Transmittal No. 13

Issued: July 14, 2017

by: Gordon P. Williams, Jr. – Senior Vice President & General Counsel  
2323 Grand Blvd., Suite 925  
Kansas City, MO 64108

Effective: July 29, 2017

SECTION 5 - SWITCHED ACCESS RATES, (CONT'D)

5.2 Rate Categories

There are three rate categories which apply to Switched Access Service:

- End Office Switching (includes Common Line and Switched Transport)
- Toll-Free 8XX Data Base Access Service
- Optional Features

5.2.1 End Office Switching

The Company combines traditional per minute switched access rate elements into a single composite per minute rate element. The composite rate element includes the following access components:

A. Common Line

The Common Line component is related to the use of Company-provided end user common lines, and the terminations in the end office of end user lines, by customers and end users for intrastate access.

B. Switched Transport

The Switched Transport component is related to the transmission and tandem switching facilities between the customer designated premises and the end office switch(es) where the customer's traffic is switched to originate or terminate the customer's communications. The Switched Transport component also includes transport between an end office which serves as host for a remote switching system or module (RSS or RSM) and the RSS or RSM or its equivalent.

The terminating switched transport rate schedules are bifurcated into "3<sup>rd</sup> Party" and "End Office" rates. The Company bills the End Office terminating switched transport rates, in accordance with Commission Rules 51.907(g)(2) and 51.907(g), for "terminating traffic traversing a tandem switch that the terminating carrier or its affiliates owns." All other terminating switched transport traffic is billed the 3<sup>rd</sup> Party terminating switched transport rates. (N)

C. End Office Switching

The End Office Switching component is related to the use of end office switching equipment, the terminations of calls at Company Intercept Operators or recordings, the Signaling Transfer Point (STP) costs, and the SS7 signaling function between the end office and the STP.
