87-2 U.S. Sprint

Consolidate the former GTE Sprint's and US Telcom's FGD presubscribed end user traffic and billing. The consolidation of traffic will occur at each tandem office to which U.S. Sprint has ordered FGD as well as at end offices where FGD Service is directly routed to the customer's premises. Traffic will be reprogrammed to route Carrier Identification Codes (CICs), presently utilized by the IC, over the same trunk groups, with provisions for traffic overflow patterns in tandem switches that have more than one trunk group.

The billing accounts will be merged to provide a single U.S. Sprint account. Should U.S. Sprint request discontinuance of this combined billing-routing arrangement, a new specialized arrangement and new charges will be developed.

Presubscription ballots and service center listings will be altered to reflect the merger.

Maine, New Hampshire, and Vermont	SP1CC	\$35.33 Per Linear Ft. per cable #
Maine, New Hampshire, and Vermont	SP1CD	0.16

* See Section 28. preceding for application of rates.

** A microwave customer will not be assessed a fixed cable space charge unless the customer's cables and/or waveguide passes through the serving wire center cable vault.

A customer interconnecting its transmission equipment between its multiplexing nodes or virtual collocation arrangements within the same serving wire center, access tandem or remote node will not be assessed a fixed cable space charge.

When determining the linear footage associated with interconnection of an Expanded Interconnection Arrangement and another Interexchange Carrier point of presence already located in the same Telephone Company building as the serving wire center, access tandem or remote node (i.e., a point of presence established under terms other than those specified for Expanded Interconnection), the linear footage to connect such locations will be measured from manhole zero to the multiplexing node or virtual collocation arrangement.
