## INTERSTATE INTRALATA and CORRIDOR MESSAGE TELECOMMUNICATIONS SERVICE

2. REGULATIONS (Cont'd)2.8 Rate Determination (Cont'd)2.8.4 Timing of Messages

Chargeable time includes the Initial Minute plus the Additional Minutes, if any, and is determined as follows:

- (A) When a message is established in one rate period and ends in another, the rate in effect in each rate period applies to the portion of the message occurring within that rate period. In the event that a minute of use is split between two rate periods, the rate in effect at the start of that minute applies.
- (B) On Station-to-Station messages, chargeable time begins when connection is established between the calling Station and the called Station.
- (C) Chargeable time ends when the calling Station "hangs up". If the called Station "hangs up" but the calling Station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the operator.
- (D) Chargeable time does not include time lost because of service faults or defects that are reported to the Telephone Company.
- (E) When Exchange telephone service used for IMTS or CMTS is directly connected (i.e., not connected through a Multiline Terminating System) at a Customer's Premises to a Communications System, chargeable time for all classes of service begins when a call from the telecommunications network terminates in or passes through the first Multiline Terminating System or terminal equipment on that Communications System. It is the Customer's responsibility to furnish appropriate answer supervision to the point of connection with the Exchange telephone service so that chargeable time may begin.
- (F) A Service Charge will apply in addition to Initial Minute and Additional Minutes chargeable time in accordance with Section 2.10.8(B)(3) following.
- (G) A Payphone Use Fee will also apply in accordance with Section 2.10.8(B)(5) following.
