- 1.1 This tariff contains regulations, rates and charges applicable to the provision of Switched Access, Special Access, Digital Subscriber Line Access Service, Public Packet Data Network, and other miscellaneous services, hereinafter referred to collectively as service(s). These services are provided to customers by the Issuing Carriers of this tariff, hereinafter the Telephone Company. (N)  
(N)

- 1.2 The provision of such services by the Telephone Company as set forth in this tariff does not constitute a joint undertaking with the customer for the furnishing of any service.

- 1.3 All rates and charges set forth in this tariff provide for the furnishing of service where suitable facilities are available, and for installation in normal locations under normal working conditions, as determined by the Telephone Company. When special construction of access facilities is involved or when expedited or other abnormal installation is required, additional charges may apply and such charges based on the estimated costs associated with such special construction or installation will be developed as occasion requires. Special construction is involved when, at the request of a customer or group of customers, the Telephone Company constructs access facilities in order to provide service, and conditions, such as one or more of the following are present:

- (a) There is no requirement for the facilities so constructed, other than to furnish the requested service.
- (b) The facilities are of a type, or over a routing, other than that which the Telephone Company would normally utilize.
- (c) The Telephone Company constructs a greater quantity of facilities than it would otherwise construct in order to fulfill the initial requirements of service.
- (d) The Telephone Company expedites construction at greater expense than would otherwise be incurred.
- (e) The Telephone Company constructs temporary facilities to provide service for the period during which permanent facilities are under construction.

Special construction, when ordered by the customer will be provided and filed in this tariff.

\* This flat rated charge was calculated based upon a 50/50 split between originating and terminating. The FCC in their FCC 11-161 ICC Transformation Order in Section 51.907(d)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate, a single flat rate is generated for billing purposes.
