5.2.1 Tandem Switching Access Service (Cont'd.)

B. Indirect Connection (Originating and Terminating)

Tandem Switching Access Service – Indirect Connection is an access service providing transmission and tandem switching between the Customer designated premises and the Company switch(es) as well as transport to or from the Customer's tandem provider, where the Customer's traffic is switched from or to an entity other than an End User for purposes of originating or terminating the Customer's communications. The following rate elements will apply to Tandem Switching Access Service – Indirect Connection: Access Tandem Switching, Tandem-Switched Transport Termination and Common Multiplexing, and Tandem-Switched Transport –Facility. For originating 8YY calls, the Toll-Free 8YY Data Base Query charge will also apply. The third-party access tandem provider may apply additional charges for switching and transport functions performed by that provider. The application of access charges to Tandem Switching Access Service is illustrated in diagrams at the end of this Section 5.

C. Rate Application

The terminating Tandem-Switched Transport rate schedules are bifurcated into "Standard" and "Affil PCL" rates. The Affil PCL terminating Tandem-Switched Transport rates¹ apply to terminating traffic traversing a Company tandem switch when the terminating carrier is a Company-affiliated price cap carrier. All other terminating Tandem-Switched Transport traffic is subject to the Standard terminating Tandem-Switched Transport rates.²

¹ Affil PCL terminating Tandem-Switched Transport rates are benchmarked to the price cap LEC rates which are subject to the step down specified in Commission Rules 51.907(g)(2) and 51.907(g).

² Standard terminating Tandem-Switched Transport rates are benchmarked to the price cap LEC rates which are not subject to the step down specified in Commission Rules 51.907(g)(2) and 51.907(g).
