6. Switched Access Service (Cont'd)**6.2 Rate Categories (Cont'd)****6.2.1 Local Transport Description (Cont'd)****(C) Tandem-Switched Transport**

The Tandem-Switched Transport Rate is assessed upon customers for the use of transport between an end office and a Telephone Company access tandem. The Tandem-Switched Transport Rate may also be assessed for transport between a host end office and a remote end office. Dedicated transport consists of circuits dedicated to the use of a single customer from the serving wire center to the Telephone Company's access tandem and Tandem Switched Transport consists of circuits used in common by multiple customers from the Telephone Company's access tandem to an end office. For examples of Tandem Switched Transport see Section 2.4.5 preceding. The Tandem-Switched Transport Rate includes four sub-elements, a Tandem-Switched Transport – Facility, a Tandem-Switched Transport-Termination, a Tandem Switching Rate, and a Shared Multiplexing rate.
