## **INTRODUCTION AND SUMMARY**

### **Introduction**

The Illinois Consolidated Telephone Company hereby provides a Description and Justification for its limited Tariff Review Plan revisions to F.C.C. Tariff No. 2 along with supporting documentation. This information is being filed in accordance with the Commission's 2016 TRP Notices released March 16, 2016 and April 13, 2016 (DA 16-274 and DA 16-399 respectively) and fulfills the requirements established in Sections 61.41 through 61.49 of the Commission rules.

### **Description of the Illinois Consolidated Telephone Company Operations**

The Illinois Consolidated Telephone Company (ICTC) is now a price cap company pursuant to FCC Order DA 08-1026<sup>1</sup> that falls under Sections 61.41 through 61.49 of the Commission's Rules and relevant Commission Orders.<sup>2</sup> They provide local service, toll, private line services, access services, DSL, CLASS services, and other modern telecommunications services to their customers.

It provides local service, toll, private line services, access services, DSL, CLASS services, and other modern telecommunications services to its customers.

Headquartered in Mattoon, Illinois, Consolidated Communications provides customers in East Central Illinois access to the latest available technologies to provide the best possible service. Illinois Consolidated officially began business in 1894 as the Mattoon Telephone Company founded by Dr. Iverson A. Lumpkin marking a century of service to East Central Illinois customers.

ICTC, along with other subsidiaries of then-Consolidated Communications, merged with McLeodUSA in 1997. In July 2002, an investment group, headed by ICTC Chairman and President Richard A. Lumpkin entered into an agreement to purchase ICTC and the other related subsidiaries from McLeodUSA. The sale closed on December 31, 2002, and the company name was changed to Consolidated Communications, Inc.

In April 2004, Consolidated Communications completed the purchase of Texas-based TXU Communications, which is comprised of the former Lufkin-Conroe Telephone Exchange and Fort Bend Communications.

ICTC is a rural East Central Illinois telecommunications carrier providing service to approximately 50,000 customers. The 35 communities served include: Arcola, Arthur, Ashmore, Assumption, Atwood, Blue Mound, Charleston, Cowden, Edinburg, Effingham, Farmersville, Gays, Hillsboro, Humboldt, Irving, Kincaid, Litchfield, Mattoon, Morrisonville,

## **SECTION 2 OVERVIEW OF FILING PACKAGE**

### **Tariff Support Material**

This support material is submitted pursuant to Part 61.49 of the Federal Communications Commission (Commission) Rules and Regulations and the Order issued in WC Docket No. 16-71, July, 2016 Annual Access Charge Tariff Filings released March 16, 2016, and Tariff Review Plans issued in WC Docket No. 16-71, Material to be Filed in Support of 2016 Annual Access Tariff Filings, released April 13, 2016.

In addition to the description and justification contained in this volume, the following information is submitted to provide specific support data at the proposed tariff level of detail for the Consolidated local operating companies.

#### ***Description and Justification***

## **SECTION 3 TARIFF SUPPORT**

### **PCI Development**

In Accordance with the Commission's Rules, the PCI for each service basket were calculated as shown in Exhibit 2, RDEV-1, Page 1 of 3. A GDP-PI factor of 1.099% was used in calculating the PCI and is based on the percentage change in the Gross Domestic Product Price Index (GDP-PI) between the quarter ending December 31, 2014, and the corresponding quarter of the 2013 GDP-PI.

As directed by the Commission,<sup>3</sup> a workpaper identifying the transmittal or letter filing date where the last index changes were implemented for the price cap categories has been included in Exhibit 2, RDEV-1, Page 3. Also, pursuant to DA 08-1026,<sup>4</sup> Consolidated has excluded ICLS receipts from its CMT PCI calculations.

The prospective PCI values for the Special Access Basket are calculated using formula found in 61.45(b) of the Commission's rules. Calculation of PCI values is shown in Exhibit 2, RDEV-1, Page 1 of 3.

### **Determination of Exogenous Changes**

In Accordance with the Commission's Rules, Consolidated developed certain exogenous changes for inclusion in the price cap formula. These changes include: (1) North American Number Plan Administration; (2) Regulatory Fees; and (3) Telecommunications Relay Service Fees.

Exogenous cost changes were individually developed for each of the items outlined above, and in the aggregate for all changes. Consolidated used base year 2014 (time of its last tariff filing) to estimate exogenous costs embedded in rates. Consolidated has also normalized the exogenous amounts to reflect any shift in revenue growth. The result is that no exogenous adjustment is made if the support rate has not changed. In other words, the rate per line remains unchanged if the factor is unchanged. A brief description of each change follows and a summary of the exogenous changes is shown in Exhibit 2, RDEV-1.

---

<sup>3</sup> 2016 TRP Notice, *Supra.*, Paragraph 14.

<sup>4</sup> See, Order, Consolidated Communications Petition for Conversion to Price Cap Regulation and for Limited Waiver Relief, DA 08-1026 para 18.

## North American Numbering Plan Administration

On June 27, 2001, the Federal Communications Commission release an order approving the compensation plan for the North American Numbering Plan Administration (NANPA) for fiscal year 2001.<sup>5</sup> The Commission reviewed and accepted the North American Numbering Plan Administrator submission and ordered that a contribution factor of 0.0000387.<sup>6</sup> This factor is used as an estimate for application to end user revenues of each telecommunications carrier in the United States to fund the program for the 2015 fiscal year (July 2015 to June 2016). The impact of the NANPA support has been included as an exogenous cost in this filing as shown in Exhibit 2, RDEV-1.

## Regulatory Fees

Earlier Commission decisions<sup>7</sup> allow local exchange companies to reflect the impact of regulatory fees as an exogenous cost in annual price cap filings. The impact of regulatory fee changes for the July 2016 – June 2017 fiscal year was calculated using a factor of .00370 as prescribed in the Commission's *Regulatory Fee Order*,<sup>8</sup> and has been used as an estimate and included as an exogenous cost in this filing and is shown in Exhibit 2, RDEV-1.

## Telecommunications Relay Service

The Americans with Disabilities Act (ADA) required that all common carriers providing interstate voice telecommunications provide Telecommunications Relay Service (TRS) to customers effective July 26, 1993. In its *Third Report and Order* in CC Docket No. 90-571,<sup>9</sup> the Commission required that all common carriers providing interstate telecommunications services contribute to an interstate shared fund to support the TRS function. The impact of the TRS exogenous cost for this filing is calculated using the .01862 as estimated in the June 4, 2015 FCC submission by Rolka Loube Saltzer Assoc. (RLSA)<sup>10</sup> and is displayed on Exhibit 2, RDEV-1.

## Rate Detail and other Exhibits

Rate Detail files will be submitted as part of the Consolidated TRP submission to display demand quantities, current rates, proposed rates, and the associated quantities for the specific baskets. For CMT, proposed SLC rates are set at current capped levels pursuant to Consolidated's price cap order<sup>11</sup> and PCCC and CCL rates continue to be zero. For non-CMT baskets, PCI, SBI, and sub-index calculations are shown.

Consolidated also includes a revenue impact analysis in Exhibit 3, RDET1 to display overall impacts of any rate changes in the filing.

Additional Forms were added as a result of the November 18, 2011, release of the *USF/ICC Transformation Order*,<sup>12</sup> and are attached as exhibits to the filing as follows:

ARC Spreadsheet (CONFIDENTIAL) – The ARC Spreadsheet demonstrates the calculations necessary to arrive at an ARC rate for filing carriers. This is a new spreadsheet in the TRP created to comply with section 51.915(e) of the Commission's rules.<sup>13</sup> For CCTX, prior to 2014, the highest zone rates were used for this calculation. Using the highest zone rate, no rates exceeded the ceiling rate, so it was not necessary to break out the rates by zone. Subsequently, CCTX has had local rate increases, that now necessitate to view the calculations by base rate area and individual zones (1 through 5). The list of exchanges is amended in this filing for CCTX to facilitate this break out.

ARC True Up Spreadsheet (CONFIDENTIAL) – The ARC True up reconciles the 2014 projected ARCs to actual counts as an adjustment to Eligible Recovery.

Access Reduction Spreadsheet (CONFIDENTIAL) – The Access Reduction spreadsheet identifies the rates that are required to be reduced pursuant to section 51.907(b)-(g) of the Commission's rules and calculates the amount of the reductions. The spreadsheets also show the calculation of a price cap ILEC's eligible recovery pursuant to section 51.915(d) of the Commission's rules. This is a new spreadsheet in the TRP created to comply with sections 51.907(b)-(g) and 51.915(d) of the Commission's rules.<sup>14</sup>

The Access Reduction Spreadsheet establishes the rates in effect as of December 29, 2011 for both its intrastate and interstate components (see columns A and B). To determine "billed" and "collected" revenue, Consolidated used the following review and analyses:

### Billed Revenue

To determine the FY2011 revenue, Consolidated downloaded monthly billing details for the period of 10/1/2010 through 9/30/2011. Using the monthly reports, Consolidated performed

---

<sup>11</sup> See, Order, Consolidated Communications Petition for Conversion to Price Cap Regulation and for Limited Waiver Relief, DA 08-1026 para 17.

<sup>12</sup> See *USF/ICC Transformation Order*, 26 FCC Rcd at 17934-35, para. 801 (although many of the switched access rate elements are subject to the transition adopted, other rates are not being specifically reduced at this time.) See also *id.* At 18109-115, paras. 1297-1314 (seeking comment on the appropriate transition for rate elements not specifically addressed in the Order).

<sup>13</sup> 47 C.F.R. §51.915(e)

<sup>14</sup> *Id.* At §§ 51.907(b)-(g), 51.915(d).

several data filters to extrapolate demand and revenue by carrier, jurisdiction and rate element. Consolidated filtered out any prior period billing from these data exports. The filtered data was then copied into the fiscal year summary.

### Collected Revenue

To determine the actual collected revenue as of March 31, 2012, Consolidated evaluated the Carrier Aging Report as of April 1, 2012. Using this report Consolidated was able to identify any carrier with unpaid balances of that date. From there, Consolidated reviewed the actual carrier bills to determine to any unpaid balance that was specific to the fiscal year billed revenue for the intrastate jurisdiction. To achieve this result, a monthly CABS report was reviewed to determine what invoices, between the bill period October 2010 to September 2011, had an unpaid balance as of March 31, 2012. The CABS report is automatically generated by the billing system, and lists all the balances due by carrier and by invoice month. The report from the April 2012 billing was the source of the unpaid balance analysis. The report contains a column that has the original billed amount, and another column showing the current unpaid balance for that invoice. Using the two columns a percentage of revenues collected compared to revenues billed was calculated. Consolidated excluded all Late Payment Charges (LPC) in the analysis.

Consolidated then developed a percentage split between originating and terminating collected revenues based on relative intrastate terminating MOU demand divided by the total intrastate MOU demand (both originating and terminating) for the period. Making an assessment of “collected only” terminating revenues to develop fiscal year 2011 collected intrastate terminating demand (see column D), Consolidated calculates the price out of intrastate terminating demand using both intrastate and interstate rates (see columns E and F). A calculation is then made to determine the amount equal to 50% of the difference between the price out columns (see column G). Proposed intrastate terminating rates are then input (see column H). The rates highlighted in green will be changed in the company’s intrastate access tariffs. Using the input proposed rates, a new price out is calculated using intrastate terminating demand (see column I). This new price out is compared to the price out using the original rates (column E) to calculate the difference between the original and proposed revenues (column J). The total of Column J is then reconciled to the required price out (column G) to ensure that the 50% reduction threshold is met.

Reciprocal Compensation Spreadsheet (CONFIDENTIAL) – The Reciprocal Compensation spreadsheet demonstrates the calculations necessary to comply with section 51.705 of the Commission’s rules and calculates the eligible recovery for reciprocal compensation rate reductions pursuant to section 51.915(d). This is a new spreadsheet in the TRP created to comply with section 51.705 and 51.915(d) of the Commission’s rules.<sup>15</sup>

Eligible Recovery Spreadsheet - The Eligible recovery sheet is created to summarize eligible recovery outputs by operating company from the access reduction, reciprocal compensation, and TRP exogenous forms.

Summary Eligible Recovery Sheet – This sheet is created for FCC tracking of eligible revenue and lines over the 2 year period of the order.

---

<sup>15</sup> *Id.* At §§ 51.705, 51.915(d).

**Tariff Rate Comparison (CONFIDENTIAL) – The Tariff Rate Comparison sheet is created to show the implementation of ARC rates in exchanges in relation to the FCC revenue benchmark restrictions in the ICC Transformation Order.**
