4815-2153-9659v.2

SECTION 13 - SWITCHED ACCESS SERVICE (CONT.)**13.2 Provision and Description of Switched Access Service Agreements (Con't)****13.2.1 Feature Group D (FGD) Access (Cont.)**

When the 101-XXXX Access Code is used, FGD switching also provides for dialing the digit 0 for access to the Customer's operator, 911 for access to the Company's emergency service, or the end-of-dialing digit (#) for cut-through access to the Customer's Premises.

In addition, End Users may originate calls by dialing the 950-XXXX Access Code specific to a particular Interexchange Carrier, provided that the Interexchange Carrier has subscribed to the Company's Feature Group D with 950 Access Common Switching Optional Feature. If the End User is presubscribed to that Interexchange Carrier, no Access Code is necessary.

13.2.2 Manner of Provision

Trunks used for Switched Access Service may be configured for one-way (either originating only or terminating only) or for two-way directionality. It is the Customer's responsibility to order a sufficient number of trunks of each type in order to meet its desired grade of service objective. At the Customer's request, the Company will assist the Customer in sizing Switched Access Trunk groups.

13.2.3 Serving Arrangements

The following serving arrangements may apply to Switched Access Service, depending on which the Customer uses:

13.2.3.1 Direct Connect Switched Access Service.

Direct Connect Service is service in which the End User obtains a Connection to the PSTN from the Company, and the Customer connects with the Company at a point of interconnection located within the same local access and transport area in which the End User obtains its Connection to the PSTN from the Company. Unless the Customer chooses to provide its own facilities for connection, the Company will provide a connection (subject to the availability of facilities, as specified in Application of Tariff, Section 2.4.2, and Special Construction Section 11, above) between the Customer's Premises and the relevant Company switch. This transmission path will be dedicated to the use of a single Customer. Customer may specify a DS3 or DS1 (or functional equivalent) connection. Higher or lower data rates may be available on a Special Construction basis as provided in Section 11 of this Tariff.

(T)

Direct Connect Service is comprised of: (i) charges for Entrance Facilities and DS3 (or functional equivalent) Switch Ports (at the customer side of the end office switch); (ii) if applicable, a charge for multiplexing traffic from one data rate to another; (iii) a per-minute local switching charge; and (v) where applicable, a toll-free database query charge (for outbound toll-free calls where the Company provides the query function). These charges are set out in Section 14.12.8 of this Tariff.
