ACCESS SERVICE

5. Access Ordering (Cont'd)

5.2 Ordering Requirements (Cont'd)

5.2.7 Internet Protocol Gateway Access Service (IPG) (Cont'd)

- that an order for Feature Group D Switched Access Service has been placed pursuant to the requirements specified in Section 5.2.1(E), preceding; and
- that the traffic consists of more than 10 percent interstate traffic.

5.2.8 Ethernet Transport Service (ETS)

When placing an order for ETS, the customer must specify:

- the customer designated premises;
- the type(s) of ETS Port interface(s);
- the speed for each ETS Port;
- the bandwidth capacity for each ETS Channel Termination (ETS CT), and the number and bandwidth capacity for each ETS Ethernet Virtual Connection (ETS EVC), ETS Extended Ethernet Virtual Connection (ETS E-EVC) and ETS Interconnected Ethernet Virtual Connections (ETS I-EVCs) associated with an ETS Port;
- options desired, if applicable;
- that the traffic consists of more than 10 percent intersate traffic.

When connecting to the ETS Port of another customer, the ordering customer must obtain authorization from the other customer.

(N)

(N)

ACCESS SERVICE5. Access Ordering (Cont'd)5.4 Charges Associated with Access Ordering (Cont'd)5.4.1 Access Order Charge (Cont'd)

The Access Order Charge does not apply (Cont'd)

- When the ETS Port Protection optional feature is ordered in conjunction with the ordering of the Primary ETS Basic Port as set forth in Section 16.4.4(A)(6)(e), following.
- When a customer requests a change of trunks from tandem-switched transport to direct-trunked transport or from direct-trunked transport to tandem-switched transport or requests to rearrange switched access service between lower capacity and higher capacity facilities (e.g. voice grade to/from DS1 or DS1 to/from DS3), providing:
 - the change is ordered no later than July 1, 1994 , and
 - the change is completed no later than October 1 , 1994, and
 - the orders to disconnect existing trunks and to connect the new trunks are placed at the same time, and
 - the number of installed trunks does not exceed the number of trunks disconnected. If the number of installed trunks exceeds the number of trunks disconnected, the Access Order Charge will apply unless the customer provides justification based upon standard engineering methods to show that the additional capacity is required to maintain the same level of service .
- When a customer requests a change of trunks from tandem-switched transport to direct-trunked transport or orders the disconnection of overprovisioned trunks, providing:
 - the change is ordered anytime between June 17, 1997 and December 31, 1998 and
 - the change is completed no later than March 31, 1999 and
 - the orders to disconnect existing trunks and to connect the new trunks are placed at the same time.

The Access Order Charge will be applied on a per order basis to each order received by the Telephone Company or copy of an order received by the Telephone Company pursuant to 5.3.1 preceding and 5.3.2 preceding, except by the Telephone Company applying the Interim NXX Translation charge, and is in addition to other applicable charges as set forth in this and other sections of this tariff.

The Access Order Charge will be applied on a per order basis for any change, rearrangement or addition to the delivery of signaling to an existing STP Port.

ACCESS SERVICE**8. Digital Subscriber Line Access Services**

Where offered under this tariff, Digital Subscriber Line Access Services provide transmission services over local exchange service facilities that can be used for simultaneous voice and data communications. Service is provided, where available, between customer designated premises and designated Telephone Company Serving Wire Centers.

8.1 Asymmetric Digital Subscriber Line Access Service

The Telephone Companies below will offer ADSL Access Service under the provisions specified in Section 8.1:

<u>Telephone Company</u>	<u>Study Area Code</u>	<u>Non-WRP/WPP</u>	<u>Wholesale Rate Plan (WRP)*</u>	<u>Wholesale Pricing Plan (WPP)**</u>
Chesnee Telephone Company, Inc. d/b/a Chesnee Communications	240515		X	
Gearheart Communications Company, Inc. d/b/a Coalfields Telephone Company	260408		X	
Skyline Telephone Membership Corp.	230501			X
South Central Rural Telephone Cooperative Corporation, Inc.	260418	X		
Yadkin Valley Telephone Membership Corporation	230511		X	

(T)

*DSL Access Services Wholesale Rate Plan (WRP) regulations are at Section 8.3 following. For the Telephone Companies above indicated as offering ADSL under the WRP, the WRP regulations at Section 8.3 apply in addition to the regulations herein at Section 8.1.

**DSL Access Services Wholesale Pricing Plan (WPP) regulations are at Section 8.4 following. For the Telephone Companies above indicated as offering ADSL under the WPP, the WPP regulations at Section 8.4 apply in addition to the regulations herein at Section 8.1.

(N)

(1) TDS Telecom Companies-Group D Public Packet Data Network rates for 12 issuing carriers are pooled and listed under "TDS Telecom Companies-Group D" in Section 17.

Transmittal No. 193

Issued: November 3, 2015

Effective: November 18, 2015

President
7852 Walker Drive, Greenbelt, Maryland 20770

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd) (T)(c) VLAN Service Establishment Charge (Cont'd) (T)

- i. establishment of a VLAN connection for a Telephone Company provided ETS EVC to another Telephone Company provided ETS EVC;
- ii. establishment of a VLAN connection for a Telephone Company provided ETS EVC to an EVC provided by another carrier to an end user outside of the service area of the Telephone Company

A separate Service Establishment Charge applies for each VLAN added to an EVC.

(d) VLAN Monthly Service Charge (T)

The VLAN Monthly Service Charge is a monthly recurring charge and applies to each individual VLAN provisioned. VLAN Monthly Service Charges apply to the following:

- i. where the Telephone Company provides both EVCs comprising a VLAN connection, a single Monthly Service Charge applies to the customer ordering the VLAN Service.
- ii. where the Telephone Company provides only one of the EVCs for a ETS VLAN connection, with another carrier providing the other EVC, a single Monthly Service Charge applies to the Telephone Company customer.

Transmittal No. 193

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(e) ETS Port Protection

Where suitable facilities exist, an ETS customer that requires stand-by capability between an ETS Basic Port at the Telephone Company's ETS SWC and its CDP may order the ETS Port Protection feature.

This feature establishes a stand-by ETS Basic Port, associated stand-by ETS CT and dedicated capacity to be activated should a failure occur in the Primary ETS Basic Port at the Telephone Company's ETS SWC or associated ETS CT between the CDP and the ETS SWC. The ETS switch will automatically redirect the ETS customer's traffic to the stand-by ETS Basic Port and associated stand-by ETS CT as well as to any EVC(s) (i.e., Intraswitch, Interswitch, Extended and/or Interconnected), assigned CoS levels, and, if applicable, the DSL Access Service Connection function, ETS MM-VCCs and ETS LBR-VCCs associated with the Primary ETS Basic Port. When ordered by the ETS customer, the Telephone Company's network will redirect traffic as described in IEEE 802.1D-2004, Section 17.

For purposes of this section, the Primary ETS Basic Port is the ETS Basic Port on which the customer orders the establishment of the ETS Port Protection feature. The stand-by ETS Basic Port provides the same functionality and bandwidth capacity as the Primary ETS Basic Port. The stand-by ETS CT provides the same functionality and bandwidth capacity as the associated ETS CT for the Primary ETS Basic Port.

(N)

(N)

Transmittal No. 193

Issued: November 3, 2015

Effective: November 18, 2015

President
7852 Walker Drive, Greenbelt, Maryland 20770

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(e) ETS Port Protection (Cont'd)

In addition to any applicable Access Order Charges specified in Section 5.4.1, preceding, monthly and nonrecurring charges apply for each ETS Port Protection feature established on an existing or new Primary ETS Basic Port. The monthly and nonrecurring charges are based upon the bandwidth capacity of the Primary ETS Basic Port and whether the CDP is located within 300 feet of the ETS SWC or more than 300 feet from the ETS SWC.

Rates and charges are specified in Section 17.4.8 following.

The ETS customer specifies on the order the Primary ETS Basic Port on which the ETS Port Protection feature is to be established. An Access Order Charge, per order, applies to establish the ETS Port Protection feature. When the ETS customer orders the ETS Port Protection feature at the same time as it orders the associated Primary ETS Basic Port, the Access Order Charge will not apply. The ETS customer may order the ETS Port Protection feature for multiple Primary ETS Basic Ports on a single Access Order, in which case only one Access Order Charge would apply for that order in addition to the applicable ETS Port Protection nonrecurring charge for each feature established on each Primary ETS Basic Port.

(N)

(N)

Transmittal No. 193

Issued: November 3, 2015

Effective: November 18, 2015

President
7852 Walker Drive, Greenbelt, Maryland 20770

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(e) ETS Port Protection (Cont'd)

The ETS Port Protection feature will automatically be discontinued when the associated Primary ETS Basic Port is disconnected. Neither the ETS Port Protection nonrecurring charge nor the Access Order Charge applies for the discontinuance of the ETS Port Protection feature.

When the ETS customer elects to increase the bandwidth capacity on an existing ETS Basic Port equipped with the ETS Port Protection feature, the ETS Design Change Charge, as described in Section 16.4.4(B)(2)(d), following, will apply per ETS Port Protection feature in lieu of the ETS Port Protection nonrecurring charge.

(N)

(N)

Transmittal No. 193

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(7) ETS Meet Point Interface (ETS-MPI)

(T)

The ETS Meet Point Interface (ETS-MPI) rate element is for a standard Ethernet defined interface between the SWC Ethernet switch and a customer location outside the Telephone Company's serving area. Customers located in the serving area of an adjacent telephone company may order an ETS-MPI from the Telephone Company for connection to the Ethernet facilities ordered by the customer from a telephone company with a serving area adjacent to that of the Telephone Company at the meet point between the two telephone companies. Interstate interexchange carriers may order an ETS-MPI for connection to Ethernet facilities ordered by the interexchange carrier from a telephone company with a serving area adjacent to that of the Telephone Company. ETS-MPIs will be billed by the Telephone Company subject to the Meet Point Billing provisions of Section 2.4.7(B) preceding. Standard Ethernet signaling protocols provided by the Telephone Company shall apply to the interface. The ETS-MPI rate element includes termination at the network side of the Telephone Company Ethernet switch and the Telephone Company's portion of the facilities up to the meet point.

An ETS-MPI comprises two elements:

ETS- MPI Channel Mileage Facility

ETS-MPI Channel Mileage Termination

The customer can connect multiple ETS Ports provided by the Telephone Company within its local exchange service area provided that the aggregate capacity of the ETS Ports does not exceed the capacity of the ETS-MPI ordered by the customer. Interface capability will be provided by the Telephone Company as part of the ETS-MPI Channel Termination.

Transmittal No. 193

President
7852 Walker Drive, Greenbelt, Maryland 20770

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(B) Types of Rates and Charges (Cont'd)(2) Nonrecurring Charges (Cont'd)(b) Service Rearrangements (Cont'd)

When the ETS customer elects to replace an existing ETS Port or ETS CT with a new ETS Port or ETS CT with a lower bandwidth capacity element than the existing ETS element being replaced, the request will be considered a discontinuance of service for the former capacity and start of service for the new capacity. Associated nonrecurring (i.e., installation) charges will apply, including any nonrecurring charges for optional features, and functions, if applicable. New minimum period requirements will be established for the new ETS elements. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued ETS elements.

(C)

(C)

(C)

(C)

When the ETS customer elects to replace an existing ETS Port or ETS CT with a new ETS Port or ETS CT with a higher bandwidth capacity element than the existing ETS element being replaced, the ETS Design Change Charge described in (d), below, will apply per new ETS Element. New minimum period requirements will be established for the higher capacity ETS elements. Any outstanding minimum period charges associated with the lower capacity ETS elements that would otherwise be applicable as described in this paragraph will be waived. Nonrecurring charges will also be waived.

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(B) Types of Rates and Charges (Cont'd)(2) Nonrecurring Charges (Cont'd)(b) Service Rearrangements (Cont'd)

When the ETS customer elects to replace an existing ETS Basic Port equipped with the ETS Port Protection feature with a new ETS Basic Port equipped with the ETS Port Protection feature with a higher bandwidth capacity than the existing ETS Basic Port being replaced, an ETS Design Change Charge as described in (d), below, will apply for the new ETS Basic Port as described in the preceding paragraph and a second ETS Design Change Charge will apply per ETS Basic Port Protection feature in lieu of the ETS Port Protection nonrecurring charge.

For example, if an ETS customer elected to replace its existing 50 Mbps ETS CT and 50 Mbps ETS Basic Port equipped with the ETS Port Protection feature with a new 100 Mbps ETS CT and 100 Mbps ETS Basic Port Protection feature, three ETS Design Change Charges would apply.

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(B) Types of Rates and Charges (Cont'd)(2) Nonrecurring Charges (Cont'd)(c) Moves (Cont'd)(ii) Moves to a Different Building Within
The same SWC

ETS Basic and Interconnection Ports, ETS EVCs, ETS E-EVCs and ETS I-EVCs are not impacted when an ETS customer moves its Point of Termination to a different building within the same SWC. The move of an ETS CT will be treated as a discontinuance and start of service. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new services. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

(iii) Moves to a Different Building in a
Different SWC

A move to a different building in a different SWC will be treated as a discontinuance and start of service of all associated ETS elements. Associated nonrecurring (i.e., installation) charges will apply, including the ETS Port Protection feature nonrecurring charge, if applicable. New minimum period requirements will be established for the new services. The ETS customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

Transmittal No. 193

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.5 ETS Term Discount Plan (Cont'd)

The monthly rates and term discount percentages for ETS service elements are set forth in Section 17, following. The ETS Term Discount Plan is only available from those Telephone Companies listed in the table at Section 16.4, preceding.

The term discount percentage for the customer's selected term commitment period applies to all committed ETS Ports provided within the Telephone Company's operating territory. The term discount percentage also applies to the following eligible ETS elements when these elements are provided within the Telephone Company's operating territory and associated with a committed ETS Port: 1) ETS Channel Terminations (ETS CTs); 2) ETS Ethernet Virtual Connections (ETS EVCs); 3) ETS Extended Ethernet Virtual Connections (ETS E-EVCs); 4) ETS-Interconnected Ethernet Virtual Connections (ETS I-EVCs); and 5) ETS MultiMedia Virtual Circuit Channels (ETS MM-VCCs); 6) ETS Low Bit Rate Virtual Circuit Channels (ETS LBR-VCCs); 7) ETS VLAN Service and 8) the ETS Port Protection feature. Since there are no bandwidth or in-service requirements for ETS CTs, ETS EVCs, ETS E-EVCs, ETS I-EVCs, ETS MM-VCCs, ETS LBR-VCCs, ETS VLAN Services and ETS Port Protection features associated with committed ETS Ports under the ETS Term Discount Plan, customer ordered disconnects of or changes to the number or bandwidth capacities for these elements do not affect the customer's ETS Term Discount Plan.

Transmittal No. 193

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.5 ETS Term Discount Plan (Cont'd)

The term discount percentage does not apply to: 1) ETS Ports ordered on a month-to-month basis; 2) ETS CTs, ETS EVCs and associated CoS levels, where applicable, ETS E-EVCs, ETS I-EVCs, ETS MM-VCCs, ETS LBR-VCCs, ETS VLAN Service and ETS Port Protection features that are not associated with a committed ETS Port; 3) ETS nonrecurring charges; 4) special access services connected to an ETS Interconnection Port.

(C)

(C)

Except as specified in (A)-(C), below, discontinuance charges will apply when the customer fails to satisfy the term commitment period or the in-service requirements for its committed ETS Ports.

The term discount percentage set forth in Section 17, following, will not be subject to Telephone Company initiated decreases during the customer's selected term commitment period.

If a term discount percentage increase occurs during the term of an existing ETS Term Discount Plan, the increased percentage will be applied automatically for the remainder of the customer's existing term commitment period.

At the end of the term commitment period, the customer may subscribe to a new ETS Term Discount Plan commitment period or revert to the undiscounted monthly rates and nonrecurring charges specified in Section 17, following. If the customer does not notify the Telephone Company in writing of its choice by the end of its existing term commitment period, the Telephone Company will automatically convert the customer's ETS billing to the undiscounted monthly rates and nonrecurring charges specified in Section 17, following. An Access Order Charge will not apply when a customer at the end of its existing term commitment period subscribes to a replacement ETS Term Discount Plan or reverts to month-to-month rates.
