Effective: July 30, 2016

ACCESS SERVICE

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D.)

3.2 Rate Categories, (Cont'd.)

3.2.1 Carrier Common Line

The Carrier Common Line rate category includes the charges related to the use of common lines by Customers and end users for interstate access, and the terminations in the local end office of end user lines.

3.2.2 End Office Local Switching

The Local Switching rate category establishes the charges related to the use of local office switching equipment, the terminations of calls at Company Intercept Operators or recordings, the use of common trunk port, the use of Signaling Transfer Point (STP), and the SS7 signaling function between the end office and the STP. End Office Local Switching may include any functional equivalent of the incumbent local exchange carrier End Office Local Switching access service provided by the Company via analogous facilities.

(N)
|
|
(N)

Where local end offices are appropriately equipped, international dialing may be provided. International dialing provides the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a standard equipped end office.

3.2.3 Transport

The Transport rate category provides the transmission and transport termination facilities between the Customer premises and the switch(es) where the Customer traffic is switched to originate or terminate its communications. Transport may include any functional equivalent of the incumbent local exchange carrier Transport access service provided by the Company via analogous facilities. The rate components may include:

(N)
|
(N)

- Transport - Termination
- Transport - Facility
- Interconnection Charge

The Company will work cooperatively with the Customer in determining (1) whether the service is to be directly routed to an end office switch or through an access tandem switch, and (2) the directionality of the service.

Issued: July 15, 2016

Transmittal No. 2

Effective: July 30, 2016

ACCESS SERVICE

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D.)

3.2 Rate Categories, (Cont'd.)

3.2.3 Transport, (Cont'd.)

A. Transmission Paths

The number of Transport transmission paths provided is based on the Customer's order and is determined by the Company.

B. Interconnection

Interconnection of non-Company switched access transport facilities is available between an end office and a Customer point of presence where such facilities are provided.

3.2.4 Tandem Switching

The Tandem Switching category establishes the charges associated with "switching" the call through the Company's switching office from the "incoming" trunk group to the "outgoing" trunk group.

Tandem Switching charges apply when the Company passes a call between the Customer and another carrier, including CMRS providers and Interconnected Wholesale providers. Tandem switching charges may include charges for multiplexing and associated trunk ports, where applicable. Tandem Switching may include any functional equivalent of the incumbent local exchange carrier Tandem Switching access service provided by the Company via analogous facilities.

|
(N)

3.2.5 8XX Data Base Query Service

8XX Data Base Query Service is a service offering utilizing originating trunk side Switched Access Service. When an 8XX + NXX + XXXX call is originated by an end user, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location (Carrier identification Code or destination routing number) to which the call is to be routed. This service is billed based on a per query charge.

3.2.6 Local Routing Number (LRN) Query Service of Last Resort

LRN Query Service of Last Resort can be used when a call is routed to the Company's local or tandem switching office where the dialed telephone number is portable and a query has not been performed to identify the correct Carrier for routing of the call. A LRN query will be performed and the call will be re-routed to the correct Carrier. This service charge is a per query charge and will be billed to the Carrier originating the call.

Issued: July 15, 2016

Transmittal No. 2

Effective: July 30, 2016

ACCESS SERVICE

SECTION 4 - RATES AND CHARGES, (CONT'D.)

4.1 Switched Access Service, (Cont'd.)

4.1.5 Local Switching

A. The Local Switching rate is applied per minute of use rate.

<u>Locality</u>	<u>Local Switching Originating Per Minute of Use</u>	<u>Local Switching Terminating Per Minute of Use</u>
CO, Colorado Springs	\$0.00197400	\$0.0007000 (R)
CO, Denver	\$0.00197400	\$0.0007000 (R)

B. Common Trunk Port

The Common Trunk Port (CTP) rate element is applied per minute of use when traffic is delivered from an access tandem for local switching or switched from a host office to a remote end office.

<u>Locality</u>	<u>CTP Originating Per Minute of Use</u>	<u>CTP Terminating Per Minute of Use</u>
CO, Colorado Springs	\$0.00074700	\$0.0000000 (R)
CO, Denver	\$0.00074700	\$0.0000000 (R)
