COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS**

Certain terms used generally throughout this tariff for Communications Service of the Company are defined below. The definitions below apply whether or not the defined term is capitalized in this tariff, although for the convenience of the Customer the Company has endeavored to identify the use of defined terms by capitalizing them where they occur. Where a term defined in this tariff is also defined in the Commission's rules (including without limitation Section 69.2 of those rules), the term in this tariff is to be construed in a manner that is consistent with the definition in the Commission's rules, subject to Section 61.26(a) of those rules, under which access services provided by a competitive local exchange carrier (such as the Company) are construed to include services and functions that are the functional equivalent of access services provided by an incumbent local exchange carrier. When terms used in this tariff are not specifically defined, they are intended to be understood as conveying the meaning they are normally given within the United States telecommunications industry (including with reference to the Commission's rules), or, if no such specific meaning exists, their normal English meaning.

(C)

(C)

Access Minutes

Denotes that usage of exchange facilities in intrastate service for the purpose of calculating chargeable usage. On the originating end of an intrastate call, usage is measured from the time the originating end user's call is delivered by the Company to and acknowledged as received by the customer's facilities connected with the originating exchange. On the terminating end of an intrastate call, usage is measured from the time the call is received by the end user in the terminating exchange. Timing of usage at both originating and terminating ends of an intrastate call shall terminate when the calling or called party disconnects, whichever event is recognized first in the originating and terminating exchanges, as applicable.

Access Tandem

Denotes a switching system that provides a concentration and distribution function for originating or terminating traffic between end offices and a customer's POT.

Bit

Denotes the smallest unit of information in the binary system of notation.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Business Day (BD)

Denotes the times of day that a company is open for business. Generally, in the business community, these are 8:00 a.m. to 5:00 p.m., with an hour for lunch, Monday through Friday, resulting in a standard forty (40) hour work week. However, Business Day hours for the Company may vary based on Company policy, union contract and location.

(M)

(M)

Call

Denotes a customer attempt for which the complete address code (e.g., 0-, 911, or 10 digits) is provided to the serving dial tone office.

Calling Party Number

Denotes the SS7 Out of Band Signaling parameter which automatically transmits the calling party's ten digit telephone number to the customer's premises for calls originating in the LATA.

Carrier or Common Carrier

See "Interexchange Carrier", "Local Exchange Carrier", "Commercial Mobile Radio Service Provider", "Third Party Carrier".

CCS

Denotes a hundred call seconds, which is a standard unit of traffic load that is equal to 100 seconds of usage or capacity of a group of servers (e.g., trunks).

Channel(s)

Denotes an electrical or photonic, in the case of fiber optic-based transmission systems, communications path between two or more POTs.

Charge Number (CN)

Denotes the SS7 Out of Band Signaling parameter which is equivalent to the ten digit ANI telephone number.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Channelize

Denotes the process of multiplexing wider bandwidth or higher speed channels into narrower bandwidth or lower speed channels or vice versa.

Commercial Mobile Radio Service (CMRS) Provider

Denotes a common carrier as defined by the Federal Communications Commission subject to the Rules set forth in Section 332 of the Communications Act.

Communications System

Denotes channels and other facilities which are capable of communications between terminal equipment provided by other than the Company.

Connection to the PSTN

Any service or facility provided by a carrier that provides the purchaser of the service or facility with the ability to send calls to the PSTN, and to receive calls from the PSTN, based on one or more standard telephone numbers which are assigned by that carrier to the service or facility and which are listed in the database of the Number Portability Administration Center as assigned to that carrier.

(N)

(N)

Contract

Denotes the service agreement between a customer and the Company under which facilities for communication between specified locations, for designated periods, and for the use of the customer and the authorized users specifically named in the contract are furnished in accordance with the provisions of this Tariff.

Customer(s)

Denotes any individual, partnership, association, joint-stock company, trust, corporation, governmental entity or any other entity which subscribes to the services offered under this Tariff based on the Application of Tariff as set forth in 1.1, preceding.

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Demarcation Point

(M)

See "Point of Termination (POT)".

(M)

Direct-Trunked Transport (DTT)

(M)

The term "Direct Trunked Transport" refers to any service or arrangement provided by the Company that, in the context of the Company's network configuration, is functionally equivalent to the facilities and/or services normally referred to as "direct trunked transport" when purchased in connection with switched access services provided by an incumbent local exchange carrier. The term generally refers to transport dedicated to the use of a single Customer without switching at a tandem Switch, between the Serving Wire Center and an End Office, or between two Customer-designated End Offices. Depending on the specific arrangements provided to a customer, Direct Trunked Transport may consist of a connection between the Customer's location and/or the Serving Wire Center, and a Company tandem switch.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**End Office

(T)

The term "End Office" denotes the switching system office or serving wire center (or functionally equivalent or analogous facilities) from which End Users receive exchange service. By way of example, system(s) or facility (ies) in a carrier's network which host telephone numbers listed in the database of the Number Portability Administration Center as assigned to the carrier, constitute an "End Office."

(C)

(C)

End Office Access Service

(N)

For the purpose of this tariff, End Office Access Service shall mean: (1) The switching of access traffic at the carrier's end office switch and the delivery of such traffic to or from the called party's premises; (2) The routing of interexchange telecommunications traffic to or from the called party's premises, either directly or via contractual or other arrangements with an affiliated or unaffiliated entity, regardless of the specific functions provided or facilities used; or (3) Any functional equivalent of the incumbent local exchange carrier access service provided by Company including local switching, the carrier common line rate elements, and intrastate access services. End Office Access Service rate elements for Company includes any functionally equivalent access service. (4) The origination and termination of interexchange telecommunications traffic to any end user, either directly or via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected VoIP service, as defined in 47 U.S.C. § 153(25), or a non-interconnected VoIP service, as defined in 47 U.S.C. § 153(36), that does not itself seek to collect reciprocal compensation charges prescribed by this subpart for that traffic, regardless of the specific functions provided or facilities used.

(N)

End User (EU)

Denotes any customer of an intrastate telecommunications service that is not a carrier shall be deemed to be an "end user" when such carrier (other than the Company) uses a telecommunications service for administrative purposes. A person or entity other than an IC that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate or terminate on the premises of such reseller.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Entrance Facility (EF)

(M)

The term "Entrance Facility" refers to any service or arrangement provided by the Company that, in the context of the Company's network configuration, is functionally equivalent to facilities and/or services normally referred to as "entrance facilities" when purchased in connection with switched access services provided by an incumbent local exchange carrier. The term generally refers to transport from the Customer's point of demarcation to the Serving Wire Center (or functionally equivalent facility/location on the Company's network). Depending on the specific arrangements provided to a customer, an Entrance Facility may consist of a connection between the Customer's location and a Company tandem switch. Under this Tariff an Entrance Facility will normally be purchased in connection with Direct Trunked Transport.

(C-M)

(C-M)

Entry Switch

(M)

See "First Point of Switching".

Exchange

Denotes a unit generally smaller than a Local Access and Transport Area, established for the administration of communications service in a specified area which usually embraces a city, town, or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. The exchange may include any Extended Area Service (EAS) area that is an enlargement of a Company's exchange area to include nearby exchanges. One or more designated exchanges comprise a given Local Access and Transport Area.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Local Access and Transport Area (LATA)

Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes.

Local Calling Area

Denotes a geographical area, as defined in the Company's Local Exchange Services Catalog, in which an end user (Telephone Exchange Service subscriber) may complete a call without incurring MTS charges. This includes Extended Area Service Points.

Local Exchange Carrier (LEC)

Local Exchange Carrier (LEC) means any carrier that is engaged in the provision of telephone Exchange Service or Exchange Access. Such term does not include a carrier insofar as such carrier is engaged in the provision of a commercial mobile service under Section 332(c) of the Act, except to the extent that the FCC finds that such service should be included in the definition of such term.

Local Switch, Local Switching

“Local Switching” refers to any service or arrangement provided by the Company that is functionally equivalent to facilities and/or services normally referred to as “local switching” when purchased in connection with switched access services provided by an incumbent local exchange carrier. By way of illustration and not limitation, the term typically refers to Switching performed by a Local Exchange Carrier (including, without limitation, the Company) that routes traffic between an End User’s Connection to the PSTN and either (a) a Customer’s network (including by means of Company-provided connections between a Company Switch and the Customer’s network) or (b) a Tandem Switch provided by the Company or a third party.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Major Fraction Thereof

Denotes any period of time in excess of 1/2 of the stated amount of time. As an example, in considering a period of 24 hours, a major fraction thereof would be any period of time in excess of 12 hours exactly. Therefore, if a given service is interrupted for a period of thirty six hours and fifteen minutes, the customer would be given a credit allowance for two twenty four hour periods for a total of forty eight hours.

Message

Denotes a "call" as defined preceding.

Milliwatt (102 Type) Test Line

Denotes an arrangement in an end office which provides a 1004 Hz tone at 0 dBm0 for one-way transmission measurements towards the customer's premises from the Company end office.

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Serving Wire Center (SWC)

A facility or location on the Company's network that is capable of providing service to Customers in the geographic area in which a Customer's point of demarcation is located. The term is intended to include all locations on the Company's network that perform the functional equivalent of the functions performed by an incumbent local exchange carrier's serving wire center.

(C)

(C)

Signaling

Denotes the process of passing information, identifying the called subscriber or addressee and for supervising and controlling the connection once it has been established.

Signaling System 7 (SS7)

Denotes the signaling protocol.

Switch, Switching, Switched

The term "switching" refers to any technical means by which a communication is directed from an origination point or input source onwards towards a destination or output location. Switching may include (without limitation) either circuit or packet switching, and switching of communications individually (including, if applicable, individual packets) or in groups, depending on the technology deployed. A "switch" is a device, software, or any technical arrangement that performs or accomplishes switching. A communication is "switched" when it passes through a switch. By way of example but not limitation, any device which determines how to route calls based on the digits of a telephone number within the North American Numbering Plan is a "switch."

COMPETITIVE ACCESS SERVICE

2. GENERAL REGULATIONS**2.6 DEFINITIONS (Cont'd)**Tandem-Switched Transport (TST)

(M)

The term “Tandem Switched Transport” refers to any service or arrangement provided by the Company that, in the context of the Company’s network configuration, is functionally equivalent to facilities and/or services normally referred to as “tandem switched transport” when purchased in connection with switched access services provided by an incumbent local exchange carrier. By way of illustration and not limitation, the term typically refers to the service involved in transmitting traffic to or from a Customer between the Serving Wire Center an End Office Switch or between the End Office Switch and a Tandem Switch.

(C-M)

(C-M)

Tandem Switching

(N)

The term “Tandem Switching” refers to any service or arrangement provided by the Company that, in the context of the Company’s network configuration, is functionally equivalent to facilities and/or services normally referred to as “tandem switching” when purchased in connection with switched access services provided by an incumbent local exchange carrier. By way of illustration and not limitation, the term typically refers to Switching performed by a Local Exchange Carrier (including, without limitation, the Company) that routes traffic between an End Office and a Customer, or between two End Offices.

(N)

Terminating Direction

(M)

Denotes the use of Access Service for the completion of calls from a customer's premises to an end user's premises.

Third Party Carrier

A Local Exchange Carrier or CMRS provider other than the Company.
