## ACCESS SERVICE

2. General Regulations (Cont'd)2.5 Connections (Cont'd)2.5.4 Expanded Interconnection - Microwave (Cont'd)

Microwave facilities, equipment and support structures may be located in, on or above the exterior walls and roof of Telephone Company serving wire centers. Such interconnection must be made in accordance with the provisions specified in 2.1 preceding. These interconnections will be provided subject to the regulations and rates and charges set forth in Section 28. following.

2.6 Definitions

Certain terms used herein are defined as follows:

Access Carrier/Customer Terminal Location (ACTL)

The term Access Carrier/Customer Terminal Location (ACTL) denotes an eight (8) or eleven (11) character code that identifies the Common Language Location Identifier (CLLI) Code of the customer facility terminal location.

Access Code

The term "Access Code" denotes a uniform seven digit code that has the form 101XXXX or 950-XXXX and is assigned by the Telephone Company to an individual customer.

## ACCESS SERVICE

2. General Regulations (Cont'd)2.6 Definitions (Cont'd)Common Channel Signaling Access

The term "Common Channel Signaling Access" denotes the capability which allows customers access to the SS7 signaling network.

Common Line

The term "Common Line" denotes a line, trunk or other facility provided under the general and/or local exchange service tariffs of the Telephone Company, terminated on a central office switch. A common line-residence is a line or trunk provided under the residence regulations of the general and/or local exchange service tariffs. A common line-business is a line provided under the business regulations of the general and/or local exchange service tariffs.

Common Transport

The term "Common Transport" denotes the use of channels and equipment for transport by multiple customers.

Communications System

The term "Communications System" denotes channels and other facilities which are capable of communications between terminal equipment provided by other than the Telephone Company.

Company

The FairPoint Telephone Companies.

Competitive County

The term "Competitive County" denotes the geographic unit of a county or county-equivalent that passes or has passed a competitive market test specified by the FCC. Competitive County also denotes a county or county-equivalent that failed a competitive market test specified by the FCC, but was granted Phase II, Level 2 pricing flexibility prior to June 1, 2017.

Conduit

The term "Conduit" denotes any reinforced passage or opening in, on, under, over or through the ground between the feeder route conduit system and cable vault location capable of containing communications facilities required to bring customer-provided fiber optic feeder cable into the Telephone Company Serving Wire Center.

(N)  
—  
(N)

## ACCESS SERVICE

2. General Regulations (Cont'd)2.6 Definitions (Cont'd)800 Service Provider

The term "800 Service Provider" denotes a telecommunications company, including Exchange Carriers and Interexchange Carriers, or a reseller of exchange or interexchange services that offers 800 Service to end users.

End Office Switch

The term "End Office Switch" denotes a local Telephone Company switching system where Telephone Exchange Service customer station loops are terminated for purposes of interconnection to trunks. Included are Remote Switching Modules and Remote Switching Systems served by a host office in a different wire center.

End User

The term "End User" denotes any customer of an interstate or foreign telecommunications service that is not a carrier, except that a carrier other than a telephone company shall be deemed to be an "end user" when such carrier uses a telecommunications service for administrative purposes and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller.

End User Channel Termination (EU Chan Term)

The term "End User Channel Termination" denotes a channel termination connecting a dedicated channel between a Local Exchange Carrier and an end-user customer premise for the purpose of carrying special access traffic. All other Channel Terminations will be denoted as a Non-End User Channel Termination.

Enhanced DSR Node

See also the definition of Node following. The term enhanced DSR node denotes a node made available after March 20, 2003 that provides additional feature functionality that is not available with the existing first-generation DSR nodes. Enhanced DSR nodes are capable of supporting DS1 and Gigabit Ethernet ports at the OC12, OC48 and OC192 levels.

Entrance Facility

The term "Entrance Facility" denotes transport from the customer designated premises to the serving wire center of the customer premises or to an alternate wire center negotiated with the Telephone Company.

Entry Switch

See First Point of Switching.

(N)  
—  
(N)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

2. General Regulations (Cont'd)2.6 Definitions (Cont'd)Node

The term "Node" denotes a DSR rate element and a designation of either a customer location or Telephone Company wire center on a SONET ring that has ADM capability. It is also the address of where a channelized (lower speed) service originates or terminates on a ring. Generally, the ring capacity determines the type of node. For DSR, see also Enhanced DSR Node.

Non-Competitive County

The term "Non-Competitive County" denotes the geographic unit of a county or county-equivalent that failed a competitive market test specified by the FCC (excluding those that were granted Phase II, Level 2 pricing flexibility prior to June 1, 2017 and thus are defined as "Competitive Counties").

(N)  
—  
(N)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

2. General Regulations (Cont'd)2.6 Definitions (Cont'd)Noncontiguous Time Slots

The term "Noncontiguous Time Slots" denotes time slots within a common interface that are not adjacent or sequential however the channel assignment order is maintained.

Non-End User Channel Termination (Non-EU Chan Term)

The term "Non-End User Channel Termination" denotes all other channel termination excluded by the definition of End User Channel Termination.

(N)  
|  
(N)

Nonrecoverable Cost

The term "Nonrecoverable Cost" denotes the cost of specially constructed facilities for which the Telephone Company has no foreseeable use should the service be terminated.

Non-Standard Premises

The term "Non-Standard Premises" denotes a free-standing structure, e.g., a billboard or communication, electrical or water tower, which is used for an antenna site. See also Premises.

Nonsynchronous Test Line

The term "Nonsynchronous Test Line" denotes an arrangement in step-by-step end offices which provides operational tests which are not as complete as those provided by the synchronous test lines, but can be made more rapidly.

Normal Construction

The term "Normal Construction" denotes all facilities the Telephone Company would normally use to provide service in the absence of a requirement for special construction.

Normal Cost

The term "Normal Cost" denotes the estimated cost to provide services using normal construction.

North American Numbering Plan

The term "North American Numbering Plan" denotes a three-digit area (Numbering Plan Area) code and a seven-digit telephone number made up of a three-digit Central Office code plus a four-digit station number.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)

Rates and charges for Switched Access Service depend generally on its use by the customer, i.e., for MTS or WATS services, 800 Data Base Access Service, Advanced Access Screening Capability, 900 Access Service, MTS-WATS equivalent services, or other services (e.g., foreign exchange service), and whether it is provided in a Telephone Company end office that is equipped to provide equal access (Feature Group D or Circuit Switched Trunk BSA - Option 3 Access, described in 6.1.1. following). Rates and charges for Switched Access Service are set forth in 30.6 following for MSA pricing and 31.6 following for all other rates, except when SONET Service transport is used in which case the rates and charges for such transport are set forth in Section 31.26 following. The application of rates for Switched Access Service are described in 6.7 and 26. following. Rates and charges for services other than Switched Access Service, e.g., a customer's interLATA toll message service, may also be applicable when Switched Access Service is used in conjunction with these other services. Descriptions of such applicability are provided in 6.2.1(A)(7), 6.2.1(B)(4), 6.2.2(A)(5), 6.2.2(B)(5), 6.2.3(A)(5), 6.2.4(A)(4), 6.2.5(A)(7), 6.2.5(B)(4), 6.2.7(A)(5), 6.2.7(B)(6), 6.2.8(A)(5), 6.2.9(A)(4), 6.7.8, 6.7.10 and 8.2 following. Finally, a credit is applied against line side Switched Access Service charges as described in 6.7.9 following.

(C)

The following provision applies to the treatment of VoIP-PSTN Access Traffic pursuant to the Federal Communications Commission's Part 51 Interconnection Rules and in compliance with the Federal Communications Commission's Report and Order and Further Notice of Proposed Rulemaking in CC Docket Nos. 96-45 and 01-92; GN Docket No. 09-51; WC Docket Nos. 03-109, 05-337, 07-135 and 10-90; and WT Docket No. 10-208, adopted October 27, 2011 and released November 18, 2011 (FCC 11-161). In the absence of an interconnection agreement between the Telephone Company and the customer specifying the treatment of VoIP-PSTN Access Traffic, the Telephone Company will bill the customer the applicable switched access rates and charges specified in Section 31.6, following,

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.1 Switched Access Service Arrangements and Manner of Provision (Cont'd)(D) 900 Access Service (Cont'd)

If a customer requests the 0+900 Option, it is the customer's responsibility to insure that 0+900 calls are provided in conjunction with the customer's credit card billing. Calls utilizing the Telephone Company's calling card and operator assisted calls, such as collect and third party billing are not permitted with the 0+900 Option.

(E) Telecommunications Relay Service (TRS) Equal Access Interconnection

TRS Equal Access Interconnection is available to TRS Carriers to interconnect with the Telephone Company to provide originating equal access to their end users. The TRS Interconnection provides trunk side access over SONET Service or Switched Access Entrance Facilities and Direct Trunked Transport Facilities from a TRS Carrier to a Telephone Company Access Tandem which enables the TRS Carrier to transfer TRS calls from an end user, to the Telephone Company's Access Tandem to reach the end user's Carrier of Choice. The Telephone Company does not provide end office local switching functions with this arrangement. The signaling protocol transmitted by the TRS Carrier is subject to the technical limitations for FGD specified in Technical Reference NPL 000258, Issue 1. The TRS Carrier shall comply with all operating, technical and service quality standards as specified in 6.2.4 for originating Feature Group D Service. The TRS Equal Access Interconnection nonrecurring charge applies per TRS Interconnection as specified in 31.6.1 (H) following.

The TRS Carrier will be billed the Entrance Facility Channel Termination or SONET Service rate and the Direct Trunked Transport Channel Mileage or SONET Service fixed and per mile rates as specified in 30.6 following for MSA pricing and 31.6 for all other Switched Access rates and 31.26 following for SONET Service rates.

(C)

The TRS Carrier will furnish to the Telephone Company all information which the Telephone Company may require to bill Interexchange Carriers for the access provided by the Telephone Company. The TRS Carrier shall keep sufficient call detail records for IC billing and, upon request of the Telephone Company make the records available for inspection. Such information shall be furnished by the TRS Carrier in a form and according to a regular schedule mutually agreed upon between the Telephone Company and TRS Carrier.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Rate Categories

There are three rate categories which apply to Switched Access Service: Local Transport (described in 6.1.3(A) following); Local Switching (described in 6.1.3(B) following); and Common Line (described in Sections 3. and 4. Preceding).

Rates and charges for Switched Access Services are found in Sections 30 and 31 following. Section 30 contains rates and charges for services which are served from a wire center in a qualifying Metropolitan Statistical Service Area (MSA) which has achieved Phase II pricing relief as described in Section 15.2 following. Section 31 contains rates and charges for all other services.

(C)

(C)

In addition, other charges may apply as set forth following. An Equal Access Cost Recovery rate, as set forth in 31.16 following applies to Interexchange Carriers who obtain FGD or CST BSA - Option 3 Switched Access Service. A Customer Identification Charge, as set forth in 31.6 following applies to customers who obtain 800 Data Base Access Service.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

Vice President, Regulatory  
521 East Morehead St., Suite 250, Charlotte, NC 28202

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Rate Categories (Cont'd)(A) Local Transport (Cont'd)

The Local Transport rate category, when provided as Direct Trunked Transport (dedicated transport to an end office or access tandem), is comprised of a Channel Mileage rate. Dedicated Tandem Trunk Port rates, Host/Remote Transport rates, an Operator Passthrough charge, STS1 to DS1, DS3 to DS1 and DS1 to Voice Multiplexing charges or CCSA charges will apply, as appropriate.

The Local Transport rate category, when provided as Tandem Switched Transport (dedicated transport to an access tandem and common transport from the access tandem to the end office), is comprised of a Channel Mileage rate, Dedicated Tandem Trunk Port rates, a Local Transport Termination rate, a Local Transport Facility rate, a Tandem Switching rate, and a Transport Multiplexing rate. Host/Remote Transport rates, an Operator Passthrough charge or CCSA charges will apply as appropriate.

The Local Transport rate category is also comprised of an Interconnection Charge which provides for interconnection with the Telephone Company Switched Access network.

The Direct Trunked Transport Channel Mileage rate provides for that portion of the voice frequency transmission path from the serving wire center of the customer premises or multiplexing node directly to an end office or an access tandem or for that portion of the voice frequency transmission path from the wire center with SONET multiplexing capability to an end office or access tandem, as applicable.

When the wire centers involved are located within different price density zones (pricing zones), the rates and charges applicable to the channel mileage element will be the rates and charges for the higher pricing zone. For example, pricing zone 3 rates and charges apply if one wire center is within pricing zone 2 and one wire center is within pricing zone 3. When one of the wire centers involved is located within a pricing zone and the other wire center involved is located within a MSA, the rates and charges applicable to the channel mileage element will be the rates and charges specified for the pricing zone.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Rate Categories (Cont'd)(A) Local Transport (Cont'd)

When the customer orders a DS3, multiplexed IBT, or IDSR Entrance Facility with DS3 Direct Trunked Transport to an end office or access tandem, the customer must order the DS3 to DS1 Multiplexing Optional Feature at the end office or access tandem.

When the customer orders an ISSP STS1 as its Direct Trunked Transport to an end office or access tandem, the customer must order the STS1 to DS1 Multiplexing Optional Feature at the end office or access tandem. ISSP STS1 service and multiplexing is set forth in Section 26.1.6 following.

Local Transport and the CCSA option are provided at the rates and charges set forth in 30.6 following for MSA pricing and 31.6 following for all other rates. The Operator Passthrough charge is set forth in 31.8 following. The application of these rates is as set forth in 6.7.1(D), 6.7.1(E), 6.7.1(F) and 8.2.3 following.

(C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Rate Categories (Cont'd)(B) Local Switching (Cont'd)

The Local Switching rate category includes monthly rates, usage rates, chargeable and nonchargeable optional features, and Basic Service Elements.

The premium usage rates for Switched Access Service Arrangements are divided into two categories. For Feature Group Switched Access Service Arrangements, the categories are LS1 and LS2. For BSA Switched Access Service Arrangements, the categories are LS1-BSA and LS2-BSA.

LS1 provides local dial switching for Feature Groups A and B, except for FGA and FGB used to terminate traffic to a WATS Access Line (WAL), provided from an equal access end office and for FGB when utilized to provide MTS/WATS service.

LS2 provides local dial switching for Feature Groups C and D, for FGA and FGB used to terminate traffic to a WAL provided from an equal access end office, for Feature Group B utilized to provide MTS/WATS service.

LS1-BSA provides local dial switching for CSL BSA and CST BSA - Option 1, except for CSL BSA and CST BSA - Option 1 used to terminate traffic to a WATS Access Line (WAL), provided from an equal access end office and for CST BSA - Option 1 when utilized to provide MTS/WATS service.

LS2-BSA provides local dial switching for CST BSA - Option 2, 3 and 4 for CSL BSA and CST BSA - Option 1 used to terminate traffic to a WAL provided from an equal access end office, for CST BSA - Option 1 utilized to provide MTS/WATS service.

The Shared End Office Trunk Port provides for the termination of Tandem Switched Transport and/or FGA or CSL BSA access minutes at an end office. Access minutes for all Switched Access Service subject to the Shared End Office Trunk Port will be multiplied by the per minute rate set forth in 30.6 following for MSA pricing and 31.6 following for all other rates. (C)

The STP Port rate provides for the point of termination to the signal switching capability of the STP. The STP provides the customer access to the Telephone Company SS7 Network and is dedicated to the customer. The STP Port rate applies on a per month basis.

## (10) (Cont'd)

## (b) (Cont'd)

If the customer selects this Virtual Shared Billing Arrangement Billing Option, the Telephone Company will first produce an inventory of Shared Billing Arrangement circuits that are terminating at each of the customer's FMS point of termination locations. Once the number of Shared Billing Arrangement circuits at each FMS point of termination location has been determined, the Telephone Company will develop a count of DS3 channel termination/collocation cross-connects and 3/1 muxes that would be required at each point of termination to serve these Shared Billing Arrangement circuits. The Telephone Company will then price these facilities by using five-year term rates specified in Section 30.6 following for MSA pricing and 31.6.9 following for all other rates. The results of this pricing exercise will be a replication of switched access facility charges that the customer would incur if a separate network were to be established specifically to serve these Shared Billing Arrangement circuits.

(C)

The pricing for these virtual Shared Billing Arrangement facilities developed by using the method described above will be billed monthly for a period of one year. Sixty (60) days prior to the end of this billing period, a new inventory will be conducted that will result in new virtual Shared billing Arrangement charges that will be billed through the next year of the customer's FMS term plan. This process will continue until the FMS plan has been terminated, or until/unless the customer physically removes the Shared Billing Arrangement circuits from the FMS facilities.

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service (Cont'd)6.2.12 Facilities Management Service (Cont'd)(F) Application of Rates

At the customer's option, FMS is provided on a month-to-month basis, under a 3 year term plan or under a 5 year term plan. The rates for FMS include Standard FMS Channels, Office FMS Channel Terminations, FMS Channel Mileage, FMS Multiplexing and a rate per DSO equivalent for Administration. Such rates are subject to change over the term selected by the customer, thereby causing an increase or decrease in the rates applicable to the customer. The rates and charges for any other service or option not provided under the FMS rate plan are subject to the rates and charges for the type of service or option being provided. The FMS rate elements and the manner in which such elements apply are described in 1 through 5 following.

(1) Primary Premises Standard Entrance Facility

The Primary Premises Standard Entrance Facility is a DSO equivalent channel provided over the FMS entrance facilities connecting the customer's primary premises to its serving wire center. At the customer's primary premises, standard entrance facility terminations will be terminated over either an electrical STS1, DS3 or DS1 interface or an IEF OC12 or OC3 optical interface.

The DSO channels provided over a DS3 or higher interface are differentiated as being one of the initial 0 through 672 DSO equivalent channels, for which a flat rate applies, or as being one of the DSO channels over the initial 672, for which a rate for each DSO equivalent channel over 672 DSO equivalent channels applies as specified in Section 30.6 following for MSA pricing and 31.6.9 following for all other rates. For term plan billing, a rate per DSO equivalent channel applies for each DSO channel provided and is further subject to the rate bands specified in Section 30.6 following for MSA Pricing and 31.6.9(B)(1) following for all other rates.

(C)

(C)

The DSO channels provided over a DS1 interface are differentiated as being one of the initial 0 through 144 DSO equivalent channels, for which a flat rate applies, or as being one of the DSO channels over the initial 144, for which a rate for each DSO equivalent channel over 144 DSO equivalent channels applies as specified in Section 30.6 following for MSA pricing and 31.6.9 following for all other rates.

(C)

(C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service (Cont'd)6.2.12 Facilities Management Service (Cont'd)(F) Application of Rates (Cont'd)(3) Channel Mileage

The FMS Channel Mileage rate element applies as a fixed rate and a rate per mile for each DSO equivalent channel provided as FMS. For DS3 or STS1 FMS channel mileage, the rates are further differentiated as being basic or direct channel mileage. Basic channel mileage applies when the channel interface at the end office or the access tandem switching office has a signal rate that is less than DS3 and the channel interface code at the primary premises is DS3, STS1, OC3 or OC12. Direct channel mileage applies when the channel interface code at the primary premises is DS3, STS1, OC3 or OC12 and the end office or access tandem switching office has a DS3 signal rate.

The mileage is determined by calculating the airline distance between the serving wire center associated with the primary premises and the end office or access tandem. To determine the rate to be billed, first compute the mileage using the method described in 6.7.11 following and apply the rates shown in Section 30.6 following for MSA pricing and 31.6.9 following for all other rates. (C)

(4) FMS Multiplexing

FMS multiplexing applies for each DSO equivalent channel provided as FMS. The rate for FMS multiplexing is differentiated by the level of multiplexing performed (i.e., DS3/STS1 to DS1 or DS1 to DSO). DS3/STS1 to DS1 multiplexing is applicable to all DSO equivalent channels that terminate to a Primary Premises and meet Type 1 criteria as described in Section (B) preceding.

(5) Administration Fee

An administration fee applies for network administration performed by the Telephone Company. The fee applies for each DSO equivalent channel provided as FMS.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service (Cont'd)6.2.14 IntelliBeam Optical Transport Service# (Cont'd)(C) Service Components (Cont'd)

- (2) IOTS Ring Mileage is the total of airline distances between devices (nodes and amplifiers) rounded up to the nearest mile. The mileage rate is based on total ring capacity and not on individual services between devices. For example, the mileage charge for a five device ring with two mid-span amplifiers and a distance of 4.3 miles between each device (21.5 total miles) would be calculated by multiplying the mileage rate in Section 30.7.21 following for MSA pricing by 22 miles. The mileage between devices (e.g., an initial node and an expansion node or an At-Node amplifier, as applicable) located at the same customer designated premises or Telephone Company wire center is zero. This mileage calculation applies regardless of the number of services on the ring. (C)
- (3) Network Optimization provides for amplification of the signal to ensure acceptable optical levels. When required, amplification is performed at the node (primary node or expansion node) or in a Telephone Company wire center when mid-span amplification of the signal is required between nodes. Node amplification occurs in one or two directions (East to West and/or West to East). Amplification in two directions requires the use of two at-node amplifiers. Mid-span amplification occurs simultaneously in both directions (East to West and West to East). The Telephone Company shall have sole responsibility in determining when amplification is required and the quantity and type of amplification necessary to maintain acceptable optical levels.

# Service availability limited. Refer to # footnote on Page 6-139.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.1 Description and Application of Rates and Charges (Cont'd)(D) Application of Rates (Cont'd)

- (4) Where originating and/or terminating recording capability does not exist for FGA, FGB, CSL BSA or CST BSA - Option 1 provided via Tandem Switched Transport to an entry switch and for originating CST BSA - Option 4, the number of access minutes will be assumed as set forth in 6.7.6. following.
- (5) For terminating CST BSA - Option 4 with the DNIS on 800 BSE, the rates and charges as set forth in Section 31.6.2(C) following will apply.

The Telephone Company will provide written notification to all access customers of record within a particular LATA that an end office in that LATA is scheduled to be converted to an equal access end office. This notification will be sent, via certified U.S. Mail, to each customer of record in the LATA where the conversion is scheduled to occur, at least six months in advance of the conversion date. The customer will have the choice of converting existing services to equal access (i.e., Feature Group D or CST BSA - Option 3) at no charge pursuant to the conditions set forth in 6.7.4 following or retaining the existing services. Except as set forth in 6.7.1(D)(2) preceding, premium rates will apply to the total access minutes beginning on the actual conversion date, whether the customer chooses to convert to FGD or CST BSA - Option 3 or retain existing services.

(E) Application of Local Transport Rates

For Switched Access Service Entrance Facilities, the rate applies on a recurring monthly basis for the capacity of the Entrance Facility (i.e., OC3, OC12, OC48, OC192, DS3, DS1, VG) ordered. These rates are set forth in Section 30.6 following for MSA pricing and 31.6 following for all other rates.

(C)

For IntelliBeam Entrance Facility Service, the STS1 rates apply on a recurring monthly basis for each STS1 arranged as Switched Access transport. Such rates are set forth in Section 31.26 following.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.2 Minimum Periods (Cont'd)

- (E) SONET Services used in the provision of Switched Access Services are subject to the minimum period for the type of SONET service involved. Minimum periods for SONET Services are set forth in Section 26.

6.7.3 Minimum Monthly Charge

- (A) Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity provided. The minimum monthly charge for the Local Transport and Local Switching rate elements is the sum of the charges set forth in 30.6 following for MSA pricing and 31.6 following for all other rates for the measured or assumed usage for the month. (C)
- (B) For monthly rated optional features or BSEs, the minimum monthly charge is the tariff monthly rate as set forth in 31.6 following.

(TR 65)

521 East Morehead St., Suite 250, Charlotte, NC 28202

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.8 Application of Rates for Extension Service

Feature Group A or CSL BSA Switched Access Service is available with extensions, i.e., additional terminations of the service at different building(s) in the same or a different LATA. Feature Group A or CSL BSA extensions in the same LATA (and same state) are charged for under the Telephone Company's local and/or general exchange service tariffs. Feature Group A or CSL BSA extensions in different LATAs (or in a different state in the same LATA) are provided and charged for as Special Access Service for that portion of the service offered within the LATA. The rate elements which apply are: A Voice Grade Channel Termination, Channel Mileage, if applicable, and Signaling Capability, if applicable. All appropriate monthly rates and nonrecurring charges as set forth in Section 30.7 following for MSA pricing and charges and 31.7 following for all other rates and charges will apply. Such extensions are ordered as set forth in 5.2 preceding. (C)

6.7.9 Message Unit Credit

Calls from end users to the seven digit local telephone numbers associated with Feature Group A or CSL BSA Switched Access Service are subject to Telephone Company local and/or general exchange service tariff charges (including message unit and toll charges as applicable). The monthly bills rendered to customers for their Feature Group A or CSL BSA Switched Access Service will include a credit to reflect any message unit charges collected from their end users under the Telephone Company's local and/or general exchange service tariffs. The credit will apply for recorded originating usage or for assumed originating usage, as appropriate, for the FGA or CSL BSA service provided. When the credit is applied on assumed usage, such credit will not exceed the assumed originating levels of usage set forth in 6.7.6 preceding. No credit will apply for any terminating FGA or CSL BSA access minutes. The message unit credit for originating FGA or CSL BSA access minutes is as set forth in 31.6 following.

(TR 65)

521 East Morehead St., Suite 250, Charlotte, NC 28202

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.10 Local Information Delivery Services

Calls over Switched Access in the terminating direction to certain community information services will be rated under the applicable rates for Switched Access Service as set forth in 30.6 following for MSA pricing and 31.6 following for all other rates. (C)

6.7.11 Mileage Measurement

The mileage to be used to determine the Direct Transport Channel Mileage monthly rate is calculated on the airline distance between the end office switch where the call carried by Local Transport originates or terminates and the customer's serving wire center (when Direct Trunked Transport is ordered to an end office) or between the customer's serving wire center and the access tandem (when Direct Trunked Transport is ordered to a tandem). The mileage to be used to determine the Local Transport Facility monthly rate is calculated on the airline distance between the access tandem and the end office switch where the call carried by local Transport originates or terminates. Exceptions are set forth in (A) through (J) following, 2.4.8 and 6.1.3(A) preceding. The V&H coordinates method is used to determine mileage. This method is set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4 for Wire Center and Interconnection Information (V&H coordinates).

The Tandem Switched Local Transport Facility mileage rate is shown in 31.6 following in terms of per mile per access minute. To determine the rate to be billed, first compute the mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage. Then, multiply the mileage by the appropriate Local Transport Facility rate. The amount to be billed shall be the product of this calculation (i.e., the number of miles multiplied by the per mile rate) multiplied by the number of access minutes.

The Direct Trunked Transport Channel Mileage rates are shown in 30.6 following for MSA pricing and 31.6 following for all other rates in terms of fixed and per mile per month. To determine the rate to be billed, first compute the mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, always round up to the next mile before determining the mileage, then multiply the mileage by the appropriate Channel Mileage per mile rate. The amount to be billed shall be the product of this calculation plus the appropriate fixed Channel Mileage rate. (C)

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.16 Service Discount Plans (Cont'd)(B) Service Discount Plan for DS1 and DS3 Entrance Facilities, DS1 and DS3 Direct Trunked Transport and DS3 to DS1 and DS1 to Voice Multiplexing (Cont'd)(1) General (Cont'd)

When the customer has elected a Commitment Discount Plan as set forth in Section 25. following, a Service Discount Plan will not be established for any service level which is included in a Commitment Discount Plan. A Service Discount Plan may be established for service levels which are not included in the Commitment Discount Plan subject to the regulations specified in Section 25.1.2 following.

(2) Description

A Service Discount Plan applies to Switched Access Service DS1 and DS3 Entrance Facility Standard Channel Terminations, DS1 and DS3 Direct Trunked Transport Channel Mileage, and Local Transport DS3 to DS1 and DS1 to Voice multiplexing Optional Features monthly rates as set forth in Section 30.6 following for MSA pricing and 31.6 following for all other rates and to IntelliBeam Dedicated SONET Ring as set forth in Section 31.26 following. (C)

The monthly rates for such services are reduced by a fixed percentage.

The amount of the discount percentage differs based on the length of the commitment period selected by the customer and the type of service. The customer must specify the number of months selected as the commitment period for its Service Discount Plan.

The discount percentage is applied to the currently effective monthly rates. Such rates may change during the commitment period, thereby causing an increase or decrease in the rates applicable to the customer.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.16 Service Discount Plans (Cont'd)(B) Service Discount Plan for DS1 and DS3 Entrance Facilities, DS1 and DS3 Direct Trunked Transport and DS3 to DS1 and DS1 to Voice Multiplexing (Cont'd)(6) Rate Regulations

Where the Service Discount Plan is requested to be provided coincident with the connection of new service, it will be effective with the establishment of service.

Where the Service Discount Plan is requested to be provided on existing service, the plan will be effective on the date the Telephone Company receives the Access Order requesting the discount.

At the end of its selected commitment period, the customer will have the option of subscribing to any then effective Service Discount Plan. If the customer does not notify the Telephone Company of its choice prior to the expiration of the commitment period, the customer's current Service Discount Plan will be renewed upon expiration of the selected period. The renewed plan will have a commitment period equal to that originally selected by the customer and the plan will be considered new.

If the customer notifies the Telephone Company of its choice within the first sixty days of the date of renewal, the customer may cancel the renewed plan and subscribe to any then effective Service Discount Plan or continue with the renewed plan. If, within the first sixty days of the date of renewal, the customer elects to cancel the renewed plan and subscribe to the service on a month-to-month basis or subscribe to a then effective Service Discount Plan, termination liability will not apply.

(7) Base Rates

For services provided with Base Rates (without rate stability), the discount percentage is applied to the Base Rates specified in Section 30.6 following for price band rates and 31.6 following for all other rates. Such rates are not rate stable and may change during the commitment period, causing an increase or decrease in the rates applicable to the customer. In no case will the Base Rate exceed the non-discounted monthly rate for the service.

6.8 Rates and Charges

Rates and Charges for Switched Access Service are found in Sections 30.6, 30.26, and 30.34.1 following for MSA pricing and Sections 31.6 and 31.26 following for all other rates.

(C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories

There are three basic rate categories which apply to Special Access Service:

- Channel Termination (described in 7.1.2(A) following).
- Channel Mileage (described in 7.1.2(B) following).
- Optional Features and Functions or BSEs (described in 7.1.2(C) following)

Additionally, ports and nodes may also apply to Special Access DSR as set forth in Section 34.1 following. Rates and charges for Integrated Optical Service Riders may also apply to Special Access connected to Integrated Optical Service Riders as set forth in Section 35.1 following.

Rates and charges for Special Access Services are found in Sections 30 and 31 following. Section 30 contains price banded rates and charges. Section 31 contains rates and charges for all non-price banded rate elements. The application of each rate Section and band is described in Section 7.4.12 following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions/Basic Service Elements (BSEs) (Cont'd)(7) Enhanced Access Diversity (EAD)

EAD provides three levels of diversity on the transmission facilities for two or more 1.544 Mbps and 44.736 Mbps services provided over not more than two different physical routes. The customers with EAD will be advised on a quarterly basis of the design of each service with EAD. This offering utilizes existing physically diverse facilities. Should facilities not be available, the service may be subject to special construction as specified in 5.1.3 preceding. The levels are described following.

Supreme

This optional feature is only available for services with the ASWC feature and guarantees diversity of the interoffice facilities and central offices between the first manholes located outside the alternate serving wire centers.

When a customer orders the Supreme EAD Optional Feature, the Supreme Rate as specified in 31.7.9(C)(7) following applies in addition to the Channel Termination, Channel Mileage and ASWC Rates and Charges for each applicable High Capacity Service.

(C)

(C)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Facilities Management Service (Cont'd)(E) Terms and Conditions (Cont'd)

- (5) If the FMS term plans in multiple LATAs share a common expiration date and the same type of primary premises, the associated commitment levels will be aggregated into a single total. Fulfillment of the commitment level will be determined as stated in (E)(3) preceding; however, the calculation will be on the aggregate level for all eligible LATAs.
- (6) The customer will provide either DS1 or electrical DS3 network interfaces at each primary premises.
- (7) The FMS customer, when ordering Voice Grade Service, DDS, DIGIROUTE<sup>SM</sup> digital service II or High Capacity Service, must specify the type of service and the locations involved, one of which must be a primary premises.
- (8) Reserved for future use.
- (9) The Telephone Company will provide the same service intervals and quality standards for services in an FMS plan as are provided for non-FMS Special Access Services.
- (10) Where Switched Access FMS is not available, when both Switched Access Service and Special Access Service terminate at the same primary premises, the Telephone Company will apply a Switched Access Service offset in the determination of the applicable rate band of FMS Channel Termination charges. This offset will be calculated by including up to seventy-five percent (75%) of the Feature Group B and D trunks in the DSO equivalency total with each trunk being counted as a single DSO equivalent. FMS rate bands are as set forth in Section 30.7.18 following .

(C)  
(C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Facilities Management Service (Cont'd)(E) Terms and Conditions (Cont'd)

(12) (Cont'd)

(b) (Cont'd)

If the customer selects this Virtual Shared Billing Arrangement Billing Option, the Telephone Company will first produce an inventory of Shared Billing Arrangement circuits that are terminating at each of the customer's FMS point of termination locations. Once the number of Shared Billing Arrangement circuits at each FMS point of termination location has been determined, the Telephone Company will develop a count of DS3 channel terminations/collocation cross-connects and 3/1 muxes that would be required at each point of termination to serve these Shared Billing Arrangement circuits. The Telephone Company will then price these facilities by using five-year term rates specified in Sections 30.7.18 following. The result of this pricing exercise will be a replication of special access facility charges that the customer would incur if a separate network were to be established specifically to serve these Shared Billing Arrangement circuits. (C)

The pricing for these virtual Shared Billing Arrangement facilities developed by using the method described above will be billed monthly for a period of one year. Sixty (60) days prior to the end of this billing period, a new inventory will be conducted that will result in new virtual Shared Billing Arrangement charges that will be billed through the next year of the customer's FMS term plan. This process will continue until the FMS plan has been terminated, or until/unless the customer physically removes the Shared Billing Arrangement circuits from the FMS facilities.

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Facilities Management Service (Cont'd)(F) Application of Rates (Cont'd)

## (1) Primary Premises Standard Channel Termination (Cont'd)

The DSO channel terminations provided over a DS3 or higher interface are differentiated as being one of the initial 0 through 672 DSO equivalent channel terminations, for which a flat rate applies, or as being one of the DSO channel terminations over the initial 672, for which a rate for each DSO equivalent channel over 672 DSO equivalent channel terminations applies as specified in Section 30.7.18 following. For term plan billing, a rate per DSO equivalent channel applies for each DSO channel termination provided and is further subject to the rate bands specified in Section 30.7.18(B)(1) following.

(C)

(C)

The DSO channel terminations provided over a DS1 interface are differentiated as being one of the initial 0 through 144 DSO equivalent channel terminations, for which a flat rate applies, or as being one of the DSO channel terminations over the initial 144, for which a rate for each DSO equivalent channel over 144 DSO Section 30.7.18 following.

(C)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Facilities Management Service (Cont'd)(F) Application of Rates (Cont'd)

## (2) Primary Premises Office Channel Termination

The Primary Premises Office Channel Termination provides for termination of FMS channel terminations to an Expanded Interconnection multiplexing node. At the customer's multiplexing node designated as its primary premises, office channel terminations will be terminated over an electrical DS3 interface or a DS1 interface. (See note below.)

For the DS3 interface, the rates for the primary premises office channel terminations are differentiated as being one of the initial 672 DSO equivalent channel terminations, for which a flat rate applies, or as being one of the DSO channel terminations over the initial 672, for which a rate for each DSO equivalent channel over 672 DSO equivalent channel terminations applies as specified in Section 30.7.18 following . The rates are further differentiated by the type of billing arrangement (i.e., month-to-month billing or term plan billing). (C) (C)

For the DS1 interface, the rates for the primary premises office channel terminations are differentiated as being one of the initial 144 DSO equivalent channel terminations, for which a flat rate applies, or as being one of the DSO channel terminations over the initial 144, for which a rate for each DSO equivalent channel over 144 DSO equivalent channel terminations applies as specified in Section 30.7.18 following . The rates are further differentiated by the type of billing arrangement (i.e., month-to-month billing or term plan billing). (C) (C)

Note: See Section 28 for further information.

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Facilities Management Service (Cont'd)(F) Application of Rates (Cont'd)

## (3) Channel Mileage

The FMS Channel Mileage rate element applies as a fixed rate and a rate per mile for each DSO equivalent channel provided as FMS. The mileage is determined by calculating the airline distance between the serving wire center associated with the primary premises and the wire center (serving wire center or hub, as applicable) associated with the secondary location involved. To determine the rate to be billed, first compute the mileage using the method described in 7.4.6 following and apply the rates shown in Section 30.7.18 following for price band rates. FMS Channel mileage applies as follows. (C)

- DS1 channel mileage applies when the primary premises interface is DS1, and the signal rate to the secondary location is DS1 or less. (C)
- Basic DS3/STS1 channel mileage applies when the interface at the primary premises is DS3 or STS1 and the signal rate to the secondary location is less than DS3 or STS1, respectively. Direct DS3/STS1 channel mileage applies when the interface at the primary premises is DS3 or STS1 and the signal rate to the secondary location is DS3 or STS1, respectively.
- OC3 channel mileage applies when the primary premises has an IEF OC3 or OC12 interface and the signal rate to the secondary location is OC3.
- OC12 channel mileage applies when the primary premises has an IEF OC12 interface and the signal rate to the secondary location is OC12.
- DS1, Basic DS3/STS1, and Direct DS3/STS1 channel mileage is provided on a month-to-month basis or under a term plan of 3 or 5 years. OC3 and OC12 channel mileage is provided under a term plan of 3 or 5 years.

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.18 LAN Extension Service# (Cont'd)(F) Rate Regulations (Cont'd)

## (2) LES Term Plans

- (a) LES is provided with a term plan of 3 or 5 years at rates set forth in Section 30.7.20 following. The customer must specify the term plan selected in its order for service. Rate elements associated with terminating LES at an Expanded Interconnection arrangement are provided on a month-to-month basis and will not be included in the term plan for the associated service. (C)  
(C)
- (b) At any time during the term commitment period, the customer may replace LES with LES of a higher transmission rate without incurring termination liability on the LES being replaced, provided that the term plan of the replacing LES is equal to, or greater than, the term commitment period of the plan being replaced.
- (c) At any time during the term commitment period, the customer may convert to a new LES term plan of the same or different term commitment, subject following:
  - No time-in-service credit will be granted for the period of time the replaced term commitment period was in effect.
  - Termination liability will not apply to the plan being replaced, provided that the term commitment period of the replacing plan is equal to or longer than the term commitment period being replaced.

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.19 IntelliBeam Optical Transport Service# (Cont'd)(B) Terms and Conditions (Cont'd)

The Telephone Company's network design will define the optical parameters at the fiber-meet locations. The Telephone Company is responsible for the quality and integrity of the high-speed optical signal at the fiber-meet where its facilities are interconnected to the facilities of the customer or of the third party. The Telephone Company bears no responsibility for the optical parameters beyond the fiber-meet (i.e., in the facilities of the customer or of the third party). The customer or third party is responsible for engineering its portion of the jointly provided ring. At their option, the Telephone Company will engineer the customer or third party's portion of the ring within the LATA subject to Additional Engineering as set forth in Section 13.1 following.

The IOTS ring is comprised of nodes, ring mileage, network optimization (amplification), high-speed (pass-through) interfaces (certain partial ring configurations only), and optical transport channels. These elements are described in (C) following and are provided at the rates set forth in Sections 30.7.21 following.

(C)  
(C)

The customer will be billed additional charges for any charges levied the Telephone Company for space and power required to place nodes on the Company's side of the network interface.

Connection of DSR to an IOTS ring is provided over an equal speed, unprotected optical transport channel (e.g. a 155.52 Mbps unprotected channel would connect to an OC3 DSR node). Each node on the DSR ring must be located at the same customer designated premises or in the same Telephone Company CO as its corresponding IOTS node. All other applicable DSR regulations as set forth in Section 34.1 apply to the derived DSR Service.

# Service availability limited. Refer to # footnote on Page 7-158.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.19 IntelliBeam Optical Transport Service# (Cont'd)(B) Terms and Conditions (Cont'd)

When IOTS is provided in a partial ring configuration, the following applies.

- (1) The customer must provide the Telephone Company with its fiber optic facility requirements (i.e., whether it will use single mode fiber or multi-mode fiber) prior to the Telephone Company ordering the necessary devices (nodes and amplifiers) to provide the requested service. The customer may utilize its own fiber optic facilities or the facilities of a third party.
- (2) The customer must provide, at no cost to the Telephone Company, suitable and secure space, suitable environmental conditions, an uninterrupted power supply, building entrance facilities, and conduit for placement of the facilities and network equipment at its locations as necessary to provide the service.
- (3) Interconnection to IOTS partial ring services may occur (i) at the customer's designated premises for which interconnection will occur via a node; (ii) in a Telephone Company CO for which a node or amplification device and fiber cross-connects to a collocation arrangement within that CO apply. Fiber cross-connects used with IOTS partial ring service are the IBT fiber cross-connects as described in Section 26.1.5(D)(1)(a) following; or (iii) at a mutually agreed upon location via a high-speed (pass-through) interface as described in (C)(4) following.
- (4) Interconnection to IOTS partial ring service is limited to high-speed fiber interconnection of the Telephone Company's backbone network fiber optic facilities and the fiber optic facilities of the customer or of a third party. Except as allowed under (C)(4) following, interconnection to other Telephone Company services may not occur at a premises which the customer has designated as its fiber-meet location.
- (5) When ordering a transport channel that originates at and terminates to devices that are not within the partial ring provided by the Telephone Company, the customer must provide the Telephone Company with a copy of the order. This order provides the Telephone Company with authority to perform the necessary mapping of the channel through the partial ring to ensure continuity of the signal over the jointly provided ring. A Channel Mapping nonrecurring charge will apply for each channel mapped through the Telephone Company provided partial ring. Channel mapping charges do not apply when ordering point-to-point or point-to-meet-point optical transport channels. Channel mapping is further described in (C)(5) following.

# Service availability limited. Refer to # footnote on Page 7-158.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.19 IntelliBeam Optical Transport Service# (Cont'd)(C) Service Components (Cont'd)

- (2) For full ring service configurations, IOTS Ring Mileage is the total of airline distances between devices (nodes and amplifiers) rounded up to the nearest mile. The mileage rate is based on total ring capacity and not on individual services between devices. For example, the mileage charge for a five device ring with two mid-span amplifiers and a distance of 4.3 miles between each device (21.5 total miles) would be calculated by multiplying the mileage rate in Section 30.7.21 following for price band rates by 22 miles. (C)  
(C)

For partial ring service configurations, IOTS Ring Mileage is the total of linear airline distances between fiber-meet locations (customer designated premises, CO, or mutually agreed upon location, as applicable) and each device (node or amplifier) on the partial ring. The total mileage is then rounded up to the nearest mile.

The mileage between devices (e.g., an initial node and an expansion node or an at-node amplifier, as applicable) located at the same customer designated premises or Telephone Company CO is zero. This mileage calculation applies regardless of the number of services on the ring.

- (3) Network Optimization provides for amplification of the signal to ensure acceptable optical levels. When required, amplification is performed at the node (primary node or expansion node) or in a Telephone Company CO when mid-span amplification of the signal is required between nodes. Node amplification occurs in one or two directions (East to West and/or West to East). Amplification in two directions requires the use of two at-node amplifiers. Mid-span amplification occurs simultaneously in both directions (East to West and West to East). The Telephone Company shall have sole responsibility in determining when amplification is required and the quantity and type of amplification necessary to maintain acceptable optical levels.
- (4) A high-speed (pass-through) interface is a device placed at a mutually agreed upon fiber-meet location where interconnection between the facilities of the Telephone Company and those of the customer or of a third party provider occurs. The high-speed (pass-through) interface will not be utilized when such interconnection occurs within a Telephone Company CO (for which a node or amplification device and fiber cross-connects apply) or at a customer's designated premises for which interconnection via a node occurs. Connection to other Telephone Company services is prohibited at locations utilizing a high-speed (pass-through) interface.

# Service availability limited. Refer to # footnote on Page 7-158.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.19 IntelliBeam Optical Transport Service# (Cont'd)(C) Service Components (Cont'd)

- (5) Optical transport channels allow for optical services to be multiplexed on to or off of the IOTS ring at locations equipped with an IOTS node. An optical interface at the node allows for connection of the applicable protocol to the customer's equipment.

Optical transport channels are provided on a node-to-node (i.e., point-to-point) basis or between a location equipped with an IOTS node and a fiber-meet location. These channels are provided on a point-to-fiber-meet basis. When a channel that originates at and terminates to devices which are not within the partial ring, the Telephone Company must map that channel through the partial ring to ensure continuity of the signal over the jointly provided ring. A Channel Mapping nonrecurring charge as set forth in Section 30.7.21(G) following applies in lieu of the rates and charges for a point-to-point or point-to-fiber-meet transport channel. (C)

Optical Transport Channels are available on a protected or unprotected basis depending on the protocol being transmitted and the level of redundancy required for the optical channel. These channels may be ordered using a single-port interface (each a single channel per interface card) or using a multi-port interface. A multi-port interface is a facility capable of supporting up to 4 multi-port channels of ESCON®, Fibre Channel, FDDI, Fast Ethernet, D1 Video, or any combination of these multi-port channels. A multi-port optical transport channel provides a two-point facility over the IOTS ring for the purpose of aggregating multiple optical channels over a single wavelength.

Some protocols have facility distance limitations and may affect the design or availability of the IOTS ring or its optical transport channels. The multi-port interface is provided with a short reach, 2-fiber interface with a 1310nm signal.

A protected optical channel allows for a single signal from the customer to be duplicated and sent over separate diverse routes (working and protect) within the IOTS network.

An unprotected optical channel provides minimum protection of the signal from the customer. End-to-end protection is provided by the protection inherent in the connecting service provided by the Telephone Company (e.g., DSR), as applicable.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.19 IntelliBeam Optical Transport Service# (Cont'd)(D) Application of Rates and Charges (Cont'd)

- (6) Monthly recurring rates apply for the nodes, ring mileage, network optimization mid-span amplification, network optimization at-node amplification subject to (D)(10) following, partial ring high-speed (pass-through) interfaces (certain partial ring configurations only) and optical transport channels. The monthly rate for an optical transport channel applies for the entire point-to-point connection. The monthly rate for a point-to-fiber meet optical transport channel applies for the entire node to fiber meet (collocation arrangement in a CO, customer premises or mutually agreed upon location, as applicable) connection. Once a term period expires, the prevailing rates of the current plan will continue at Category I or Category II rates, as determined in (D)(10) following, until the customer service or requests a new term plan.
- (7) The rates and charges for optical transport channels delivered over a single-port or multi-port interface are set forth in Section 30.7.21 following. When the optical transport channel is provided with a multi-port interface, rates and charges apply for the multi-port facility. (C)
- (8) Nonrecurring charges for IOTS apply for the initial installation of service and for any subsequent node, network optimization mid-span amplification or optical transport channel that is added at any time after the initial installation of service. A nonrecurring charge also applies to upgrade a 4 channel primary node to a 16 channel primary node or a 4 channel expansion node to a 16 channel expansion node.
- (9) Additionally, a Channel Mapping nonrecurring charge as set forth in Section 30.7.21(G) following applies for each channel which the Telephone Company must map over the partial ring. Only channels that originate at and terminate to devices that are not within the partial ring require mapping. (C)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.20 Bonded Digital Link Service (Cont'd)

## (B) Terms and Conditions

- (1) Bonded Digital Link Service is available within or between wire centers where suitable digital cross-connect (hubbing) technology exists to perform DS1 to DS0 multiplexing functions. Those locations (wire centers) are set forth in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.
- (2) The service may only be used for connection from a wire center with a digital hubbing arrangement to a DS1 special access service capable of assignment to compatible DS0 channels. The customer or its authorized representatives must designate the DS0 channels on the special access service connected to this service. Data rates above 64 kbps require contiguous DS0 channel assignments. Connection to services other than special access service is prohibited.
- (3) Bonded Digital Link Service is provided with a one-year minimum service period. If service is disconnected prior to satisfying the minimum service period (i.e., within the first twelve months), minimum period charges apply. The minimum one-year service period and minimum period charges do not apply if the rates have increased during the one-year period. The minimum period charge is equal to 100 % of the monthly rate from the date of disconnection through the balance of the first twelve months of service.
- (4) This service is used for connectivity within or between wire centers. The rates and charges for Bonded Digital Link Service apply as a flat rate per DS0 equivalent channel.
- (5) Credit for an interruption of Bonded Digital Link Service is subject to the basic credit allowance set forth for Special Access services as set forth in Section 2.8.1.1 preceding.
- (6) Bonded Digital Link Service is provided with a negotiated interval as set forth in Section 5.2.1(B) preceding.
- (7) The rates and charges for Bonded Digital Link Service apply per DS0 equivalent (64 kbps). The customer is assessed either an Intra-office or an Inter-office Channel Charge for each DS0. Rates and charges are set forth in 30.7.22 following. (C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Description (Cont'd)7.2.21 Optical Network# (Cont'd)

## (E) Rate Regulations (Cont'd)

- (9) The MRC for the Access Aggregation Port applies per port and at the specified term plan rate. The Access Aggregation Port charge is also dependent on the type of facility interface provided.
- (10) Nonrecurring charges (NRCs) apply for the initial installation of On-Net Channel Extensions and Access Aggregation Ports.
- (11) When connecting Optical Network services to other Telephone Company provided services, the rates and charges, and terms and conditions of the connecting services also apply.
- (12) The MRCs and NRCs for Optical Network are listed in Section 30.7.23. (C)
- (13) When connecting a Optical Network circuit to an Expanded Interconnection arrangement pursuant to Section 28 following, the MRC for the Channel Extension that provides the communications path and interface termination from a customer's premises to the serving wire center will apply at the specified term plan rate, as set forth in Section 30.7.23 following. The customer shall also be charged an MRC for the Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the Serving Wire Centers, if applicable. In addition to charges described herein, any other charges associated with connecting Optical Network to an Expanded Interconnection arrangement are described in Section 28 following. (C)  
(C)
- (14) When a Optical Network circuit is ordered from a customer designated premises to a wire center where connection to a TLS NNI Port Only Connection occurs, as set forth in Section 7.2.20(B)(6)(j) preceding, the Channel Extension rate element at the customer designated premises will apply at the specified term plan rate, as set forth in Section 30.7.23 following. The NNI Port Only Connection rate element will apply in lieu of the Channel Extension rate element at the TLS end of the service. The customer shall also be charged Optical Network Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the serving wire centers, if applicable. (C)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

7.4.1 Types of Rates and Charges

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. The rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

When a rate is shown as a three year rate or a five year rate, the rate applies each month or fraction thereof that the Special Access Service is provided. However, early termination charges apply as set forth in (D) following if the service is disconnected prior to completion of the three or five year term for the service. Section 7.4.9(C) following contains regulations which are specific to the application of three year and five year rates. Service Discount Plans as set forth in Section 7.4.10 following are not available with Channel Extension Service.

In the states where Expanded Interconnection has become operational, monthly rates for Standard Channel Terminations, Channel Mileage and certain Optional Features and Functions/Basic Service Elements for 1.544 Mbps and 44.736 Mbps (electrical) Special Access High Capacity Services and certain SONET Services are arranged in pricing zones. The pricing zone for each serving wire center in the states where Expanded Interconnection has become operational is specified in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(1) Installation of Service (Cont'd)

The nonrecurring charges for the installation of service are set forth in 30.7 following for price band charges and 31.7 following for all other charges, as applicable, as a nonrecurring charge for the Channel Termination rate element (Standard, Office Channel Termination cross-connect or Virtual Office Channel Termination, as applicable).

Nonrecurring charges do not apply for the rearrangement of Special Access Services on to an Enterprise SONET Service (ESS) ring provided that (i) the same customer designated premises are maintained; and (ii) rearrangement on the ESS ring occurs during the ESS conversion period as set forth in Section 26.1.2(D) following.

When service is added to a Commitment Discount Plan or the National Discount Plan (as specified in Section 25.2 following), the channel termination nonrecurring charge which applies to such installed service is the lesser of (i) the applicable nonrecurring charge as specified in Section 30 following for price band charges, and 31 following for all other charges or (ii) \$1.00.

In addition, a nonrecurring charge as set forth in 7.1.2(B) preceding applies to Channel Mileage between two Telephone Company Hubs where multiplexing and/or FairPoint Enterprise Network Reconfiguration Service functions are performed. Such nonrecurring charges are set forth in 30.7.9 following as a nonrecurring charge for Mid-link Channel Mileage.

(C)  
(C)

Note: See Section 28 for further information.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(1) Installation of Service (Cont'd)

In the states where Expanded Interconnection has become operational, nonrecurring charges for the Standard Channel Termination and the Mid-link Charge for 1.544 Mbps and 44.736 Mbps (electrical) Special Access High Capacity Services are arranged in pricing zones. The pricing zone for each serving wire center in the states where Expanded Interconnection has become operational is specified in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO.4.

Nonrecurring charges for certain Special Access and SONET Service rate elements are arranged in price bands. The price band for each serving wire center and the type of Special Access Services which are subject to price band rating are specified in Section 15.3 following. (C)  
(C)

When a customer's designated premises is served by a serving wire center located in a state other than the state in which the customer's designated premises is located, the nonrecurring charges for Special Access Services for such customer shall be the Special Access Service nonrecurring charges then in effect for the serving wire center from which the customer is served.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

All other service arrangements will be charged for as follows:

- If the changes involves the addition of, or rearrangement to, one or more channel terminations to an existing multipoint service, the appropriate nonrecurring charge(s) will apply as set forth in (1) preceding. The charge(s) will apply only for the channel termination(s) that is being added or rearranged.
- If the change involves the addition of an optional feature or function or a BSE which has a separate nonrecurring charge, that nonrecurring charge will apply.
- If the change involves changing the type of signaling on a Voice Grade service, a charge equal to the Voice Grade channel termination rate element nonrecurring charge will apply on a first and additional basis. The charge will apply per channel termination affected.
- If the change involves the rearrangement of an existing Voice Grade Service or an existing multiplexed Voice Grade Service (e.g., Voice Grade Service multiplexed to Telegraph Grade Service) to a High Capacity Service, a Voice Grade to DS1 Rearrangement Charge will apply. The Voice Grade to DS1 Rearrangement Charge, as set forth in 30.7.3(E) following will apply to each Voice Grade Service rearranged. (C)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

- If the change involves the rearrangement of an existing Voice Grade Service derived from a High Capacity Service to a different High Capacity Service, a Voice Grade to DS1 Rearrangement Charge will apply. The charge applies only when both High Capacity Services involved are between the same customer premises and Telephone Company Hub where the multiplexing function is performed. The Voice Grade to DS1 Rearrangement Charge, as set forth in 30.7.3(E) following for price band charges will apply to each Voice Grade Service rearranged. (C)  
(C)
- If the change involves the rearrangement of an existing DIGIROUTE<sup>SM</sup> digital service II special access service to a High Capacity Service, a DDS II to DS1 Rearrangement Charge will apply. The DDS II to DS1 Rearrangement Charge, as set forth in 30.7.12(E) following will apply to each DIGIROUTE<sup>SM</sup> digital service II rearranged. (C)  
(C)
- If the change involves the rearrangement of an existing DIGIROUTE<sup>SM</sup> digital service II special access service derived from a High Capacity Service to a different High Capacity Service, a DDS II to DS1 Rearrangement Charge will apply. The charge applies only when both High Capacity Services involved are between the same customer premises and Telephone Company Hub where the multiplexing function is performed. The DDS II to DS1 Rearrangement Charge, as set forth in 30.7.12(E) following will apply to each DIGIROUTE<sup>SM</sup> digital service II rearranged. (C)

(TR 65)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

- If the change involves the rearrangement of an existing High Capacity Service or an existing multiplexed High Capacity Service into a greater bit rate High Capacity Service, into an optical fiber interface arrangement, into a FairPoint Enterprise SONET Private Network Service or into Switched Access Service Interface Group 9, a Digital to Digital Rearrangement Charge as set forth in 30.7.9(D) following charges will apply for each service reconfigured. No charge applies to the multiplexed services on the existing High Capacity Service unless the customer changes service types, in which case the appropriate nonrecurring charge for each change will apply. (C)
- If the change involves the rearrangement of an existing Telephone Company provided High Capacity Service or an existing Telephone Company provided multiplexed High Capacity Service into a Telephone Company provided High Capacity under an Expanded Interconnection Arrangement, or from one Telephone Company provided Expanded Interconnection Arrangement to another within the same Telephone Company serving wire center, an Interconnection Rearrangement Charge as set forth in 30.7.9(D)(3)(a) following will apply for each service reconfigured. (C)

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

- If the change involves the rearrangement of a Telephone Company provided High Capacity provided under an Expanded Interconnection Arrangement to a Telephone Company provided High Capacity or multiplexed High Capacity Service, an Interconnection Rearrangement Charge as set forth in 30.7.9 following will apply for each service reconfigured. (C)
- If the change involves the rearrangement of an IntelliBeam Broadband Transport (IBT) service that is terminated with a 2-fiber interface into an IBT service that is terminated with a 4-fiber interface or vice versa, a Fiber Interface Rearrangement Charge as set forth in Section 30.26.5 following applies. (C)
- If the change involves the rearrangement of the manner a multiplexing node of IBT service is configured which involves a DS1 Port and/or a DS3/STS1 Port, a Multiplexing Node Mapping Rearrangement Charge as set forth in Section 30.26.5 following applies. An example of a change in service configuration on an IBT OC3 node would be a change in the mapping of an existing channel(s) on that node. For instance, if the existing channel on the IBT OC3 node is an STS1 that is DS3 mapped, the node could be rearranged such that the mapping for that STS1 is changed to 28 DS1s that are Virtual Tributary mapped (VT-1.5). In this case a Multiplexing Node Mapping Rearrangement Charge as set forth in Section 30.26.5 following applies. Service configuration options for IBT channels are delineated in Section 26.1.5(A) following. The Multiplexing Node Mapping Rearrangement Charge applies for each multiplexing node of the IBT service configured and not on a per channel basis within the IBT service. (C)
- For all other changes, including the addition of optional features or BSEs without separate nonrecurring charges, a charge equal to a channel termination rate element nonrecurring charge. Only one such charge will apply per service, per change.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs\* (Cont'd)

The Telephone Company will work cooperatively with the customer in determining the routing required for Video, Advanced Video and Program Audio services. A customer can order full-time and/or part-time service(s) between customer designated premises or between customer designated premises and a Hub and will be billed accordingly at the rates set forth in 30.7.4 or 30.7.5 following for the full-time or part-time service, as appropriate. (C)

At the request of a customer, compatible full-time and/or part-time services provided to a Hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Other Labor as set forth in 31.13 following. The rates that apply for the service between each customer-designated premises and the Hub are a Channel Termination and Channel Mileage, if applicable, and any associated optional features and functions or BSEs.

7.4.8 Shared Use Digital High Capacity Services

Shared use occurs when Special Access Service and Switched Access Service including CCSA are provided over the same High Capacity facilities through a common interface. The regulations governing Shared Use Arrangements are set forth in Section 5.2.7 preceding.

\* Includes connection to or between locations where IntelliBeam Broadband Transport (IBT) multiplexing capability occurs as described in Section 26.1.5(B)(3) following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.9 Service-Specific Rate Regulations (Cont'd)(B) Fiber Based Multichannel Video Service (MVS) and Advanced Uncompressed Digital Video Service (AUDVS)

Standard rates and charges apply to MVS and AUDVS as specified in 30.7.5 and 30.7.15 following., respectively, for price band rates and charges and 31.7.5 following for all other rates and charges. (C)

(1) Channel Termination Monthly Rates

For Transmit and Receive channel terminations provided on a first and additional basis, the First channel termination monthly rate applies to the first video signal of each channel installed at a customer designated premises. An Additional channel termination monthly rate applies for each additional video signal added to the same channel at the same customer designated premises. The customer may disconnect the Additional channel terminations in any order desired. However, the First channel termination monthly rate remains in effect until all video signals on the channel are disconnected.

For the AUDVS Dual Transmit channel termination, the monthly rate applies per point of termination, regardless of the number of video signals provided over

(2) Channel Mileage Measurement

Channel Mileage monthly rates consist of a Fixed and Per Mile rate which apply to each channel regardless of the number the Channel Terminations provided over the channel. Channel Mileage measurement is as specified in 7.4.6 preceding.

(TR 65)

Issued: November 16, 2017

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.9 Service-Specific Rate Regulations (Cont'd)(C) Channel Extension Service

Rates and charges apply for Channel Extension Service as specified in Section 30.7.17 following. Unique rate elements will apply depending on the backbone architecture in use by the customer. Such charges are shown as a 3-year rate or a 5-year rate and apply on a monthly basis during the term selected by the customer. Channel termination, channel mileage, redundant path switching and repeater rates and charges apply as set forth in (1) through (4) following. When service is disconnected in whole or in part prior to completion of the 3-year or 5-year term plan, as applicable, early termination charges apply as set forth in Section 7.4.1(D) preceding. (C)

(1) Channel Termination Monthly Rates and Nonrecurring Charges

The First Channel Termination Monthly Rate and Nonrecurring Charge applies to the first channel termination installed at a customer designated premises. When more than one Channel Extension Service channel terminations using the same backbone architecture are provided to a customer designated premises at which a First Channel Termination has already been provided, the Additional Channel Termination Monthly Rate and Nonrecurring Charge applies to each additional channel termination provided to that same customer designated premises. The Additional Channel Termination Monthly Rate and Nonrecurring Charge applies whether or not the additional service(s) are ordered at the same time, are on the same or different Access Order or are scheduled for the same or different due dates.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.10 Service Discount Plan (Cont'd)(B) Description

A Service Discount Plan applies to:

- Special Access Service Standard Channel Terminations, Channel Mileage and applicable Optional Features and Functions or BSEs monthly or base rates, as set forth in 30.7 following for price band rates and 31.7 following for all other rates;
- FairPoint Enterprise Network Reconfiguration Service Network Access Ports monthly rates as set forth in 30.19 following for price band rates and 31.19 following for all other rates;
- IntelliBeam Dedicated SONET Ring SONET Distribution Channels, Channel Mileage, Nodes and Ports as set forth in 30.26 ; (C)
- FairPoint Enterprise Service Fiber Distributed Data Interface Channel Terminations and Channel Mileage as set forth in 30.23 following for price band rates and 31.23 following for all other rates;
- and to Enterprise SONET Service Ring Transport Services as set forth in Section 30.26 following. (C)

For services provided with Rate Stability as set forth in (G) following, a fixed discount percentage is applied to the Rate Stability Base Rates specified in Section 30.7 following for price band rates and 31.7 following for all other rates.

For services provided with Base Rates (without rate stability), a discount percentage is applied to the Base Rates specified in Section 30.7 following for price band rates and 31.7 following for all other rates.

For all other services, the month-to-month rates for such services are reduced by a fixed percentage.

The amount of the discount percentage differs based on the length of the commitment period selected by the customer and the type of service. The customer must specify the number of months selected as the commitment period for its Service Discount Plan. For existing Service Discount Plans with commitment periods of 2, 3, 4, 5, 7 or 10 years, the commitment period will be converted to a commitment period of 24, 36, 48, 60, 84, or 120 months, respectively.

Effective: December 1, 2017

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.11 Shared Billing Arrangement (Cont'd)

For administrative purposes, one "Arrangement" under the High Capacity, IDSR, DSR, or IntelliBeam Broadband Transport Shared Billing Arrangement option shall be limited to one Host Customer permitting one Service User to connect a specified number of services to one specified multiplexer on the Host Customer's service. A subsequent request by the Service User to increase the number of services connected to the same multiplexer shall not constitute a new or separate "Agreement".

A Shared Billing Arrangement shall be established between a Host Customer and a Service User upon the completion of the service order for the first circuit(s) in the Arrangement. A Shared Billing Arrangement shall be deemed cancelled when the last circuit in the Arrangement belonging to the Service User has been disconnected.

A Processing Charge will apply for each Service User DS1, DS3 or STS-1 order processed for a Shared Billing Arrangement. The High Capacity, IDSR, and DSR Shared Billing Arrangement Processing Charge is contained in Section 30.7.9 following and the FairPoint Enterprise Service Shared Billing Arrangement Processing charge is contained in Section 30.7.15 following. The order processing charge does not apply when a Service User's IBT Service is connected to a Host Customer's IBT, IDSR, or DSR or between two separate Host Customer's IDSR or DSR rings. A Processing Charge does not apply for Service User Integrated Optical Service Rider order(s) processed for a Shared Billing Arrangement. The order processing charge applies in addition to all other applicable rates and charges for the Service User's service(s).

## ACCESS SERVICE

Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)

## 7.4.12 Application of Competitive and Non-Competitive Rates

## (A) Transport, Optional Features and Functions, Non-End User Channel Terminations

The FCC has deemed all Special Access transport rate elements, non-end user channel terminations, end user channel terminations for services with a bandwidth greater than a DS3, and packet-based end user channel terminations to be eligible for relief from price cap regulation. Relief from price cap regulation also applies to multiplexing, certain optional features and functions and the non-recurring charges that are not associated with end-user channel terminations. These rate elements are set forth in Section 30 following, and are distinguished by Price Band as described below:

Price Band 5 contains certain Special Access rate elements described above for circuits located in a wire center not granted Phase II Pricing Flexibility by June 1, 2017

Price Band 6 contains certain Special Access rate elements described above for circuits in a wire center granted Phase II pricing flexibility prior to June 1, 2017.

In any instance where Channel Mileage crosses wire centers located in different Price Bands, the charge for the higher numbered Price Band in Section 30 following applies.

For the avoidance of doubt, in accordance with Section 2.4.7 of this Tariff, only Telephone Company wire centers in the operating territory of this Tariff will be considered to determine the Price Band of the applicable channel mileage rate elements. If one wire center is in the operating territory of this Tariff and the other wire center is not, the rates and charges applicable to the channel mileage rate element will be determined by the Price Band that applies to the wire center that is in the Telephone Company's operating territory.

A listing of all wire centers in the Telephone Company's operating territory and the applicable Price Bands for Special Access rate elements is provided in Section 15.3.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)

## 7.4.12 Application of Competitive and Non-Competitive Rates (Cont'd.)

## (B) End-User Channel Terminations

The application of rates to End User Channel Terminations for non-packet based Special Access Services with a bandwidth equal to or less than a DS3 is dependent upon whether the serving wire center (SWC) is located in a Competitive County or a Non-Competitive County. If the SWC associated with the End User Channel Termination is located in a Competitive County, Price Band 5 rates and charges in Section 30 following apply. If the End User Channel Termination is served by a serving wire center in a Non-Competitive County, non-competitive rates and charges in Section 31 apply.

When service is provided under a Service Discount Plan as set forth in Sections 7.4.10 preceding or a Commitment Discount Plan as set forth in Section 25 following, the discount percentage shall be applied to the rate in the applicable Price Band. When service is provided as part of a Shared Use Arrangement, rates set forth in Section 30 may apply to both the switched access and the special access portions of the facility.

Section 15.3 following designates, for each wire center, the applicable tariff section and Price Band for Special Access rate elements.

## ACCESS SERVICE

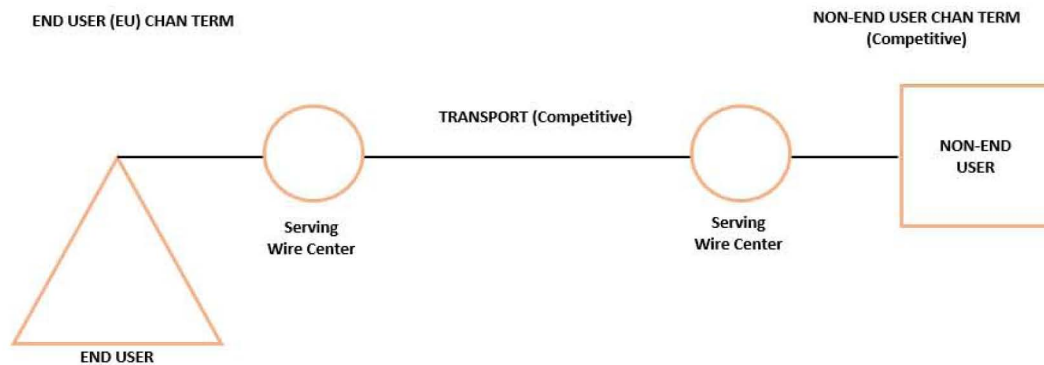

## 7. Special Access Service (Cont'd)

## 7.4 Rate Regulations (Cont'd)

## 7.4.12 Application of Competitive and Non-Competitive Rates (Cont'd)

Examples of competitive and non-competitive rate applications for non-packet based circuits that have a bandwidth of a DS3 or less are illustrated in the following diagrams:

Example 1:

**Non-End User to End User Circuit Design**

Section 30 rates apply to the non-end user Channel Termination (Chan Term). Price Bands will be dependent on whether Phase II pricing flexibility was granted prior to June 1, 2017. End User Channel Termination rates depend on the location of the end user serving wire center (SWC). If SWC is located in a Non-Competitive County, the end-user Chan Term rates will be located in Section 31. Otherwise, Section 30 Price Band 5 rates will apply to the end-user Chan Term.

## ACCESS SERVICE

14. Communications Services14.1 General14.1.1 Undertaking of Carrier

- (A) Service is furnished for interstate communications originating or terminating at specified points within Company's operating territory as defined in Section 14.4.1. (T)
- (B) Company shall provide service in accordance with the terms and conditions set forth in this Section.
- (C) Company may, when authorized by Customer and agreed to by Company, act as Customer's agent for ordering facilities provided by other carriers to allow connection of Customer's locations to Company's network or to the network of an underlying carrier or service.
- (D) Company will pass on and bill to Customer any charges it incurs (including applicable recurring and nonrecurring charges and any time and material charges) from other service providers, such as ILECS and CLECS, necessary to complete provision of a service offered in this Tariff to Customer's designated premises.
- (E) Service is provided on a monthly basis unless ordered on a longer term basis, and is available 24 hours per day, seven days per week.
- (F) Purchases of the same service from the FairPoint Telephone Companies shall be included toward Customer's total volume commitments for the service.

14.1.2 Limitations on Service

- (A) Service is offered subject to the availability of the necessary facilities and equipment and subject to the provisions of this Tariff.
- (B) Company reserves the right to discontinue furnishing service, or to limit the use of service, when necessitated by conditions beyond its control, when Customer is using service in violation of the law or in violation of the provisions of this Tariff, or for nonpayment by Customer.

## ACCESS SERVICE

15. Metropolitan Statistical Areas and Competitive Areas of the FairPoint Telephone Companies (C)15.2 Metropolitan Statistical Areas of the FairPoint Telephone Companies

## (A) General

Wire centers within the Telephone Company' operating territories have been arranged in Metropolitan Statistical Areas (MSAs). Those wire centers designated as a MSA achieved various phases of pricing relief pursuant to Subpart H of the Commission's Part 69 Rules. Switched Access Service provided from a qualifying MSA is subject to the rates and charges set forth in Sections 30 and 31 as determined by the level of pricing relief described in (1) and (2) following.

(C)  
—  
(C)

## (1) Switched Access Level 1 MSA Pricing

(C)

MSAs assigned to Level 1 pricing are those MSA which have achieved Phase II pricing relief for all rate elements associated with the portion of the transmission path connecting an Interexchange Carrier's Point of Presence to the wire center serving the secondary location involved (i.e., End User's designated premises). The rate elements associated with the transmission path are those rate elements applicable for the type of service involved, whether configured on a point-to-point basis or in a ring architecture. For example, a High Capacity 1.544 Mbps Service as set forth in Section 7.2.9 preceding is comprised of channel termination, channel mileage and optional features and functions or BSE rate elements. An OC12 DSR ring as set forth in Section 34.1 following is comprised of nodes, channel mileage and port rate elements.

15.2 Metropolitan Statistical Areas of the FairPoint Telephone Companies (Cont'd)

(A) General (Cont'd)

(1) Switched Access Level 1 MSA Pricing (Cont'd) (C)

Rates and charges for Switched Access Service rate elements subject to Level 1 pricing are set forth in Section 30. following. Rates and charges for the rate elements associated with connecting the secondary location (i.e., End User's designated premises) to its serving wire center are shown in Section 31. following. (C)  
(C)

(2) Switched Access Level 2 MSA Pricing (C)

MSAs assigned to Level 2 pricing are those MSAs which have achieved Phase II pricing relief for all Switched Access Service rate elements associated with the end-to-end transmission path connecting the Interexchange Carrier's Point of Presence to the secondary location involved. The rate elements associated with the transmission path are those rate elements applicable for the type of service involved, whether configured on a point-to-point basis or in a ring architecture. (C)

Rates and charges for rate elements subject to Level 2 pricing are set forth in Section 30. following. (C)

## 15.3 Competitive Areas for Special Access Services

The FCC has deemed all Special Access transport rate elements, non-end user channel terminations, end user channel terminations for services with a bandwidth greater than a DS3, and packet based end user channel terminations to be eligible for relief from price cap regulation. Relief from price cap regulation also applies to multiplexing, certain optional features and functions and the non-recurring charges that are not associated with end-user channel terminations. These rate elements are set forth in Section 30 following, and are distinguished by Price Band as described in Section 7.4.12.

Certain rate elements in the following Special Access services are subject to relief from price cap regulation, as described in Section 7.4.12:

- Bonded Digital Link Service
- Channel Extension Service
- DIGIROUTESM Digital Service II
- Digital Data Service
- DOVROUTESM Service
- Enterprise SONET Service
- Facilities Management Service
- High Capacity DS1 and DS3
- IntelliBeam Broadband Transport (IBT)
- IntelliBeam Dedicated SONET Ring (IDSR)
- IntelliBeam Entrance Facility
- IntelliBeam Optical Transport Service (IOTS)
- IntelliBeam Shared Assurance Network
- IntelliBeam Shared Single Path - Internet Protocol Routing Service (IPRS)
- LAN Extension Service
- Metallic
- Non-Standard Premises Connection Charge
- FairPoint Enterprise FDDI Service
- FairPoint Enterprise Network Reconfiguration Service
- Program Audio Service
- Telegraph Service
- Dedicated SONET Ring (DSR)
- Optical Network
- Video and Advanced Video Services
- Voice Grade Service
- WATS Access Line
- Exchange Access Switched Multi-Megabit Data Service
- Exchange Access Frame Relay Service
- Exchange Access Asynchronous Transfer Mode Cell Relay Service
- ATM Cell Relay Service
- TransConnect LAN Service
- Internet Protocol
- Virtual Private Network Service

Effective: December 1, 2017

## ACCESS SERVICE

15. Metropolitan Statistical Areas and Competitive Areas of the FairPoint Telephone Companies (Cont'd)

## 15.3 Competitive Areas for Special Access Services

The table below identifies competitive and non-competitive areas for Special Access rate elements by location. For each serving wire center (designated by CLLI code), the table indicates:

- For transport and non-end user channel termination rate elements:
  - (1) whether the wire center was subject to Phase II pricing relief prior to June 1, 2017. Wire centers that were granted such relief are designated in the table as "MSA" and those that were not as "Non-MSA."
  - (2) the applicable tariff section and Price Band. All transport and non-end user channel termination rate elements are subject to competitive pricing as set forth in Section 30 following, and may be either in Price Band 5 or 6, as described in Section 7.4.12 preceding.
- For end user channel termination rate elements:
  - (1) whether the wire center is in a Competitive or a Non-Competitive county;
  - (2) the applicable tariff section and Price Band.

## ACCESS SERVICE

30. The FairPoint Telephone Companies Price Band Rates and Charges (Cont'd)30.7 Special Access Service (Cont'd)30.7.8 Digital Data Service (Cont'd)Maine, New Hampshire, and Vermont (Cont'd)

## (C) Optional Features and Functions/Basic Service Elements

## (1) Bridging BSE, per port

	<u>USOC</u>	<u>Monthly Rates</u>	<u>Nonrecurring Charges</u>	(D)
Price Band 5	BCNDA	\$23.96 (C)	None	
Price Band 6	BCNDA	29.89	None	
(2) Transfer Arrangement BSE (Key activated* or Dial-up**), per four port arrangement***	XTD	ICB	ICB	

\* The key activated control channel is rated as a Metallic Channel Termination (use USOC T6EME in lieu of T6ECS) and Channel Mileage, if applicable (use USOC 1L5MX in lieu of 1L5XX).

\*\* The Dial-up option requires the customer to order the Controller Arrangement (USOC XTDDU) from 13.3.8 preceding.

\*\*\* An additional Channel Termination charge will also apply whenever a spare channel is configured as a channel termination to the customer designated premises. Additional Channel Mileage charges will also apply when the transfer arrangement is not located in the customer designated premises serving wire center.

## ACCESS SERVICE

30. The FairPoint Telephone Companies Price Band Rates and Charges (Cont'd)30.17 Packet Switching Access Service

(M)

30.17.1 DATAFLASH<sup>SM</sup> \* Packet Switching Service – Synchronous#

Rates and charges as specified in 30.7 of this tariff apply, as appropriate, for each channel connected to an access concentrator or packet switch. The technical specifications are defined under optional features in Section 7. for channels provided to the port connections.

(T)

In addition to the charges specified following, the general regulations and charges specified in other sections of this tariff apply, as appropriate.

(A) Access Concentrator Port Connections (Low to Medium Throughput)

Rates and charges include central office equipment at the Access Concentrator, one logical channel and one network address. A Voice Grade or DIGIROUTE<sup>SM</sup> digital service II (DDS II) Channel as specified in Section 7. between the customer premises and the Access Concentrator and a Central Office Interface as specified in (2) following.

(1) X.25 and X.75 Port - Maine, New Hampshire, and Vermont  
Per port connected for transmission speeds of:

<u>Price Bands 5 &amp; 6</u>	<u>USOC</u>	<u>Nonrecurring Charges</u>	<u>Monthly Rates</u>
- 1.2 kbps	LDZ12	\$55.00	\$34.00
- 2.4 kbps	LDZ24	55.00	34.00
- 4.8 kbps	LDZ48	55.00	34.00
- 9.6 kbps	LDZ96	55.00	34.00

(2) Central Office Interfaces(a) Voice Grade Interfaces,  
each, for speeds of:

<u>Price Bands 5 &amp; 6</u>	<u>USOC</u>	<u>Nonrecurring Charges</u>	<u>Monthly Rates</u>
- 1.2 kbps	MOD1X	\$30.00	\$45.00
- 2.4 kbps	MOD2X	30.00	60.00
- 4.8 kbps	MOD4X	30.00	75.00
- 9.6 kbps	MOD9X	30.00	95.00

(b) DIGIROUTE<sup>SM</sup> digital service  
II (DDS II) Interface,  
each, for speeds up to:

<u>Price Bands 5 &amp; 6</u>	<u>USOC</u>	<u>Nonrecurring Charges</u>	<u>Monthly Rates</u>
- 9.6 kbps	LLN9E	33.74	25.00

(B) Interface Option Change Charge

A nonrecurring charge applies as specified in 30.17.1(F) following to change the type of Central Office Interface subsequent to the initial installation of the service.
