ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Rate Categories, Applications and Regulations (Cont'd)7.2.1 Rate Categories (Cont'd)(I) Fixed Rate Term Plan (Cont'd)(3) Upgrades (Cont'd)

When a customer upgrades a DS3 service being billed F RTP rates to an Ethernet Transport (ET) or Ethernet Virtual Private Line (EVPL) service offered by the Telephone Company, the customer must commit to ET for periods of one (1), three (3) or five (5) years or an EVPL Term Discount Plan for periods of one (1), two (2), three (3) or five (5) years or an EVPL Fixed Rate Term Plan for a period of seven (7) years. Termination liability charges will not apply to upgrades if the ET or EVPL commitment period is equal to the existing DS3 F RTP commitment period. (C)

When a disconnect order for a DS3 circuit is submitted to the Telephone Company, the customer must note on the disconnect order that the DS3 circuit to be disconnected is being or has been upgraded to ET or EVPL service.

(4) Termination Liability

If during the term of the F RTP the customer disconnects a DS3 circuit prior to the 7 year minimum commitment period, termination liability charges will apply as follows:

- (a) an amount equal to 100% of monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 1 of the 7 year term commitment period of the F RTP, if any, plus
- (b) an amount equal to 50% of the monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 2 through year 5 of the 7 year term commitment period of the F RTP, if any, plus
- (c) an amount equal to 20% of monthly recurring charges for each DS3 circuit disconnected for the months remaining for year 6 through year 7 of the 7 year term commitment period of the F RTP.

* Customers subscribing to a DS3 F RTP on or before August 13, 2011 may elect to discontinue service without termination liability within 90 days of the effective date of the revisions filed under Transmittal No. 7.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.15 Ethernet Virtual Private Line (Cont'd)7.15.2 Rate Regulations (Cont'd)(C) Term Discount Plan

An Ethernet Virtual Private Line Term Discount Plan (TDP) is available for EVPL service and applies to UNI and NNI port connections, EVPL channel mileage, EVC connections, QoS, ICO NNI Trunking Arrangement and ICO NNI Additional Mileage. A TDP provides the customer discounted rates for the rate elements listed.

The customer has the option of ordering EVPL under a term commitment period of 1, 2, 3 or 5 years. The customer must notify the Telephone Company in writing the length of its selected term commitment period. In order for a circuit to be eligible for TDP pricing, the customer must commit a UNI and/or NNI port connection to a TDP. All committed ports must be ordered for the same term commitment period (i.e., all 3 years or all 5 years) and remain in-service at the same bandwidth capacity throughout the entire term commitment period. UNI or NNI port connections installed after the establishment of the customer's TDP may be ordered on a month-to-month basis or added as additional committed ports to a customer's existing term commitment period as described in (1) following.

(C)

The monthly rates for EVPL service under a TDP are set forth in 7.15.3 following.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.15 Ethernet Virtual Private Line (Cont'd)7.15.2 Rate Regulations (Cont'd)(C) Term Discount Plan (Cont'd)

At the end of the term commitment period, the customer may subscribe to a new TDP commitment period or revert to month-to-month rates. If the customer does not notify the Telephone Company in writing within 60 calendar days prior to the expiration of their 1, 2, 3 or 5 year term commitment period, the term commitment period and TDP rates and conditions in effect at the time of expiration will automatically renew. (C)

(1) Addition of UNI/NNI Port Connection

When the customer requests the addition of a port connection, the customer will choose one of the following options when ordering a new port connection during its existing term commitment period:

- (a) Add the new port connection to its existing TDP, provided the customer commits to retain the newly installed port connection in-service at the same bandwidth capacity for the remainder of the existing term commitment period. The term commitment period of the customer's existing TDP will continue uninterrupted.
- (b) Replace the existing TDP in its entirety with a new TDP as described in (3) following.

ACCESS SERVICE

17. EXPANDED INTERCONNECTION SERVICES *

(T)

17.1 Service Description

- 17.1.1. Expanded Interconnection Service (EIS) provides customers with the capability to collocate customer provided transmission, concentration, and multiplexing equipment at the Telephone Company premises. EIS customers may terminate basic fiber optic transmission facilities at the Telephone Company premises for connection to their equipment or may lease facilities from the Telephone Company.

EIS customers may lease transport from the Telephone Company to connect their collocation equipment in lieu of constructing their own facility to the Telephone Company premises.

EIS is not available to Enhanced Service Providers. Customer premises equipment, protocol conversion equipment or other types of customer equipment not required for basic transmission shall not be installed in Telephone Company wire centers or access tandems.

17.2 Provision of EIS17.2.1 General

- (A) EIS will be provided as Physical EIS where transmission facilities of the customer interconnect with the facilities of the Telephone Company within the Telephone Company wire center or access tandem or a Virtual EIS where the interconnection with Telephone Company facilities occurs outside the wire center or access tandem in a manhole or other similar location.
- (B) EIS arrangements are available for Switched Access and DS0 (operating at 64 Kbps and Fractional T1 bandwidths), DS1 (1.544 Mbps) and DS3 (45 Mbps) Special Access transmission facilities and terminating equipment that terminate to Telephone Company wire center or access tandem facilities in or near Telephone Company buildings. The DS0 Cross Connect can accommodate 64Kbps DDS and Fractional T1 bandwidths of 128 Kbps, 256 Kbps and 384 Kbps. The Cross Connect arrangement may be connected directly to Telephone Company provided 64Kbps DDS or Fractional T1/DS0, DS1 or DS3 services or to a Telephone Company provided 64 Kbps DDS or Fractional T1/DS0, DS1 or DS3 multiplexing arrangement. The Cross Connect charge applies per DS0 (64Kbps), DS1, or DS3 connection.
- Fractional T1 service can be designed to carry various DS0 combinations. Therefore, The DS0 Cross Connect charge for Fractional T1 will be assessed as follows:
- 128 Kbps: 2 DS0 Cross Connects
256 Kbps: 4 DS0 Cross Connects
384 Kbps: 6 DS0 Cross Connects
- (C) Rates for the Switched Access Cross Connect are listed in Section 6.6.34 and rates for the Special Access Cross Connect are found in Section 7.11.5.
- (D) EIS will be available for microwave transmission on a case by case basis where reasonably feasible. EIS is not available on non fiber optic facilities.
- (E) Customer provided facilities and customer designated termination equipment are subject to the terms, conditions, and rates specified in this tariff.

Customer requests for space for terminating equipment other than within an access tandem or wire center will be handled on a case by case basis where technically feasible on a first-come, first served basis.

* Effective March 1, 2015, Physical Expanded Interconnection Service (EIS), as referenced throughout Section 17 of this tariff, will no longer be available to new customers. There will be no change to arrangements in service on orders prior to March 1, 2015. Virtual EIS remains in effect.

ACCESS SERVICE

17. EXPANDED INTERCONNECTION SERVICES (Cont'd)

17.6 EIS Service Request (Cont'd)

17.6.2 Relocation Within the Same Wire Center or Access Tandem

Customer requests for relocation of the termination equipment from one location to a different location for the same customer within the same wire center or access tandem will be handled on an individual case basis.

17.6.3 Expansion of Existing Space

Customer requests for expansion of existing space within a specific wire center or access tandem will be treated as a new service application.

17.7 Physical EIS *

(T)

17.7.1 Availability of Service

- (A) Physical EIS will be made available in only wire centers and access tandems where there is existing suitable space as defined in 17.7.2.
- (B) Wire Centers and access tandems which are exempt from EIS requirements due to lack of existing suitable space or are not technically feasible are shown in 17.11.1. The Telephone Company will notify the appropriate State Commissions when existing suitable space has been exhausted in a particular wire center or access tandem.
- (C) Existing suitable space in Telephone Company wire centers and access tandems available for physical EIS will be provided to customers on a first-come, first-served basis as specified in 17.7.2.

* Effective March 1, 2015, Physical Expanded Interconnection Service (EIS) will no longer be available to new customers. There will be no change to arrangements in service on orders prior to March 1, 2015. Virtual EIS remains in effect.
