**7. Special Access Service (Cont'd)****7.1 General (Cont'd)****7.1.4 Alternate Use**

Alternate Use occurs when a service is arranged by the Telephone Company so that the customer can select different types of transmission at different times. A customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12. following, Specialized Service or Arrangements. The customer will pay the stated tariff rates for the Access Service rate elements for the service ordered [i.e., Channel Terminations, Channel Mileage (as applicable) and Optional Features and Functions (if any)].

**7.1.5 Special Facilities Routing**

A customer may request that the facilities used to provide Special Access Service be specially routed. The regulations, rates and charges for Special Facilities Routing are set forth in Section 11. following.

(C)  
(C)

**7.1.6 Design Layout Report**

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this tariff as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

## 7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

## 7.2.1 Rate Categories (Cont'd)

Channel Mileage rates are made up of the Channel Mileage Facility rate and the Channel Mileage Termination rate. For GLC, the Channel Mileage rate category also recovers the costs associated with the equipment and the transmission facilities that GLC provides between locations on GLC's transport network, which are not connected to GLC's tandem switch location in Westphalia, Michigan, where GLC provides cross connects that are not Channel Termination facilities and not otherwise functionally equivalent to such facilities ("GLC CM Cross Connect Location").

(C)

(C)

(C)

(C)

## (1) Channel Mileage Facility

The Channel Mileage Facility rate recovers the per mile cost for the transmission path which extends between the Telephone Company serving wire centers and/ or hub(s). Channel Mileage Facility rate also recovers the per mile cost for the transmission path which extends between GLC CM Cross Connect Locations.

(C)

(C)

(C)
