ACCESS SERVICE

6. SWITCHED ACCESS SERVICE

6.7 RATE REGULATIONS

6.7.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES (Cont'd)

O. Entrance Facility

The Entrance Facility monthly rate is assessed based on the type of facility provided, Voice Grade, DS1 or DS3. When Lineside Switched Access Service is provided, the Voice Grade Entrance Facility rate is assessed for each Lineside service provided, unless the customer requests a DS1 or DS3 Entrance Facility. The Entrance Facility rate is assessed even when the customer's premises and the SWC are located in the same building. The Entrance Facility rate is in addition to the rates assessed for DTT and TST. Rates and charges are set forth in 6.8, following.

P. Direct-Trunked Transport

1. Except as set forth in 2. and 3., following, for each DTT facility provided, Voice Grade, DS1 or DS3, a fixed monthly rate, per mile band, and a monthly rate per mile is assessed. The DTT rates are in addition to the Entrance Facility rate. Mileage measurement is described in 6.7.11, following. Rates and charges are set forth in 6.8, following.

2. When Lineside Switched Access service is provided, the Voice Grade DTT rates are assessed for each Lineside service, unless the customer requests a DS1 or DS3 facility. DTT rates are assessed between the SWC of the customer's premises and the dial tone office. When traffic is terminated in an end office which is not the dial tone office, Tandem Transmission rates, as set forth in R., following, are assessed between the dial tone office and the end office where the traffic terminates. The Tandem Transmission rates are in addition to the DTT rates. Tandem Switching rates will not be assessed.

3. When the customer orders DTT to a remote switching system or module (RSS or RSM), DTT rates are assessed between the SWC and the host office and Tandem Transmission rates, as set forth in Q., following, are assessed between the host and the RSS or RSM. In these instances the Tandem Transmission rates will use the Terminating-Tandem 3rd Party rates when the RSS or RSM is not owned by a CenturyLink ILEC or Terminating Tandem to End Office when the RSS or RSM is owned by a CenturyLink ILEC. Mileage measurement rules are set forth in 6.7.11, following. Tandem Switching rates will not be assessed.

|  
(C)

## ACCESS SERVICE

## 6. SWITCHED ACCESS SERVICE

## 6.7 RATE REGULATIONS

## 6.7.11 MILEAGE MEASUREMENT (Cont'd)

Exceptions to the mileage measurement rules are as follows:

- A. Mileage for Lineside Switched Access provided by DTT in the originating direction is calculated on an airline basis, using the V & H coordinates method, between the end office switch where the Lineside switching dial-tone is provided and the customer's serving wire center for the Switched Access Service provided.

Mileage for Lineside Switched Access provided by DTT in the terminating direction is calculated on an airline basis, using V & H coordinates method, between the end office switch where the Lineside switching dial-tone is provided and the customer's serving wire center when traffic is terminated in the dial-tone office or an end office without measurement capability. When traffic is terminated in an end office with measurement capability and is not the dial-tone office, Tandem Transmission rates are applicable as set forth in 6.7.1, preceding, and mileage will be calculated between the dial-tone office and the end office where the traffic terminates for the application of Tandem Transmission rates. The Tandem Transmission rates are in addition to the DTT rates.

- B. When the customer orders access service via DTT to a host for access to a remote switching system or module (RSS or RSM), both DTT and Tandem Transmission rates apply as set forth in 6.7.1, preceding. Mileage for DTT is calculated on an airline basis between the SWC of the customer's premises or Company Hub, whichever is applicable, and the host office for the RSS or RSM. Mileage for Tandem Transmission is calculated between the host office and the RSS or RSM.

When the customer orders TST from an access tandem to a host for access to a RSS or RSM, mileage for Tandem Transmission is calculated between the access tandem and the host office and then a second mileage measurement is calculated between the host office and the RSS or RSM. In instances where TST is ordered from a CenturyLink Operating Company (CLOC) access tandem, the Tandem Transmission Terminating-Tandem End Office rates will apply. In instances where TST is ordered from a non-CLOC access tandem, the Tandem Transmission Terminating – Tandem 3rd Party rates will apply.

- Originating	0.000747
- Terminating	0.000000
	<b>MONTHLY RATE</b>
3. End Office Dedicated Trunk Port,[2] Per Trunk	\$3.00

[1] *DID* available only in ID (Spokane LATA), OR, WA.

[2] The End Office Dedicated Trunk Port rate was calculated based upon a 50/50 split between originating and terminating traffic using this flat-rated port. The FCC in their FCC 11-161 ICC Transformation order in section 51.907(d)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate a single flat rate is generated for billing purposes. The Originating portion of the charge is \$3.00.
