## ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)5.2 Access Order (Cont'd)

Special Access Non-Competitive End User Channel Terminations (EUCTs) (C)  
may be ordered for connection with Switched Access Service at Company (C)  
designated WATS Serving Offices (WSOs) and may be ordered separately (C)  
by a customer other than the customer which orders the Switched Access  
Service. For this Special Access Non-Competitive EUCT the customer must (C)  
also specify the type of calling (i.e., originating only or terminating only) for  
which the service is to be provided. Additionally, when the necessary  
screening functions are not provided at the wire center which serves the  
customer's originating or terminating premises, the Company will provide the (C)  
service to the nearest wire center where capacity exists. In these  
circumstances, the customer will be so notified and the order will be changed  
to designate the appropriate premises. No charge will apply for the change.

When Switched Access Service is ordered in trunks, the trunks may be  
determined by the customer in the following manner. For each day the  
customer shall determine the highest number of trunks in use for a single  
hour. The customer shall, for the same hour period (i.e., busy hour), pick the  
twenty consecutive business days in a calendar year which add up to the  
largest number of trunks in use. The customer shall then determine the  
average busy hour trunks by dividing the largest number of trunks in use  
figure, for the same hour period, for the consecutive twenty business day  
period by 20. This computation shall be performed for each end office  
and/or access tandem the customer wishes to serve.

Where the Special Access Service is exempt from the Special Access  
Surcharge as set forth in 7.4.2 following, the customer shall furnish with the  
order the certification as set forth in that section.

(C) Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Company personnel of the service ordered and the requested changes to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes include such things as the addition or deletion of optional features or functions or a change in the type of Transport Termination (Switched Access only), type of channel interface, type of Interface Group or technical specification package. Design changes do not include a change of customer premises, end user premises, end office switch, Feature Group type or Special Access Non-Competitive EUCT type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied. (C)

\* This flat rated charge was calculated based upon a 50/50 split between originating and terminating. The FCC in their FCC 11-161 ICC Transformation order in Section 51.907(D)(1) allowed Price Cap Carriers to use an equal split to divide the charge between originating and terminating elements. When the terminating portion of the rate is reduced and then combined with the originating portion of the rate, a single flat rate is generated for billing purposes.

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types

Each type of Special Access Channel has its own characteristics. All are subdivided by one or more of the following:

(C)

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

The Customer can order a basic channel and select from a list of available transmission parameters, interface combinations, and optional features to design a channel which meets the Customer's specific communications needs.

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use.

7.1.2 Rate Categories

(D)

The basic rate elements which apply to Special Access Service in this tariff are as follows:

- Non-Competitive End User Channel Terminations (EUCTs)  
(described in 7.1.2(A) following)
- Optional Features and Functions

(C)

(D)

(C)

(A) Non-Competitive End User Channel Terminations (EUCTs)

(C)

The Non-Competitive EUCT rate category provides for the communications path between a customer designated premises and the serving wire center or WATS Serving Office of that premises. Included as part of the Non-Competitive EUCT is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Non-Competitive EUCT charge applies per customer designated premises at which the channel is terminated. Non-Competitive EUCT charges for DS1 and DS3 High Capacity Services may vary based on distance, as set forth in 7.5.8(A) following. Special Access Service used in connection with Switched Access service is provided as set forth in Section 6.1.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.3 Service Configurations

There are three types of service configurations over which Special Access Services are provided: two-point service, multipoint service and extension service.

(A) Two-Point Service

A two-point service connects two customer designated premises, either on a directly connected basis or through a Hub where multiplexing functions are performed, or a customer designated premises and a WATS Serving Office. All types of Special Access Service may be provided as two-point service.

Applicable rate elements in this tariff are:

- Non-Competitive End User Channel Terminations (EUCTs)
- Optional Features and Functions (when applicable)

In addition, a Special Access Surcharge as set forth in 7.4.2 following may be applicable.

The following diagram depicts a two-point Voice Grade service connecting two customer designated premises located 15 miles apart. The service is provided with C-Type Conditioning. The rate elements found in this tariff are the End User Channel Termination services in a Serving Wire Center designated as Non-Competitive.

- C-Type Conditioning Optional Feature

(B) Multipoint Service

Multipoint service connects three or more customer designated premises through a Company Hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link which is not included in this tariff is a channel between Hubs (i.e., bridging locations). Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.2 following.

(C)

(C)

(C)

Multipoint service utilizing a customized technical specifications package as set forth in 7.2 following will be provided when technically possible. If the Company determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

(C)

When ordering, the customer will specify the desired bridging Hub(s) selected from the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. This tariff identifies the type(s) of bridging functions which are available and the serving wire centers at which they are available.

(C) Extension Service

Special Access Service utilized for connection with Feature Group A Switched Access Service is available with extensions, i.e., additional terminations of the service at different building(s) in the same or a different exchange. Feature Group A extensions within the same exchange are charged for under the Company's local and/or general exchange service tariffs. Feature Group A extensions in different exchanges and Voice Grade extensions in the same or different exchanges are charged for as Special Access Service. The rate elements which apply are: the Voice Grade Non-Competitive EUCT (C) and Voice Bridging, if applicable. All appropriate monthly rates and (C) nonrecurring charges for the Non-Competitive EUCTs are set forth in (C) 7.5.2 following will apply. Such extensions are ordered as set forth in 5.2 preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.4 Alternate Use

Alternate use occurs when a Customer uses a service for different types of transmission at different times. The Customer may transfer from one type of operation to another at will. A Customer may use transmission services in any privately beneficial way but, where technical or engineering changes are required to effectuate an alternate use, charges set forth in Section 13 of this tariff may be applicable.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12, Specialized Service or Arrangements. The customer will pay the stated tariff rates for the Access Service rate elements for the service ordered (i.e., Non-Competitive End User Channel Terminations (EUCTs) and Optional Features [if any]).

(C)  
(C)

Alternate uses will be allowed provided that such use meets the technical protection parameters as set forth in Section 7.2.

7.1.5 Special Facilities Routing

A customer may request that the facilities used to provide Special Access Service be specially routed. The regulations, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in Section 11 following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.6 Design Layout Report

At the request of the customer, the Company will provide to the customer the make-up of the facilities and services provided under this tariff as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed. (C)

7.1.7 Acceptance Testing

At no additional charge, the Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters: (C)

(A) For Voice Grade (VG) Non-Competitive End User Channel Terminations (EUCTs): loss, 3-tone slope, d.c. continuity and operational signaling, where technically appropriate. Where a four-wire voice transmission interface provides two-wire voice transmission, (i.e., there is a four-wire to two-wire conversion), balance (equal level echo path loss) will also be tested. Additionally, C-notched noise and C-message noise tests will be provided where technically appropriate, as well as frequency response, harmonic distortion, phase jitter, impulse noise and delay distortion for all analog facilities. (C)

(B) All other Special Access Non-Competitive EUCTs will be tested to the performance parameters specified for the individual services. (C)

Additional tests may be ordered as set forth in 13.1.10 following. Charges for these additional tests are set forth in 13.2 and 13.3.1(A).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 High Capacity Service(A) Basic Channel Description

- (1) A High Capacity Non-Competitive End User Channel Termination (EUCT) is a channel for the transmission of 1.544 or 44.736 Mbps isochronous serial data transport signals. The actual bit rate and framing format is a function of the channel interface selected by the customer. High capacity services are provided between customer designated premises through serving wire centers or between a customer designated premises and a Telephone Company hub. (C)  
(C)
- The Non-Competitive EUCT rate element for DS1 and DS3 services may vary based on distance. The mileage used to determine the monthly rate for channel terminations located outside a Company Central Office is the airline distance between the customer's designated premises and the Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Company offices for such purposes. (C)  
(C)  
(C)
- (2) Fractional DS1 Non-Competitive EUCTs provide simultaneous, two-way transmission at contiguous bit rates of 128.0, 256.0, and 384.0 kbps. Fractional DS1 channels operate over the combined bandwidth of adjacent channels to create a contiguous bit rate. (C)

Due to technical limitations associated with the provision of Fractional DS1, this service will be offered only in central offices where a compatible channel bank exists and the distance between the central office and the customer designated premises is less than or equal to 12,000 feet.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 Special Access Service Utilized for Connection with Switched Access Service (Cont'd)(B) WATS Special Access Circuit (WSAC)

A WATS Special Access Circuit (WSAC) is comprised of a Non-Competitive End User Channel Termination (EUCT) between the customer's end user serving wire center and the customer's end user premises as specified in Section 7.1.2(A). (C)  
(C)

The transmission path is offered as either effective two-wire, effective four-wire, or a high capacity access connection. This service is provided with rotary dial or dual tone multi-frequency address signaling, and with either loop start or ground start signaling. Additionally, other optional features such as improved return loss can be provided. (C)

(C) Voice Grade Service Restrictions

When a WSAC, as described in (B) preceding, is used for multi-jurisdictional access, and when the Company's intrastate tariff provides for customer billing for these facilities, the Company will exempt the customer from the intrastate charges related to the WSAC. All calls carried over a special access line used in conjunction with common switching optional features for multi-jurisdictional access will be passed to the customer for completion except when state restrictions apply or when the end user voluntarily uses a multiple carrier access code (assuming 101XXXX dialing has not been restricted by the customer). 7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). When service is jointly provided under the Single Bill Method of Multiple Company (Interconnection Point) Billing, the nonrecurring charges are applicable to all nonrecurring functions in the provision of Special Access Non-Competitive End User Channel Terminations (EUCT). Under the Multiple Bill Method, the nonrecurring charges are applicable only when the nonrecurring function occurs within the Company's territory. The types of nonrecurring charges that apply for Special Access Non-Competitive EUCTs are: installation of service, installation of optional features and functions, and service rearrangements.

Zone density charges are applicable only to DS1 and DS3 special access Non-Competitive End User Channel Terminations (EUCTs) (C)  
provided at the Company designated exchanges set forth in Section (C)

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs

A customer has the option of ordering Voice Grade Non-Competitive End User Channel Termination (EUCT) or High Capacity Non-Competitive EUCT to facility hub for channelizing to individual services requiring lower capacity facilities (e.g., Voice, Program Audio, etc.). (C)

A Hub is a Company designated serving wire center at which bridging or multiplexing functions are performed. The bridging functions performed are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize digital facilities to individual services requiring a lower capacity or bandwidth. (C)

Different locations may be designated as hubs for different facility capabilities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. When placing an Access Order the customer will specify the desired hub. Serving wire centers and hub locations are identified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. (C)

(D)  
(D)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs (Cont'd)

Point to point services may be provided on channels of these services to a hub. The transmission performance for the point to point service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps channel is multiplexed to voice frequency channels, the transmission performance of the channelized service will be Voice Grade, not High Capacity.

The Telephone Company will commence billing the monthly rate for the service to the hub on the date specified by the customer on the Access Order. Individual channels utilizing these services may be installed coincident with the installation of the service to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or a High Capacity Non-Competitive End User Channel Termination (EUCT) at the time the service is installed. Individual service rates (by service type) will apply for a Non-Competitive EUCT for each channelized service. These will be billed to the customer as each individual service is installed.

At the request of a customer, the full-time and/or part-time services provided to the Hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Additional Labor as set forth in 13.2 following. 7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use of Digital High Capacity Service

Shared use occurs when special access service and switched access service are provided over the same high capacity DS1 or DS3 facilities through a common interface. The facility will be ordered, provided and rated as special access service (i.e., Non-Competitive End User Channel Termination (EUCT)). The nonrecurring charge that applies when the shared use facility is installed will be the nonrecurring charge associated with the appropriate special access high capacity DS1 or DS3. The customer must place an order for each individual switched access or special access service utilizing the shared use facilities and specify the channel assignment for each such service. Individual service (i.e., switched or special access) nonrecurring charges will not apply to the individual channels of the shared use facility. Rating as special access will continue until such time as the customer chooses to use a portion of the available capacity for providing switched access service.

(C)

(C)

(C)

For special access high capacity DS1 or DS3, the special access Non-Competitive EUCT rates will be reduced by 1/24th for each DS1 channel, 1/672nd for each DS3 channel activated for switched access service. Switched access rates and charges as set forth in Section 6.8 preceding will apply for each channel of shared use facility that is used to provide switched access service (i.e., 1/24th of the switched access entrance facility, direct-trunked transport, and applicable multiplexing rates will apply for each channel of a DS1 service or 1/672nd for each channel of a DS3 service activated for switched access service).

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.11 Special Access Term Discount Plan

The Special Access Term Discount Plan (TDP) rates for Special Access Non-Competitive End User Channel Terminations (EUCTs) subject to Section 203 of the Communications Act are filed in this tariff. Other Special Access rates included in this plan are not subject to Section 203 and are provided outside of this tariff.

(N)

(N)

(A) General

The Special Access Term Discount Plan (TDP) applies to Special Access Digital Data Service (56.0 and 64.0 kbps), High Capacity DS1 (1.544 Mbps) and DS3 (44.736 Mbps) services, DS3 to DS1 and DS1 to DS0 Multiplexing, and Shared SONET Ring Service. The TDP provides the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment per service on a state or national basis when the TDP is established.

In order for a circuit to be eligible for TDP pricing, the customer must commit a channel termination and/or multiplexer, or if not provided by the Company, the portion of the circuit (i.e., interoffice mileage) that is provided by the Company to a TDP. The commitment level for a circuit will be based on this information. For purpose of determining the term discount plan commitment level for Shared SONET Ring Service (SSRS), a Ring Connection equates to a Special Access Channel Termination. Customers may disconnect or move channel terminations and/or multiplexers within the committed area (i.e., state or nation) and not be subject to termination liability charges as long as the commitment levels are maintained.

(C)

(C)

(B) Commitment Level

All eligible special access rate elements for a given circuit (channel termination, channel mileage termination (fixed), channel mileage facility (per mile), multiplexing or ring connection and ring transport) must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a TDP by committing all or a portion of their in-service circuits to a minimum term of 3 years up to maximum term of 5 years. During the term of the selected TDP, the customer must maintain an in-service commitment threshold of not less than 90% nor more than 130% of the committed circuits.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Premier Term Discount Plan

The Premier Term Discount Plan rates for Special Access Non-Competitive End User Channel Terminations (EUCTs) subject to Section 203 of the Communications Act are filed in this tariff. Other Special Access rates included in this plan are not subject to Section 203 and are provided outside of this tariff.

(N)

(N)

(A) General

The Premier Term Discount Plan (PTDP) applies to Special Access Voice Grade Service, monthly Program Audio Service, Digital Data Service, High Capacity Fractional DS1 Service, and High Capacity DS1 (1.544 Mbps) and DS3 (44.736 Mbps) Service. The PTDP provides the customer with discounted rates for the services listed. The customer agrees to commit 100% of their existing and future special access services ordered from the Telephone Company on a national basis for a five year commitment period when the PTDP is established.

The following rate elements will be eligible for PTDP rates:

Channel Termination  
Channel Mileage Termination (fixed)  
Channel Mileage Facility (per mile)  
Multiplexing

The commitment level will be based on special access circuit quantities determined by the Company's billing records and mutually agreed upon by the Company and the customer. The commitment level will be based on DS1 equivalent circuits, by state, and updated annually. If the customer's circuit quantity falls below 95% of the state specific commitment level in a consecutive 60 day period, a shortfall penalty as set forth in (C) following is applicable.

10. Special Federal Government Access Services

For Special Access Federal Government Services, only Non-Competitive End-User Channel Terminations (EUCTs) are filed as part of this tariff. Federal Government Services for other Special Access Services to complete the circuit are outside this tariff and can be accessed at the Company's website or Company's other designated location.

(N)

(N)

10.1 General

This section covers Special Access Services that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government. Services provided to state or local emergency operations centers are included. These services provide for command and control communications, including communications for national security, emergency preparedness and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security.

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period. The provision of service under these conditions may require the availability of facilities, such as portable microwave equipment, which are provided on a temporary basis by the Telephone Company or customer.

10.2 Emergency Conditions

These services will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

- State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters").
- Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad. (Includes space vehicle recovery and protection efforts.)
- Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
