.

* Customers subscribing to a DS3 FRTP on or before August 13, 2011 may elect to discontinue service without termination liability within 90 days of the effective date of the revisions filed under Transmittal No. 7.

FACILITIES FOR INTERSTATE ACCESS

5. Special Access Service (Cont'd)5.6 Rate Regulations (Cont'd)5.6.20 Ethernet Virtual Private Line (Cont'd)(C) Term Discount Plan (Cont'd)

At the end of the term commitment period, the customer may subscribe to a new TDP commitment period or revert to month-to-month rates. If the customer does not notify the Telephone Company in writing within 60 calendar days prior to the expiration of their 1, 2, 3 or 5 year term commitment period, the term commitment period and TDP rates and conditions in effect at the time of expiration will automatically renew. (C)

(1) Addition of UNI/NNI Port Connection

When the customer requests the addition of a port connection, the customer will choose one of the following options when ordering a new port connection during its existing term commitment period:

- (a) Add the new port connection to its existing TDP, provided the customer commits to retain the newly installed port connection in-service at the same bandwidth capacity for the remainder of the existing term commitment period. The term commitment period of the customer's existing TDP will continue uninterrupted.
- (b) Replace the existing TDP in its entirety with a new TDP as described in (3) following.

February 24, 2015

FACILITIES FOR INTERSTATE ACCESS

17. EXPANDED INTERCONNECTION SERVICES *

(T)

17.1 Service Description

17.1.1 Expanded Interconnection Service (EIS) provides customers with the capability to collocate customer provided transmission, concentration, and multiplexing equipment, at the Telephone Company premises. EIS customers may terminate basic fiber optic transmission facilities at the Telephone Company premises for connection to their equipment or may lease facilities from the Telephone Company.

EIS customers may lease transport from the Telephone Company to connect to their collocation equipment in lieu of constructing their own facility to the Telephone Company premises.

EIS is not available to Enhanced Service Providers. Customer premises equipment, protocol conversion equipment or other types of customer equipment not required for basic transmission shall not be installed at the Telephone Company premises.

17.2 Provision of EIS17.2.1 General

- (A) EIS will be provided as Physical EIS where transmission facilities of the customer interconnect with the facilities of the Telephone Company within the Telephone Company wire center or access tandem or as Virtual EIS where the interconnection with Telephone Company facilities occurs outside the wire center or access tandem in a manhole or other similar location.
- (B) EIS arrangements are available for Switched Access and DS0 (operating at 64Kbps, and Fractional T1 bandwidths), 10 Mbps, 100 Mbps, 1 Gbps, DS1 (1,544 Mbps) and DS3 (45Mbps) Special Access transmission facilities and terminating equipment that terminate to Telephone Company wire center or access tandem facilities in or near Telephone Company buildings. The DS0 Cross Connect can accommodate 64Kbps DDS and Fractional T1 bandwidths of 128 Kbps, 256 Kbps and 384 Kbps. The 10 Mbps, 100 Mbps and 1 Gbps Cross Connect arrangements are available for EIS arrangements in association with LAN Extension Service as set forth in 5.6.17. The Cross Connect arrangement may be connected directly to Telephone Company provided 64Kbps DDS or Fractional T1/DS0, 10 Mbps, 100 Mbps, 1 Gbps, DS1 or DS3 services or to a Telephone Company provided 64Kbps DDS or Fractional T1/DS0, 10 Mbps, 100 Mbps, 1 Gbps, DS1, or DS3 multiplexing arrangement. The Cross Connect charge applies per DS0 (64Kbps), 10 Mbps, 100 Mbps, 1 Gbps, DS1, or DS3 connection.

Fractional T1 service can be designed to carry various DS0 combinations. Therefore, the DS0 Cross Connect charge for Fractional T1 will be assessed as follows:

- 128 Kbps: 2 DS0 Cross Connects
- 256 Kbps: 4 DS0 Cross Connects
- 384 Kbps: 6 DS0 Cross Connects

Rates for the Switched Access Cross Connect are listed in Section 4.6.9 and rates for the Special Access Cross Connect are found in Section 5.1.1 (D).

- (C) EIS will be available for microwave transmission on a case by case basis where reasonably feasible. EIS is not available on non-fiber optic facilities.
- (D) Customer provided facilities and customer designated termination equipment are subject to the terms, conditions, and rates specified in this tariff.
- (E) Customers requests for space for terminating equipment other than within an access tandem or wire center will be handled on a case by case basis where technically feasible on a first-come, first-served basis.

* Effective March 1, 2015, Physical Expanded Interconnection Service (EIS), as referenced throughout Section 17 of this tariff, will no longer be available to new customers. There will be no change to arrangements in service on orders prior to March 1, 2015. Virtual EIS remains in effect.

FACILITIES FOR INTERSTATE ACCESS

17. EXPANDED INTERCONNECTION SERVICES (Cont'd)17.6 EIS Service Request (Cont'd)17.6.1 Application Form for Physical EIS (Cont'd)

(H) (Cont'd)

Option 2: Supplemental Application. The customer may elect to have a major change to its original EIS application treated by the Telephone Company as a supplemental application. A supplemental application may affect the Telephone Company's obligation to process and fulfill the original application. On receipt of a supplemental application and Engineering Fee, the Telephone Company will notify the customer in writing within fifteen (15) days following receipt of the completed supplemental application if the customer's requirements cannot be accommodated as specified. Upon notification that the Telephone Company can accommodate the requirements of the supplemental application, the customer may elect to proceed with the supplemental application. The Telephone Company's obligations under the original application will be merged with the obligations of the supplemental application and the combined project timeline will be based on the date the supplemental application was received. All of the provisions herein applicable to an original application similarly apply to a supplemental application.

Minor changes are those requests that do not require additional AC or DC power systems, HVAC system upgrades, or changes in cage space. The customer will be required to submit a revised application, but the deliverable dates for the project will not change.

17.6.2 Relocation Within the Same Wire Center or Access Tandem

Customer requests for relocation of the termination equipment from one location to a different location for the same customer within the same wire center or access tandem will be handled on an individual case basis.

17.6.3 Expansion of Existing Space

Customer requests for expansion of existing space within a specific wire center or access tandem will be treated as a new service application.

17.7 Physical EIS *

(T)

17.7.1 Availability of Service

- (A) Physical EIS will be made available where there is existing suitable space as defined in 17.7.2.
- (B) Wire Centers and access tandems which are exempt from EIS requirements due to lack of existing suitable space or are not technically feasible are shown in 17.10.1. The Telephone Company will notify the appropriate State Commissions when existing suitable space has been exhausted in a particular wire center or access tandem.
- (C) Existing suitable space in Telephone Company wire centers or access tandems available for physical EIS will be provided to customers on a first-come, first-served basis as specified in 17.7.2.

* Effective March 1, 2015, Physical Expanded Interconnection Service (EIS) will no longer be available to new customers. There will be no change to arrangements in service on orders prior to March 1, 2015. Virtual EIS remains in effect.
